Quality notification task	Get entities from quality notification task	X	
Quality notification task	Get entity from quality notification task by key	X	
Quality notification long text	Get entities from related quality notification long text	X	
Quality notification long text	Add new entity to related quality notification long text		X
Quality notification long text	Get related quality notification	X	
Quality notification long text	Get entities from quality notification long text	X	
Quality notification long text	Get entity from quality notification long text by key	X	
Quality notification partner	Get entities from related quality notification partner	X	
Quality notification partner	Add new entity to related quality notification partner		X
Quality notification partner	Get related quality notification	X	
Quality notification partner	Get entities from quality notification partner	X	

Available SAP S/4HANA Public\_v4 Cloud APIs

Resource	Updated Endpoint	Export	Import
Quality notification partner	Get entity from quality notification partner by key	X	
Quality notification item cause	Get related quality notification	X	
Quality notification item cause	Get entities from related quality notification item cause	X	
Quality notification item cause	Add new entity to related quality notification item cause		X
Quality notification item cause	Get related quality notification item	X	
Quality notification item cause	Get entities from quality notification item cause	X	
Quality notification item cause	Get entity from quality notification item cause by key	X	
Batch requests	Send a group of requests		X
Fixed asset	Get entities from fixed asset	X	
Fixed asset	Invoke action create fixed asset		X
Fixed asset	Invoke action create master fixed asset		X
Fixed asset	Get entity from fixed asset by key	X	
Fixed asset	Invoke action change		X
Fixed asset assignment	Get entities from related fixed asset assgmt	X	
Fixed asset assignment	Get related fixed asset	X	
Fixed asset assignment	Get entities from fixed asset assignment	X	
Fixed asset assignment	Get entity from fixed asset assignment by key	X	
Fixed asset ledger	Get entities from related fixed asset ledger	X	
Fixed asset ledger	Get related fixed asset	X	
Fixed asset ledger	Get entities from fixed asset ledger	X	
Fixed asset ledger	Get entity from fixed asset ledger by key	X	
Fixed asset valuation	Get entities from related fixed asset valuation	X	
Fixed asset valuation	Get related fixed asset	X	
Fixed asset valuation	Get entities from fixed asset valuation	X	
Fixed asset valuation	Get entity from fixed asset valuation by key	X	
Globalization fixed asset	Get related fixed asset	X	
Globalization fixed asset	Get entities from fixed asset country data	X	
Globalization fixed asset	Get entity from fixed asset country data by key	X	
Fixed asset time-based valuation	Get related fixed asset	X	
Fixed asset time-based valuation	Get related fixed asset valuation	X	
Fixed asset time-based valuation	Get entities from related fixedassettimebasedvaln	X	
Fixed asset time-based valuation	Get entities from fixed asset time based valuation	X	
Fixed asset time-based valuation	Get entity from fixed asset time based valuation by key	X	
Globalization fixed asset assignment	Get related fixed asset	X	
Globalization fixed asset assignment	Get entities from global asset assignment	X	
Globalization fixed asset assignment	Get entity from global asset assignment by key	X	
Globalization fixed asset time-based valuation	Get related fixed asset	X	
Globalization fixed asset time-based valuation	Get related fixed asset valuation	X	
Globalization fixed asset time-based valuation	Get entities from globalization fixed asset time-based valuation	X	
Globalization fixed asset time-based valuation	Get entity from globalization fixed asset time-based valuation by key	X	
Batch requests	Send a group of requests		X
Quality task	Get entities from quality task	X	
Quality task	Add new entity to quality task		X
Quality task	Get entity from quality task by key	X	
Quality task	Update entity in quality task		X
Quality task	Invoke action set quality task lifecycle status to completed		X
Quality task	Invoke action set quality task lifecycle status to in process		X
Quality task long text	Get related quality task detailed desc	X	
Quality task long text	Get entities from related quality task long text	X	
Quality task long text	Get related qualitytaskprocessornotes	X	
Quality task long text	Get related quality task	X	
Quality task long text	Get entities from quality task long text	X	
Quality task long text	Get entity from quality task long text by key	X	
Quality task long text	Update entity in quality task long text		X
Batch requests	Send a group of requests		X
Billing request	Get entities from cabillrequest	X	
Billing request	Add new entity to billing request		X
Billing request	Get entity from billing request by key	X	
Billing request	Update entity in billing request		X
Billing request	Delete entity from billing request		X
Billing request	Invoke action reject		X
Billing request	Invoke action release		X
Billing request	Invoke action cancel		X
Billing request	Invoke action set to for checking		X
Billing request item	Get entities from related billing request item	X	
Billing request item	Add new entity to related billing request item		X
Billing request item	Get related billing request	X	
Billing request item	Get entities from billing request item	X	
Billing request item	Get entity from billing request item by key	X	
Billing request item	Update entity in billing request item		X
Billing request item	Delete entity from billing request item		X
Batch requests	Send a group of requests		X
Customer invoice item set	Reads customer invoice item data, such as reference document number, bank name, payment card type, and more	X	
Customer open item set	Reads customer open item data, such as document date, posting date, open amount in trans action currency, and more	X	

