

Resource	Endpoint	Export	Import
API type: Account			
Account access control	Get assignable roles for a resource	X	
	Get a rule set	X	
	Update a rule set		X
Account federation policies	List account federation policies	X	
	Get account federation policy	X	
	Create account federation policy		X
	Update account federation policy		X
	Delete account federation policy		X
Account groups	List group details	X	
	Get group details	X	
	Create a new group		X
	Replace a group		X
	Update group details		X
	Delete a group		X
Account IP access lists	Get access lists	X	
	Get IP access list	X	
	Create access list		X
	Replace access list		X
	Update IP access list		X
	Delete access list		X
Account metastore assignments	Get all workspaces assigned to a metastore	X	
	Get metastore assignment	X	
	Assign metastore to workspace		X
	Update metastore assignment		X
	Delete metastore assignment		X
Account metastores	Get all metastores associated with an account	X	
	Get a metastore	X	
	Create metastore		X
	Update a metastore		X
	Delete a metastore		X
Account service principals	List service principals	X	
	Get service principal details	X	
	Create service principal		X
	Replace service principal		X
	Update service principal details		X
	Delete service principal		X
Account storage credentials	Get all storage credentials assigned to a metastore	X	
	Get storage credential	X	
	Create a storage credential		X
	Update storage credential		X
	Delete storage credential		X
	Delete storage credential		X
Account users	List users	X	
	Get user details	X	
	Create a new user		X
	Replace a user		X
	Update user details		X
	Delete a user		X
Billable usage download	Return billable usage logs	X	
Budget policy	List budget policies	X	
	Get a budget policy	X	
	Create a budget policy		X
	Update a budget policy		X
	Delete a budget policy		X
Budgets	Get all budgets	X	
	Get budget	X	
	Create new budget		X
	Modify budget		X
	Delete budget		X
Credential configurations	Get all credential configurations	X	
	Get credential configuration	X	
	Create credential configuration		X
	Delete credential configuration		X
Log delivery configurations	Get all log delivery configurations	X	
	Get log delivery configuration	X	
	Create a new log delivery configuration		X
	Enable or disable log delivery configuration		X
	Get all network configurations	X	

Network configurations	Get a network configuration	X	
	Create network configuration		X
	Delete a network configuration		X
Network connectivity	List network connectivity configurations	X	
	Get a network connectivity configuration	X	
	Create network connectivity configuration		X
	Delete network connectivity configuration		X
Network policies	List network policies	X	
	Get a network policy	X	
	Update a network policy		X
	Delete a network policy		X
Service principal federation policies	List service principal federation policies	X	
	Get service principal federation policy	X	
	Create service principal federation policy		X
	Update service principal federation policy		X
	Delete service principal federation policy		X
Service principal secrets	List service principal secrets	X	
	Create service principal secret		X
	Delete service principal secret		X
Storage configurations	Get all storage configurations	X	
	Get storage configuration	X	
	Delete storage configuration		X
Usage dashboards	Get usage dashboard	X	
	Create new usage dashboard		X
VPC endpoint configurations	Get all VPC endpoint configurations	X	
	Get VPC endpoint configuration	X	
	Create VPC endpoint configuration		X
	Delete VPC endpoint configuration		X
Workspace assignment	Get permission assignments	X	
	List workspace permissions	X	
	Create or update permissions assignment		X
	Delete permissions assignment		X
	Delete permissions assignment		X
Workspace network option	Get workspace network option	X	
	Update workspace network option		X
Workspaces	Get all workspaces	X	
	Get a workspace	X	
	Create a new workspace		X
	Update workspace configuration		X
	Delete a workspace		X
API type: Workspace			
Account access control proxy	Get assignable roles for a resource	X	
	Get a rule set	X	
	Update a rule set		X
ACL permissions	Get object ACL	X	
	Set object ACL		X
	Transfer object ownership		X
Alerts	List alerts	X	
	Get an alert	X	
	Create an alert		X
Alerts (v2)	List alerts	X	
	Get an alert	X	
	Create an alert		X
	Update an alert		X
	Delete an alert		X
Apps	List apps	X	
	List app deployments	X	
	Get an app deployment	X	
	Get an app	X	
	Get app permissions	X	
	Get app permission levels	X	
	Create an app		X
	Create an app deployment		X
	Update an app		X
	Delete an app		X
	Start an app		X
	Stop an app		X
	Set app permissions		X
	Update app permissions		X

