

## Available PlentyONE APIs

Resource	API endpoint	Export	Import
Account	Anonymize contact		X
	Apply selected group function options for given contact IDs		X
	Batch update		X
	Convert guest account into regular account		X
	Create a job with given data		X
	Create address contact relations		X
	Create address for existing contact		X
	Create address for existing order		X
	Create address for existing warehouse		X
	Create address option		X
	Create address option type		X
	Create address POS relation		X
	Create address		X
	Create address warehouse relation		X
	Create an address for an existing order		X
	Create bank account		X
	Create company contact relation		X
	Create company for existing contact		X
	Create company		X
	Create contact department		X
	Create contact event		X
	Create contact option		X
	Create contact option sub type		X
	Create contact option type		X
	Create contact position		X
	Create contact		X
	Create contact type		X
	Create region for sales representative		X
	Create a contact class		X
	Delete a job by a given ID		X
	Delete address contact relation		X
	Delete address		X
	Delete address of the contact		X
	Delete address option by address ID		X
	Delete address option by option ID		X
	Delete address option type		X
	Delete address POS relation		X
	Delete address warehouse relation		X
	Delete bank account		X
	Delete batch of companies		X
	Delete company contact relation		X
	Delete company		X
	Delete company of the contact		X
	Delete contact		X
	Delete contact department		X
	Delete contact event		X
	Delete contact option		X
	Delete contact option		X
	Delete contact option sub type		X
	Delete contact option type		X
	Delete contact position		X
	Delete contact type		X
	Delete files from contact documents		X
	Delete region		X
	Delete a contact class		X
	Get address contact relation	X	
	Get address data by address ID	X	
	Get address	X	
	Get address option	X	
	Get address option type	X	
	Get address POS relation	X	
	Get addresses	X	
	Get bank account	X	
	Get company contact relation	X	
	Get company	X	
	Get company of the contact	X	
	Get contact department	X	
	Get contact event types as a key/value array	X	
	Get contact	X	
	Get contact option	X	
	Get contact option sub type	X	
	Get contact option type	X	
	Get contact position	X	
Get contact type	X		
Get login URL	X		
Get paginated list of jobs based on provided parameters	X		

## Available PlentyONE APIs

Resource	API endpoint	Export	Import
	Get primary or last created addresses of contact	X	
	Get region by contact ID and accountid	X	
	Get region by ID	X	
	Get sales representative of region	X	
	Get single job by ID	X	
	Get storage object from contact documents	X	
	Get temporary URL for document	X	
	Get vCard filestream of contact	X	
	List address contact relations	X	
	List address option types	X	
	List address options	X	
	List address POS relations	X	
	List address relation types	X	
	List address relation types	X	
	List addresses that are linked with contacts	X	
	List all group function related data	X	
	List bank accounts	X	
	List bank accounts paginated	X	
	List companies	X	
	List contact classes	X	
	List contact classes	X	
	List contact classes paginated	X	
	List contact departments	X	
	List contact events by contact ID	X	
	List contact events	X	
	List contact option sub types	X	
	List contact option types	X	
	List contact options	X	
	List contact positions	X	
	List contact related data	X	
	List contact types	X	
	List contacts	X	
	List contacts	X	
	List documents of a contact	X	
	List order addresses	X	
	List regions by contact ID	X	
	List warehouse addresses	X	
	Login frontend user		X
	Logout frontend user		X
	Refresh access token		X
	Reset contact primary address		X
	Return contact class model based on ID	X	
	Search contacts		X
	Send password link for contact		X
	Set contact address per address type as primary address		X
	Unblock contact		X
	Update a job names with given data		X
	Update address contact relations		X
	Update address of the contact		X
	Update address option by address ID		X
	Update address option		X
	Update address option type		X
	Update address POS relation		X
	Update address		X
	Update address warehouse relation		X
	Update an address for an existing order		X
	Update an existing document link		X
	Update bank account		X
	Update company		X
	Update company		X
	Update contact department		X
	Update contact event		X
	Update contact option		X
	Update contact option		X
	Update contact option sub type		X
	Update contact option type		X
	Update contact position		X
	Update contact		X
	Update contact type		X
	Update password for contact		X
	Update region		X
	Update a contact class		X
	Update an account contact relation isprimary field		X
	Upload document to contact directory		X
	Upload document to contact directory		X
	Validate contact option by given value	X	