Available SAP S/4HANA Public\_v4 Cloud APIs

Resource	Updated Endpoint	Export	Import
Customer document set	Reads customer document data, such as company code, customer number, fiscal year, and more	X	
Consolidation plant hierarchy	Get entities from consolidation plant hierarchy	X	
Consolidation plant hierarchy	Get entity from consolidation plant hierarchy by key	X	
Consolidation plant hierarchy node	Get entities from related hierarchy node	X	
Consolidation plant hierarchy node	Get related hierarchy	X	
Consolidation plant hierarchy node	Get entities from consolidation plant hierarchy node	X	
Consolidation plant hierarchy node	Get entity from consolidation plant hierarchy node by key	X	
Consolidation plant hierarchy: Text	Get entities from related text	X	
Consolidation plant hierarchy: Text	Get related hierarchy	X	
Consolidation plant hierarchy: Text	Get entities from consolidation plant hierarchy text	X	
Consolidation plant hierarchy: Text	Get entity from consolidation plant hierarchy text by key	X	
Cnsltdn plant hierarchy node: Text	Get entities from related text	X	
Cnsltdn plant hierarchy node: Text	Get related hierarchy node	X	
Cnsltdn plant hierarchy node: Text	Get entities from consolidation plant hier node text	X	
Cnsltdn plant hierarchy node: Text	Get entity from consolidation plant hier node text by key	X	
Batch requests	Send a group of requests		X
Content security policy status	Get entities from cont ent security policy status	X	
Content security policy status	Get entity from cont ent security policy status by key	X	
Trusted content	Get entities from trusted site content	X	
Trusted content	Get entity from trusted site content by key	X	
Trusted sites	Get entities from related trusted cont ent	X	
Trusted sites	Get entities from trusted sites	X	
Trusted sites	Get entity from trusted sites by key	X	
Batch requests	Send a group of requests		X
Change record lifecycle status	Get entities from a change record lifecycle status	X	
Change record lifecycle status	Get entity from a change record lifecycle status by key	X	
Change record lifecycle status text	Get related change record lifecycle status text	X	
Change record lifecycle status text	Get entities from a change record lifecycle status text	X	
Change record lifecycle status text	Get entity from a change record lifecycle status text by key	X	
Batch requests	Send a group of requests		X
Pooled capacity for work center	Get entities from work center capacity	X	
Pooled capacity for work center	Add new entity to work center capacity		X
Pooled capacity for work center	Get entity from work center capacity by key	X	
Pooled capacity for work center	Update entity in work center capacity		X
Work center pooled capacity description	Get entities from related description	X	
Work center pooled capacity description	Add new entity to related description		X
Work center pooled capacity description	Get related header	X	
Work center pooled capacity description	Get entities from work center capacity text	X	
Work center pooled capacity description	Get entity from work center capacity text by key	X	
Work center pooled capacity description	Update entity in work center capacity text		X
Work center pooled capacity interval	Get entities from related interval	X	
Work center pooled capacity interval	Add new entity to related interval		X
Work center pooled capacity interval	Get related header	X	
Work center pooled capacity interval	Get entities from workcentercapacityinterval	X	
Work center pooled capacity interval	Get entity from workcentercapacityinterval by key	X	
Work center pooled capacity interval	Update entity in workcentercapacityinterval		X
Work center pooled capacity interval	Delete entity from workcentercapacityinterval		X
Work center pooled capacity shift	Get related header	X	
Work center pooled capacity shift	Get entities from related shift	X	
Work center pooled capacity shift	Add new entity to related shift		X
Work center pooled capacity shift	Get related interval	X	
Work center pooled capacity shift	Get entities from work center capacity shift	X	
Work center pooled capacity shift	Get entity from work center capacity shift by key	X	
Work center pooled capacity shift	Update entity in work center capacity shift		X
Work center pooled capacity shift	Delete entity from work center capacity shift		X
Batch requests	Send a group of requests		X
Label field group	Get entities from label field group	X	
Label field group	Get entity from label field group by key	X	
Label field group	Get entities from related childrenlabelfieldgroups	X	
Label field group	Get related parent label field group	X	
Label field version	Get entities from related label field versions	X	
Label field version	Get related label field group	X	
Label field version	Get entities from label field version	X	
Label field version	Get entity from label field version by key	X	
Label field group text	Get entities from related texts	X	
Label field group text	Get related label field group	X	
Label field group text	Get entities from label field group text	X	
Label field group text	Get entity from label field group text by key	X	
Label field version text	Get entities from related texts	X	
Label field version text	Get related label field version	X	
Label field version text	Get entities from label field version text	X	
Label field version text	Get entity from label field version text by key	X	
Batch requests	Send a group of requests		X

