

Available Docebo APIs

Resource	API endpoint	Export	Import
Analytics: Dashboard	List of enrollments for current branch and children	X	
	Download users as CSV	X	
	Detail information for the children of the current branch	X	
	Summary of the current branch	X	
	Get course enrollment statistics to be used in charts	X	
	Get enrollment report for a given course or all course	X	
	Download course dashboard as CSV	X	
	Get course enrollment summary statistics	X	
	Download privacy policies as CSV	X	
	Report data for privacy policy	X	
Analytics: Manager	Get data lake status: Manager section	X	
	Get report manager extraction in CSV format	X	
	Get report manager results paginated	X	
	Get report manager extraction status	X	
	Get report manager extraction in XLSX format	X	
	Create a manager report		X
Analytics: Query builder	Get query builder v2 details	X	
	Delete query builder v2		X
	Add a user from the user list able to see the query builder section		X
	Remove a user from the user list able to see the query builder section		X
	Get query builder v2 available in the platform	X	
	Get the preview of a query builder v2	X	
	Get query builder v2 list	X	
	Create query builder v2		X
	Get the username list of the users able to see the query builder v2 section	X	
	Create query builder v2 preview		X
Analytics: Report	Edit query builder v2		X
	Get report info	X	
	Update report		X
	Delete a report		X
	Patch update report		X
	Get information about last refresh	X	
	Report export polling	X	
	Get refresh token	X	
	Get available fields	X	
	Get refresh status	X	
	Export report as CSV	X	
	Get exported report file stream	X	
	Get report results paginated	X	
	Run export scheduling	X	
	Export report as XLSX	X	
	Get export procedure status	X	
	Get report preview	X	
	Generate a temporary preview		X
	Get new reports available in the platform	X	
	Create report		X
	Put AAMON settings		X
	Start data lake refresh v2 on demand		X
	Migrate legacy report		X
Start refresh on demand		X	
Clone a report		X	
Delete reports		X	
Audiences: Audience	Return list of mappable fields for the data importer	X	
	Get all audiences	X	
	Create audience		X
	Get an audience	X	
	Update an audience		X
	Delete an audience		X
	Get users from audience	X	
	Add user to audience		X
	Delete users from audience		X
	Assign manual users to audience		X
	Assign manual users to audience		X
	Export users belonging to audience	X	
	Get a group ID from an audience ID	X	
	Get an audience ID from group ID	X	
Change the audience active status		X	
Audit trail: Audit trail	Get audit trail logs	X	
	Create an audit trail query		X
	Get event types	X	
	Get old audit trail events	X	
	Download action audit trail logs	X	
Audit trail: Logs	Get audit trail log records	X	
	Get paginated list of catalogs	X	
	Insert a new catalog		X
	Delete multiple catalogs		X
	Get a catalog	X	
	Update a catalog		X
	Delete a catalog		X
	Get paginated list of catalog branches	X	
	Assign branches to a catalog		X
	Unassign branches from catalogs		X
	Get a list of catalog branches	X	