Artifact allow lists	Get artifact allowlist	X	
	Set an artifact allowlist		X
Assets	List assets	X	
	Get an asset	X	
	Create an asset		X
	Delete an asset		X
	Update an asset		X
Catalogs	List catalogs	X	
	Get a catalog	X	
	Create a catalog		X
	Update a catalog		X
	Delete a catalog		X
Clean rooms	List clean rooms	X	
	Get a clean room	X	
	Create a clean room		X
	Create output catalog		X
	Update a clean room		X
	Delete a clean room		X
Cluster policies	Get cluster policy permissions	X	
	Get cluster policy permission levels	X	
	Get a cluster policy	X	
	List cluster policies	X	
	Set cluster policy permissions		X
	Update cluster policy permissions		X
	Create a new policy		X
	Delete a cluster policy		X
	Update a cluster policy		X
	Get cluster permissions	X	
Clusters	Get cluster permission levels	X	
	List clusters	X	
	List node types	X	
	List availability zones	X	
	List available spark versions	X	
	Set cluster permissions		X
	Update cluster permissions		X
	Change cluster owner		X
	Create new cluster		X
	Terminate cluster		X
	Update cluster configuration		X
	List cluster activity events		X
	Permanently delete cluster		X
	Pin cluster		X
	Resize cluster		X
	Restart cluster		X
	Start terminated cluster		X
	Unpin cluster		X
	Update cluster configuration (partial)		X
Command execution	Get command info	X	
	Get status	X	
	Cancel command		X
	Run a command		X
	Create execution context		X
	Delete execution context		X
Connections	List connections	X	
	Get a connection	X	
	Create a connection		X
	Update a connection		X
	Delete a connection		X
Consumer fulfillments	Get listing content metadata	X	
	List all listing fulfillments	X	
Consumer installations	List all installations	X	
	List installations for a listing	X	
	Install from a listing		X
	Update an installation		X
	Uninstall from a listing		X
Consumer listings	List listings	X	
	Get listing	X	
	Get batch listings	X	
	Search listings	X	
	Get personalization request for a listing	X	

Consumer personalization requests	List all personalization requests	X	
	Create personalization request		X
Consumer providers	List providers	X	
	Get a provider	X	
	Get batch of providers	X	
Credentials	List credentials	X	
	Get a credential	X	
	Create credential		X
	Update a credential		X
	Delete a credential		X
	Generate temporary service credential		X
Current user	Validate credential		X
DBFS	Get current user info	X	
	Get file or directory status	X	
	List DBFS directory contents	X	
	Get the contents of a file	X	
	Append data block		X
	Close stream		X
	Open a stream		X
	Delete a file/directory		X
	Create a directory		X
	Move a file		X
Endpoints	Upload a file		X
	List all vector search endpoints	X	
	Get vector search endpoint	X	
	Create endpoint		X
	Delete vector search endpoint		X
Experiments	Update budget policy		X
	List artifacts	X	
	Get an experiment	X	
	Get experiment by name	X	
	List experiments	X	
	Get metric history for a run	X	
	Get a run	X	
	Get experiment permissions	X	
	Get experiment permission levels	X	
	Delete runs by creation time		X
	Restore runs by deletion time		X
	Create experiment		X
	Delete an experiment		X
	Restore an experiment		X
	Search experiments	X	
	Set a tag for an experiment		X
	Update an experiment		X
	Create a run		X
	Delete a run		X
	Delete a tag on a run		X
	Log a batch of metrics/params/tags for a run		X
	Log inputs to a run		X
	Log a metric for a run		X
	Log a model		X
	Log a param for a run		X
	Restore a run		X
	Search for runs	X	
	Set a tag for a run		X
	Update a run		X
	Set experiment permissions		X
	Update experiment permissions		X
External locations	List external locations	X	
	Get an external location	X	
	Create external location		X
	Update an external location		X
	Delete an external location		X
Files	List directory contents	X	
	Download a file	X	
	Create a directory		X
