

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Sales order: Sales order header	Read all sales order headers	X	
Sales order: Sales order header	Read the header of a specific sales order	X	
Sales order: Sales order header	Read all items of a specific sales order	X	
Sales order: Sales order header	Read the header payment plan of a specific sales order	X	
Sales order: Sales order header	Read the header pricing element of a specific sales order	X	
Sales order: Sales order header	Create a sales order		X
Sales order: Sales order header	Update a sales order		X
Sales order: Sales order header	Delete a sales order		X
Sales order: Sales order header	Read the billing plan of a sales order	X	
Sales order: Sales order header	Create a sales order item for a sales order		X
Sales order: Sales order header	Read the header partners of a sales order	X	
Sales order: Sales order header	Create a header partner for a sales order		X
Sales order: Sales order header	Create a header payment plan for a specific sales order		X
Sales order: Sales order header	Get entities from related to preceding proc flow doc	X	
Sales order: Sales order header	Create a header pricing element for a specific sales order		X
Sales order: Sales order header	Read the related objects of a sales order header	X	
Sales order: Sales order header	Create a related object for a sales order header		X
Sales order: Sales order header	Get entities from related to subsequent proc flow doc	X	
Sales order: Sales order header	Read the header texts of a sales order	X	
Sales order: Sales order header	Create a header text for a sales order		X
Sales order: Sales order header	Read the sales order header for a billing plan	X	
Sales order: Sales order header	Read the sales order header for a header partner	X	
Sales order: Sales order header	Read the sales order header for a pricing element	X	
Sales order: Sales order header	Read the sales order header of a sales order item	X	
Sales order: Sales order header	Read the sales order header data for a preceding document of a sales order	X	
Sales order: Sales order header	Read the sales order header for a related object	X	
Sales order: Sales order header	Read the sales order header data for a subsequent document of a sales order	X	
Sales order: Sales order header	Read the sales order header for a header text	X	
Sales order: Sales order header	Read the sales order header for a payment plan item	X	
Sales order: Sales order header	Read the billing plans of all sales orders	X	
Sales order: Sales order header	Read the billing plan of a sales order	X	
Sales order: Sales order header	Update the billing plan of a sales order		X
Sales order: Sales order header	Read all sales order items	X	
Sales order: Sales order header	Create a sales order item		X
Sales order: Sales order header	Read a sales order item	X	
Sales order: Sales order header	Update a sales order item		X
Sales order: Sales order header	Delete a sales order item		X
Sales order: Sales order header	Read the header partners of all sales orders	X	
Sales order: Sales order header	Create a header partner for a specific sales order with a specific partner function		X
Sales order: Sales order header	Read the header partners of a sales order and a partner function	X	
Sales order: Sales order header	Update a header partner for a specific sales order with a specific partner function		X
Sales order: Sales order header	Delete a header partner of a specific sales order with a specific partner function		X
Sales order: Sales order header	Read the payment plans of all sales orders	X	
Sales order: Sales order header	Create a payment plan for a sales order		X
Sales order: Sales order header	Read a payment plan item of a sales order	X	
Sales order: Sales order header	Update a payment plan item of a sales order		X
Sales order: Sales order header	Delete a payment plan item of a specific sales order		X
Sales order: Sales order header	Read the preceding documents of all sales orders	X	
Sales order: Sales order header	Read a preceding document for a sales order	X	
Sales order: Sales order header	Read the header pricing elements of all sales orders	X	
Sales order: Sales order header	Create a header pricing element for a sales order		X
Sales order: Sales order header	Read the header pricing element for a sales order	X	
Sales order: Sales order header	Update a header pricing element for a sales order		X
Sales order: Sales order header	Delete a header pricing element for a sales order		X
Sales order: Sales order header	Read related objects from the headers of all sales orders	X	
Sales order: Sales order header	Create a related object for a sales order header		X

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Sales order: Sales order header	Read a related object from the header of a specific sales order	X	
Sales order: Sales order header	Delete a related object from a sales order header		X
Sales order: Sales order header	Read the subsequent documents of all sales orders	X	
Sales order: Sales order header	Read a subsequent document of a sales order	X	
Sales order: Sales order header	Read the header texts of all sales orders	X	
Sales order: Sales order header	Create a header text for a sales order		X
Sales order: Sales order header	Read a header text from a sales order	X	
Sales order: Sales order header	Update a header text for a sales order		X
Sales order: Sales order header	Delete a header text from a sales order		X
Purchase order: Purchase order header	Get the header details of all the purchase orders in the system	X	
Purchase order: Purchase order header	Get the header details of a purchase order	X	
Purchase order: Purchase order header	Get the item details of all the items in a purchase order	X	
Purchase order: Purchase order header	Get the header details of an item in a purchase order	X	
Product master: Product	Return product master records	X	
Product master: Product	Return product master record by product number	X	
Product master: Product	Create product master record		X
Product master: Product	Update product master record		X
Product master: Product	Return description	X	
Product master: Product	Create a new description		X
Product master: Product	Return plant data	X	
Product master: Product	Create plant data		X
Product master: Product	Return basic data text	X	
Product master: Product	Create basic data text		X
Product master: Product	Return inspection text	X	
Product master: Product	Create inspection text		X
Product master: Product	Return basic procurement data	X	
Product master: Product	Return purchase text	X	
Product master: Product	Create purchase text		X
Product master: Product	Return basic quality management data	X	
Product master: Product	Return basic sales data	X	
Product master: Product	Return sales tax data	X	
Product master: Product	Create sales tax data		X
Product master: Product	Return basic storage data	X	
Product master: Product	Return units of measure	X	
Product master: Product	Create units of measure		X
Product master: Product	Return sales organization data	X	
Product master: Product	Create sales organization data		X
Product master: Product	Return valuation area data	X	
Product master: Product	Create valuation area data		X
Product master: Product	Return description	X	
Product master: Product	Create a new description		X
Product master: Product	Return description by product number and language	X	
Product master: Product	Update a description		X
Product master: Product	Delete a description		X
Product master: Product	Return plant data	X	
Product master: Product	Create plant data		X
Product master: Product	Return plant data by product number and plant	X	
Product master: Product	Update plant data		X
Product master: Product	Return basic data text	X	
Product master: Product	Create basic data text		X
Product master: Product	Return basic data text by product number and language	X	
Product master: Product	Update basic data text		X
Product master: Product	Delete basic data text		X
Product master: Product	Return inspection text	X	
Product master: Product	Create inspection text		X
Product master: Product	Return inspection text by product number and language	X	
Product master: Product	Update inspection text		X
Product master: Product	Delete inspection text		X
Product master: Product	Return basic procurement data	X	
Product master: Product	Create basic procurement data		X

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import

Product master: Product	Update basic sales data		X
Product master: Product	Return sales tax data	X	
Product master: Product	Create sales tax data		X
Product master: Product	Return sales tax data	X	
Product master: Product	Create sales tax data		X
Product master: Product	Return sales tax data by product number and country	X	
Product master: Product	Update sales tax data		X
Product master: Product	Delete sales tax data		X
Product master: Product	Return basic storage data	X	
Product master: Product	Create basic storage data		X
Product master: Product	Return basic storage data by product number	X	
Product master: Product	Update basic storage data		X
Product master: Product	Return units of measure	X	
Product master: Product	Create units of measure		X
Product master: Product	Return units of measure by product number and alternative unit	X	
Product master: Product	Update units of measure		X
Product master: Product	Delete units of measure		X
Product master: Product	Return sales organization data	X	
Product master: Product	Create sales organization data		X
Product master: Product	Return sales organization data by product, sales organization and distribution channel	X	
Product master: Product	Update sales organization data		X
Product master: Product	Return valuation area data	X	
Product master: Product	Create valuation area data		X
Product master: Product	Return valuation area data by product number, valuation area and valuation type	X	
Product master: Product	Update valuation area data		X
Supplier invoice: Header data	Read supplier invoice data	X	
Supplier invoice: Header data	Read supplier invoice data by key data	X	
Supplier invoice: Header data	Get related to br supplierinvoicenfdocument	X	
Supplier invoice: Header data	Read the supplier invoice data including the withholding tax data	X	
Supplier invoice: Header data	Read the supplier invoice data and the item data with purchase order reference	X	
Supplier invoice: Header data	Read the supplier invoice data including the entered delivery note data	X	
Supplier invoice: Header data	Read the supplier invoice data including the entered purchasing document data	X	
Supplier invoice: Header data	Read the supplier invoice data including the entered service entry sheet (lean) data	X	
Supplier invoice: Header data	Read the supplier invoice data including the additional data	X	
Supplier invoice: Header data	Create a supplier invoice		X
Supplier invoice: Header data	Delete supplier invoice that has not been posted		X
Supplier invoice: Header data	Read the supplier invoice data and the item data for posting to asset	X	
Supplier invoice: Header data	Read the supplier invoice data and the item data for posting to material	X	
Supplier invoice: Header data	Read the supplier invoice data and the item data for posting to G/L account	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Supplier invoice: Header data	Get entities from related to supplierinvoiceodn	X	
Supplier invoice: Header data	Read the supplier invoice data including the tax data	X	
Supplier invoice: Header data	Read supplier invoice item data for posting to asset	X	
Supplier invoice: Header data	Read supplier invoice item data for posting to asset by key data	X	
Supplier invoice: Header data	Read supplier invoice item data for posting to material	X	
Supplier invoice: Header data	Read supplier invoice item data for posting to material by key data	X	
Supplier invoice: Header data	Read supplier invoice item data for posting to G/L account	X	
Supplier invoice: Header data	Read supplier invoice item data for posting to G/L account by key data	X	
Supplier invoice: Header data	Get entities from a supplierinvoiceodn	X	
Supplier invoice: Header data	Get entity from a supplierinvoiceodn by key	X	
Supplier invoice: Header data	Read tax data for supplier invoice	X	
Supplier invoice: Header data	Read tax data for supplier invoice by key data	X	
Customer return: Customer return header	Read all customer return headers	X	
Customer return: Customer return header	Read the header of a specific customer return	X	
Customer return: Customer return header	Create one or more return order headers		X
Customer return: Customer return header	Update the header of a specific return order		X
Customer return: Customer return header	Delete a specific return order		X
Customer return: Customer return header	Read the customer return overview statuses of a specific return order	X	
Customer return: Customer return header	Create one or more items for a specific return order		X
Customer return: Customer return header	Read the header-level business partners of a specific return order	X	
Customer return: Customer return header	Create a header partner for a return order		X
Customer return: Customer return header	Read the header-level pricing elements of a specific return order	X	
Customer return: Customer return header	Read the related objects from a return order header	X	
Customer return: Customer return header	Create related objects for a return order header		X
Customer return: Customer return header	Read the header-level texts of a specific return order	X	
Customer return: Customer return header	Read the return order header for a specific item	X	
Customer return: Customer return header	Read the return order header for a specific header-level business partner	X	
Customer return: Customer return header	Read the return order header for a specific header-level pricing element	X	
Customer return: Customer return header	Read the return order header for a specific related object	X	
Customer return: Customer return header	Read the return order header for a specific piece of header-level text	X	
Customer return: Customer return header	Read all customer return overview statuses	X	
Customer return: Customer return header	Read the specific customer return overview statuses	X	
Customer return: Customer return header	Create one or more return order items		X
Customer return: Customer return header	Read a specific return order item	X	
Customer return: Customer return header	Update a specific return order item		X
Customer return: Customer return header	Delete a specific return order item		X
Customer return: Customer return header	Read all header-level business partners	X	
Customer return: Customer return header	Create a header partner for a specific return order with a specific partner function		X
Customer return: Customer return header	Read a specific header-level business partner	X	
Customer return: Customer return header	Update a specific header-level business partner		X
Customer return: Customer return header	Delete a specific header-level business partner		X
Customer return: Customer return header	Read all header-level pricing elements	X	
Customer return: Customer return header	Read a specific header-level pricing element	X	
Customer return: Customer return header	Update a specific header-level pricing element		X
Customer return: Customer return header	Delete a specific header-level pricing element		X
Customer return: Customer return header	Read the related objects from the headers of all return orders	X	
Customer return: Customer return header	Create a specific related object for a return order header		X
Customer return: Customer return header	Read a specific related object from a return order header	X	
Customer return: Customer return header	Delete a specific related object from a return order header		X
Customer return: Customer return header	Read all header-level texts	X	
Customer return: Customer return header	Read a specific piece of header-level text	X	
Customer return: Customer return header	Update a specific piece of header-level text		X
Customer return: Customer return header	Delete a specific piece of header-level text		X
Customer return: Customer return item	Read all customer return items	X	
Customer return: Customer return item	Read all items of a specific customer return	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Customer return: Customer return item	Read the serial numbers of a specific item	X	
Customer return: Customer return item	Read all serial numbers	X	
Customer return: Customer return item	Read a specific serial number	X	
Credit memo request: Credit memo request h	Read all credit memo request headers	X	
Credit memo request: Credit memo request h	Read the header of a specific credit memo request	X	
Material stock: material master	Read material ID and base unit of measure	X	
Material stock: material master	Read material ID and base unit of measure for a specific material	X	
Material stock: material master	Read material stock information for a specific material	X	
Material stock: material master	Read material stock in account model for a specific set of stock identifiers including material ID and base unit	X	
Material stock: material master	Read material stocks in account model for a specific set of stock identifiers including material ID and base unit	X	
Material stock: material stock	Read material stocks in account model	X	
Material stock: material stock	Read material stock information for a specific material	X	
Material stock: material stock	Read material stock in account model for a specific set of stock identifiers including material ID and base unit	X	
Item subsequent process flow	Read the subsequent items of all debit memo requests items	X	
Item subsequent process flow	Read a subsequent item for a debit memo request item	X	
Debit memo request header	Read the debit memo request header data for a subsequent item of a debit memo request	X	
Debit memo request header	Read all debit memo request headers	X	
Debit memo request header	Create a debit memo request		X
Debit memo request header	Read the header of a specific debit memo request	X	
Debit memo request header	Update a specific debit memo request		X
Debit memo request header	Delete a specific debit memo request		X
Debit memo request item	Read the debit memo request item data for a subsequent item of a debit memo request	X	
Debit memo request item	Read the subsequent items of specified debit memo request items	X	
Debit memo request item	Read all items of a specific debit memo request	X	
Debit memo request item	Create a debit memo request item for a specific debit memo request		X
Debit memo request item	Read the debit memo request header for a specific item	X	
Debit memo request item	Read all debit memo request items	X	
Debit memo request item	Create a debit memo request item		X
Debit memo request item	Read a specific debit memo request item	X	
Debit memo request item	Update a specific debit memo request item		X
Debit memo request item	Delete a specific debit memo request item		X
Item partner	Read the debit memo request header for a specific partner function of a debit memo request item	X	
Item partner	Read the debit memo request item for a specific partner function of a debit memo request item	X	
Item partner	Read the item partners of a specific debit memo request item	X	
Item partner	Create an item partner for a debit memo request item		X
Item partner	Read the item partners for all debit memo requests	X	
Item partner	Create additional item partner for a specific debit memo request item with a specific partner function		X
Item partner	Read the item partners of a specific item and with a specific partner function in a specific debit memo request	X	
Item partner	Update the item partners of a specific item and with a specific partner function in a specific debit memo request		X
Item partner	Delete the item partners of a specific item and with a specific partner function in a specific debit memo request		X
Item pricing element	Read the debit memo request header for a specific pricing element	X	
Item pricing element	Read the debit memo request item for a specific pricing element	X	
Item pricing element	Read the pricing element of a specific debit memo request item	X	
Item pricing element	Read the item pricing elements of all debit memo requests	X	
Item pricing element	Read the item pricing element of a specific item and with specific pricing details in a specific debit memo request	X	
Item pricing element	Update an item pricing element		X
Item pricing element	Delete an item pricing element		X
Header partner	Read the debit memo request header for a specific header partner	X	
Header partner	Read the header partners of a specific debit memo request	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Header partner	Create a header partner for a debit memo request		X
Header partner	Read the header partners of all debit memo requests	X	
Header partner	Create additional header partner for a specific debit memo request with a specific partner function		X
Header partner	Read the header partners of a specific debit memo request and with a specific partner function	X	
Header partner	Update the header partners of a specific debit memo request with a specific partner function		X
Header partner	Delete the header partners of a specific debit memo request with a specific partner function		X
Header pricing element	Read the debit memo request header for a specific pricing element	X	
Header pricing element	Read the header pricing element of a specific debit memo request	X	
Header pricing element	Read the header pricing elements of all debit memo requests	X	
Header pricing element	Read the header pricing element for a specific debit memo request	X	
Header pricing element	Update a header pricing element for a specific debit memo request		X
Header pricing element	Delete a header pricing element for a specific debit memo request		X
Header subsequent process flow	Read the debit memo request header data for a subsequent document of a debit memo request	X	
Header subsequent process flow	Read the subsequent document data of a debit memo request	X	
Header subsequent process flow	Read the subsequent documents of all debit memo requests	X	
Header subsequent process flow	Read a subsequent document of a debit memo request	X	
Header text	Read the debit memo request header for a specific header text	X	
Header text	Read the header texts of all debit memo requests	X	
Header text	Read a specific header text for a specific debit memo request	X	
Header text	Update a specific header text for a specific debit memo request		X
Header text	Delete a specific header text for a specific debit memo request		X
Item text	Read the text of a specific debit memo request item	X	
Item text	Read item texts of all debit memo requests	X	
Item text	Read a specific item text	X	
Item text	Update a specific item text		X
Item text	Delete a specific item text		X
Batch requests	Send a group of requests		X
Sales order without charge header	Read all sales order without charge headers	X	
Sales order without charge header	Create a sales order without charge		X
Sales order without charge header	Read the header of a specific sales order without charge	X	
Sales order without charge header	Update a specific sales order without charge		X
Sales order without charge header	Delete a specific sales order without charge		X
Sales order without charge item	Read all items of a specific sales order without charge	X	
Sales order without charge item	Create a sales order without charge item for a specific sales order without charge		X
Sales order without charge item	Read the sales order without charge header for a specific item	X	
Sales order without charge item	Read all sales order without charge items	X	
Sales order without charge item	Create a sales order without charge item		X
Sales order without charge item	Read a specific sales order without charge item	X	
Sales order without charge item	Update a specific sales order without charge item		X
Sales order without charge item	Delete a specific sales order without charge item		X
Header partner	Read the header partners of a specific sales order without charge	X	
Header partner	Read the sales order without charge header for a specific header partner	X	
Header partner	Read the header partners of all sales order without charges	X	
Header partner	Read the header partners of a specific sales order without charge and with a specific partner function	X	
Header partner	Update the header partners of a specific sales order without charge and with a specific partner function		X
Header partner	Delete the header partners of a specific sales order without charge and with a specific partner function		X
Header text	Read the header texts of a specific sales order without charge	X	
Header text	Read the sales order without charge header for a specific header text	X	
Header text	Read the header texts of all sales order without charges	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Header text	Read a specific header text for a specific sales order without charge	X	
Header text	Update a specific header text for a specific sales order without charge		X
Header text	Delete a specific header text for a specific sales order without charge		X
Item partner	Read the sales order without charge header for a specific partner function of a sales order without charge item	X	
Item partner	Read the item partners of a specific sales order without charge item	X	
Item partner	Read the sales order without charge item for a specific partner function of a sales order without charge item	X	
Item partner	Read the item partners for all sales order without charges	X	
Item partner	Read the item partners of a specific item with a specific partner function in a specific sales order without charge	X	
Item partner	Update the item partners of a specific item with a specific partner function in a specific sales order without charge		X
Item partner	Delete the item partners of a specific item with a specific partner function in a specific sales order without charge		X
Item text	Read the sales order without charge header for a specific text of a sales order without charge item	X	
Item text	Read the text of a specific sales order without charge item	X	
Item text	Read the sales order without charge item for a specific item text	X	
Item text	Read item texts of all sales order without charges	X	
Item text	Read a specific item text	X	
Item text	Update a specific item text		X
Item text	Delete a specific item text		X
Item schedule line	Read the sales order without charge header for a specific schedule line	X	
Item schedule line	Read the schedule lines of a specific sales order without charge item	X	
Item schedule line	Read the sales order without charge item for a specific schedule line	X	
Item schedule line	Read the schedule lines of all sales order without charges	X	
Item schedule line	Read a specific schedule line	X	
Batch requests	Send a group of requests		X
Material movements for confirmation	Read the material document for goods movements	X	
Material movements for confirmation	Read information on a single material document for goods movements	X	
Batch characteristics for material movements	Read the material document for goods movements together with the corresponding batch characteristics	X	
Batch characteristics for material movements	This operation is not supported		X
Batch characteristics for material movements	Read the batch characteristics in material documents for goods movements	X	
Batch characteristics for material movements	Read information on a single batch characteristic in a material document for goods movements	X	
Production order confirmation	Read the header data of a production order confirmation together with the corresponding material documents for goods movements	X	
Production order confirmation	This operation is not supported		X
Production order confirmation	Read information on the header data of production order confirmations	X	
Production order confirmation	Create a new production order confirmation		X
Production order confirmation	Read information on the header data of a single production order confirmation	X	
Production order confirmation	Cancel a production order confirmation		X
Service operations	Fetches proposal data for quantities, work activities, dates and times, and personnel data for confirmations		X
Service operations	Fetches proposal data for goods movements of a confirmation		X
Batch requests	Send a group of requests		X
Bank statement items	Read unmatched bank statement items	X	
Bank statement items	Read a single unmatched bank statement item	X	
Bank reconciliation statements	Read all unmatched bank statement items	X	
Bank reconciliation statements	Read bank reconciliation statements	X	
Bank reconciliation statements	Read a single bank reconciliation statement by key	X	
Bank reconciliation items	Get bank reconciliation items	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Bank reconciliation items	Get a single bank reconciliation item by key	X	
Bank reconciliation items	Generates bank reconciliation statement using automatic match		X
Journal entry items	Read all unmatched journal entry items	X	
Journal entry items	Read unmatched journal entry items	X	
Journal entry items	Read a single unmatched journal entry item	X	
Batch requests	Send a group of requests		X
Defect classes	Read a set of defect classes	X	
Defect classes	Read a specific defect class by its ID	X	
Defect class texts	Read defect classes with text associations	X	
Defect class texts	Read defect class texts with associations to defect classes	X	
Defect class texts	Read a set of defect class texts	X	
Defect class texts	Read the text of a defect class in a specific language	X	
Batch requests	Send a group of requests		X
Batch requests	Send a group of requests		X
Outbound delivery item texts	Create outbound delivery item texts		X
Outbound delivery item texts	Update outbound delivery item texts		X
Outbound delivery item texts	Delete outbound delivery item texts		X
Outbound delivery items	Read texts of specific outbound delivery item	X	
Outbound delivery items	Create outbound delivery item texts		X
Outbound delivery items	Read outbound delivery items	X	
Outbound delivery items	Read outbound delivery items	X	
Outbound delivery items	Update outbound delivery items		X
Outbound delivery items	Delete outbound delivery items		X
Outbound delivery items	Performs a batch split for the outbound delivery item		X
Outbound delivery texts	Create outbound delivery header texts		X
Outbound delivery texts	Update outbound delivery header texts		X
Outbound delivery texts	Delete outbound delivery header texts		X
Outbound delivery headers	Read texts of specific outbound delivery header	X	
Outbound delivery headers	Create outbound delivery header texts		X
Outbound delivery headers	Read handling units headers of specific outbound delivery header	X	
Outbound delivery headers	Read items of specific outbound delivery header	X	
Outbound delivery headers	Read outbound delivery headers	X	
Outbound delivery headers	Create outbound deliveries with reference to preceding document		X
Outbound delivery headers	Read outbound delivery headers	X	
Outbound delivery headers	Update outbound delivery headers		X
Outbound delivery headers	Delete outbound deliveries		X
Outbound delivery headers	Delete all handling units from outbound delivery		X
Outbound delivery headers	Performs batch split and set picked quantity		X
Outbound delivery headers	Invoke action assignhandlingunittodelivery		X
Outbound delivery headers	Set picked quantity in base unit of measure for delivery item		X
Outbound delivery headers	Add serial number to outbound delivery item		X
Outbound delivery headers	Delete serial number from outbound delivery item		X
Outbound delivery headers	Delete all serial numbers from outbound delivery item		X
Outbound delivery headers	Post goods issue for outbound delivery		X
Outbound delivery headers	Reverses goods issue for outbound delivery		X
Outbound delivery headers	Confirms picked quantity of outbound delivery items		X
Outbound delivery headers	Confirms picked quantity of outbound delivery item		X
Outbound delivery headers	Takes over delivery quantity as picked quantity for all outbound delivery items		X
Outbound delivery headers	Takes over delivery quantity as picked quantity for specified outbound delivery item		X
Outbound delivery headers	Set picked quantity and delivery quantity for outbound delivery item		X
Outbound delivery headers	Set picked quantity and delivery quantity for outbound delivery item		X
Handling unit headers	Create handling unit headers		X
Handling unit items	Create handling unit items		X
Outbound delivery partner addresses 2	Read outbound delivery partner addresses	X	
Outbound delivery partner addresses 2	Read outbound delivery partner addresses	X	
Outbound delivery partner addresses 2	Update outbound delivery partner addresses		X
Outbound delivery partners	Read addresses of specific outbound delivery partner	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Outbound delivery partners	Read partners of specific outbound delivery header	X	
Outbound delivery maintenance item object list headers	Read maintenance item object list headers of specific outbound delivery item	X	
Outbound delivery document flows	Read document flows of specific outbound delivery item	X	
Outbound delivery document flows	Read outbound delivery document flows by key	X	
Outbound delivery document flows	Update outbound delivery document flows		X
Outbound delivery maintenance item object list headers	Read maintenance item object lists of specific outbound delivery maintenance item object list header	X	
Outbound delivery partner addresses	Read addresses of specific outbound delivery partner	X	
Batch requests	Send a group of requests		X
Plan category	Get entities from a planning category	X	
Plan category	Get entity from a planning category by key	X	
Plan category text	Get entities from related to text	X	
Plan category text	Get related to planning category	X	
Plan category text	Get entities from a planning category text	X	
Plan category text	Get entity from a planning category text by key	X	
Credit blocked delivery document	Read all credit blocked delivery documents	X	
Credit blocked delivery document	Read a specific credit blocked delivery document	X