Available Docebo APIs

Resource	API endpoint	Export	Import
	Get paginated list of catalog courses	X	
	Assign courses to a catalog		X
	Unassign courses from catalogs		X
	Retrieve a list of paginated courses that are assignable to a catalog	X	
	Duplicate a catalog		X
	Get paginated list of catalog groups	X	
	Assign groups to a catalog		X
	Unassign groups from a catalog		X
	Get paginated list of groups that are assignable to a catalog	X	
	Get paginated list of catalog learning plans	X	
	Assign learning plans to a catalog		X
	Unassign learning plans from catalogs		X
	Retrieve a list of paginated learning plans that are assignable to a catalog	X	
	Get paginated list of catalog subscriptions	X	
	Get paginated list of catalog users	X	
	Assign users to a catalog		X
	Unassign users to a catalog		X
	Retrieve a list of paginated users that are assignable to a catalog	X	
	Get a virtual catalog	X	
	Get paginated list of virtual catalog branches	X	
	Assign branches to a virtual catalog		X
	Unassign branches from a virtual catalog		X
	Get a list of virtual catalog branches	X	
	Get paginated list of virtual catalog groups	X	
	Assign groups to a virtual catalog		X
	Unassign groups from a virtual catalog		X
	Retrieve a list of paginated groups that are assignable to a virtual catalog	X	
	Get paginated list of virtual catalog users	X	
	Assign users to a virtual catalog		X
	Unassign users to a virtual catalog		X
Catalog management: Catalogues	Retrieve a list of paginated users that are assignable to a virtual catalog	X	
Certification: Certification	List the certifications awarded to a particular user	X	
	Create a new course category		X
	Get category details	X	
	Update a category attributes		X
Course: Categories	Delete a category		X
Course: Classrooms	Check classroom availability given a time frame		X
Course: Course archived	Delete a specific archived course		X
	Batch course update		X
	Batch course delete		X
	Return courses available in the platform	X	
	View a course info	X	
	Update course general details		X
	Get a list of course seats	X	
	Update seats of a power user who manages a course		X
	Assign extra seats to a power user who manages a course		X
	Get list of users that could be enrolled in a given course	X	
	Sign to a course		X
	Duplicate e-learning course		X
	Return catalogs related to the given course	X	
	Return learning plans related to the given course	X	
	Remove learning plan from a course		X
	Assign learning plan from a course		X
	Return all the learning plans associated or associable to a specific course	X	
	Return channels associated to the given course	X	
	Remove association between course and channel		X
	Assign channels to a course		X
	Return all the channels associated or associable to a specific course	X	
	Return enrollments associated to the given course	X	
	Batch update course's status		X
	Batch update course's thumbnail		X
	Return sessions associated to the given course	X	
	Create a session in a course		X
	Retrieve courses enrollments	X	
	Store courses additional fields values		X
	Get all assignment training materials for a given course	X	
	Get assignment files links by training material	X	
	Update one or more training materials in the given course		X
Course: Courses	Retrieve all the attempts made on a given test	X	
	Get an event	X	
	Edit an event		X
	Delete an event		X
	Return the attendance of a given event	X	
	Edit an attendance		X
	Duplicate an event		X
	Sync an event		X
	Check the status of a recording for an event	X	
	Submit a recording for an event		X
	Delete a recording for an event		X
	Get the recording of an event	X	
Course: Events	Joining or starting a webinar event	X	
	Check instructor availability given a session and a time frame		X
	Assign instructors to sessions or events		X

Available Docebo APIs

Resource	API endpoint	Export	Import
Course: Instructors	Return list of mappable fields for the data importer	X	
	Return the instructors info related to sessions and/or events	X	
	Email relevant instructors about the given course sessions or events		X
	Delete instructors from session/event		X
Course: Sessions	Get a session	X	
	Edit a session		X
	Delete a session		X
	Return events list for the session	X	
	Create a new event in the session		X
	Return enrollments associated to the given session	X	
	Evaluate a session		X
	Duplicate a session		X
	Return list of mappable fields for the data importer	X	
	Batch import of ILT sessions		X
Course: Thumbnails	Return ILT sessions	X	
	View a course thumbnail	X	
	Update thumbnail information		X
	Delete a thumbnail		X
Ecommerce: Billing	Return courses thumbnails	X	
	Clone thumbnail and assigned it to a multidomain client		X
Ecommerce: Cart	View a thumbnail usage in courses and learning plans	X	
	Delete all billing data for the given user		X
	Cancel current transaction without redirection		X
	Free checkout action when total sum of the cart items is 0		X
	Cancel current transaction		X
	Handle ecommerce transaction failure		X
	Delete and unsubscribe user from current transaction item		X
	Validate passed coupon		X
	Lock coupon for 24 hours		X
	Unlock coupon action		X
Ecommerce: Coupon	Get all coupons	X	
	Create a new coupon with param code description		X
	Get single coupon	X	
	Update properties of coupon		X
	Get all users who used the coupon	X	
	Get all courses of the coupon	X	
	Update courses of the coupon		X
	Get random code	X	
	Delete batch coupons		X
	Export list of coupons	X	
Ecommerce: Payment	Retrieve all enabled payment method in the current LMS	X	
	Payment gateway settings	X	
Ecommerce: Stripe	Read some specific settings of stripe from the server database	X	
	Get all transactions	X	
	Get info for desired transaction	X	
	Get all transactions (new API)	X	
	Export list of transactions (new API)	X	
	Update fields for a transaction		X
	Update payment status for an item in a transaction		X
	Massive mark transactions as canceled		X
	Massive update payment status for items in a transaction		X
	Enrollment: Courses archive	Return the settings of wiretransfer	X
Archive a single course enrollment			X
Return a single archived enrollment		X	
Return sessions list of an archived course enrollment		X	
Enrollment: Users archive	Return archived session's events	X	
	Return the archived enrollments of a specific course	X	
	Batch course enrollments archiving via background job		X
	Bulk delete archived course enrollments		X
Learn: Assignment	Return archived enrollments of a user	X	
	Check if a specific screen-recording video uploaded as assignment learning object exists	X	
Learn: Catalog content	Handle elastic transcoder generated/initiated callbacks		X
	Retrieve content of the given catalog	X	
	Retrieve some content for all the given catalogs	X	
	Retrieve content of all the given catalogs	X	
	Retrieve all the visible content of the general catalog	X	
	Retrieve all the visible content of given catalogs for the calendar widget	X	
	Retrieve content of the given catalog	X	
	Retrieve some content for all the given catalogs	X	
	Retrieve content of all the given catalogs	X	
	Retrieve all the visible general catalog content for the current user	X	
Retrieve content of the calendar of courses in public general catalog	X		
Learn: Catalog content	Retrieve all the visible content of given catalogs for the calendar widget	X	
	Retrieve content of the calendar of courses in internal general catalog for the logged user	X	
	Batch import catalogue items		X
	Retrieve all catalog filter options	X	
	Retrieve all catalog filter options	X	
	Retrieve webpages to be displayed as public catalog pages	X	
	Batch import catalogs		X
	Batch import catalogue visibility		X
Remove course form a catalog		X	
Learn: Catalog content	Import courses (and courses only) into a catalog		X
	Batch add courses in catalogs		X