## Available PlentyONE APIs

Resource	API endpoint	Export	Import
Accounting	Create a VAT configuration		X
	Create an accounting location		X
	Delete a posting account		X
	Delete a VAT configuration		X
	Delete an accounting location		X
	Get a posting key configuration of an accounting location	X	
	Get a VAT configuration by ID	X	
	Get a VAT configuration for a country in a location	X	
	Get a VAT configuration for the standard accounting location of a client	X	
	Get accounting location settings	X	
	Get all posting accounts	X	
	Get all unique posting accounts	X	
	Get an accounting location	X	
	Get debtor account configuration of an accounting location	X	
	Get posting account	X	
	Get posting accounts by country and webstore	X	
	Get posting accounts by locationid and type	X	
	Get posting accounts by locationid	X	
	Get the ID of an accounting location of a country	X	
	Get the revenue account configuration of a country	X	
	Get the revenue account configuration of an accounting location	X	
	List accounting locations	X	
	List accounting locations of a client	X	
	List revenue account configurations	X	
	List VAT configurations for one country of delivery	X	
	List VAT configurations	X	
	List VAT configurations of an accounting location	X	
	List the debtor accounts by mode	X	
	Save posting accounts		X
	Update a posting key configuration of an accounting location		X
	Update a VAT configuration		X
	Update accounting location settings		X
	Update an accounting location		X
Update debtor account configuration of an accounting location		X	
Update the revenue account configuration of an accounting location		X	
Address design	Create new layout		X
	Delete layout		X
	Get default layout	X	
	Get layout by country ID	X	
	Get layout	X	
	List all available fields	X	
	List all layouts with their contents	X	
	List countries used in other layouts	X	
Update layout		X	
Audit log	Get audit log system config	X	
	Get available audit log archives	X	
	Get available audit log entities	X	
	Get available audit log entities	X	
	Get the download URL for an restored audit log archive	X	
	Get the download URL for an restored audit log file	X	
	Restore an audit log archive		X
	Write the system config		X
Basket	Add item to basket		X
	Find a basket item by its ID	X	
	Get basket	X	
	List basket items	X	
	Make batch requests	X	
BI	Add a key figure configuration		X
	Check if results change since provided since parameter and Return IDs of updated key figures		X
	Delete key figure configuration		X
	Delete multiple key figure configurations		X
	Delete raw data\models that are deletable		X
	Export raw data of a given key figure to a spreadsheet (Google, Microsoft)	X	
	Generate key figure config from template class		X
	Get a raw data file from the storage	X	
	Get a raw data file from the storage	X	
	Get key figure config	X	
	Get key figure templates	X	
	Get list of all raw data creators	X	
	Get list of all raw data creators	X	
	Get list of raw data files	X	
	Get list of raw data files	X	
	Get order types in string format	X	
	Recalculate one or more raw data based key figures by key figure config IDs		X
	Reset all saved raw data configurations with given data		X
	Reset all saved raw data configurations with given data		X

## Available PlentyONE APIs

Resource	API endpoint	Export	Import
	Return a list of raw data creators with their configurations	X	
	Return a list of raw data creators with their configurations	X	
	Return filtered raw data for given key figure	X	
	Return filtered raw data for given key figure		X
	Return global filter values by given criteria identifiers param: identifiers		X
	Return global filters by given key figure identifiers param: identifiers		X
	Return key figure calculation details	X	
	Return key figure dimensions and dimension values	X	
	Return list of key figure classes	X	
	Return all key figure configs	X	
	Return list of all saved configurations	X	
	Search for key figure calculation results		X
	Update key figure configuration		X
Blog	Create a blog post		X
	Delete a blog post		X
	Get a blog post	X	
	List blog posts	X	
	Update a blog post		X
Board	Check reference key	X	
	Copy column		X
	Copy task		X
	Create column and assign it to a board		X
	Create reference		X
	Create task in specific column		X
	Delete column		X
	Delete reference from a given task		X
	Delete task		X
	Get task by ID	X	
	List all columns of a given board	X	
	List all task of a column	X	
	Update column		X
	Update position of of a column		X
	Update task position		X
	Update task		X
Boards	Copy board		X
	Create new board		X
	Delete board		X
	Get board by ID	X	
	List all boards	X	
	Update board		X
Catalog	Activate or deactivate catalog		X
	Benchmark for generation of a channel map template	X	
	Build private download URL	X	
	Build public download URL	X	
	Cancel export runs		X
	Check the connection to FTP, FTPs, SFTP		X
	Copy catalog format		X
	Copy catalog		X
	Create a channel map		X
	Create catalog		X
	Delete a channel map		X
	Delete catalog		X
	Export a catalog	X	
	Generate a channel map		X
	Generate token	X	
	Get a channel map	X	
	Get a list of catalog statuses	X	
	Get a list of channel maps	X	
	Get a single status history file	X	
	Get archive	X	
	Get catalog content	X	
	Get catalog	X	
	Get catalog status	X	
	Get preview catalog	X	
	Get preview vdi catalog	X	
	Get status data	X	
	Get templates by type and subtype	X	
	Get templates for type	X	
	Get types	X	
	Get a list of catalogs	X	
	Get catalog by version	X	
	Import a catalog		X
	List status histories	X	
	List status logs	X	
	List status performances	X	
	List catalog versions	X	