Description	Get entity from a joint operating agreement text by key	X	
Description	Update entity in a joint operating agreement text		X
Description	Delete entity from a joint operating agreement text		X
Partner share	Get related joint operating agreement	X	
Partner share	Get entities from related joint operating agreement partner share	X	
Partner share	Add new entity to related joint operating agreement partner share		X
Partner share	Get related joint operating agreement equity grp	X	
Partner share	Get entities from a joint operating agreementpartshr	X	
Partner share	Get entity from a joint operating agreement partner share by key	X	
Partner share	Update entity in a joint operating agreement partner share		X
Partner share	Delete entity from a joint operating agreement partner share		X
Batch requests	Send a group of requests		X
Merchandise category	Get entities from merchandise category	X	
Merchandise category	Add new entity to merchandise category		X
Merchandise category	Get entity from merchandise category by key	X	
Merchandise category	Update entity in merchandise category		X
Merchandise category	Delete entity from merchandise category		X
Merchandise category text	Get entities from related merchandise category text tp	X	
Merchandise category text	Add new entity to related merchandise category text tp		X
Merchandise category text	Get related merchandise category tp	X	
Merchandise category text	Get entities from merchandise category text	X	
Merchandise category text	Get entity from merchandise category text by key	X	
Merchandise category text	Update entity in merchandise category text		X
Merchandise category characteristic	Get entities from related mrchdscatcharacteristic tp	X	
Merchandise category characteristic	Add new entity to related mrchdscatcharacteristic tp		X
Merchandise category characteristic	Get related merchandise category tp	X	
Merchandise category characteristic	Get entities from mrchdscatcharacteristic	X	
Merchandise category characteristic	Get entity from mrchdscatcharacteristic by key	X	
Merchandise category characteristic	Delete entity from mrchdscatcharacteristic		X
Merchandise cat charc value restriction	Get entities from related mrchdscatcharcvalstrcn tp	X	
Merchandise cat charc value restriction	Add new entity to related mrchdscatcharcvalstrcn tp		X
Merchandise cat charc value restriction	Get related merchandise category tp	X	
Merchandise cat charc value restriction	Get entities from mrchdscatcharcvalstrcn	X	
Merchandise cat charc value restriction	Get entity from mrchdscatcharcvalstrcn by key	X	
Merchandise cat charc value restriction	Delete entity from mrchdscatcharcvalstrcn		X
Batch requests	Send a group of requests		X
Document flow	Get entities from caSecuritydepdocumentflow	X	
Document flow	Get entity from caSecuritydepdocumentflow by key	X	
Request detail	Get related caSecuritydeprequestdetail	X	
Request detail	Get entities from related caSecuritydepdocumentflow	X	
Request detail	Get entities from casecuritydeposit req detail	X	
Request detail	Get entity from casecuritydeposit req detail by key	X	
Security deposit management	Get entities from related casecuritydeposit	X	
Security deposit management	Get entities from related caSecuritydeprequestdetail	X	
Security deposit management	Add new entity to related caSecuritydeprequestdetail		X
Security deposit management	Get related casecuritydeposit	X	
Security deposit management	Get entities from casecuritydeposit	X	
Security deposit management	Add new entity to casecuritydeposit		X
Security deposit management	Get entity from casecuritydeposit by key	X	
Security deposit management	Invoke action clear		X
Security deposit management	Invoke action releasepartially		X
Security deposit management	Invoke action release		X
Security deposit management	Invoke action resetrelease		X
Security deposit management	Invoke action reverse		X
Security deposit management	Invoke action change		X
Batch requests	Send a group of requests		X
Profit center company code assignment	Get entities from profit center company code assignment	X	