Available Docebo APIs

Resource	API endpoint	Export	Import	
Learn: Catalogue	Retrieve all advanced filter options by catalog ID	X		
	Retrieve all categories	X		
Learn: Categories	Retrieve all child categories by ID of parent category	X		
	Return all certifications	X		
Learn: Certifications	Batch import of user certifications		X	
	Return list of mappable fields for the data importer	X		
Learn: Channel dashboard	View channel assets	X		
	List of channels assets	X		
	Unfollow a list of channel IDs		X	
	The logged user can follow a list of channels		X	
	Update notification of a followed channel		X	
	View channel experts	X		
	Retrieve the number of pending content based on the user's visibility	X		
	Retrieve the number of content completed by the user	X		
	Retrieve the time spent in courses	X		
	Show the latest twenty skill updates for the user	X		
	Retrieve a list of assets that can be suggested by the manager	X		
	Batch import of ILT sessions and dates		X	
	Return list of mappable fields for the data importer	X		
	Get the list of classrooms	X		
Learn: Classroom	Create a new classroom		X	
	Delete a classroom		X	
	Views a classroom	X		
	Update an existing classroom		X	
	View a course	X		
	Get all learning objects by ID of course	X		
	Get enrollment report for a given course	X		
	Create a new course		X	
	Update specific course		X	
	Batch import courses		X	
	Return all courses	X		
	Delete a specific learning course by given ID		X	
	Share a course using a signed link via deeplink		X	
	Enroll to a session via its deeplink if enabled		X	
Learn: Course	Get all sessions that the user is enrolled in or all available if not enrolled by ID of course	X		
	View course rating	X		
	Insert course rating		X	
	Get all the widgets that have been set for the specific course	X		
	Get discussions/posts of a course	X		
	Put discussions (thread): Course		X	
	Add new message to a forum thread		X	
	Flag a forum message with a like or dislike		X	
	Get course enrollment statistic to be used in charts	X		
	Download course enrollment statistics PDF file		X	
	Get the full information about the ILT course session	X		
	Move a user from one session to another one		X	
	Download session evaluation action for the currently logged user	X		
	Add CLOR LO to course		X	
	Delete CLOR LOs from course		X	
	Batch adding CLOR LO to course		X	
	Batch import courses		X	
	Retrieve course sessions	X		
	Retrieve the list of all course additional fields optionally filtered with the input parameters	X		
	Create a course additional field		X	
	Delete one course field		X	
	Get information about a course additional field	X		
	Update a course additional field		X	
	Course tracking data reset for courses with tracking data and optionally for courses without tracking data		X	
	Synchronize training material trackings for the specified course and return an up-to-date snapshot of current user status in the course		X	
	Get downloadable link for course materials	X		
	Undo dismission for a course to logged user		X	
	Dismiss a course for logged user		X	
	Return the list of scheduled ILT sessions	X		
	Create a new classroom session		X	
	Delete a session in the LMS		X	
	Update an existing session in the LMS		X	
	Learn: Course description	Check course visibility		X
		Course description action	X	
Learn: Enrollments	Enroll user/s in course/s		X	
	Un-enroll users in course/s		X	
	Batch import assignments		X	
	Update enrollment of users to courses (multiple update)		X	
	Enroll user in course		X	
	View information for enrolled user on current course	X		
	Enroll a user in a course		X	
	Update enrollment of user to course (single update)		X	
	Batch unenroll of users from courses and sessions		X	
	Duplicate enrollments between courses		X	
	Enroll user in ILT		X	
	Get pending enrollments for users that are waiting for admin approval	X		
	Return list of mappable fields for the data importer	X		
	Delete enrollments to a session		X	
Return list of external training	X			