Purchaser responsible	Return the purchaser responsible	X	
Purchaser responsible	Update the purchaser responsible		X
Supplier	Return the suppliers	X	
Supplier	Create a supplier		X
Supplier	Return the list of suppliers	X	
Supplier	Create a supplier		X
Supplier	Return a supplier	X	
Supplier	Update a supplier		X
Supplier	Delete a supplier		X
Translation status	Return the translation statuses	X	
Translation status	Create a translation status		X
Translation status	Return the list of translation statuses	X	
Translation status	Create a translation status		X
Translation status	Return a translation status	X	
Translation status	Update a translation status		X
Translation status	Delete a translation status		X
Batch requests	Send a group of requests		X
Service confirmation	Read the header information of all service confirmations in the system	X	
Service confirmation	Create a service confirmation		X
Service confirmation	Read header information of a service confirmation by key	X	
Service confirmation	Update header information of a service confirmation		X
Service confirmation appointment	Read all appointment details within a service confirmation	X	
Service confirmation appointment	Create an appointment within a service confirmation		X
Service confirmation appointment	Read the appointment details of a service confirmation	X	
Service confirmation appointment	Create an appointment for a service confirmation		X
Service confirmation appointment	Read appointment details within service confirmation by key	X	
Service confirmation appointment	Update the appointment for a service confirmation		X
Service confirmation duration	Read all duration details within a service confirmation	X	
Service confirmation duration	Create a duration within a service confirmation		X
Service confirmation duration	Read the duration details of a service confirmation	X	
Service confirmation duration	Create a duration for a service confirmation		X
Service confirmation duration	Read duration details within a service confirmation by key	X	
Service confirmation duration	Update duration for a service confirmation		X
Service confirmation item	Read item information of a service confirmation	X	
Service confirmation item	Create a service confirmation item		X
Service confirmation item	Read service confirmation item by key	X	
Service confirmation item	Read service confirmation item	X	
Service confirmation item	Create a service confirmation item		X
Service confirmation item	Read service confirmation item by key	X	
Service confirmation item	Update service confirmation item by key		X
Service confirmation item	Delete a service confirmation item by key		X
Service confirmation partner	Read the partner within a service confirmation by key	X	
Service confirmation partner	Create a partner within a service confirmation		X
Service confirmation partner	Read partners of a service confirmation	X	
Service confirmation partner	Create a partner for a service confirmation		X
Service confirmation partner	Read partners within service confirmation by key	X	
Service confirmation partner	Update the partner for a service confirmation		X
Service confirmation partner	Delete the partner for a service confirmation		X
Employee resp. for service confirmation	Read an employee responsible of a service confirmation	X	
Employee resp. for service confirmation	Create a new employee within a service confirmation		X
Employee resp. for service confirmation	Read employee responsible of a service confirmation	X	
Employee resp. for service confirmation	Create a new employee within a service confirmation		X
Employee resp. for service confirmation	Read employee responsible of a service confirmation by key	X	
Employee resp. for service confirmation	Update employee responsible of a service confirmation by key		X
Employee resp. for service confirmation	Delete employee responsible of a service confirmation by key		X
Price element of service confirmation	Read pricing elements of a service confirmation	X	
Price element of service confirmation	Create pricing elements for a service confirmation		X
Price element of service confirmation	Read pricing elements of a service confirmation	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Price element of service confirmation	Create pricing elements for a service confirmation		X
Price element of service confirmation	Read pricing elements of a service confirmation by key	X	
Price element of service confirmation	Update pricing elements of a service confirmation		X
Reference objects of srvc confirmation	Read reference objects of a service confirmation	X	
Reference objects of srvc confirmation	Create reference objects for a service confirmation		X
Reference objects of srvc confirmation	Read reference objects of a service confirmation	X	
Reference objects of srvc confirmation	Create reference objects for a service confirmation		X
Reference objects of srvc confirmation	Read reference objects of a service confirmation by key	X	
Reference objects of srvc confirmation	Delete reference objects of a service confirmation		X
Service confirmation user status	Read the user status within a service confirmation by key	X	
Service confirmation user status	Create a user status within a service confirmation		X
Service confirmation user status	Read the service confirmation active user status	X	
Service confirmation user status	Update the service confirmation with a new user status		X
Service confirmation user status	Read the user status within service confirmation by key	X	
Service confirmation user status	Delete user status within a service confirmation		X
Service confirmation text	Read texts of a service confirmation item	X	
Service confirmation text	Create texts for a service confirmation		X
Service confirmation text	Read texts of a service confirmation	X	
Service confirmation text	Create texts for a service confirmation		X
Service confirmation text	Read the texts of a service confirmation by key	X	
Service confirmation text	Update long text of a service confirmation		X
Service confirmation text	Delete texts of a service confirmation		X
Service confirmation item appointment	Read the appointment within a service confirmation item by key	X	
Service confirmation item appointment	Create an appointment for a service confirmation item		X
Service confirmation item appointment	Read the appointment details of a service confirmation item	X	
Service confirmation item appointment	Create an appointment for a service confirmation item		X
Service confirmation item appointment	Read appointment details within a service confirmation item by key	X	
Service confirmation item appointment	Update the appointment for a service confirmation item		X
Service confirmation item duration	Read the duration within a service confirmation item by key	X	
Service confirmation item duration	Create a duration for a service confirmation item		X
Service confirmation item duration	Read the duration details of a service confirmation item	X	
Service confirmation item duration	Create a duration for a service confirmation item		X
Service confirmation item duration	Read the duration details within the service confirmation item by key	X	
Service confirmation item duration	Update the duration for a service confirmation item		X
Service confirmation item partner	Read the partner within a service confirmation item by key	X	
Service confirmation item partner	Create a partner for a service confirmation item		X
Service confirmation item partner	Read partners of a service confirmation item	X	
Service confirmation item partner	Create a partner for a service confirmation item		X
Service confirmation item partner	Read partners within service confirmation item by key	X	
Service confirmation item partner	Update partner for a service confirmation item		X
Service confirmation item partner	Delete the partner for a service confirmation item		X
Price element of srvc confirmation item	Read pricing elements of a service confirmation item	X	
Price element of srvc confirmation item	Create pricing elements for a service confirmation item		X
Price element of srvc confirmation item	Read pricing elements of a service confirmation item	X	
Price element of srvc confirmation item	Create pricing elements for a service confirmation item		X
Price element of srvc confirmation item	Read the pricing elements of a service confirmation item by key	X	
Price element of srvc confirmation item	Update the pricing elements of a service confirmation item		X
Reference obj. of srvc confirmation item	Read reference objects of a service confirmation item by key	X	
Reference obj. of srvc confirmation item	Create reference objects for a service confirmation item		X
Reference obj. of srvc confirmation item	Read pricing elements of a service confirmation item	X	
Reference obj. of srvc confirmation item	Create reference objects for a service confirmation item		X
Reference obj. of srvc confirmation item	Read reference objects of a service confirmation item by key	X	
Reference obj. of srvc confirmation item	Delete reference objects of a service confirmation item		X
Serial number in service confirmation item	Read the serial number of a service confirmation item	X	
Serial number in service confirmation item	Create a serial number for a service confirmation item		X
Serial number in service confirmation item	Read the serial number of a service confirmation item	X	
Serial number in service confirmation item	Create a serial number for a service confirmation item		X
Serial number in service confirmation item	Read the serial number of a service confirmation item by key	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Serial number in service confirmation item	Delete the serial number of a service confirmation item by key		X
Service confirmation item user status	Read the user status within a service confirmation item by key	X