Available SAP S/4HANA Public\_v4 Cloud APIs

Resource	Updated Endpoint	Export	Import
Profit center company code assignment	Get entity from profit center company code assignment by key	X	
Profit center company code assignment	Update entity in profit center company code assignment		X
Profit center	Get related profitcenterpt	X	
Profit center	Get entities from related prftctrcompcodeassgmtpt	X	
Profit center	Add new entity to related profit center company code assignment		X
Profit center	Get entities from profitcenter	X	
Profit center	Add new entity to profitcenter		X
Profit center	Get entity from profitcenter by key	X	
Profit center	Update entity in profitcenter		X
Profit center	Delete entity from profitcenter		X
Profit center	Invoke action merge		X
Profit center	Invoke action change validity period		X
Profit center text	Get entities from related profitcenter text	X	
Profit center text	Add new entity to related profitcenter text		X
Profit center text	Get related profitcenter	X	
Profit center text	Get entities from profitcenter text	X	
Profit center text	Get entity from profitcenter text by key	X	
Profit center text	Update entity in profitcenter text		X
Profit center text	Delete entity from profitcenter text		X
Batch requests	Send a group of requests		X
Measuring points	Get entities from measuring point	X	
Measuring points	Add new entity to measuring point		X
Measuring points	Get entity from measuring point by key	X	
Measuring points	Update entity in measuring point		X
Measuring points	Invoke action startmsmtreadingtransfer		X
Measuring points	Invoke action deactivate measuring point		X
Measuring points	Invoke action cancelmsmtreadingtransfer		X
Measuring points	Invoke action change measuring point category		X
Measuring points	Invoke action activate measuring point		X
Measuring point text	Get related longtext	X	
Measuring point text	Get related measuring point	X	
Measuring point text	Get entities from measuring point long text	X	
Measuring point text	Add new entity to measuring point long text		X
Measuring point text	Get entity from measuring point long text by key	X	
Measuring point text	Update entity in measuring point long text		X
Measuring point condition	Get entities from related measuring point condition	X	
Measuring point condition	Add new entity to related measuring point condition		X
Measuring point condition	Get related measuring point	X	
Measuring point condition	Get entities from measuring point condition	X	
Measuring point condition	Add new entity to measuring point condition		X
Measuring point condition	Get entity from measuring point condition by key	X	
Measuring point condition	Update entity in measuring point condition		X
Measuring point condition	Delete entity from measuring point condition		X
Measuring point condition - long text	Get related measuring point	X	
Measuring point condition - long text	Get related measuring point condition longtext	X	
Measuring point condition - long text	Get related measuring point condition	X	
Measuring point condition - long text	Get entities from msrgpointconditionlongtext	X	
Measuring point condition - long text	Add new entity to measuring point condition longtext		X
Measuring point condition - long text	Get entity from measuring point condition longtext by key	X	
Measuring point condition - long text	Update entity in measuring point condition longtext		X
Batch requests	Send a group of requests		X
Real estate contract type	Get entities from recontracttype	X	
Real estate contract type	Get entity from RE contract type by key	X	
Real estate contract type: Text	Get entities from related text	X	
Real estate contract type: Text	Get related RE contract type	X	
Real estate contract type: Text	Get entities from RE contract typetext	X	
Real estate contract type: Text	Get entity from RE contract typetext by key	X	
Batch requests	Send a group of requests		X
Well completion downtime	Get entities from well completion downtime	X	
Well completion downtime	Add new entity to well completion downtime		X
Well completion downtime	Invoke action update well downtime		X
Well completion downtime	Get entity from well completion downtime by key	X	
Well completion downtime	Update entity in well completion downtime		X
Well completion downtime	Delete entity from well completion downtime		X
Well completion downtime item	Get entities from related prawellcomplndwnitmtpt	X	
Well completion downtime item	Add new entity to related well completion downtime item		X
Well completion downtime item	Get related well completion downtime item	X	
Well completion downtime item	Get entities from well completion downtime reason	X	
Well completion downtime item	Get entity from well completion downtime reason by key	X	
Batch requests	Send a group of requests		X
Consolidation distribution channel	Get entities from consolidation distribution channel	X	
Consolidation distribution channel	Add new entity to consolidation distribution channel		X
Consolidation distribution channel	Get entity from consolidation distribution channel by key	X	
Consolidation distribution channel	Update entity in consolidation distribution channel		X
Consolidation distribution channel	Delete entity from consolidation distribution channel		X
Cnsltdn distribution channel: Text	Get entities from related text	X	