Available Docebo APIs

Resource	API endpoint	Export	Import	
Learn: External training	Create external training		X	
	Delete an external training		X	
	View an external training	X		
	Update external training		X	
	Import external training		X	
Learn: Forum	Forum data action	X		
Learn: ILT	Get full session info for multiple sessions in different courses	X		
Learn: Instructor	Get all instructors assigned to a specific course	X		
	Get assignments for student or assignments to be evaluated from provided instructor	X		
Learn: LO	Return information for a single learning object	X		
	Play single LO or scorm-tincan chapter	X		
	Track single LO		X	
	Batch import of learning objects		X	
	Batch reset of LO tracking data		X	
	Batch insert of tracking for learning objects		X	
	Batch insert of test/quiz questions		X	
	Get downloadable link for training materials	X		
	Create LO of type screen-recording		X	
	Generate pre signed URL for screencast asset		X	
	Return the list of SCORM interactions for a certain user in a SCO object	X		
	Return list of mappable fields for the data importer	X		
	Batch evaluate a list of assignments		X	
	Learn: Location	Return list of locations	X	
		Create a new ILT location with the given details		X
Delete an existing ILT location with the given location ID			X	
Retrieve information about a certain location		X		
Update an existing ILT location with the given details			X	
Retrieve information about a certain location classroom		X		
Retrieve all classrooms from a specified location ID		X		
Learn: LP (learning plan)	Return list of learning plans	X		
	Create a new learning plan		X	
	Delete a specific learning plan by given ID		X	
	Update specific learning plan		X	
	View a learning plan	X		
	Enroll single user in learning plan		X	
	Share an LP using a signed link via deeplink		X	
	Undo dismissal for a learning plan to logged user		X	
	Dismiss a learning plan for logged user		X	
	Unenroll a user from a learning plan		X	
Learn: PU	Assign users to power user		X	
	Assign course categories to power user		X	
Learn: Subscription bundle	Assign course categories to power user	X		
	Create a new subscription bundle		X	
	Delete one subscription bundle		X	
	View a subscription bundle	X		
	Update a subscription bundle		X	
	Get the subscription bundle items	X		
	Create new subscription bundle items		X	
	Delete subscription bundle item		X	
	Delete subscription bundle items		X	
	Update a subscription bundle visibility		X	
	Delete a subscription bundle visibility		X	
	Get all courses and learning plans for given subscription bundle	X		
	Retrieve all filter options by subscription ID	X		
	Batch import for subscription bundles from CSV		X	
	Batch import for subscription bundles from CSV		X	
	Batch import for subscription bundles visibility		X	
	Get the assignable items for a subscription bundle	X		
Learn: Subscription field	Delete subscription fields		X	
	Return list of subscription fields	X		
	Create subscription field		X	
	Delete a subscription field		X	
	Get subscription field data	X		
Learn: Subscription plan	Update subscription field		X	
	Retrieve all subscription plans filtered on input parameters	X		
	Create a new subscription plan		X	
	Purchasing subscription plan		X	
	Delete one subscription plan		X	
	View a subscription plan	X		
	Update a subscription plan		X	
Batch import for subscription plans		X		
	List subscription records	X		
	Create a new subscription record		X	
	Renew a new subscription record		X	
	Delete a subscription record		X	
	View a subscription record	X		
	Update a subscription record		X	
	Delete subscription record items		X	
	Create a new subscription record item		X	
	Delete subscription record item		X	
	Retrieve all users by subscription record ID	X		
Terminate a subscription record		X		