Statistical key figure text	Delete a specific translation of language-dependent fields for a statistical key figure		X
Batch requests	Send a group of requests		X
Capacity assignment	Read the capacity assignments of all work centers	X	
Capacity assignment	Read the capacity assignment for a work center and the capacity category allocation	X	
Capacity interval	Read the list of all work center capacity intervals for a work center	X	
Capacity interval	Create a new work center capacity interval for the given work center		X
Capacity interval	Read all the capacity intervals of all work center capacities	X	
Capacity interval	Create a new capacity interval for a given work center capacity		X
Capacity interval	Read the capacity interval for the given primary keys	X	
Capacity interval	Update the capacity interval for the given primary keys		X
Queued operations capacity	Read the list of all the queued operations for a work center	X	
Queued operations capacity	Read work center operations	X	
Queued operations capacity	Read a single work center operation by its key	X	
Daily operations capacity	Read the list of all operations for the current day in a work center	X	
Daily operations capacity	Read the current day's operations for a work center	X	
Daily operations capacity	Read the current day's operation for a work center	X	
Header	Read all the assigned capacities of a given work center ID	X	
Header	Read all the assigned capacities of a given work center ID	X	
Header	Create a new capacity assignment for a work center		X
Header	Read the scheduling relevant capacity header of a given work center ID	X	
Header	Read all the cost center allocations of a given work center ID	X	
Header	Create a cost center allocation for a work center		X
Header	Read the list of all operations for the current day of a given work center ID	X	
Header	Read all the work center descriptions of a given work center ID	X	
Header	Read the list of all the queued operations of a given work center ID	X	
Header	Read all the headers of all work centers	X	
Header	Create a new work center		X
Header	Read the work center header of a given work center ID	X	
Header	Update the work center header of the given work center ID		X
Capacity shift	Read all the capacity shifts for the given primary keys	X	
Capacity shift	Create a new capacity shift for a work center capacity interval		X
Capacity shift	Read all the capacity shifts of all work center capacity intervals	X	
Capacity shift	Create a new capacity shift for a work center capacity interval		X
Capacity shift	Read capacity shift for the given primary keys	X	
Capacity shift	Update capacity shift for the given primary keys		X
Capacity assignment version 2	Read the list of all the queued operations for a work center	X	
Capacity assignment version 2	Read the list of all operations for the current day in a work center	X	
Capacity assignment version 2	Read the capacity assignments of all work centers	X	
Capacity assignment version 2	Create a new capacity assignment for a work center		X
Capacity assignment version 2	Read the capacity assignment of a work center for the given primary keys	X	
Capacity assignment version 2	Update the capacity assignment of a work center for the given primary keys		X
Capacity header	Read the capacity header of a work center capacity assignment for the given primary keys	X	
Capacity header	Read the capacity headers of all work center capacity assignments	X	
Capacity header	Read the capacity header of a given capacity ID	X	
Capacity header	Update the capacity header of a given capacity ID		X
Capacity interval version 2	Read the capacity interval for the given primary keys	X	
Capacity interval version 2	Create a new capacity interval for a work center capacity		X
Capacity interval version 2	Read the capacity intervals of all capacities	X	
Capacity interval version 2	Create a new capacity interval for a work center capacity		X

Condition record descriptions	Create one or more pricing record texts for a specific condition record		X
Condition record descriptions	Read the condition record for a specific pricing record text	X	
Condition record descriptions	Read all pricing record texts in the system	X	
Condition record descriptions	Create one or more pricing record texts		X
Condition record descriptions	Read a specific pricing record text	X	
Condition record descriptions	Update a specific pricing record text		X
Condition record descriptions	Delete a specific pricing record text		X
Batch requests	Send a group of requests		X
Bill of material object links	Read the object links between the BOM and document info record objects	X	
Bill of material object links	Retrieve the BOM object links for a document info record	X	
Document info record	Retrieve the BOM object links for a document info record	X	
Document info record	Retrieve the BOM objects associated with a document info record	X	
Document info record	Read the document info records	X	
Document info record	Create a document info record		X
Document info record	Retrieve the details of a document info record by key	X	
Document info record	Update the details of a document info record		X
Document info record	Invoke action change status		X
Change record object links	Retrieve the change record object links for a document info record	X	
Change record object links	Retrieve the change record objects associated with a document info record	X	
Change record object links	Read the object links between the change record and document info record objects	X	
Change record object links	Retrieve the change record object links for a document info record	X	
Product object links	Retrieve the product object links for the document info record	X	
Product object links	Retrieve the product object links associated with a document info record	X	
Product object links	Create an object link between a product and a document info record		X
Product object links	Read the object links between the product and document info record objects	X	
Product object links	Create an object link between a product and a document info record		X
Product object links	Retrieve the product object links for a document info record	X	
Product object links	Delete the object link between a product and document info record		X
Classification characteristics	Retrieve the characteristics associated with a document info record	X	
Classification characteristics	Retrieve the list of characteristics	X	
Classification characteristics	Retrieve the characteristics maintained for a document info record	X	
Classification class	Retrieve the classification objects associated with a document info record	X	
Classification class	Retrieve the list of classes	X	
Classification class	Retrieve the class associated with a document info record	X	
Document info record description	Retrieve the document description maintained for a document info record	X	
Document info record description	Create a description for a document info record		X
Document info record description	Retrieve the description maintained for a document info record in a specific language	X	
Document info record description	Read the document descriptions maintained for document info records	X	
Document info record description	Create a document description for a document info record		X
Document info record description	Retrieve the document description maintained for a document info record in a specific language	X	
Document info record description	Update the document description maintained for a document info record in a specific language		X
Document info record description	Delete the document description maintained for a document info record in a specific language		X
Document status value help	Retrieve the document status for a document info record	X	
Document status value help	Read the document statuses for the document types	X	
Document status value help	Read the internal document status	X

Classification characteristic values	Retrieve the classification characteristic values maintained for a document info record	X	
Classification characteristic values	Retrieve the list of characteristic values	X	
Classification characteristic values	Retrieve the classification characteristic values maintained for a document info record	X	
Classification class characteristics	Retrieve the characteristics associated with a class for a document info record	X	
Classification class characteristics	Retrieve the list of characteristics	X	
Classification class characteristics	Retrieve the characteristics associated with a class for a document info record	X	
Batch requests	Send a group of requests		X
Lockbox batch	Get entities from lockbox batch	X	
Lockbox batch	Add new entity to lockbox batch		X
Lockbox batch	Get entity from lockbox batch by key	X	
Lockbox batch item	Get entities from related to item	X	
Lockbox batch item	Get related to header	X	
Lockbox batch item	Get entities from lockbox batch item	X	
Lockbox batch item	Get entity from lockbox batch item by key	X	
Lockbox payment advice item	Get related to root	X	
Lockbox payment advice item	Get entities from related to lockbox clearing	X	
Lockbox payment advice item	Get related to batchitem	X	
Lockbox payment advice item	Get entities from lockbox clearing	X	
Lockbox payment advice item	Get entity from lockbox clearing by key	X	
Batch requests	Send a group of requests		X
Accrual output items	Post manual contract accruals	X	
Read supplier scores	Get entities from related results	X	
SAP value help set	Get entities from SAP value help set	X	
SAP value help set	Add new entity to SAP value help set		X
SAP value help set	Get entity from SAP value help set by key	X	
SAP value help set	Update entity in SAP value help set		X
SAP value help set	Delete entity from SAP value help set		X
SAP currencies	Get entities from SAP currencies	X	
SAP currencies	Add new entity to SAP currencies		X
SAP currencies	Get entity from SAP currencies by key	X	
SAP currencies	Update entity in SAP currencies		X
SAP currencies	Delete entity from SAP currencies		X
SAP units of measure	Get entities from SAP units of measure	X	
SAP units of measure	Add new entity to SAP units of measure		X
SAP units of measure	Get entity from SAP units of measure by key	X	
SAP units of measure	Update entity in SAP units of measure		X
SAP units of measure	Delete entity from SAP units of measure		X
SAP my document descriptions	Get entities from SAP mydocumentdescriptions	X	
SAP my document descriptions	Add new entity to SAP my document descriptions		X
SAP my document descriptions	Get entity from SAP my document descriptions by key	X	
SAP my document descriptions	Update entity in SAP my document descriptions		X
SAP my document descriptions	Delete entity from SAP my document descriptions		X
SAP format set	Get related format	X	
SAP file share set	Get related fileshare	X	
SAP table columns set	Get entities from related tablecolumns	X	
SAP cover page set	Get entities from related coverage	X	
SAP signature set	Get related signature	X	
SAP pdfstandard set	Get related PDF standard	X	
SAP hierarchy set	Get related hierarchy	X	
SAP pdfheader set	Get related header	X	
SAP pdffooter set	Get related footer	X	
Batch requests	Send a group of requests		X
Ledger	Read the items of all ledgers	X	
Ledger	Read a ledger by key	X	
Ledger text	Read the texts of a specific ledger	X	
Ledger text	Read the ledger related to the text item	X	
Ledger text	Read the texts of all ledgers	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Ledger text	Read the texts of a ledger for a specific language and ledger ID	X	
Where used list	Read bills of material for a component	X	
Where used list	Read bills of material for a component based on the specified component key	X	
Batch requests	Send a group of requests		X
Relationship type	Get entities from phase relationship type	X	
Relationship type	Get entity from phase relationship type by key	X	
Relationship type text	Get entities from related to text	X	
Relationship type text	Get related to relshptype	X	
Relationship type text	Get entities from phase relationship type text	X	
Relationship type text	Get entity from phase relationship type text by key	X	
Batch requests	Send a group of requests		X
Field combination assignment	Set of field combination assignments to a condition contract type	X	
Field combination assignment	Set of field combination assignments to a condition contract type	X	
Field assignment to combination type	Set of field combination assignments to a condition contract type	X	
Condition contract type	Set of field combination assignments to a condition contract type	X	
Condition contract type	Condition contract types used in the settlement processes	X	
Condition contract type	Condition contract types used in the settlement processes	X	
Batch requests	Send a group of requests		X
Payment header	Read payment header information	X	
Payment header	Read payment header information of a specific key	X	
Payment items	Read payment items of a single payment header	X	
Payment items	Read payment items information	X	
Payment items	Read information of a single payment item	X	
Payment items	Update item approval status and custom field data		X
Batch requests	Send a group of requests		X
Sales quotation header	Read all sales quotation headers	X	
Sales quotation header	Create a sales quotation		X
Sales quotation header	Read the header of a specific sales quotation	X	
Sales quotation header	Update a specific sales quotation		X
Sales quotation header	Delete a specific sales quotation		X
Sales quotation item	Read all items of a specific sales quotation	X	
Sales quotation item	Create a sales quotation item for a specific sales quotation		X
Sales quotation item	Read the sales quotation header for a specific item	X	
Sales quotation item	Read all sales quotation items	X	
Sales quotation item	Create a sales quotation item		X
Sales quotation item	Read a specific sales quotation item	X	
Sales quotation item	Update a specific sales quotation item		X
Sales quotation item	Delete a specific sales quotation item		X
Header partner	Read the header partners of a specific sales quotation	X	
Header partner	Read the sales quotation header for a specific header partner	X	
Header partner	Read the header partners of all sales quotations	X	
Header partner	Read the header partners of a specific sales quotation and with a specific partner function	X	
Header partner	Update the header partners of a specific sales quotation and with a specific partner function		X
Header partner	Delete the header partners of a specific sales quotation and with a specific partner function		X
Header preceding process flow	Read the preceding documents of a sales quotation	X	
Header preceding process flow	Read the sales quotation header for a preceding document of a sales quotation	X	
Header preceding process flow	Read the preceding documents of all sales quotations	X	
Header preceding process flow	Read a preceding document of a sales quotation	X	
Header pricing element	Read the header pricing element of a specific sales quotation	X	
Header pricing element	Create a header pricing element for a specific sales quotation		X
Header pricing element	Read the sales quotation header for a specific pricing element	X	
Header pricing element	Read the header pricing elements of all sales quotations	X	
Header pricing element	Create a header pricing element for a sales quotation		X
Header pricing element	Read the header pricing element for a specific sales quotation	X	
Header pricing element	Update a header pricing element for a specific sales quotation		X
Header pricing element	Delete a header pricing element for a specific sales quotation		X

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Header related object	Read the related objects of a sales quotation	X	
Header related object	Create related objects for a sales quotation		X

Change number	Create a new object type assignment for one change master		X
Change number	Read change master header data	X	
Change number	Create new change masters		X
Change number	Read the header data of one change master	X	
Change number	Update the header data of one change master		X
Change number	Delete a specific change master		X
Change number	Shifts the validity date of one change master		X
Change number characteristic assignments	Read all characteristics assigned to change masters	X	
Change number characteristic assignments	Read the data of one characteristic assigned to a specific change master	X	
Change number characteristic values	Read the valuation a specific change master by one characteristic	X	
Change number characteristic values	Read the characteristic values of all change masters	X	
Change number characteristic values	Read the characteristic values of a specific change master	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Change number class and characteristic assignment	Read the valuation of a change master based on class and characteristic	X	
Change number class and characteristic assignment	Read all characteristic assignments of a change master through a class	X	
Change number class and characteristic assignment	Read all characteristic assignments of change masters by classes	X	
Change number class and characteristic assignment	Read one characteristic assignment by one class of one change master	X	
Change number class assignments	Read all class assignments of change masters	X	
Change number class assignments	Read one class assignment of a specific change master	X	
Change number object type assignment	Read object type assignment of change masters	X	
Change number object type assignment	Create object type assignments for change masters		X
Change number object type assignment	Read one object type assignment of one change master	X	
Change number object type assignment	Update the object type assignment of one change master		X
Change number object type assignment	Delete an object type assignment of one change master		X
Change number object management records	Read all object management records for a change master	X	
Change number object management records	Read the object management records of all change masters	X	
Change number object management records	Read a specific object management record of a change master	X	
Change number object management records	Update a specific object management record of a change master		X
Change number object management records	Delete a specific object management record from a change master		X
Change number object management records	Assign alternative dates to object management records		X
Change number object management records	Unassign alternative dates to object management records		X
Change number object management records	Read the object management records for document info records of a change master	X	
Change number object management records	Create a new object management record for a dir for one change master		X
Change number object management records	Read object management records for dirs of all change masters	X	
Change number object management records	Create new change master object management records for document info records		X
Change number object management records	Read one change master's object management record for document info records	X	
Change number object management records	Update one change master's object management record for document info records		X
Change number object management records	Delete an object management record for a dir from a specific change master		X
Change number object management records	Assign alternative dates to object management records for dirs of a specific change master		X
Change number object management records	Unassign alternative dates from object management records for dirs of a specific change master		X
Change number object management records	Read the object management records for materials of a change master	X	
Change number object management records	Create a new object management record for a material for one change master		X
Change number object management records	Read object management records for materials of all change masters	X	
Change number object management records	Create new change master object management records for materials		X
Change number object management records	Read one change master's object management record for materials	X	
Change number object management records	Update one change master's object management record for materials		X
Change number object management records	Delete an object management record for a material from a specific change master		X
Change number object management records	Assign alternative dates to object management records for materials of a specific change master		X
Change number object management records	Unassign alternative dates from object management records for materials of a specific change master		X
Change number object management records	Read the object management records for material boms of a change master	X	
Change number object management records	Create a new object management record for a material BOM for one change master		X
Change number object management records	Read object management records for material boms of all change masters	X	
Change number object management records	Create new change master object management records for material boms		X

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Change number object management records	Read one change master's object management record for material boms	X	
Change number object management records	Update one change master's object management record for material boms		X
Change number object management records	Delete an object management record for a material BOM from a specific change master		X
Change number object management records	Assign alternative dates to object management records for material boms of a specific change master		X
Change number object management records	Unassign alternative dates from object management records for material boms of a specific change master		X
Batch requests	Send a group of requests		X
Sales order header	Read all sales order headers in customer projects	X	
Sales order header	Create a sales order for a customer project		X
Sales order header	Read the header of a specific sales order in a customer project	X	
Sales order header	Update the header of a specific sales order in a customer project		X
Sales order item	Read all sales order items in a specific customer project	X	
Sales order item	Create a sales order item for a specific customer project		X
Sales order item	Read all sales order items in customer projects	X	
Sales order item	Create a sales order item in a customer project		X
Sales order item	Read a specific sales order item in a customer project	X	
Sales order item	Update a specific sales order item in a customer project		X
Sales order item	Delete a specific sales order item in a customer project		X
Sales order header partner	Read the header partners of a sales order in a specific customer project	X	
Sales order header partner	Create a header partner of a sales order in a specific customer project		X
Sales order header partner	Read the header partners of all sales order in customer projects	X	
Sales order header partner	Create a header partner for a sales order in a customer project		X
Sales order header partner	Read the header partners with a specific partner function of a sales order in a customer project	X	
Sales order header partner	Update the header partners of a sales order with a specific partner function in a customer project		X
Sales order header text	Read the header texts of a sales order in a specific customer project	X	
Sales order header text	Create a header text for a sales order in a specific customer project		X
Sales order header text	Read the header texts of all sales orders in customer projects	X	
Sales order header text	Create a header text for a sales order in a customer project		X
Sales order header text	Read a specific header text for a sales order in a customer project	X	
Sales order header text	Update a specific header text for a sales order in a customer project		X
Sales order header text	Delete a specific header text for a sales order in a customer project		X
Sales order item partner	Read the partners of a sales order item in a customer project	X	
Sales order item partner	Create a partner for a sales order item in a customer project		X
Sales order item partner	Read the item partners for all sales orders in customer projects	X	
Sales order item partner	Create an item partner for a sales order in a customer project		X
Sales order item partner	Read the item partners with a specific partner function of a sales order in a customer project	X	
Sales order item partner	Update the item partners with a specific partner function of a sales order in a customer project		X
Sales order item text	Read the text of a sales order item in a customer project	X	
Sales order item text	Create a text for a sales order item in a customer project		X
Sales order item text	Read item texts of all sales orders in customer projects	X	
Sales order item text	Create an item text for a sales order in a customer project		X
Sales order item text	Read a specific item text in a customer project	X	
Sales order item text	Update a specific item text in a customer project		X
Sales order item text	Delete a specific item text in a customer project		X
Sales order item work package	Read the work package of a sales order item in a customer project	X	
Sales order item work package	Assign a work package to a sales order item in a customer project		X
Sales order item work package	Read the work packages of all sales order items in customer projects	X	
Sales order item work package	Assign a work package to a sales order item in a customer project		X