## Available PlentyONE APIs

Resource	API endpoint	Export	Import	
	Migrate catalogs		X	
	Regenerate a channel map		X	
	Restore archived catalog		X	
	Restore version of catalog		X	
	Return available schedule days list	X		
	Update a channel map		X	
	Update catalog content		X	
Category	Update catalog		X	
	Create new categories		X	
	Deactivate availability for clients		X	
	Delete a category template		X	
	Delete category details for the specified languages		X	
	Delete a category		X	
	Get a category	X		
	Get a category template	X		
	Get category tree	X		
	Get category trees	X		
	List categories	X		
	Update a category template		X	
	Update categories		X	
	Update one category		X	
	Cloud	Commit plugin changes		X
Delete files from frontend storage			X	
Delete files from the inbox			X	
Delete layout documents			X	
Delete object from frontend storage			X	
Get cloud metrics		X		
Get file information		X		
Get metadata for storage object		X		
Get system metrics		X		
Get the content of a file from the inbox		X		
Get the URL for a layout document		X		
Get the URL for a layout document		X		
Get the URL for a order property file		X		
List files from the inbox		X		
List frontend storage files		X		
List layout documents		X		
Update metadata of storage object			X	
Upload a file to the inbox			X	
Upload a layout document			X	
Upload a single file to frontend storage			X	
Upload a single file to frontend storage			X	
Comment		Create a comment		X
		Delete a comment		X
	Get a comment	X		
	List comments	X		
	Update a comment		X	
Configuration	Exports a configuration file	X		
	Get configuration file	X		
	Imports a configuration file		X	
	List configurations	X		
	Save configuration file		X	
Document	Archive document of an order		X	
	Delete a category document		X	
	Delete a document without an order relation		X	
	Delete document of an order		X	
	Download category documents	X		
	Download documents asynchronous	X		
	Download documents	X		
	Download documents of a document type	X		
	Download documents of an order	X		
	Download documents		X	
	Download the content of a document	X		
	Download the content of a preview document	X		
	Generate a document of a "stock intake"		X	
	Generate a preview of a document		X	
	Generate adjustment form of an order		X	
	Generate credit note of an order		X	
	Generate delivery note of an order		X	
	Generate document of an order		X	
	Generate dunning letter of an order		X	
	Generate dunning letter reversal document of an order		X	
	Generate invoice of an order		X	
	Generate multi credit note of an order		X	
	Generate multi invoice of an order		X	
	Generate offer document of an order		X	