Available Docebo APIs

Resource	API endpoint	Export	Import	
Learn: Subscription record	Return list of users associated to given record	X		
	Unassociate users from record		X	
	Batch import for subscription bundles visibility		X	
	Batch creates a new subscription record item		X	
	Return the list of courses and learning plans relative to a record ID visible to the user	X		
Learn: Subscription seat association	Delete one or more subscription seat associations		X	
	Retrieve all subscription seat associations filtered on input parameters	X		
	Create a new subscription seat association		X	
	Create a new subscription seat association (multiple)		X	
	View a subscription seat association	X		
	Update a subscription seat association		X	
	Retrieve all subscription seat associations filtered on input parameters	X		
Batch import for subscription seat association		X		
Learn: Survey	Retrieve survey data grouped by user	X		
Learn: Tests	Get completed or not completed learning objects	X		
	Get account list	X		
Learn: Webinar	Create a webinar account		X	
	Delete a webinar account		X	
	Update a webinar account		X	
	Pair a webinar account with webinar provider		X	
	Get Adobe Connect account list	X		
	Create a webinar Adobe Connect account		X	
	Delete a webinar Adobe Connect account		X	
	Update a webinar Adobe Connect account		X	
	Create a webinar GoTo Meeting account		X	
	Delete a webinar GoTo Meeting account		X	
	Update a webinar GoTo Meeting account		X	
	Get GoTo Meeting account list	X		
	Pair a webinar GoTo Meeting account with webinar provider		X	
	Get MS Teams account list	X		
	Create a webinar MS Teams account		X	
	Delete a webinar MS Teams account		X	
	Get a single webinar MS Teams account	X		
	Update a webinar MS Teams account		X	
	Learning plan: Learning plans	Retrieve all the enrollments from learning plans	X	
		Retrieve learning plan courses enrollments	X	
		Retrieve learning plans list	X	
		Create new learning plan		X
		Delete learning plans		X
Retrieve properties of a learning plan		X		
Update a learning plan			X	
Update statuses of learning plans			X	
Retrieve list of courses assigned to a learning plan		X		
Add courses to a learning plan			X	
Delete courses association to a learning plan			X	
Update status of course assigned to a learning plan			X	
Update the prerequisites of a course within a learning plan			X	
Reset the prerequisites of a course within a learning plan			X	
Retrieve the list of courses to set as prerequisites along with those already chosen		X		
Associate learning plan to channel list			X	
Remove learning plan from channel list			X	
Retrieve list catalogs where a learning plan is assigned		X		
Associate learning plan to a catalog list			X	
Remove learning plan from catalog list			X	
Enrollment for a single user into a learning plan			X	
Delete enrollment for user into a learning plan			X	
Update enrollment for user into a learning plan			X	
Enrolling users into a learning plan			X	
Delete user enrollments from a learning plan			X	
Bulk to update enrollment of users assigned to a learning plan			X	
Return list of mappable fields for the data importer		X		
Get a list of users enrolled in a given learning plan		X		
Retrieve learning plan additional fields list		X		
Store learning plan additional fields values			X	
Retrieve the list of all the courses assigned to a learning plan		X		
Recalculate and persist the status of a learning plan enrollment			X	
Manage: Auth0		Login and create (optionally) a user also update info and additional fields data		X
	Get settings for Auth0 app	X		
Manage: Central repo	Return the list of the CLOR categories with additional info	X		
	Get a list of already imported ITI objects for a specific CSP or all CSP's	X		
Manage: Channels	Update channel details		X	
	List of visible channels	X		
Manage: Click jacking	Return the status of clickjacking	X		
	Toggle clickjacking enable status		X	
	Return the domains of clickjacking	X		
	Set the list of domains allowed by clickjacking prevention		X	
	Update the existing list of domains allowed by clickjacking prevention		X	
Manage: Content partner fields	Clear the whitelisted domains or deletes one or more domains from whitelist		X	
	Retrieve the list of partner additional fields filtered on input parameters	X		
Manage: Content partner fields	Create user field		X	
	Get user additional fields info	X		
	Update user fields		X	
	Delete one partner field		X	