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Sales order item work package	Read a specific work package in a customer project	X	
Sales order item work package	Unassign a specific work package in a customer project		X
Sales order item pricing element	Read the pricing elements of a sales order item in a customer project	X	
Sales order item pricing element	Read the item pricing elements for all sales orders in customer projects	X	
Sales order item pricing element	Read specific item pricing element data of a sales order in a customer project	X	
Sales order item billing plan	Read the billing plan of a sales order item in a customer project	X	
Sales order item billing plan	Create a billing plan item for a sales order item in a customer project		X
Sales order item billing plan	Read the billing plans of all sales order items in customer projects	X	
Sales order item billing plan	Create a billing plan item for a sales order item in a customer project		X
Sales order item billing plan	Read a specific billing plan item in a customer project	X	
Sales order item billing plan	Update a specific billing plan item in a customer project		X
Sales order item billing plan	Delete a specific billing plan item in a customer project		X
Resource demands	Return all team-related resource demands in work packages of customer and internal projects	X	
Resource demands	Create a resource demand for a work package team		X
Resource demands	Return details about a specific resource demand in a work package	X	
Resource demands	Update information for a resource demand		X
Resource demands	Delete a resource demand in a work package		X
Resource demand distribution	Return details about the effort distribution for a specific resource demand	X	
Resource demand distribution	Create distribution of efforts for a resource demand in a work package		X
Resource demand distribution	Return information about the resource demand for an item in the demand distribution	X	
Resource demand distribution	Return details about demand distributions for resource demands in the system	X	
Resource demand distribution	Create a new distribution for a resource demand in a work package		X
Resource demand distribution	Return details about effort distribution in a resource demand, for a given month and year	X	
Resource demand distribution	Update a demand distribution for a resource demand in a work package		X
Resource demand distribution	Delete a demand distribution item from a resource demand in a work package		X
Resource demand skills	Return information about the skills assigned to a specific resource demand	X	
Resource demand skills	Return skills assigned to resource demands in all work packages	X	
Resource demand skills	Return information about skills assigned to a resource demand in a work package	X	
Resource supplies	Return details about confirmed staffing assignments for a resource demand	X	
Resource supplies	Create a resource supply for a resource demand in a work package		X
Resource supplies	Return information about the resource demand for a confirmed staffing assignment	X	
Resource supplies	Return all resource supplies in work packages of customer and internal projects	X	
Resource supplies	Create a resource supply for a resource demand in a work package		X
Resource supplies	Return details about a specific resource supply in a work package	X	
Resource supplies	Update information for a resource supply		X
Resource supplies	Delete a resource supply in a work package		X
Work packages	Return details about team resources planned in a work package	X	
Work packages	Create a resource demand for a specific work package		X
Work packages	Return the status of all work package functions in a work package	X	
Work packages	Set the status of a work package function in a work package		X
Work packages	Return work packages and their details, for a given customer or internal project	X	
Work packages	Create work packages for an internal or customer project		X

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Work packages	Return header information for the project of a work package	X	
Work packages	Return information about work packages in customer and internal projects	X	
Work packages	Create a work package for a customer or internal project		X
Work packages	Return information about a specific work package in a customer or internal project	X	
Work packages	Update basic information for a work package		X
Work packages	Delete a work package in a customer or internal project		X
Resource supply distribution	Return the supply distributions for a resource supply	X	
Resource supply distribution	Create distribution of efforts for a resource supply in a work package		X
Resource supply distribution	Return information about a resource supply for a given supply distribution	X	
Resource supply distribution	Return details about supply distributions for resource supplies in the system	X	
Resource supply distribution	Create a new distribution for a resource supply in a work package		X
Resource supply distribution	Return details about effort distribution in a resource supply, for a given month and year	X	
Resource supply distribution	Update a supply distribution for a resource supply in a work package		X
Resource supply distribution	Delete a supply distribution item from a resource supply in a work package		X
Work package functions	Return the work package functions in work packages of customer and internal projects	X	
Work package functions	Set the status of a work package function in a work package		X
Work package functions	Return information about a work package function in the work package of a customer or internal project	X	
Work package functions	Update the status of a work package function in a work package		X
Project	Return details about customer and internal projects	X	
Project	Create a customer or internal project		X
Project	Return details about a customer or internal project	X	
Project	Update the basic information for a customer or internal project		X
Project roles	Return, for a project, the project roles and the business partners assigned to those roles	X	
Project roles	Create project roles for a customer or internal project		X
Project roles	Return the project roles and business partners assigned to them	X	
Project roles	Assign a project role and a business partner to a project		X
Project roles	Return the business partner assigned to a project role	X	
Project roles	Update the business partner assigned to a project role		X
Project roles	Delete an assigned project role from a project		X
Work items	Return all the work items assigned to a work package	X	
Work items	Assign work items to a work package		X
Work items	Return the work items assigned to a work package	X	
Work items	Assign a work item to a work package		X
Work items	Return information about a work item in a work package	X	
Work items	Delete a work item from a work package		X
Demands	Return all the resources and expenses planned in a work package	X	
Demands	Create a resource plan for a work package		X
Demands	Return items planned in work packages of customer and internal projects	X	
Demands	Create a resource plan item in a work package		X
Demands	Return details about a specific item planned in a work package	X	
Demands	Update a plan item in a work package		X
Demands	Delete a plan item from a work package		X
Service operations	Invoke action updatecustprojslsorditemmaterial		X
Batch requests	Send a group of requests		X
Maintain subscriptions	Read subscription information for business events	X	
Maintain subscriptions	Create business event subscriptions		X
Maintain subscriptions	Read business event subscription information	X	
Maintain subscriptions	Update business events subscription status		X
Read subscriptions	Read business event subscription information	X	
Read subscriptions	Read business event subscription information	X	
Sold to party assignment	Read all sold-to party assignments	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Sold to party assignment	Read a specific sold-to party assignment	X	
Batch requests	Send a group of requests		X
Maintenance item	Get entities from maintenance item	X	
Maintenance item	Add new entity to maintenance item		X
Maintenance item	Get entity from maintenance item by key	X	
Maintenance item	Update entity in maintenance item		X
Maintenance item long text	Get entities from related to longtext	X	
Maintenance item long text	Get related to maintenance item	X	
Maintenance item long text	Get entities from maintenance item text	X	
Maintenance item long text	Get entity from maintenance item text by key	X	
Maintenance item long text	Update entity in maintenance item text		X
Maintenance item cause	Get entities from related to maintenance item cause	X	
Maintenance item cause	Get related to maintenance item	X	
Maintenance item cause	Get entities from maintenance item cause	X	
Maintenance item cause	Get entity from maintenance item cause by key	X	
Maintenance item cause	Update entity in maintenance item cause		X
Maintenance item cause	Delete entity from maintenance item cause		X
Maintenance item reason	Get entities from related to maintenance item reason	X	
Maintenance item reason	Get related to maintenance item	X	
Maintenance item reason	Get entities from maintenance item reason	X	
Maintenance item reason	Get entity from maintenance item reason by key	X	
Maintenance item reason	Update entity in maintenance item reason		X
Maintenance item reason	Delete entity from maintenance item reason		X
Maintenance item object list item	Get entities from related to maint item object list item	X	
Maintenance item object list item	Get related to maintenance item tp	X	
Maintenance item object list item	Get entities from maint item object list item	X	
Maintenance item object list item	Get entity from maint item object list item by key	X	
Maintenance item object list item	Update entity in maint item object list item		X
Maintenance item object list item	Delete entity from maint item object list item		X
Maintenance plan call objects	Get entities from related to maint plan call objects	X	
Maintenance plan call objects	Get entities from maintenance plan call object	X	
Maintenance plan call objects	Get entity from maintenance plan call object by key	X	
Maintenance item cause long text	Get related to maintenance item	X	
Maintenance item cause long text	Get entities from related to maintenance item cause text	X	
Maintenance item cause long text	Get related to maintenance item cause	X	
Maintenance item cause long text	Get entities from maintenance item cause text	X	
Maintenance item cause long text	Get entity from maintenance item cause text by key	X	
Maintenance item cause long text	Update entity in maintenance item cause text		X
Maintenance item cause long text	Delete entity from maintenance item cause text		X
Maintenance item reason long text	Get related to maintenance item	X	
Maintenance item reason long text	Get entities from related to maintenance item reason text	X	
Maintenance item reason long text	Get related to maintenance item reason	X	
Maintenance item reason long text	Get entities from maintenance item reason text	X	
Maintenance item reason long text	Get entity from maintenance item reason text by key	X	
Maintenance item reason long text	Update entity in maintenance item reason text		X
Maintenance item reason long text	Delete entity from maintenance item reason text		X
Batch requests	Send a group of requests		X
Condition type text	Read descriptions of all condition types in the system	X	
Condition type text	Read a specific condition type description	X	
Condition types	Read the condition type for a specific condition type description	X	
Condition types	Read the description of a specific condition type	X	
Condition types	Read all condition types in the system	X	
Condition types	Read a specific condition type	X	
Pricing procedure items	Read the condition type from a specific pricing procedure item	X	
Pricing procedure items	Read the pricing procedure for a specific subtotal line	X	
Pricing procedure items	Read the subtotal line description from a specific pricing procedure item	X	
Pricing procedure items	Read all pricing procedure items in the system	X	
Pricing procedure items	Read a specific pricing procedure item	X	
Pricing procedure subtotal lines	Read subtotal line descriptions in all pricing procedures	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Pricing procedure subtotal lines	Read a specific subtotal line description in a specific pricing procedure	X	
Pricing procedures	Read the pricing procedure item of a specific pricing procedure	X	
Pricing procedures	Read the pricing procedure for a specific pricing procedure item	X	
Pricing procedures	Read all pricing procedures in purchasing	X	
Pricing procedures	Read a specific pricing procedure	X	
Pricing procedure text	Read the description of a specific pricing procedure	X	
Pricing procedure text	Read the pricing procedure for a specific pricing procedure description	X	
Pricing procedure text	Read all pricing procedure descriptions	X	
Pricing procedure text	Read a specific pricing procedure description	X	
Batch requests	Send a group of requests		X
Billing document header	Read all billing document headers	X	
Billing document header	Read the header of a specific billing document	X	
Billing document header	Cancel one specific billing document		X
Billing document header	Retrieve a specific billing document in PDF format	X	
Billing document item	Read all items of a specific billing document	X	
Billing document item	Read the billing document header for a specific item	X	
Billing document item	Read all billing document items	X	
Billing document item	Read a specific billing document item	X	
Header partner	Read the header business partners of a specific billing document	X	
Header partner	Read the billing document header for a specific header partner function	X	
Header partner	Read the header business partners of all billing documents	X	
Header partner	Read the header business partners of a specific billing document and with a specific partner function	X	
Header pricing element	Read the header pricing elements of a specific billing document	X	
Header pricing element	Read the billing document header for a specific header pricing element	X	
Header pricing element	Read header pricing elements of all billing documents	X	
Header pricing element	Read the header pricing elements of a specific billing document and specific pricing element	X	
Header text	Read the header texts of a specific billing document	X	
Header text	Read the header texts of all billing documents	X	
Header text	Read the header texts of a specific billing document for a specific language and long text ID	X	
Item partner	Read the billing document header for a specific item partner function	X	
Item partner	Read the item business partners of a specific billing document item	X	
Item partner	Read a billing document item for a specific item partner function	X	
Item partner	Read item business partners for all billing documents	X	
Item partner	Read item business partners of an item and with a specific partner function in a specific billing document	X	
Item pricing element	Read the billing document header for a specific item and pricing element	X	
Item pricing element	Read the item pricing elements of a specific billing document item	X	
Item pricing element	Read a billing document item for a specific item and item-level pricing element	X	
Item pricing element	Read item pricing elements of all billing documents	X	
Item pricing element	Read the item pricing elements for a specific item and item pricing element	X	
Item text	Read the item texts of a specific billing document	X	
Item text	Read item texts of all billing documents	X	
Item text	Read item texts for a specific language and long text ID	X	
Batch requests	Send a group of requests		X
Activity type	Read all available cost center activity types	X	
Activity type	Create a new activity type or a new validity period for an existing activity type		X
Activity type	Read a specific cost center activity type	X	
Activity type	Update a specific cost center activity type		X
Activity type	Delete a specific cost center activity type		X

Resource	API endpoint	Export	Import
Activity type text	Read all language-dependent fields for a specific cost center activity type	X	
Activity type text	Read cost center activity type header fields for a specific language	X	
Activity type text	Read all language-dependent fields for all cost center activity types	X	
Activity type text	Create language-dependent fields for a specific cost center activity type		X
Activity type text	Read language-dependent fields of a cost center activity type in a specific language	X	
Activity type text	Update language-dependent fields of a cost center activity type in a specific language		X
Activity type text	Delete a specific translation of language-dependent fields for a cost center activity type		X
Batch requests	Send a group of requests		X
Legal document content types	Get details of document content type	X	
Legal document content types	Get details of a document content type	X	
Content type text	Get details of document content type text	X	
Content type text	Get details of document content type text	X	
Content type text	Get details of a document content type text	X	
Batch requests	Send a group of requests		X
Serial numbers with material stock	Get entities from a material serial number	X	
Serial numbers with material stock	Get entity from a material serial number by key	X	
Material stock	Get entities from related to matlstkinacctmod	X	
Material stock	Get entities from related to material serial number	X	
Material stock	Read material stocks in account model for a specific set of stock identifiers	X	
Batch requests	Send a group of requests		X
Inspection plan headers	Read all inspection plan headers	X	
Inspection plan headers	Create a new inspection plan header		X
Inspection plan headers	Read a specific inspection plan header by its key	X	
Inspection plan headers	Update a specific inspection plan header		X
Inspection plan headers	Delete a specific inspection plan header		X
Dependent charc spec assignments	Read all the dependent characteristic specifications in the inspection plan	X	
Dependent charc spec assignments	Create a new dependent characteristic specification in the inspection plan		X
Dependent charc spec assignments	Read a specific dependent characteristic specification by its key	X	
Dependent charc spec assignments	Update a specific dependent characteristic specification in the inspection plan		X
Dependent charc spec assignments	Delete a specific dependent characteristic specification in the inspection plan		X
Material assignments	Read all the material assignments in the inspection plan	X	
Material assignments	Create a new material assignment in the inspection plan		X
Material assignments	Read a specific material assignment by its key	X	
Material assignments	Update a specific material assignment in the inspection plan		X
Material assignments	Delete a specific material assignment in the inspection plan		X
Characteristic assignments	Read all the characteristics in the inspection plan	X	
Characteristic assignments	Create a new characteristic in the inspection plan		X
Characteristic assignments	Read a specific characteristic by its key	X	
Characteristic assignments	Update a specific characteristic in the inspection plan		X
Characteristic assignments	Delete a specific characteristic in the inspection plan		X
Inspection plan operations	Read all the operations in the inspection plan	X	
Inspection plan operations	Create a new operation in the inspection plan		X
Inspection plan operations	Read a specific operation by its key	X	
Inspection plan operations	Update a specific operation in the inspection plan		X
Inspection plan operations	Delete a specific operation in the inspection plan		X
Prt assignments	Read all the production resources/tools in the inspection plan	X	
Prt assignments	Create a new production resource/tool in the inspection plan		X
Prt assignments	Read a specific production resource/tool by its key	X	
Prt assignments	Update a specific production resource/tool in the inspection plan		X
Prt assignments	Delete a specific production resource/tool in the inspection plan		X
Batch requests	Send a group of requests		X