Available SAP S/4HANA Public\_v4 Cloud APIs

Cnsltdn distribution channel: Text	Get entities from consolidation distribution channel text	X	
Cnsltdn distribution channel: Text	Get entity from consolidation distribution channel text by key	X	
Cnsltdn distribution channel: Text	Update entity in consolidation distribution channel text		X
Cnsltdn distribution channel: Text	Delete entity from consolidation distribution channel text		X
Batch requests	Send a group of requests		X
Bearer maintain	Get entities from bearer	X	
Bearer maintain	Get entity from bearer by key	X	
Bearer maintain	Update entity in bearer		X
Bearer group maintain	Get related maintain bearer hier node	X	
Bearer group maintain	Get entities from related maintain bearer hier node	X	
Bearer group maintain	Add new entity to related maintain bearer hier node		X
Bearer group maintain	Get entities from bearer group	X	
Bearer group maintain	Get entity from bearer group by key	X	
Bearer group maintain	Update entity in bearer group		X
Division of interest	Get related pramaintdoihiernode	X	
Division of interest	Get related maintain division of interest	X	
Division of interest	Get entities from related maintain bearer hier node	X	
Division of interest	Add new entity to related maintain bearer hier node		X
Division of interest	Get entities from DOI	X	
Division of interest	Add new entity to DOI		X
Division of interest	Get entity from DOI by key	X	
Division of interest	Update entity in DOI		X
Tax state exemptions	Get related maintain division of interest	X	
Tax state exemptions	Get entities from DOEX	X	
Tax state exemptions	Get entity from DOEX by key	X	
Tax state exemptions	Update entity in DOEX		X
Ownership maintain	Get entities from related maintain DOI owner hier node	X	
Ownership maintain	Add new entity to related maintain DOI owner hier node		X
Ownership maintain	Get related maintain division of interest	X	
Ownership maintain	Get related maintain DOI owner hier node	X	
Ownership maintain	Get entities from related maintain state exemption hier node	X	
Ownership maintain	Add new entity to related maintain state exemption hier node		X
Ownership maintain	Get entities from doiowner	X	
Ownership maintain	Get entity from doiowner by key	X	
Ownership maintain	Update entity in doiowner		X
Owner history	Get entities from related pramaintdoihistoryhiernode	X	
Owner history	Add new entity to related pramaintdoihistoryhiernode		X
Owner history	Get related maintain division of interest	X	
Owner history	Get entities from DOI history	X	
Owner history	Get entity from DOI history by key	X	
Owner history	Update entity in DOI history		X
Division of interest fund transfer	Get related maintain division of interest	X	
Division of interest fund transfer	Get entities from related pramaintdoiowntransfhiernode	X	
Division of interest fund transfer	Add new entity to related pramaintdoiowntransfhiernode		X
Division of interest fund transfer	Get related maintain DOI owner hier node	X	
Division of interest fund transfer	Get entities from transfheader	X	
Division of interest fund transfer	Get entity from transfheader by key	X	
Division of interest fund transfer	Update entity in transfheader		X
Marketing exemptions	Get related maintain division of interest	X	
Marketing exemptions	Get entities from related pramaintmktgexempthiernode	X	
Marketing exemptions	Add new entity to related pramaintmktgexempthiernode		X
Marketing exemptions	Get related maintain DOI owner hier node	X	
Marketing exemptions	Get entities from mkex	X	
Marketing exemptions	Get entity from mkex by key	X	
Marketing exemptions	Update entity in mkex		X
Sliding scale header	Get related maintain division of interest	X	
Sliding scale header	Get entities from related pramaintslidingscHDRhiernode	X	
Sliding scale header	Add new entity to related pramaintslidingscHDRhiernode		X
Sliding scale header	Get related maintain DOI owner hier node	X	
Sliding scale header	Get entities from scaleHDR	X	
Sliding scale header	Get entity from scaleHDR by key	X	
Sliding scale header	Update entity in scaleHDR		X
Sliding scales items	Get related maintain division of interest	X	
Sliding scales items	Get related pramaintslidingscHDRhiernode	X	
Sliding scales items	Get entities from related pramaintslidingscalehiernode	X	
Sliding scales items	Add new entity to related pramaintslidingscalehiernode		X
Sliding scales items	Get entities from scale	X	
Sliding scales items	Get entity from scale by key	X	
Sliding scales items	Update entity in scale		X
Funds transfer items	Get related maintain division of interest	X	
Funds transfer items	Get related pramaintdoiowntransfhiernode	X	
Funds transfer items	Get entities from related pramaintowntransfdethiernode	X	
Funds transfer items	Add new entity to related pramaintowntransfdethiernode		X
Funds transfer items	Get entities from transfdetail	X	