Available Docebo APIs

Resource	API endpoint	Export	Import
Manage: Content partners	View content partner	X	
	Update specific content partner		X
	Delete content partner		X
	Get the content partners	X	
	Get the courses of a content partner	X	
	Get the affiliates of a content partner	X	
	Add users as a content partners affiliates		X
	Delete a content partners affiliated users		X
	List all content partners affiliations for the current user	X	
	Add user as a content partners affiliate (if the correct partner code is provided)		X
Manage: CSM	Delete a content partner affiliation for the current user		X
	Get the general CSM information for the service availability and parameters for the FE	X	
Manage: E-Signature	Send CSM contact request via email		X
	Get e-signature settings	X	
Manage: Enrollment field	Save e-signature settings		X
	Retrieve the list of enrollment fields filtered on input parameters	X	
	Create enrollment field		X
	Delete more than one enrollment fields		X
	Update enrollment fields for selected courses		X
	Delete one enrollment field		X
Manage: Enrollment rules logs	Get a list of the enrollment rules logs	X	
	Get a list of the enrollment rules logs items by enrollment log	X	
	Get a list of log items associated to a logs	X	
	Rollback enrollment on rule trigger		X
	Rollback enrollment on course or learning plan		X
Manage: ERP	Massive rollback		X
	Generate URL by given path and append the params needed for authentication for ERP	X	
Manage: External user	Associate a list of external user ID and type with the corresponding Docebo users		X
Manage: Feature	Return all feature toggles	X	
	Enable or disable one or more feature toggles		X
Manage: Gamification	Get gamification information for the current user	X	
	Retrieve gamification reward requests for specific user or currently logged user	X	
	Get user assigned badges grouped by badge (user can have assigned to the same badge multiple times)	X	
	Get leaderboards list with positions of the users including requested user position	X	
	Get user contests that he is part of	X	
	Update gamification reward request status		X
	Send message to the user who made the reward request		X
Manage: Global search	Elasticsearch action	X	
	Elasticsearch initial action	X	
Manage: Importer	Create an importer preset		X
	View importer presets for the selected type	X	
	Update an importer preset		X
	Delete an importer preset		X
	Get a preview for the to be imported CSV file	X	
	Get CSV sample URL	X	
Manage: Job	Return a paginated array of job descriptors matching the specified filters	X	
	Push a new background job for immediate handling and execution		X
	Return the descriptor of the requested job	X	
	Update a subset of information of a given job		X
	Delete the passed job, where the operation is only possible if the job is in the 'aborted' or 'completed' state		X
	Get a list of the enrollment rules	X	
Manage: Legacy enrollment rules	Create a new enrollment rule		X
	Get a single enrollment rule	X	
	Update an enrollment rule		X
	Delete an enrollment rule		X
	Update the status of an enrollment rule		X
	Get a list of the branches associated to an enrollment rule	X	
	Update the branches of an enrollment rule when the audience type is set as branch		X
	Delete the branches of an enrollment rule		X
	Get a list of the courses associated to an enrollment rule	X	
	Update the courses of an enrollment rule when the enroll to is set to course		X
	Delete the courses of an enrollment rule		X
	Get a list of the groups associated to an enrollment rule	X	
	Update the groups of an enrollment rule when the enroll to is set to groups		X
	Delete the groups of an enrollment rule		X
	Get a list of learning plans associated to an enrollment rule	X	
	Update the learning plans of an enrollment rule when the enroll to is set to learning plan		X
	Delete the learning plans of an enrollment rule when the enroll to is set to learning plan		X
	Get a list of the courses not associated to an enrollment rule	X	
	Get a list of learning plans not associated to an enrollment rule	X	
	Get a list of the groups not associated to an enrollment rule	X	
Get a list of the notifications not associated to an enrollment rule	X		
	Return a paginated list of manager types	X	
	Create new manager type		X
	Delete the manager type/s		X
	Return info for given manager type	X	
	Update a manager type		X
	List all manager subordinate relation records	X	
	Retrieve the subordinate information	X	
	Update manager subordinate relations		X
	Batch create manager subordinate relations		X
	Delete manager subordinate relations		X
	Send notification to manager for pending subordinates		X