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Production volumes	Get entities from production volume	X	
Production volumes	Add new entity to production volume		X
Production volumes	Get entity from production volume by key	X	
Batch requests	Send a group of requests		X
Controlling area	Get entities from a controlling area	X	
Controlling area	Get entity from a controlling area by key	X	
Buffer profile details	Get entities from a profile details	X	
Buffer profile details	Get entity from a profile details by key	X	
Buffer profile assigned to plant	Get related to profile assignment	X	
Buffer profile assigned to plant	Get entities from related to profile details	X	
Buffer profile assigned to plant	Get entities from a profileassignedtoplant	X	
Buffer profile assigned to plant	Get entity from a profileassignedtoplant by key	X	
Batch requests	Send a group of requests		X
Document header	Read information on material document header level	X	
Document header	Create a material document		X
Document header	Read information for a specific material document header	X	
Document header	Cancel a material document		X
Document items	Read information for a specific material document header and material document items	X	
Document items	Read information on material document item and header level for a specific material document item	X	
Document items	Read information on material document items level	X	
Document items	Read information on material document items level for a specific material document	X	
Document items	Cancel a material document item		X
Serial numbers	Read information on serial numbers for a specific material document item	X	
Serial numbers	Read information of serial numbers on material document items level	X	
Serial numbers	Read information of serial number on material document item level for a specific material document, item, year and material	X	
Batch requests	Send a group of requests		X
Inbound delivery document flows	Read inbound delivery document flows by key	X	
Inbound delivery document flows	Update inbound delivery document flows		X
Inbound delivery items	Read document flows of specific inbound delivery item	X	
Inbound delivery items	Read items of specific inbound delivery header	X	
Inbound delivery items	Read inbound delivery items	X	
Inbound delivery items	Read inbound delivery items	X	
Inbound delivery items	Update inbound delivery items		X
Inbound delivery items	Delete inbound delivery items		X
Inbound delivery items	Confirms putaway quantity of inbound delivery item		X
Inbound delivery items	Takes over delivery quantity as putaway quantity for specified inbound delivery item		X
Inbound delivery items	Create an additional batch split item for an inbound delivery item		X
Inbound delivery items	Add serial number to inbound delivery item		X
Inbound delivery items	Delete all serial numbers from inbound delivery item		X
Inbound delivery items	Delete serial number from inbound delivery item		X
Inbound delivery items	Set putaway quantity in base unit of measure for delivery item		X
Inbound delivery items	Set putaway quantity and delivery quantity for inbound delivery item		X
Inbound delivery items	Set putaway quantity and delivery quantity for inbound delivery item		X
Inbound delivery headers	Read inbound delivery headers	X	
Inbound delivery headers	Create inbound deliveries with reference to preceding document		X
Inbound delivery headers	Read inbound delivery headers	X	
Inbound delivery headers	Update inbound delivery headers		X
Inbound delivery headers	Delete inbound deliveries		X
Inbound delivery headers	Confirms putaway quantity of inbound delivery items		X
Inbound delivery headers	Post goods receipt for inbound delivery		X
Inbound delivery headers	Takes over delivery quantity as putaway quantity for all inbound delivery items		X
Inbound delivery headers	Reverses goods receipt for inbound delivery		X

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Inbound delivery texts	Read texts of specific inbound delivery header	X	
Inbound delivery partners	Read partners of specific inbound delivery header	X	
Inbound delivery maintenance item object list	Read maintenance item object lists of specific inbound delivery item	X	
Inbound delivery item texts	Read texts of specific inbound delivery item	X	
Inbound delivery partner addresses	Read addresses of specific inbound delivery partner	X	
Inbound delivery maintenance item object list	Read maintenance item objects of specific inbound delivery maintenance item object list	X	
Batch requests	Send a group of requests		X
Budget validity of grant	Get entities from grantbdgtvaliditylink	X	
Budget validity of grant	Get entity from grantbdgtvaliditylink by key	X	
Budget validity of grant	Update entity in grantbdgtvaliditylink		X
Budget validity of grant	Delete entity from grantbdgtvaliditylink		X
Grant	Get related to grant	X	
Grant	Get entities from related to grantbdgtvaliditylink	X	
Grant	Get entities from grant	X	
Grant	Add new entity to grant		X
Grant	Get entity from grant by key	X	
Grant	Update entity in grant		X
Grant	Delete entity from grant		X
Grant	Invoke action change life cycle status		X
Cost sharing for grant	Get entities from related to grant cost sharing link	X	
Cost sharing for grant	Get related to grant	X	
Cost sharing for grant	Get entities from grant cost sharing link	X	
Cost sharing for grant	Get entity from grant cost sharing link by key	X	
Cost sharing for grant	Update entity in grant cost sharing link		X
Cost sharing for grant	Delete entity from grant cost sharing link		X
Grant specific funds	Get entities from related to grant funds link	X	
Grant specific funds	Get related to grant	X	
Grant specific funds	Get entities from grant funds link	X	
Grant specific funds	Get entity from grant funds link by key	X	
Grant specific funds	Update entity in grant funds link		X
Grant specific funds	Delete entity from grant funds link		X
Object overhead cost cap for grant	Get entities from related to grantobjvrheadcostcaplink	X	
Object overhead cost cap for grant	Get related to grant	X	
Object overhead cost cap for grant	Get entities from grantobjvrheadcostcaplink	X	
Object overhead cost cap for grant	Get entity from grantobjvrheadcostcaplink by key	X	
Object overhead cost cap for grant	Update entity in grantobjvrheadcostcaplink		X
Object overhead cost cap for grant	Delete entity from grantobjvrheadcostcaplink		X
Overhead cost cap for grant	Get entities from related to grant overhead cost cap link	X	
Overhead cost cap for grant	Get related to grant	X	
Overhead cost cap for grant	Get entities from grant overhead cost cap link	X	
Overhead cost cap for grant	Get entity from grant overhead cost cap link by key	X	
Overhead cost cap for grant	Update entity in grant overhead cost cap link		X
Overhead cost cap for grant	Delete entity from grant overhead cost cap link		X
Overhead cost for grant	Get entities from related to grant overhead cost link	X	
Overhead cost for grant	Get related to grant	X	
Overhead cost for grant	Get entities from grant overhead cost link	X	
Overhead cost for grant	Get entity from grant overhead cost link by key	X	
Overhead cost for grant	Update entity in grant overhead cost link		X
Overhead cost for grant	Delete entity from grant overhead cost link		X
Grant specific sponsored classes	Get entities from related to grant sponsored classes link	X	
Grant specific sponsored classes	Get related to grant	X	
Grant specific sponsored classes	Get entities from grant sponsored classes link	X	
Grant specific sponsored classes	Get entity from grant sponsored classes link by key	X	
Grant specific sponsored classes	Update entity in grant sponsored classes link		X
Grant specific sponsored classes	Delete entity from grant sponsored classes link		X
Grant specific sponsored programs	Get entities from related to grant sponsored programs link	X	
Grant specific sponsored programs	Get related to grant	X	
Grant specific sponsored programs	Get entities from grant sponsored programs link	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Grant specific sponsored programs	Get entity from grant sponsored programs link by key	X	
Grant specific sponsored programs	Update entity in grant sponsored programs link		X
Grant specific sponsored programs	Delete entity from grant sponsored programs link		X
Grant text	Get entities from related to text	X	
Grant text	Get related to grant	X	
Grant text	Get entities from granttext	X	
Grant text	Get entity from granttext by key	X	
Grant text	Update entity in granttext		X
Batch requests	Send a group of requests		X
Credit memo request simulation	Simulates the creation of a credit memo request		X
Batch requests	Send a group of requests		X
Maintenance order confirmation	Get entities from maint order confirmation	X	
Maintenance order confirmation	Add new entity to maint order confirmation		X
Maintenance order confirmation	Get entity from maint order confirmation by key	X	
Maintenance order confirmation	Invoke action cancelmaintenance order confirmation		X
Maintenance order confirmation long text	Get related to longtext	X	
Maintenance order confirmation long text	Get related to maint order confirmation	X	
Maintenance order confirmation long text	Get entities from longtext	X	
Maintenance order confirmation long text	Get entity from longtext by key	X	
Batch requests	Send a group of requests		X
Fund hierarchy	Get entities from fund hierarchy	X	
Fund hierarchy	Get entity from fund hierarchy by key	X	
Fund hierarchy text	Get entities from related to fundcorehierarchy text	X	
Fund hierarchy text	Get entities from fund hierarchy text	X	
Fund hierarchy text	Get entity from fund hierarchy text by key	X	
Fund hierarchy node	Get entities from related to fund core hierarchy node	X	
Fund hierarchy node	Get related to fundcorehierarchy	X	
Fund hierarchy node	Get entities from fund hierarchy node	X	
Fund hierarchy node	Get entity from fund hierarchy node by key	X	
Fund hierarchy node text	Get entities from related to fund core hierarchy node text	X	
Fund hierarchy node text	Get entities from fund hierarchy node text	X	
Fund hierarchy node text	Get entity from fund hierarchy node text by key	X	
Batch requests	Send a group of requests		X
A country	Read the items of all countries/regions	X	
A country	Read a country/region by key	X	
A country text	Read the texts of a specific country/region	X	
A country text	Read the country/region related to the text item	X	
A country text	Read the texts of all country/region items	X	
A country text	Read the texts of a country/region for a specific language and country/region key	X	
Defect categories	Read all defect categories	X	
Defect categories	Read a specific defect category	X	
Defect category texts	Read defect categories with text associations	X	
Defect category texts	Read a set of defect category texts	X	
Defect category texts	Read the text of a defect category in a specific language	X	
Batch requests	Send a group of requests		X
Sales order simulation	Simulates the creation of a sales order		X
Value added service for so simulation	Get entities from a sales order value added service	X	
Value added service for so simulation	Add new entity to a sales order value added service		X
Value added service for so simulation	Get entity from a sales order value added service by key	X	
Value added service for so simulation	Update entity in a sales order value added service		X
Value added service for so simulation	Delete entity from a sales order value added service		X
Batch requests	Send a group of requests		X
Item partner	Read the return order header for a specific item-level business partner	X	
Item partner	Read the item-level business partners of a specific item	X	
Item partner	Create a header partner for a return order		X
Item partner	Read the return order item for a specific item-level business partner	X	
Item partner	Read all item-level business partners	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Item partner	Create a partner for a return order item with a specific partner function		X
Item partner	Read a specific item-level business partner	X	
Item partner	Update a specific item-level business partner		X
Item partner	Delete a specific item-level business partner		X
Item pricing element	Read the return order header for a specific item-level pricing element	X	
Item pricing element	Read the item-level pricing elements of a specific item	X	
Item pricing element	Read the return order item for a specific item-level pricing element	X	
Item pricing element	Read all item-level pricing elements	X	
Item pricing element	Read a specific item-level pricing element	X	
Item pricing element	Update a specific item-level pricing element		X
Item pricing element	Delete a specific item-level pricing element		X
Item related object	Read the return order header for a specific item-level related object	X	
Item related object	Read the related objects of a specific return order item	X	
Item related object	Create related objects for a specific return order item		X
Item related object	Read the return order item for a specific related object	X	
Item related object	Read the related objects of all return order items	X	
Item related object	Create a specific related object for a specific return order item		X
Item related object	Read a specific related object of a specific return order item	X	
Item related object	Delete a specific related object from a specific return order item		X
Item text	Read the return order header for a specific piece of item-level text	X	
Item text	Read the item-level texts of a specific item	X	
Item text	Read the return order item for a specific piece of item-level text	X	
Item text	Read all item-level texts	X	
Item text	Read a specific piece of item-level text	X	
Item text	Update a specific piece of item-level text		X
Item text	Delete a specific piece of item-level text		X
Return process step	Read the return order header for a specific advanced return process step	X	
Return process step	Read the advanced return process steps of a specific item	X	
Return process step	Read the return order item for a specific advanced return process step	X	
Return process step	Read all advanced return process steps	X	
Return process step	Read a specific advanced return process step	X	
Schedule line	Read the return order header for a specific schedule line	X	
Schedule line	Read the schedule lines of a specific item	X	
Schedule line	Read the return order item for a specific schedule line	X	
Schedule line	Read all schedule lines	X	
Schedule line	Read a specific schedule line	X	
Service operations	Reject a specific return order		X
Service operations	Approves a specific return order		X
Batch requests	Send a group of requests		X
Payment advice	Read all available payment advices	X	
Payment advice	Create a new payment advice		X
Payment advice	Read a specific payment advice	X	
Payment advice	Update a specific payment advice		X
Payment advice	Delete a specific payment advice		X
Payment advice line item	Read all item fields for a specific payment advice header	X	
Payment advice line item	Create items for a specific payment advice header		X
Payment advice line item	Read all item fields for all payment advice headers	X	
Payment advice line item	Create items for a specific payment advice header		X
Payment advice line item	Read all fields of a specific payment advice item	X	
Payment advice line item	Update items for a specific payment advice header		X
Payment advice line item	Delete a specific payment advice item		X
Batch requests	Send a group of requests		X
Returns order simulation	Simulates the creation of a return order		X
Batch requests	Send a group of requests		X
Quota arrangement	Get the header details of all the quota arrangements in the system	X	
Quota arrangement	Create a quota arrangement header		X

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Quota arrangement	Get the header details of a quota arrangement	X	
Quota arrangement	Update the header details of a quota arrangement		X
Quota arrangement	Delete the header of a quota arrangement		X
Item	Get the item details of all the items in a quota arrangement	X	
Item	Add an item to a quota arrangement		X
Item	Get the header details of an item in a quota arrangement	X	
Item	Get the item details of all the items, in all the quota arrangements in the system	X	
Item	Add an item to a quota arrangement		X
Item	Get the item details of an item in a quota arrangement	X	
Item	Update the item details of an item in a quota arrangement		X
Item	Delete an item in a quota arrangement		X
Batch requests	Send a group of requests		X
Budget account	Get entities from budget account	X	
Budget account	Get entity from budget account by key	X	
Budget account text	Get entities from related to text	X	
Budget account text	Get related to budget account	X	
Budget account text	Get entities from budget account text	X	
Budget account text	Get entity from budget account text by key	X	
Batch requests	Send a group of requests		X
Legal document status	Get entities from legal document status	X	
Legal document status	Get entity from legal document status by key	X	
Legal document status text	Get entities from related to lglcintntmdocstatus text	X	
Legal document status text	Get related to lglcintntmdocstatus	X	
Legal document status text	Get entities from legal document status text	X	
Legal document status text	Get entity from legal document status text by key	X	
Batch requests	Send a group of requests		X
Mrp area data	Return mrp area data	X	
Mrp area data	Create mrp area data		X
Mrp area data	Return mrp area data	X	
Mrp area data	Create mrp area data		X
Mrp area data	Return mrp area data by product number, plant and mrp area	X	
Mrp area data	Update mrp area data		X
Quality management data	Return quality management data	X	
Quality management data	Return quality management data	X	
Quality management data	Create quality management data		X
Quality management data	Return quality management data by product number and plant	X	
Quality management data	Update quality management data		X
Sales data at plant level	Return sales data	X	
Sales data at plant level	Return sales data	X	
Sales data at plant level	Create sales data		X
Sales data at plant level	Return sales data by product number and plant	X	
Sales data at plant level	Update sales data		X
Storage data at plant level	Return storage data	X	
Storage data at plant level	Return storage data	X	
Storage data at plant level	Create storage data		X
Storage data at plant level	Return storage data by product number and plant	X	
Storage data at plant level	Update storage data		X
Plant text	Return plant text	X	
Plant text	Return plant text	X	
Plant text	Create plant text		X
Plant text	Return plant text by product number and plant	X	
Plant text	Update plant text		X
Plant text	Delete plant text		X
International trade data	Return international trade data	X	
International trade data	Return international trade data	X	
International trade data	Create international trade data		X
International trade data	Return international trade data by product number and plant	X	
International trade data	Update international trade data		X
Costing data at plant level	Return costing data	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Costing data at plant level	Return costing data	X	
Costing data at plant level	Create costing data		X
Costing data at plant level	Return costing data by product number and plant	X	
Costing data at plant level	Update costing data		X
Forecasting data	Return forecasting data	X	
Forecasting data	Return forecasting data	X	
Forecasting data	Create forecasting data		X
Forecasting data	Return forecasting data by product number and plant	X	
Forecasting data	Update forecasting data		X
Procurement data	Return procurement data	X	
Procurement data	Return procurement data	X	
Procurement data	Create procurement data		X
Procurement data	Return procurement data by product number and plant	X	
Procurement data	Update procurement data		X
Supply planning data	Return supply planning data	X	
Supply planning data	Return supply planning data	X	
Supply planning data	Create supply planning data		X
Supply planning data	Return supply planning data by product number and plant	X	
Supply planning data	Update supply planning data		X
Work scheduling data	Return work scheduling data	X	
Work scheduling data	Return work scheduling data	X	
Work scheduling data	Create work scheduling data		X
Work scheduling data	Return work scheduling data by product number and plant	X	
Work scheduling data	Update work scheduling data		X
Storage location data	Return storage location data	X	
Storage location data	Create storage location data		X
Storage location data	Return storage location data	X	
Storage location data	Create storage location data		X
Storage location data	Return storage location data by product number, plant and storage location	X	
Storage location data	Update storage location data		X
Gtin data	Return gtin data	X	
Gtin data	Create gtin data		X
Gtin data	Return gtin data	X	
Gtin data	Create gtin data		X
Gtin data	Return gtin data by product number, alternative unit and consecutive number	X	
Gtin data	Update gtin data		X
Gtin data	Delete gtin data		X
Sales text	Return sales text	X	
Sales text	Create sales text		X
Sales text	Return sales text	X	
Sales text	Create sales text		X
Sales text	Return sales text by product number, sales organization, distribution channel and language	X	
Sales text	Update sales text		X
Sales text	Delete sales text		X
Material ledger account	Return material ledger account data	X	
Material ledger account	Create material ledger account data		X
Material ledger account	Return material ledger account data	X	
Material ledger account	Create material ledger account data		X
Material ledger account	Return material ledger account data by product number, valuation area, valuation type and currency	X	
Material ledger account	Update material ledger account data		X
Material ledger prices	Return material ledger price data	X	
Material ledger prices	Create material ledger price data		X
Material ledger prices	Return material ledger price data	X	
Material ledger prices	Create material ledger price data		X
Material ledger prices	Return material ledger price data by product number, valuation area, valuation type and currency	X	
Material ledger prices	Update material ledger price data		X