Available SAP S/4HANA Public\_v4 Cloud APIs

Resource	Updated Endpoint	Export	Import
Funds transfer items	Get entity from transfdetail by key	X	
Funds transfer items	Update entity in transfdetail		X
Batch requests	Send a group of requests		X

Mobility in environment	Get entity from ecolprptytransptbtwnenvlcpts by key	X	
Ecotoxicological remarks	Get related pcectxproperty	X	
Ecotoxicological remarks	Get related pcectxassmtoxicity	X	
Results for aboveground organisms	Get related pcectxproperty	X	
Results for aboveground organisms	Get related pcectxtoxytoabgdom	X	
Results for soil-dwelling organisms	Get related pcectxproperty	X	
Results for soil-dwelling organisms	Get related pcectxtoxytosldgom	X	
Batch requests	Send a group of requests		X
Asphyxiation hazard	Get entities from pcsftyasphyxiationhazard	X	
Asphyxiation hazard	Get entity from pcsftyasphyxiationhazard by key	X	
Safety-related property	Get related safetyrelatedprpty	X	
Safety-related property	Get related asphyxiation hazard	X	
Safety-related property	Get entities from safety related property	X	
Safety-related property	Invoke action validate		X
Safety-related property	Invoke action create and release version		X
Safety-related property	Get entity from safety related property by key	X	
Auto-ignition temperature	Get related safetyrelatedprpty	X	
Auto-ignition temperature	Get related auto ignition	X	
Auto-ignition temperature	Get entities from pcsfyaautoignition	X	
Auto-ignition temperature	Get entity from pcsfyaautoignition by key	X	
Burning rate	Get related safetyrelatedprpty	X	
Burning rate	Get related burning rate	X	
Burning rate	Get entities from pcsfytburningrate	X	
Burning rate	Get entity from pcsfytburningrate by key	X	
Heat of combustion	Get related safetyrelatedprpty	X	
Heat of combustion	Get related combustion heat	X	
Heat of combustion	Get entities from pcsfytcombustionheat	X	
Heat of combustion	Get entity from pcsfytcombustionheat by key	X	
Corrosion of metals	Get related safetyrelatedprpty	X	
Corrosion of metals	Get related corrosion rate	X	
Corrosion of metals	Get entities from pcsfytcorrosionrate	X	
Corrosion of metals	Get entity from pcsfytcorrosionrate by key	X	
Dust explosion class	Get related safetyrelatedprpty	X	
Dust explosion class	Get related dust explosion class	X	
Dust explosion class	Get entities from pcsfydustexplosionclass	X	
Dust explosion class	Get entity from pcsfydustexplosionclass by key	X	
Explosiveness	Get related safetyrelatedprpty	X	
Explosiveness	Get related explosiveness	X	
Explosiveness	Get entities from pcsfytexplosiveness	X	
Explosiveness	Get entity from pcsfytexplosiveness by key	X	
Fire point	Get related safetyrelatedprpty	X	
Fire point	Get related firepoint	X	