Available Docebo APIs

Resource	API endpoint	Export	Import
	Send emails to subordinates		X
	List of users for a specific domain	X	
	List managers	X	
	Retrieve all the subordinates for the given manager	X	
	Retrieve all manager types	X	
	Transfer subordinates from one manager to another		X
	List manager courses	X	
	List manager learning plans	X	
Manage: Manager	Batch enroll team members to courses		X
	Batch enroll team members to learning plans		X
	Return all mobile settings	X	
Manage: Mobile	Update basic launch information for mobile apps		X
	Return basic launch information for mobile apps	X	
Manage: Multidomain	This endpoint will return a deep link used for mobile log in		X
Manage: Notification	View all multidomain clients	X	
	Send an external notification		X
	List the OAuth 2.0 clients	X	
Manage: OAuth 2.0	Create a new OAuth 2.0 client configuration		X
	Update a new OAuth 2.0 client configuration		X
	Delete an OAuth 2.0 client		X
Manage: Objectives	Set user my area of interest occupation and skills		X
Manage: Open graph	Fetch all open graph tags from a valid URL	X	
	List of branches of given or root level	X	
	Create a new branch in the organizational chart tree		X
	Delete the branch		X
	Get details of a selected branch	X	
	Update selected branch		X
	Retrieve information about a branch's users	X	
	Assign a collection of user IDs to the specified node		X
	Move an org chart under a new parent node		X
	Assign user fields to branch/group		X
	Check for duplicate branch code		X
	Import branches		X
	Delete branches		X
	Remove members from branches		X
Manage: Orgchart	Return branch codes associated with their translations	X	
Manage: Player	Return list of mappable fields for the data importer	X	
	Get player license key	X	
	Get list of all policies	X	
	Create privacy policy		X
	Delete a privacy policy		X
	Update a privacy policy		X
	Assign a policy: List	X	
	Assign multidomains on policy		X
	Unassign policy from multidomain(s)		X
	View tracking of policy and sub-policies	X	
	Create tracking of policy and sub-policies		X
	Get policy by ID with latest version	X	
	Get list of all policy versions	X	
	Get list of all clients	X	
	Update tracking of policy and sub-policies		X
Manage: Policy	Get privacy policy ID by domain	X	
	Check if the logged user need to accept privacy policy	X	
	Return base information: Default platform language active languages active plugins color scheme and etc	X	
	Get translation	X	
	Translate the passed array of phrases in all available languages		X
	Send request to the sales or help team in the erp		X
	Apply a theme by theme code		X
	Return the available microservices for the given LMS URL	X	
Manage: Site	Return an OAuth 2.0 access token in exchange for a google auth token		X
	List help desk settings	X	
	Retrieve Docebo environment status	X	
	View all tags	X	
	Create a new tag		X
	View tag	X	
	Delete tag		X
	Retrieve all blacklisted tags	X	
Manage: Tags	Update the blacklisted tags		X
	Clear the blacklist		X
	Get list of all terms & conditions records	X	
	Create a terms & conditions record		X
	Delete a terms & conditions record		X
	Update a terms & conditions record		X
	Assign terms & conditions: List	X	
	Assign multidomains on terms and conditions		X
	Unassign terms & conditions from multidomain(s)		X
	View tracking of a terms & conditions record	X	
	Create a tracking record for the terms & conditions		X
	Get a terms and conditions record by ID with latest version	X	
	Get list of all versions of a terms & conditions record	X	
	Get list of all clients	X	
	Update the tracking of a terms & conditions record		X
	Get the terms & conditions record ID by domain	X	

Available Docebo APIs

Resource	API endpoint	Export	Import
Manage: Terms and conditions	Check if the logged user need to accept the terms and conditions	X	
	Get the default terms and conditions	X	
Manage: Theme	View a theme by theme code	X	
	Update a theme by theme code		X
	Delete a theme		X
	View all themes	X	
	Update or create a theme variant by theme code and multidomain ID		X
Manage: Trails	Return audit trail logs generated in a specific time span	X	
	Retrieve 2FA secret key	X	
Manage: Two factor auth	Pair two-factor authentication app		X
	Send two-factor authentication OTP code by email		X
	Regenerate 2FA recovery code		X
	Verify two-factor authentication OTP code		X
	Delete 2FA secret or code		X
	Verify 2FA recovery code		X
	Delete 2FA secret or code of signed-in user		X
Manage: Unsplash	List photos from unsplash	X	
	Fetch an Unsplash image and uploading it to S3		X
Manage: Upload	Generate Amazon S3 pre-signed URL for given file	X	
	Return a post policy for making authenticated requests using HTTP	X	
	Delete file from Amazon S3		X
Manage: User	Return list of users	X	
	Create user		X
	Delete a user		X
	Update an existing user with the provided account information		X
	View a user's info	X	
	Get array of users with predefined selection fields	X	
	Generate access token for user by provided username and password		X
	Get specific information about currently logged user	X	
	Invalidate user token		X
	Change user password		X
	User registration		X
	Keep user session alive	X	
	Get setting information about specific user	X	
	Set setting information about specific user		X
	Registration confirmation email		X
	Get information from temporary user	X	
	Update a user status		X
	Update existing users with the provided account information		X
	Add users to branches		X
	Remove users from branches		X
	Move users from one branch to another branch		X
	Approve temporary users		X
	Reject temporary user		X
	Check if given username is free	X	
	Resend registration email to a pending user		X
	Return list of mappable fields for the data importer	X	
	Export users	X	
	Batch import users		X
	User 'quick' registration (only by providing email)		X
	Raise event for sending notification "user created by admin"		X
	Retrieve the list of domains available for the given user	X	
	Retrieve merge users Detail information included first chunk of enrollments subscriptions badges transactions	X	
	Merge the data from one user to another		X
	Retrieve all course enrollments for users to merge	X	
	List merge users badges	X	
	List merge users transactions	X	
	Retrieve all subscriptions for users to merge	X	
	Retrieve all the subordinates of a manager	X	
	List of all the managers for the current user	X	
	Opt-out from newsletter delivery		X
	Get events filtered by user range of date and category	X	
	Delete users		X
	Get user activities information like number of visited session per month enrollments per month	X	
	Retrieve information about the currently available levels within the platform	X	
	Send message to user		X
	Groups and folders are returned in separate arrays	X	
	Get navigation menu	X	
	Launch a job to export users data related to certificates returns the ID of the job which will generate all files needed		X
	Add a page to favorites		X
	Delete a page from favorites		X
Manage: User field	Retrieve the list of user additional fields filtered on input parameters	X	
	Create user field		X
	Get user additional fields info	X	
Manage: Workforce	Update user fields		X
	Delete one user field		X
Marketplace: GO1	Search a skill from workforce service	X	
	Create a background job for SCORM import		X
	Get GO1 filter	X	
	Retrieve provider credentials data	X	
	Update LinkedIn Learning credentials		X
	Create LinkedIn Learning credentials		X
	Delete LinkedIn Learning credentials		X