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Valuation account data	Return valuation account data	X	
Valuation account data	Return valuation account data	X	
Valuation account data	Create valuation account data		X
Valuation account data	Return valuation account data by product number, valuation area and valuation type	X	
Valuation account data	Update valuation account data		X
Valuation costing data	Return costing data	X	
Valuation costing data	Return costing data	X	
Valuation costing data	Create costing data		X
Valuation costing data	Return costing data by product number, valuation area and valuation type	X	
Valuation costing data	Update costing data		X
Batch requests	Send a group of requests		X
Batches	Get entities from batch	X	
Batches	Add new entity to batch		X
Batches	Get entity from batch by key	X	
Batches	Update entity in batch		X
Batch characteristics	Get entities from related to batch charc	X	
Batch characteristics	Get related to batch	X	
Batch characteristics	Get entities from batch charc	X	
Batch characteristics	Get entity from batch charc by key	X	
Batch class assignments	Get related to batch class	X	
Batch class assignments	Get related to batch	X	
Batch class assignments	Get entities from batch class	X	
Batch class assignments	Add new entity to batch class		X
Batch class assignments	Get entity from batch class by key	X	
Batch class assignments	Delete entity from batch class		X
Plant specific batch information	Get entities from related to batch plant	X	
Plant specific batch information	Get related to batch	X	
Plant specific batch information	Get entities from batch plant	X	
Plant specific batch information	Get entity from batch plant by key	X	
Plant specific batch information	Update entity in batch plant		X
Batch texts	Get entities from related to batchtext	X	
Batch texts	Get related to batch	X	
Batch texts	Get entities from batchtext	X	
Batch texts	Get entity from batchtext by key	X	
Batch texts	Update entity in batchtext		X
Batch texts	Delete entity from batchtext		X
Batch characteristics valuation	Get entities from related to batch charc value	X	
Batch characteristics valuation	Add new entity to related to batch charc value		X
Batch characteristics valuation	Get related to batch charc	X	
Batch characteristics valuation	Get entities from batch charc value	X	
Batch characteristics valuation	Add new entity to batch charc value		X
Batch characteristics valuation	Get entity from batch charc value by key	X	
Batch characteristics valuation	Update entity in batch charc value		X
Batch characteristics valuation	Delete entity from batch charc value		X
Batch requests	Send a group of requests		X
Company code data	Read the items of all company codes	X	
Company code data	Read a company code by key	X	
Journal entry item basic data	Read the company code data of a specific universal entry item	X	
Journal entry item basic data	Read the current cost center data of a specific universal entry item	X	
Journal entry item basic data	Read the chart of accounts data of a specific universal entry item	X	
Journal entry item basic data	Read universal journal entry items	X	
Journal entry item basic data	Read a universal journal entry item by key	X	
Cost center data	Read the items of all cost centers	X	
Cost center data	Read a cost center by key	X	
General ledger account in chart of accounts	Read the items of all chart of accounts	X	
General ledger account in chart of accounts	Read a chart of account by key	X	
Profit center data	Read the current profit center data of a specific universal entry item	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Profit center data	Read the items of all profit centers	X	
Profit center data	Read a profit center by key	X	
Process order confirmation	Read information on the header data of process order confirmations	X	
Process order confirmation	Create a new process order confirmation		X
Process order confirmation	Read information on the header data of a single process order confirmation	X	
Process order confirmation	Cancel a process order confirmation		X
Material movements for confirmation	Read the header data of a process order confirmation together with the corresponding material documents for goods movements	X	
Material movements for confirmation	This operation is not supported		X
Material movements for confirmation	Read the material document for goods movements	X	
Material movements for confirmation	Read information on a single material document for goods movements	X	
Batch characteristics for material movements	Read the material document for goods movements together with the corresponding batch characteristics	X	
Batch characteristics for material movements	This operation is not supported		X
Batch characteristics for material movements	Read the batch characteristics in material documents for goods movements	X	
Batch characteristics for material movements	Read information on a single batch characteristic in a material document for goods movements	X	
Service operations	Fetches proposal data for quantities, work activities, dates and times, and personnel data for confirmations		X
Service operations	Fetches proposal data for goods movements of a confirmation		X
Batch requests	Send a group of requests		X
Kanban containers	Read kanban containers	X	
Kanban containers	Read a single kanban container by its key	X	
Kanban containers	Set the status of a kanban container		X
Kanban containers	Set the locking status of a kanban container		X
Kanban containers	Withdraws a given quantity from a kanban container		X
Kanban containers	Retries the failed status change of a kanban container		X
Kanban container detailed quantities	Read the batch quantities for a kanban container	X	
Kanban container detailed quantities	Read batch quantities of kanban containers	X	
Kanban container detailed quantities	Read the batch quantity for a single kanban container and batch combination	X	
Kanban deliveries	Read the delivery information of a kanban container	X	
Kanban deliveries	Read the kanban container of a delivery information	X	
Kanban deliveries	Read delivery information related to kanban containers	X	
Kanban deliveries	Read the delivery information for a single kanban container by the container key	X	
Kanban control cycles	Read the kanban control cycle of a kanban container	X	
Kanban control cycles	Read the kanban containers of a kanban control cycle	X	
Kanban control cycles	Read the kanban control cycle of a delivery information	X	
Kanban control cycles	Read kanban control cycles	X	
Kanban control cycles	Create a kanban control cycle		X
Kanban control cycles	Read a single kanban control cycle by its key	X	
Kanban control cycles	Update a single kanban control cycle		X
Kanban control cycles	Delete an existing kanban control cycle		X
Kanban control cycles	Set the life cycle status of a kanban control cycle		X
Kanban control cycles	Add a kanban container to an event-driven kanban control cycle		X
Kanban control cycles	Withdraws a quantity from a control cycle		X
Kanban container delivery addresses	Read the kanban control cycle of a kanban container delivery address	X	
Kanban container delivery addresses	Read kanban container delivery addresses	X	
Kanban container delivery addresses	Read a single kanban container delivery address by its key	X	
Batch requests	Send a group of requests		X
Procurement data	Return procurement data	X	
Procurement data	Return procurement data by product number and plant	X	
Plant data	Return procurement data	X	
Plant data	Return storage location data	X	
Plant data	Return supply planning data	X	
Plant data	Return plant data	X	
Plant data	Return plant data	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Plant data	Return plant data by product number and plant	X	
Storage location data	Return storage location data	X	
Storage location data	Return storage location data by product number, plant and storage location	X	
Supply planning data	Return supply planning data	X	
Supply planning data	Return supply planning data by product number and plant	X	
Product	Return product master records	X	
Product	Return product master record by product number	X	
Product description	Return description	X	
Product description	Return description	X	
Product description	Return description by product number and language	X	
Characteristics	List of characteristics assigned to any class used in product classification	X	
Characteristics	List of characteristics assigned to any class used in product classification	X	
Characteristics	Characteristic assigned to any class that is used in product classification for a given key	X	
Class assignments	List of classes assigned to products	X	
Class assignments	List of classes assigned to products	X	
Class assignments	Product class assignment for a given key	X	
Sales tax data	Return sales tax data	X	
Sales tax data	Return sales tax data	X	
Sales tax data	Return sales tax data by product number and country	X	
Sales organization data	Return sales organization data	X	
Sales organization data	Return sales organization data	X	
Sales organization data	Return sales organization data by product, sales organization and distribution channel	X	
Work scheduling data	Return work scheduling data	X	
Work scheduling data	Return work scheduling data	X	
Work scheduling data	Return work scheduling data by product number and plant	X	
Characteristic valuations	Read the valuation of the selected characteristic, class type and product	X	
Characteristic valuations	List of characteristic valuations for products	X	
Characteristic valuations	Characteristic valuation of a product for a given key	X	
Class characteristics	Read the characteristics assigned to the class	X	
Class characteristics	Read the valuation of the selected characteristic, class type and product	X	
Class characteristics	List of characteristics assigned to a class	X	
Class characteristics	Class characteristic assignment for a given key	X	
Class header data	Header data of the selected class	X	
Class header data	List of class header data	X	
Class header data	Class header data for a given key	X	
Batch requests	Send a group of requests		X
Maintenance item	Get entities from maintenance item	X	
Maintenance item	Add new entity to maintenance item		X
Maintenance item	Get entity from maintenance item by key	X	
Maintenance item	Update entity in maintenance item		X
Maintenance item long text	Get entities from related to longtext	X	
Maintenance item long text	Get related to maintenance item	X	
Maintenance item long text	Get entities from maintenance item text	X	
Maintenance item long text	Get entity from maintenance item text by key	X	
Maintenance item long text	Update entity in maintenance item text		X
Maintenance item cause	Get entities from related to maintenance item cause	X	
Maintenance item cause	Get related to maintenance item	X	
Maintenance item cause	Get entities from maintenance item cause	X	
Maintenance item cause	Get entity from maintenance item cause by key	X	
Maintenance item cause	Update entity in maintenance item cause		X
Maintenance item cause	Delete entity from maintenance item cause		X
Maintenance item reason	Get entities from related to maintenance item reason	X	
Maintenance item reason	Get related to maintenance item	X	
Maintenance item reason	Get entities from maintenance item reason	X	
Maintenance item reason	Get entity from maintenance item reason by key	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Maintenance item reason	Update entity in maintenance item reason		X
Maintenance item reason	Delete entity from maintenance item reason		X
Maintenance item object list item	Get entities from related to maint item object list item	X	
Maintenance item object list item	Get related to maintenance item tp	X	
Maintenance item object list item	Get entities from maint item object list item	X	
Maintenance item object list item	Get entity from maint item object list item by key	X	
Maintenance item object list item	Update entity in maint item object list item		X
Maintenance item object list item	Delete entity from maint item object list item		X
Maintenance plan call objects	Get entities from related to maint plan call objects	X	
Maintenance plan call objects	Get entities from maintenance plan call object	X	
Maintenance plan call objects	Get entity from maintenance plan call object by key	X	
Maintenance item cause long text	Get related to maintenance item	X	
Maintenance item cause long text	Get entities from related to maintenance item cause text	X	
Maintenance item cause long text	Get related to maintenance item cause	X	
Maintenance item cause long text	Get entities from maintenance item cause text	X	
Maintenance item cause long text	Get entity from maintenance item cause text by key	X	
Maintenance item cause long text	Update entity in maintenance item cause text		X
Maintenance item cause long text	Delete entity from maintenance item cause text		X
Maintenance item reason long text	Get related to maintenance item	X	
Maintenance item reason long text	Get entities from related to maintenance item reason text	X	
Maintenance item reason long text	Get related to maintenance item reason	X	
Maintenance item reason long text	Get entities from maintenance item reason text	X	
Maintenance item reason long text	Get entity from maintenance item reason text by key	X	
Maintenance item reason long text	Update entity in maintenance item reason text		X
Maintenance item reason long text	Delete entity from maintenance item reason text		X
Maintenance plan	Get entities from related to item	X	
Maintenance plan	Add new entity to related to item		X
Maintenance plan	Get entities from maintenance plan	X	
Maintenance plan	Add new entity to maintenance plan		X
Maintenance plan	Get entity from maintenance plan by key	X	
Maintenance plan	Update entity in maintenance plan		X
Maintenance plan	Invoke action assignmaintitemtomaintplan		X
Maintenance plan	Invoke action resetmaintplanstsmrkdfordeletn		X
Maintenance plan	Invoke action restartmaintplnschedule		X

Project	Read enterprise project definitions by project uuid	X	
Project	Update enterprise project definitions		X
Project	Delete enterprise project definitions by project uuid		X
Project	Set the processing status for enterprise project definitions		X
Project	Create a project by copying data from an existing project		X
Project element	Read the project that is related to one particular project element	X	
Project element	Read enterprise project elements of a certain enterprise project	X	
Project element	Create enterprise project element for a certain project		X
Project element	Read enterprise project elements	X	
Project element	Create enterprise project elements		X
Project element	Read enterprise project elements by project element uuid	X	
Project element	Update enterprise project elements		X
Project element	Delete enterprise project elements by project element uuid		X
Project element	Read the parent project element that is related to one particular project element	X	
Project element	Read sub project elements of one particular project element	X	
Project element	Create sub project element for a certain project element		X
Project element	Changes the position of enterprise project elements		X
Project element	Set the processing status for enterprise project elements		X
Project element	Invoke action changeperioddistributionoption		X
Project JVA	Read the project to which the joint venture accounting data is related	X	
Project JVA	Read the project jva of one particular project	X	
Project JVA	Read joint venture accounting data of enterprise project definitions	X	
Project JVA	Read joint venture accounting data of enterprise project definition by project uuid	X	
Project JVA	Update joint venture accounting data of enterprise project definitions		X
Project role	Read the project that is related to a particular project role	X	
Project role	Read the project roles of one particular project	X	
Project role	Create a project role for a certain project		X
Project role	Read project role data of enterprise projects	X	
Project role	Create project roles		X
Project role	Read projects roles by project role uuid	X	
Project team member	Read the project that is related to one particular project team member	X	
Project team member	Read the project team members of one particular project	X	
Project team member	Create a project team member for a certain project		X
Project team member	Read project team member data of enterprise projects	X	
Project team member	Create project team members		X
Project team member	Read project team members by project team member uuid	X	
Project public sector	Read the project public sector of one particular project	X	
Project public sector	Read the project to which the public sector data is related	X	
Project public sector	Read public sector data of enterprise project definitions	X	
Project public sector	Read public sector data of enterprise project definitions by project uuid	X	
Project public sector	Update public sector data of enterprise project definitions		X
Project element jva	Read the project containing the project element to which the joint venture accounting data is related	X	
Project element jva	Read the joint venture accounting data of one particular project element	X	
Project element jva	Read the project element to which the joint venture accounting data is related	X	
Project element jva	Read joint venture accounting data of enterprise project elements	X	
Project element jva	Read joint venture accounting data of enterprise project element by project element uuid	X	
Project element jva	Update joint venture accounting data of enterprise project elements		X
Project element block function	Read the project containing the project element to which the blocked functions information is related	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Project element block function	Read the project element block function of one particular project element	X	
Project element block function	Read the project element to which the blocked functions information is related	X	
Project element block function	Read blocked functions information of enterprise project elements	X	
Project element block function	Create blocked functions information for enterprise project elements		X
Project element block function	Read blocked functions information of enterprise project elements by project uuid	X	
Project element block function	Update blocked functions information of enterprise project elements		X
Project element public sector	Read the project containing the project element to which the public sector data is related	X	
Project element public sector	Read the project element public sector of one particular project element	X	
Project element public sector	Read the project element that is related to one particular project element public sector	X	
Project element public sector	Read public sector data of enterprise project elements	X	
Project element public sector	Read public sector data of enterprise project elements by project element uuid	X	
Project element public sector	Update public sector data of enterprise project elements		X
Project element work item	Read the project containing the project element that is related to a particular work item	X	
Project element work item	Read the work items of a particular project element	X	
Project element work item	Create work items for project elements		X
Project element work item	Read the project element that is related to a particular work item	X	
Project element work item	Read work item data of enterprise project elements	X	
Project element work item	Read work item data of enterprise project elements by work item uuid	X	
Project element work item	Update work items of project elements		X
Project element work item	Delete work items of project elements		X
Project entitlement	Read the project that is related to one particular project entitlement	X	
Project entitlement	Read the project role that is related to a project entitlement	X	
Project entitlement	Read the entitlement data of one particular project team member	X	
Project entitlement	Create project entitlement for a team member		X
Project entitlement	Read the project team member that is related to a project entitlement	X	
Project entitlement	Read project entitlement data of enterprise projects	X	
Project entitlement	Create project entitlements		X
Project entitlement	Read project entitlements by project entitlement uuid	X	
Project entitlement	Update project entitlement data		X
Project entitlement	Delete project entitlement data		X
Project element deliverable	Read the project element deliverable of one particular project element	X	
Project element deliverable	Create deliverable for an enterprise project element		X
Project element deliverable	Read the project element that is related to one particular project element deliverable	X	
Project element deliverable	Read deliverable data of enterprise project elements	X	
Project element deliverable	Read deliverable data of enterprise project elements by deliverable uuid	X	
Project element deliverable	Update deliverable data of enterprise project elements		X
Project element deliverable distribution	Read the deliverable distribution of one particular project element deliverable	X	
Project element deliverable distribution	Create deliverable distribution for a deliverable		X
Project element deliverable distribution	Read the deliverable that is related to one particular deliverable distribution	X	
Project element deliverable distribution	Read deliverable distribution data of enterprise project element deliverables	X	
Project element deliverable distribution	Read deliverable distribution data of enterprise project element deliverables by deliverable distribution uuid	X	
Project element deliverable distribution	Update deliverable distribution data of enterprise project element deliverables		X
Project element work item text	Read the work item text of a particular configured work item	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Project element work item text	Read the configured work item text data of project elements by work item ID and language	X	
Project element work item text	Read the configured work item text data of project elements by work item ID and language	X	
Batch requests	Send a group of requests		X
Sales contract header	Read all sales contract headers	X	
Sales contract header	Create a sales contract		X
Sales contract header	Read the header of a specific sales contract	X	
Sales contract header	Update the header of a specific sales contract		X
Sales contract header	Delete a specific sales contract		X
Sales contract item	Read items of a specific sales contract	X	
Sales contract item	Create one or more items for a specific sales contract		X
Sales contract item	Read the sales contract header for a specific sales contract item	X	
Sales contract item	Read all sales contract items	X	
Sales contract item	Create one or more sales contract items for a specific sales contract		X
Sales contract item	Read a specific sales contract item	X	
Sales contract item	Update a specific sales contract item		X
Sales contract item	Delete a specific sales contract item		X
Header partner	Read the header-level partners of a specific sales contract	X	
Header partner	Create the header partners of a specific sales contract		X
Header partner	Read the sales contract header for a specific header partner	X	
Header partner	Read all header-level partners	X	
Header partner	Read a specific header-level partner	X	
Header partner	Update a specific header-level partner		X
Header partner	Delete a specific header-level partner		X
Header pricing element	Read the header-level pricing elements of a specific sales contract	X	
Header pricing element	Read the sales contract header for a specific header pricing element	X	
Header pricing element	Read all header-level pricing elements	X	
Header pricing element	Read a specific header-level pricing element	X	
Header pricing element	Update a specific header-level pricing element		X
Header pricing element	Delete a specific header-level pricing element		X
Header text	Read the header-level texts of a specific sales contract	X	
Header text	Read the sales contract header for a specific header text	X	
Header text	Read all header-level texts	X	
Header text	Read a specific header-level text	X	
Header text	Update a specific header-level text		X
Header text	Delete a specific header-level text		X
Item partner	Read the sales contract header for a specific item partner	X	
Item partner	Read the item-level partner of a specific sales contract item	X	
Item partner	Read the sales contract item for a specific item partner	X	
Item partner	Read all item-level partners	X	
Item partner	Read a specific item-level partner	X	
Item partner	Update a specific item-level partner		X
Item partner	Delete a specific item-level partner		X
Item pricing element	Read the sales contract header for a specific item pricing element	X	
Item pricing element	Read the item-level pricing element of a specific sales contract item	X	
Item pricing element	Read the sales contract item for a specific item pricing element	X	
Item pricing element	Read all item-level pricing elements	X	
Item pricing element	Read a specific item-level pricing element	X	
Item pricing element	Update a specific item-level partner		X
Item pricing element	Update a specific item-level pricing element		X
Item text	Read the sales contract header for a specific item text	X	
Item text	Read the item-level text of a specific sales contract item	X	
Item text	Read the sales contract item for a specific item text	X	
Item text	Read all item-level texts	X	
Item text	Read a specific item-level text	X	
Item text	Update a specific item-level text		X