## Available PlentyONE APIs

Resource	API endpoint	Export	Import
	Generate order confirmation of an order		X
	Generate order custom document of an order		X
	Generate pick up delivery note of an order		X
	Generate pro forma invoice of an order		X
	Generate purchase order (PO) delivery note of an order		X
	Generate refund reversal document of an order		X
	Generate reorder document of an order		X
	Generate repair slip of an order		X
	Generate return slip of an order		X
	Generate reversal document of an order		X
	Generate success confirmation of an order		X
	Generate a preview of the "incoming items receipt"		X
	Get an order document	X	
	Get current invoice or credit note of an order	X	
	Get most recent document of an order	X	
	Get status of a document	X	
	List documents	X	
	List documents of a category	X	
	List documents of a type	X	
	List documents of an order	X	
	List order documents	X	
	Regenerate a faulty document		X
	Upload category documents		X
	Upload order documents		X
Elastic sync	Check report log	X	
	Check report log	X	
	Copy one or more mappings		X
	Copy the syncs		X
	Create a sync mapping filter		X
	Create a sync mapping		X
	Create a sync mapping row		X
	Create a sync matching		X
	Create a sync option		X
	Create a sync		X
	Create sync mapping filters		X
	Create sync mapping rows		X
	Create sync matches		X
	Create sync options		X
	Delete a sync		X
	Delete a sync		X
	Delete a sync mapping		X
	Delete a sync mapping		X
	Delete a sync mapping row		X
	Delete a sync matching		X
	Delete one or more mappings		X
	Delete syncs		X
	Execute the run procedure		X
	Export the sync	X	
	Export the syncs		X
	Get a list of all mappings for a particular sync type	X	
	Get a list with variation matches	X	
	Get a sync	X	
	Get a sync	X	
	Get a sync mapping	X	
	Get a sync mapping	X	
	Get a sync mapping row	X	
	Get a sync matching	X	
	Get all syncs	X	
	Get an entity	X	
	Get computed preview of mapped target	X	
	Get list of decimals	X	
	Get list of sync intervals	X	
	Get list of sync types	X	
	Get log by ID	X	
	Get preview of CSV values	X	
	Get schedule times	X	
	Get syncs status	X	
	Get the CSV columns of a sync	X	
	Get the CSV rows	X	
	Get the label list for mapping filtration	X	
	Get the list of jobs for live import		X
	Get the mapping values	X	
	Get the mapping values tree	X	
	Get the model key to field value key	X	
	Get the plenty fields value map for a particular sync type	X	
	Import a page for live import		X

## Available PlentyONE APIs

Resource	API endpoint	Export	Import
	Import the sync with different Plenty ID		X
	Import the sync with different Plenty ID		X
	Initiate + queue live import		X
	List sync mapping rows	X	
	List sync mappings	X	
	List sync mappings	X	
	List sync matches	X	
	List syncs	X	
	Preview the syncs	X	
	Reset the cache	X	
	Save the CSV on s3		X
	Save the CSV on s3		X
	Update a sync mapping filter		X
	Update a sync mapping		X
	Update a sync mapping row		X
	Update a sync matching		X
	Update a sync option		X
	Update a sync		X
	Update sync mapping filters		X
	Update sync mapping rows		X
	Update sync matches		X
	Update sync options		X
	Update the CSV of a sync		X
Export	Export an elastic export	X	
	Export an elastic export	X	
	Generate a token	X	
	Get format keys	X	
	Get format keys	X	
	List export documents	X	
Export settings	Create an export		X
	Delete export		X
	Delete filter from the export		X
	Get export	X	
	List elastic exports	X	
	Update an export		X
Feedback	Create a feedback comment		X
	Create a feedback		X
	Create a feedback rating		X
	Delete a feedback comment		X
	Delete a feedback		X
	Delete a feedback rating		X
	Delete multiple feedbacks		X
	Get a feedback comment	X	
	Get a feedback	X	
	Get a feedback rating	X	
	List feedback comments	X	
	List feedback ratings	X	
	List feedback replies	X	
	List feedbacks	X	
	Migrate legacy feedbacks		X
	Update a feedback		X
	Update the visibility of multiple feedbacks		X
Fulfillment	Create trolley tag		X
	Delete trolley tag		X
	Delete trolley tag		X
	Execute a pick list action		X
	Get a pick list	X	
	Get a pick list	X	
	Get all pick list items	X	
	Get all pick List	X	
	Get pick list item	X	
	Set state of a pick list item		X
Item	Activate a client (store)		X
	Activate a country		X
	Activate a currency		X
	Activate a customer class		X
	Activate a customer class		X
	Activate a referrer account		X
	Activate a referrer		X
	Activate a referrer		X
	Activate a shipping profile		X
	Add a variation to a bundle		X
	Book incoming stock		X
	Book outgoing stock		X
	Bulk activate shipping profiles		X
	Bulk create category links		X

## Available PlentyONE APIs

Resource	API endpoint	Export	Import
	Bulk create prices		X
	Bulk update category links		X
	Bulk update items		X
	Bulk update prices		X
	Bulk update properties		X
	Bulk update properties		X
	Copy an item		X
	Correct stock		X
	Create a barcode		X
	Create a commission		X