Available Docebo APIs

Resource	API endpoint	Export	Import
Marketplace: LiL (LinkedIn Learning)	Verify if credentials are correct	X	
	Associate libraries subjects and topic categories with learning assets	X	
Marketplace: Open sesame	Prepare pull content sync action	X	
	Content sync action	X	
	Provision tenant action	X	
	Remove tenant action	X	
	Update status of the LTI provider		X
Marketplace: Providers	Return information for CSP's	X	
	Get iframe url action	X	
	Add CSP courses as LO's in central repository		X
	Batch add CSP courses as LO's in central repository		X
	Fetch data for carousel	X	
	Course importing API bundles different API calls within the LMS to provide a complete course creation		X
	Batch course importing API bundles different API calls within the LMS to provide a complete course creation		X
	Return information about credentials for provided CSP	X	
	Fetch a service provider course data	X	
	Provision current admin user in Skilla therefore gaining access to its content library	X	
	Run a query against Skilla's catalog categories	X	
Marketplace: Skilla	Run a query against Skilla's catalog	X	
	Return DKIM records	X	
Notifications: DKIM	Create a DKIM record		X
	Return a DKIM record	X	
	Delete a DKIM record		X
	Validate the activation of a DKIM record and activates/deactivates it		X
	Return array of the 10 most recent notifications	X	
Notifications: Notification	Return list of notifications	X	
	Mark the message as read		X
Notifications: Notifications log	Return a list of notifications logs	X	
Notifications: Webhooks	Return the list of webhooks	X	
	Create a webhook		X
	View a specific webhook	X	
	Update a webhook		X
	Delete a webhook		X
	Return the list of events available for subscription	X	
	Change the webhook status		X
	Delete a webhook last error		X
	Return the logs of a specific webhook	X	
	Return the configuration of webhooks notification AWS region and fast delivery account ID	X	
	Update the webhook configuration		X
	Return the content of the dead letter queue for a given webhook	X	
	Delete messages from the dead letter queue of a webhook		X
	Return the filters for logs of a specific webhook	X	
OTJ: Assignments	Return the limits of a webhook app	X	
	Upload an assignment's checklist answers for the current logged user		X
OTJ: Checklists	Get an assignment with the relative answers	X	
	Approve or reject an assignment		X
	Get all checklists	X	
	Create a checklist		X
	Delete a checklist		X
	Get a checklist	X	
	Duplicate a checklist		X
	Update a checklist		X
	Get all versions of a checklist	X	
	Get a version of a checklist	X	
	Get all questions of a version	X	
	Update all questions of a version		X
	Get all schedules related to a checklist	X	
	Create a schedule for a checklist		X
	Delete a schedule		X
	Update a schedule of a checklist		X
	OTJ: Managers	Get all the assignments that need to be completed by the subordinates of the specified manager	X
OTJ: Reports	Get all checklists for reporting purpose	X	
	Get checklists evaluators info with status	X	
OTJ: Users	Get all the assignment of a specific user	X	
	Create a menu		X
	Delete a menu		X
	Get single menu information	X	
	Edit a single menu		X
Pages: Menu	Listing menus	X	
	Add a single page to a menu		X
	Listing pages	X	
Pages: Pages	Create a page		X
	Delete a page		X
	Get single page information	X	
	Edit a single page		X
	Enable/disable the pages functionality for the LMS or its multidomains		X
Pages: Widgets	Manage pages	X	
Power user: Permissions	Catalogs available for widget selection	X	
	Retrieve the list of permissions	X	
Power user: Power users	Retrieve the list of power users	X	
	Create power users		X
	Unassign power users		X
	Unassign power users		X

Available Docebo APIs

Resource	API endpoint	Export	Import