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Item text	Delete a specific item-level text		X
Service operations	Approves a specific sales contract		X
Service operations	Reject a specific sales contract		X
Batch requests	Send a group of requests		X
Segment	Read the items of all segments	X	
Segment	Read a segment by key	X	
Segment text	Read the texts of a specific segment	X	
Segment text	Read the segment related to the text item	X	
Segment text	Read the texts of all segments	X	
Segment text	Read the texts of a segment for a specific language and segment ID	X	
Nota fiscal data	Get entities from a br supplierinvoicendocument	X	
Nota fiscal data	Get entity from a br supplierinvoicendocument by key	X	
Withholding tax data	Read withholding tax data of supplier invoice	X	
Withholding tax data	Read withholding tax data of supplier invoice by key data	X	
Account assignment data	Read account assignment data of supplier invoice item	X	
Account assignment data	Read account assignment data of supplier invoice item by key data	X	
Item with purchase order reference	Read the item data with purchase order reference including the account assignment data	X	
Item with purchase order reference	Read supplier invoice item data with purchase order reference	X	
Item with purchase order reference	Read supplier invoice item data with purchase order reference by key data	X	
Si entered delivery notes	Read entered delivery note data for supplier invoice	X	
Si entered delivery notes	Read entered delivery note data for supplier invoice by key data	X	
Si entered purchasing documents	Read entered purchasing document data for supplier invoice	X	
Si entered purchasing documents	Read entered purchasing document data for supplier invoice by key data	X	
Si entered service entry sheets (lean)	Read entered service entry sheet (lean) data for supplier invoice	X	
Si entered service entry sheets (lean)	Read entered service entry sheet (lean) data for supplier invoice by key data	X	
Additional data	Read additional data for supplier invoice	X	
Additional data	Read additional data for supplier invoice by key data	X	
Service operations	Invoke action post		X
Service operations	Releases a supplier invoice		X
Service operations	Reverses a supplier invoice and return the reversal number		X
Batch requests	Send a group of requests		X
Item subsequent process flow	Read the subsequent documents of all credit memo requests	X	
Item subsequent process flow	Read a subsequent document of a credit memo request	X	
Credit memo request header	Read the credit memo request header data for a subsequent item of a credit memo request	X	
Credit memo request header	Create a credit memo request		X
Credit memo request header	Update a specific credit memo request		X
Credit memo request header	Delete a specific credit memo request		X
Credit memo request item	Read the credit memo request item data for a subsequent item of a credit memo request	X	
Credit memo request item	Read the subsequent items of specified credit memo request items	X	
Credit memo request item	Read all items of a specific credit memo request	X	
Credit memo request item	Create a credit memo request item for a specific credit memo request		X
Credit memo request item	Read the credit memo request header for a specific item	X	
Credit memo request item	Read all credit memo request items	X	
Credit memo request item	Create a credit memo request item		X
Credit memo request item	Read all items of a specific credit memo request	X	
Credit memo request item	Update a specific credit memo request item		X
Credit memo request item	Delete a specific credit memo request item		X
Item partner	Read the credit memo request header for a specific partner function of a credit memo request item	X	
Item partner	Read the credit memo request item for a specific partner function of a credit memo request item	X	
Item partner	Read the item partners of a specific credit memo request item	X	
Item partner	Create an item partner for a credit memo request item		X

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Item partner	Read the item partners for all credit memo requests	X	
Item partner	Create additional item partner for a specific credit memo request item with a specific partner function		X
Item partner	Read the item partners of a specific credit memo request item	X	
Item partner	Update the item partners of a specific item and with a specific partner function in a specific credit memo request		X
Item partner	Delete the item partners of a specific item and with a specific partner function in a specific credit memo request		X
Item pricing element	Read the credit memo request header for a specific pricing element	X	
Item pricing element	Read the credit memo request item for a specific pricing element	X	
Item pricing element	Read the pricing element of a specific credit memo request item	X	
Item pricing element	Read the item pricing elements of all credit memo requests	X	
Item pricing element	Read the pricing element of a specific credit memo request item	X	
Item pricing element	Update an item pricing element		X
Item pricing element	Delete an item pricing element		X
Item text	Read the credit memo request header for a specific text of a credit memo request item	X	
Item text	Read the credit memo request item for a specific item text	X	
Item text	Read the text of a specific credit memo request item	X	
Item text	Read item texts of all credit memo requests	X	
Item text	Read a specific item text	X	
Item text	Update a specific item text		X
Item text	Delete a specific item text		X
Header partner	Read the credit memo request header for a specific header partner	X	
Header partner	Read the header partners of a specific credit memo request	X	
Header partner	Create a header partner for a credit memo request		X
Header partner	Read the header partners of all credit memo requests	X	
Header partner	Create additional header partner for a specific credit memo request with a specific partner function		X
Header partner	Read the header partners of a specific credit memo request	X	
Header partner	Update the header partners of a specific credit memo request with a specific partner function		X
Header partner	Delete the header partners of a specific credit memo request with a specific partner function		X
Header pricing element	Read the credit memo request header for a specific pricing element	X	
Header pricing element	Read the header pricing element of a specific credit memo request	X	
Header pricing element	Read the header pricing elements of all credit memo requests	X	
Header pricing element	Read the header pricing element of a specific credit memo request	X	
Header pricing element	Update a header pricing element for a specific credit memo request		X
Header pricing element	Delete a header pricing element for a specific credit memo request		X
Header subsequent process flow	Read the credit memo request header data for a subsequent document of a credit memo request	X	
Header subsequent process flow	Read the subsequent documents of specified credit memo requests	X	
Header subsequent process flow	Read the subsequent documents of all credit memo requests	X	
Header subsequent process flow	Read a subsequent document of a credit memo request	X	
Header text	Read the credit memo request header for a specific header text	X	
Header text	Read the header texts of a specific credit memo request	X	
Header text	Read the header texts of all credit memo requests	X	
Header text	Read a specific header text for a specific credit memo request	X	
Header text	Update a specific header text for a specific credit memo request		X
Header text	Delete a specific header text for a specific sales order		X
Service operations	Invoke action release approval request		X
Service operations	Invoke action reject approval request		X
Batch requests	Send a group of requests		X
Product allocation object	Read product allocation objects	X	
Product allocation object	Read product allocation object	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Product allocation object description	Read product allocation object description	X	
Product allocation object description	Read product allocation object in a specific language	X

Product allocation object description	Read product allocation object description in a specific language	X	
Product allocation object meta data	Read characteristic meta data	X	
Product allocation object meta data	Read product allocation object	X	
Product allocation object meta data	Read characteristic meta data	X	
Product allocation object meta data	Read characteristic meta data	X	
Product allocation characteristic value combir	Read characteristic value combinations	X	
Product allocation characteristic value combir	Create characteristic value combination		X
Product allocation characteristic value combir	Read product allocation object	X	
Product allocation characteristic value combir	Read characteristic value combinations	X	
Product allocation characteristic value combir	Read characteristic value combination	X	
Product allocation characteristic value combir	Update characteristic value combination		X
Product allocation characteristic value combir	Delete characteristic value combination		X
Product allocation characteristic value combir	Set lifecycle status of a characteristic value combination to active		X
Product allocation characteristic value combir	Set lifecycle status of a characteristic value combination to inactive		X
Product allocation object time series	Read product allocation object	X	
Product allocation object time series	Read product allocation object time series	X	
Product allocation object time series	Create product allocation object time series		X
Product allocation object time series	Read characteristic value combinations	X	
Product allocation object time series	Read product allocation object time series	X	
Product allocation object time series	Read time series	X	
Product allocation object time series	Update time series for a characteristic value combination		X
Product allocation object time series	Delete time series of a characteristic value combination		X
Batch requests	Send a group of requests		X
Iam: business role change doc	Get entities from business role changes	X	
Iam: business role change doc	Get entity from business role changes by key	X	
Batch requests	Send a group of requests		X
Service order	Read the header information of all service orders in the system	X	
Service order	Create a service order		X
Service order	Read header information of a service order by key	X	
Service order	Update header information of a service order		X
Service order appointment	Read all appointment details within a service order	X	
Service order appointment	Create an appointment within a service order		X
Service order appointment	Read appointment details of a service order	X	
Service order appointment	Create an appointment for a service order		X
Service order appointment	Read appointment details within the service order by key	X	
Service order appointment	Update the appointment for a service order		X
Service confirmations	Read service confirmation information of a service order	X	
Service confirmations	Read header information of all service confirmations in the system	X	
Service confirmations	Read header information of a service confirmation by key	X	
Defect data within service order	Read the defect data within a service order	X	
Defect data within service order	Create a defect within a service order		X
Defect data within service order	Read the defect data within all service orders in the system	X	
Defect data within service order	Update the service order with a new defect		X
Defect data within service order	Read defect data within a service order by key	X	
Defect data within service order	Update defect data within a service order		X
Defect data within service order	Delete the defect data within a service order		X
Service order duration	Read all duration details within a service order	X	
Service order duration	Create a duration within a service order		X
Service order duration	Read the duration details of a service order	X	
Service order duration	Create a duration for a service order		X
Service order duration	Read the duration details within the service order by key	X	
Service order duration	Update the duration for a service order		X
Service order items	Read item information of a service order	X	
Service order items	Create a service order item		X
Service order items	Read the service order details of a service item	X	
Service order items	Read a service order item	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import

Purchase contract item	Get entities from related to purcritemnotes	X	
Purchase contract item	Add new entity to related to purcritemnotes		X
Purchase contract item	Get the details of all the items, in all the purchase contracts in the system	X	
Purchase contract item	Create an item in all the purchase contracts in the system		X
Purchase contract item	Get the item details of an item in a purchase contract	X	
Purchase contract item	Update an item in a purchase contract		X
Delivery address	Get the details of all the delivery addresses of all the items, in all the purchase contracts in the system	X	
Delivery address	Add a delivery address to all the items, in all the purchase contracts in the system		X
Delivery address	Get the details of all the delivery addresses of a specific item in a purchase contract	X	
Delivery address	Update the details of all the delivery addresses of a specific item in a purchase contract		X
Item notes	Get all the item notes in the system	X	
Item notes	Create a new item note for a purchase contract		X
Item notes	Get the item notes of a specific purchase contract	X	
Item notes	Update the item notes of a purchase contract		X
Purchase contract item condition validity	Get entities from related to purcontritemcndnvaldty	X	
Purchase contract item condition validity	Get the purchase contract item details of a specific condition validity	X	
Purchase contract item condition validity	Get the details of the validities of all the items in the system	X	
Purchase contract item condition validity	Get the detail of a specific validity maintained for a specific item	X	
Purchase contract	Get the details of a purchase contract to which a specific item belongs	X	
Purchase contract	Get the item details of all the items in a purchase contract	X	
Purchase contract	Add new entity to related to purchase contract item		X
Purchase contract	Get the purchase contract details of a specific condition validity	X	
Purchase contract	Get the header details of all the purchase contracts in the system	X	
Purchase contract	Create a new purchase contract		X
Purchase contract	Get the header details of a purchase contract	X	
Purchase contract	Update the header details of a purchase contract		X
Purchase contract item condition amount	Get the condition validity details of a specific condition type	X	
Purchase contract item condition amount	Get the details of the condition amounts of a specific validity of a specific item	X	
Purchase contract item condition amount	Get the purchase contract details of a specific condition type	X	
Purchase contract item condition amount	Get the details of the condition amounts of all the validities of all the items in the system	X	
Purchase contract item condition amount	Get the detail of a specific condition amount maintained for a specific validity, maintained for a specific item	X	
Purchase contract header conditions validity	Get entities from related to purcontrhdcndnvaldty	X	
Purchase contract header conditions validity	Get the purchase contract details of a specific condition validity	X	
Purchase contract header conditions validity	Get the details of the validities of the header in the system	X	
Purchase contract header conditions validity	Get the detail of a specific validity maintained for the header	X	
Header notes	Get entities from related to purctrnotes	X	
Header notes	Add new entity to related to purctrnotes		X
Header notes	Get all the header notes in the system	X	
Header notes	Create a new header note for a purchase contract		X
Header notes	Get the header notes of a specific purchase contract	X	
Header notes	Update the header notes of a specific purchase contract		X
Purchase contract partner	Get the partner details of a purchase contract	X	
Purchase contract partner	Add new entity to related to purctrpartners		X
Purchase contract partner	Get the details of all the partners of all the purchase contracts in the system	X	
Purchase contract partner	Add a business partner to all the purchase contracts in the system		X
Purchase contract partner	Get the partner details of a purchase contract	X	
Purchase contract partner	Update the partner details of a purchase contract		X
Purchase contract header conditions amount	Get the purchase contract details of a specific condition type	X	
Purchase contract header conditions amount	Get the condition validity details of a specific condition type	X	
Purchase contract header conditions amount	Get the details of the condition amounts of a specific validity of a specific header	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Purchase contract header conditions amount	Get the details of the condition amounts of all the validities of the header in the system	X	
Purchase contract header conditions amount	Get the detail of a specific condition amount maintained for a specific validity, maintained for the header	X	
Purchase contract header conditions scales	Get the purchase contract details of a specific condition scale	X	
Purchase contract header conditions scales	Get the details of the condition scales of a specific condition amount of a specific validity of a specific header	X	
Purchase contract header conditions scales	Get the details of the condition amount of a specific condition scale of a specific validity of a specific header	X	
Purchase contract header conditions scales	Get the details of the condition scales of all the condition amounts of all the validities of the header in the system	X	
Purchase contract header conditions scales	Get the detail of a specific condition scale amount maintained for a specific amount, maintained for the header	X	
Purchase contract item condition scales	Get the purchase contract details of a specific condition scale	X	
Purchase contract item condition scales	Get the details of the condition scales of a specific condition amount of a specific validity of a specific item	X	
Purchase contract item condition scales	Get the details of the condition amount of a specific condition scale of a specific validity of a specific item	X	
Purchase contract item condition scales	Get the details of the condition scales of all the condition amounts of all the validities of all the items in the system	X	
Purchase contract item condition scales	Get the detail of a specific condition amount maintained for a specific validity, maintained for a specific item	X