Available SAP S/4HANA Public\_v4 Cloud APIs

Resource	Updated Endpoint	Export	Import
Fire point	Get entities from pcsftyfirepoint	X	
Fire point	Get entity from pcsftyfirepoint by key	X	
Flammability of gases/solids	Get related safetyrelatedprpty	X	
Flammability of gases/solids	Get related gassolidflammability	X	
Flammability of gases/solids	Get entities from pcsftygassolidflammability	X	
Flammability of gases/solids	Get entity from pcsftygassolidflammability by key	X	
Hazardous combustion products	Get related safetyrelatedprpty	X	
Hazardous combustion products	Get entities from related hzdscmbtnprod	X	
Hazardous combustion products	Get entities from pcsftyhzdscmbtnprod	X	
Hazardous combustion products	Get entity from pcsftyhzdscmbtnprod by key	X	
Flammability of liquids	Get related safetyrelatedprpty	X	
Flammability of liquids	Get related liquidflammability	X	
Flammability of liquids	Get entities from pcsftyliquidflammability	X	
Flammability of liquids	Get entity from pcsftyliquidflammability by key	X	
Lower explosion/flammability limit	Get related safetyrelatedprpty	X	
Lower explosion/flammability limit	Get related lowerflmtylimit	X	
Lower explosion/flammability limit	Get entities from pcsftylowerflmtylimit	X	
Lower explosion/flammability limit	Get entity from pcsftylowerflmtylimit by key	X	
Minimum ignition energy	Get related safetyrelatedprpty	X	
Minimum ignition energy	Get related minigntnengy	X	
Minimum ignition energy	Get entities from pcsftyminigntnengy	X	
Minimum ignition energy	Get entity from pcsftyminigntnengy by key	X	
Oxidizing	Get related safetyrelatedprpty	X	
Oxidizing	Get related oxidizing	X	
Oxidizing	Get entities from pcsftyoxidizing	X	
Oxidizing	Get entity from pcsftyoxidizing by key	X	
Peroxides	Get related safetyrelatedprpty	X	
Peroxides	Get related peroxides	X	
Peroxides	Get entities from pcsftyperoxides	X	
Peroxides	Get entity from pcsftyperoxides by key	X	
Self heating	Get related safetyrelatedprpty	X	
Self heating	Get related self heating	X	
Self heating	Get entities from pcsftyselfheating	X	
Self heating	Get entity from pcsftyselfheating by key	X	
Self ignition	Get related safetyrelatedprpty	X	
Self ignition	Get related self ignition	X	
Self ignition	Get entities from pcsftyselfignition	X	
Self ignition	Get entity from pcsftyselfignition by key	X	
Solvent separation test	Get related safetyrelatedprpty	X	
Solvent separation test	Get related solventsprntest	X	
Solvent separation test	Get entities from pcsftysolventsprntest	X	
Solvent separation test	Get entity from pcsftysolventsprntest by key	X	
Thermal decomposition temperature	Get related safetyrelatedprpty	X	
Thermal decomposition temperature	Get related thrmldcmpstn	X	
Thermal decomposition temperature	Get entities from pcsftythrmldcmpstn	X	
Thermal decomposition temperature	Get entity from pcsftythrmldcmpstn by key	X	
Upper explosion/flammability limit	Get related safetyrelatedprpty	X	
Upper explosion/flammability limit	Get related upperflmtylimit	X	
Upper explosion/flammability limit	Get entities from pcsftyupperflmtylimit	X	
Upper explosion/flammability limit	Get entity from pcsftyupperflmtylimit by key	X	
Flash point	Get related flash point	X	
Flash point	Get related sftyproperty	X	
Flash point	Get entities from sftyflashpoint	X	
Flash point	Get entity from sftyflashpoint by key	X	
Batch requests	Send a group of requests		X