Inventory special stock valuation type (master data)	Get entities from inventory special stock valuation type 2	X	
Inventory special stock valuation type (master data)	Get entity from inventory special stock valuation type 2 by key	X	
Elimination profit center (master data)	Get entities from elimination profit center	X	
Elimination profit center (master data)	Get entity from elimination profit center by key	X	
Global currency (master data)	Get entities from global currency	X	
Global currency (master data)	Get entity from global currency by key	X	
Predecessor reference document type (master data)	Get entities from predecessor reference doc type	X	
Predecessor reference document type (master data)	Get entity from predecessor reference doc type by key	X	
Offsetting account (master data)	Get entities from offsetting account	X	
Offsetting account (master data)	Get entity from offsetting account by key	X	
Functional currency (master data)	Get entities from functional currency	X	
Functional currency (master data)	Get entity from functional currency by key	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Freely defined currency 4 (master data)	Get entities from free defined currency 4	X	
Freely defined currency 4 (master data)	Get entity from free defined currency 4 by key	X	
Line item is completed (master data)	Get entities from lineitemiscompleted	X	
Line item is completed (master data)	Get entity from lineitemiscompleted by key	X	
Partner project internal ID (master data)	Get entities from partner project internal ID	X	
Partner project internal ID (master data)	Get entity from partner project internal ID by key	X	
Inventory special stock supplier (master data)	Get entities from inventory special stock supplier	X	
Inventory special stock supplier (master data)	Get entity from inventory special stock supplier by key	X	
Account assignment type (master data)	Get entities from account assignment type	X	
Account assignment type (master data)	Get entity from account assignment type by key	X	
Product sold group (master data)	Get entities from sold product group	X	
Product sold group (master data)	Get entity from sold product group by key	X	
Fiscal year of clearing journal entry (master data)	Get entities from clearing journal entry fiscal year	X	
Fiscal year of clearing journal entry (master data)	Get entity from clearing journal entry fiscal year by key	X	
Logical system (master data)	Get entities from logical system	X	
Logical system (master data)	Get entity from logical system by key	X	
Group asset (master data)	Get entities from group master fixed asset	X	
Group asset (master data)	Get entity from group master fixed asset by key	X	
Sales document item (master data)	Get entities from sales document item	X	
Sales document item (master data)	Get entity from sales document item by key	X	
Partner order cat. (master data)	Get entities from partner order category	X	
Partner order cat. (master data)	Get entity from partner order category by key	X	
Partner bus. area (master data)	Get entities from partner business area	X	
Partner bus. area (master data)	Get entity from partner business area by key	X	
Partner func. area (master data)	Get entities from partner functional area	X	
Partner func. area (master data)	Get entity from partner functional area by key	X	
Project external ID (master data)	Get entities from project external ID	X	
Project external ID (master data)	Get entity from project external ID by key	X	
Origin cost center (master data)	Get entities from origin cost center	X	
Origin cost center (master data)	Get entity from origin cost center by key	X	
Freely defined currency 5 (master data)	Get entities from free defined currency 5	X	
Freely defined currency 5 (master data)	Get entity from free defined currency 5 by key	X	
Company code currency (master data)	Get entities from company code currency	X	
Company code currency (master data)	Get entity from company code currency by key	X	
Origin object type (master data)	Get entities from origin object type	X	
Origin object type (master data)	Get entity from origin object type by key	X	
Controlling object debit type (master data)	Get entities from controlling object debit type	X	
Controlling object debit type (master data)	Get entity from controlling object debit type by key	X	
Partner WBS element internal ID (master data)	Get entities from partner WBS element internal ID	X	
Partner WBS element internal ID (master data)	Get entity from partner WBS element internal ID by key	X	
Account number (master data)	Get entities from gl account hierarchy	X	
Account number (master data)	Get entity from gl account hierarchy by key	X	
Freely defined currency 7 (master data)	Get entities from free defined currency 7	X	
Freely defined currency 7 (master data)	Get entity from free defined currency 7 by key	X	
Partner company code (master data)	Get entities from partner company code	X	
Partner company code (master data)	Get entity from partner company code by key	X	
Item (master data)	Get entities from sales order item	X	
Item (master data)	Get entity from sales order item by key	X	
Offsetting account type (master data)	Get entities from offsetting account type	X	
Offsetting account type (master data)	Get entity from offsetting account type by key	X	
Partner sales document item (master data)	Get entities from partner sales document item	X	
Partner sales document item (master data)	Get entity from partner sales document item by key	X	
Inventory valuation type (master data)	Get entities from inventory valuation type	X	
Inventory valuation type (master data)	Get entity from inventory valuation type by key	X	
Additional metadata	Get entities from additional meta data	X	
Additional metadata	Get entity from additional meta data by key	X	
SAP value help set	Get entities from SAP value help set	X	
SAP value help set	Add new entity to SAP value help set		X
SAP value help set	Get entity from SAP value help set by key	X	
SAP value help set	Update entity in SAP value help set		X

Combined WBS element	Read a set of entries from combined WBS element	X	
Combined WBS element	Read an entry by key from combined WBS element	X	
Combined WBS element text	Read associated entries of combined WBS element text	X	
Combined WBS element text	Read associated entries of combined WBS element	X	
Combined WBS element text	Read a set of entries from combined WBS element text	X	
Combined WBS element text	Read an entry by key from combined WBS element text	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
WBS element internal ID	Read internal IDs the entity set is deprecated use entity set combined WBS element instead	X	
WBS element internal ID	Read an entry by key from WBS element internal ID - deprecated	X	
Batch requests	Send a group of requests		X
Budget period hierarchy	Get entities from budget period hierarchy	X	
Budget period hierarchy	Get entity from budget period hierarchy by key	X	
Budget period hierarchy node	Get entities from related to budgetperiodcorehiernode	X	
Budget period hierarchy node	Get related to budgetperiodcorehierarchy	X	
Budget period hierarchy node	Get entities from budget period hierarchy node	X	
Budget period hierarchy node	Get entity from budget period hierarchy node by key	X	
Budget period hierarchy text	Get entities from related to text	X	
Budget period hierarchy text	Get entities from budget period hierarchy text	X	
Budget period hierarchy text	Get entity from budget period hierarchy text by key	X	
Budget period hierarchy node text	Get entities from related to text	X	
Budget period hierarchy node text	Get entities from budget period hierarchy node text	X	
Budget period hierarchy node text	Get entity from budget period hierarchy node text by key	X	
Batch requests	Send a group of requests		X
Condition supplements	Read all condition supplements in the system	X	
Condition supplements	Create one or more condition supplements		X
Condition supplements	Read a specific condition supplement	X	
Condition supplements	Update a specific condition supplement		X
Condition supplements	Delete a specific condition supplement		X
Condition record validity	Read validity of the condition record for a specific condition supplement	X	
Condition record validity	Read the condition supplements for a specific condition record validity period	X	
Condition record validity	Create one or more condition supplements for a specific condition record validity period		X
Condition record validity	Read validity of all condition records in the system	X	
Condition record validity	Read the validity of a specific condition record	X	
Condition record validity	Update the validity period of a specific condition record		X
Condition records	Read the condition record for a specific condition supplement	X	
Condition records	Read the condition supplements of a specific condition record	X	
Condition records	Create one or more condition supplements for a specific condition record		X
Condition records	Read the condition record for a specific condition record validity period	X	
Condition records	Read the validity of a specific condition record	X	
Condition records	Read all condition records in the system	X	
Condition records	Create one or more condition records		X
Condition records	Read a specific condition record	X	
Condition records	Update a specific condition record		X
Condition records	Delete a specific condition record		X
Pricing scales	Read the pricing scales of a specific condition supplement	X	
Pricing scales	Create one or more pricing scales for a specific condition supplement		X
Pricing scales	Read the condition supplement for a specific condition supplement pricing scale	X	
Pricing scales	Read the condition record for a specific pricing scale	X	
Pricing scales	Read the pricing scales of a specific condition record	X	
Pricing scales	Create one or more pricing scales for a specific condition record		X
Pricing scales	Read all pricing scales in the system	X	
Pricing scales	Create one or more pricing scales		X
Pricing scales	Read a specific pricing scale	X	
Pricing scales	Update a specific pricing scale		X
Pricing scales	Delete a specific pricing scale		X
Batch requests	Send a group of requests		X
Customer materials	Read all customer materials	X	
Customer materials	Create a customer material		X
Customer materials	Read a customer material under a distribution chain	X	
Customer materials	Update a customer material under a distribution chain		X
Customer materials	Delete a customer material under a distribution chain		X

Available SAP S/4HANA Public_v2 Cloud APIs

Batch requests	Send a group of requests		X
Budget period	Get entities from budget period	X	
Budget period	Add new entity to budget period		X
Budget period	Get entity from budget period by key	X	
Budget period	Update entity in budget period		X
Budget period	Delete entity from budget period		X
Budget period text	Get entities from related to text	X	
Budget period text	Get related to budget period	X	
Budget period text	Get entities from budget period text	X	
Budget period text	Get entity from budget period text by key	X	
Budget period text	Update entity in budget period text		X
Batch requests	Send a group of requests		X
Bank details	Read bank details	X	
Bank details	Read bank details by key	X	
Batch requests	Send a group of requests		X
Material coverages	Read information on material coverages	X	
Material coverages	Read information on a specific coverage situation	X	
Supply and demand	Read information on the supply and demand for an mrp material	X	
Master data	Read master data for mrp materials	X	
Master data	Read master data for a specific mrp material	X	
Batch requests	Send a group of requests		X
Activity type	Read all available cost center activity types	X	
Activity type	Read a specific cost center activity type	X	
Activity type text	Read all language-dependent fields for a specific cost center activity type	X	
Activity type text	Read cost center activity type header fields for a specific language	X	
Activity type text	Read all language-dependent fields for all cost center activity types	X	
Activity type text	Read language-dependent fields of a cost center activity type in a specific language	X	
Batch requests	Send a group of requests		X
Distribution channel	Get entities from a distribution channel	X	
Distribution channel	Get entity from a distribution channel by key	X	
Distribution channel text	Get entities from related to text	X	
Distribution channel text	Get related to distribution channel	X	
Distribution channel text	Get entities from a distribution channel text	X	
Distribution channel text	Get entity from a distribution channel text by key	X	
Team member functions	Read the member function details of a team	X	
Team member functions	Create the member function of a team		X
Team member functions	Delete the member function of a team		X
Team member functions	Invoke action unassign team member function		X
Team hierarchy nodes	Read the hierarchy details of a team	X	
Team hierarchy nodes	Invoke action addubnode		X
Team hierarchy nodes	Invoke action deleteubnode		X
Team hierarchy nodes	Invoke function get sub nodes	X	
Team hierarchy nodes	Invoke function getpotentialsubnodesforassign	X	
Team headers	Read the header details of a team	X	
Team headers	Create header details of a team		X
Team headers	Update header details of a team		X
Team headers	Delete header details of a team		X
Team headers	Invoke action preponeteamheaderstartdate		X
Team owners	Read the owner details of a team	X	
Team owners	Create the owner of a team		X
Team owners	Delete the owner of a team		X
Team owners	Invoke action unassign team owner		X
Team members	Read the member details of a team	X	
Team members	Create the member of a team		X
Team members	Invoke action delete team member and functions		X
Team members	Invoke action updateteammemberassignmentstartdate		X
Team attributes	Read the attribute of a team	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Team attributes	Create the attribute of a team		X
Team attributes	Delete the attribute of a team		X
Batch requests	Send a group of requests		X
Change record header data	Read change record data	X	
Change record header data	Create a change record		X
Change record header data	Read data of a specific a change record	X	
Change record header data	Update header attributes of a change record		X
Func loc task list assign to chg recd	Read the functional location task list assigned to a change record	X	
Func loc task list assign to chg recd	Assign a functional location task list to a change record		X
Func loc task list assign to chg recd	Read all change record - functional location task list assignments in the system	X	
Func loc task list assign to chg recd	Assign a functional location task list to a change record		X
Func loc task list assign to chg recd	Read a specific change record - functional location task list assignment	X	
Func loc task list assign to chg recd	Update a functional location task list to a change record		X
Func loc task list assign to chg recd	Remove a functional location task list from a change record		X
Change record life cycle status	Get related to change record life cycle status	X	
Change record life cycle status	Read all change record - lifecycle status with its lifecycle status text in the system	X	
Change record life cycle status	Read a specific change record - change record attribute or field	X	
Characteristic assignments to change records	Read the characteristic assigned to a change record	X	
Characteristic assignments to change records	Assign a characteristic to a change record		X
Characteristic assignments to change records	Read all change record - characteristic assignments in the system	X	
Characteristic assignments to change records	Assign a characteristic to a change record		X
Characteristic assignments to change records	Read a specific change record - characteristic assignment	X	
Characteristic assignments to change records	Update a characteristic to a change record		X
Characteristic assignments to change records	Remove a characteristic from a change record		X
Class assignments to change records	Read the class assigned to a change record	X	
Class assignments to change records	Assign a class to a change record		X
Class assignments to change records	Read all change record - class assignments in the system	X	
Class assignments to change records	Assign a class to a change record		X
Class assignments to change records	Read a specific change record - class assignment	X	
Class assignments to change records	Update a class to a change record		X
Class assignments to change records	Remove a class from a change record		X
Equip task list assign to change records	Read the equipment task list assigned to a change record	X	
Equip task list assign to change records	Assign an equipment task list to a change record		X
Equip task list assign to change records	Read all change record - equipment task list assignments in the system	X	
Equip task list assign to change records	Assign an equipment task list to a change record		X
Equip task list assign to change records	Read a specific change record - equipment task list assignment	X	
Equip task list assign to change records	Update an equipment task list to a change record		X
Equip task list assign to change records	Remove an equipment task list from a change record		X
Master recipe assignments to change records	Read the master recipes assigned to a change record	X	
Master recipe assignments to change records	Assign a master recipe to a change record		X
Master recipe assignments to change records	Read all change record - master recipe assignments in the system	X	
Master recipe assignments to change records	Assign a master recipe to a change record		X
Master recipe assignments to change records	Read a specific change record - master recipe assignment	X	
Master recipe assignments to change records	Update a master recipe assignment to a change record		X
Master recipe assignments to change records	Remove a master recipe assignment from a change record		X
Production routing assignments to change records	Read the production routing assigned to a change record	X	
Production routing assignments to change records	Assign a production routing to a change record		X
Production routing assignments to change records	Read all change record - production routing assignments in the system	X	
Production routing assignments to change records	Assign a production routing assignments to a change record		X
Production routing assignments to change records	Read a specific change record - production routing assignment	X	
Production routing assignments to change records	Update a production routing assignments to a change record		X
Production routing assignments to change records	Remove a production routing assignments from a change record		X
Standard BOM assignment to change record	Read the standard BOM assigned to a change record	X	
Standard BOM assignment to change record	Assign a standard BOM to a change record		X
Standard BOM assignment to change record	Read all change record - standard BOM assignments in the system	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Standard BOM assignment to change record	Assign a standard BOM to a change record		X
Standard BOM assignment to change record	Read a specific change record - standard BOM assignment	X	
Standard BOM assignment to change record	Update a standard BOM to a change record		X
Standard BOM assignment to change record	Remove a standard BOM from a change record		X
Variant BOM assign to chg records	Read the variant BOM assigned to a change record	X	
Variant BOM assign to chg records	Assign a variant BOM to a change record		X
Variant BOM assign to chg records	Read all change record - variant BOM assignments in the system	X	
Variant BOM assign to chg records	Assign a variant BOM to a change record		X
Variant BOM assign to chg records	Read a specific change record - variant BOM assignment	X	
Variant BOM assign to chg records	Update a variant BOM to a change record		X
Variant BOM assign to chg records	Remove a variant BOM from a change record		X
Change record user status	Get related to change record user status	X	
Change record user status	Read all change record - user status with its user status text in the system	X	
Change record user status	Read a specific change record - change record attribute or field	X	
Change record epd collaboration	Read the collaboration assigned to a change record	X	
Change record epd collaboration	Assign a collaboration to a change record		X
Change record epd collaboration	Read all change record - collaboration assignments in the system	X	
Change record epd collaboration	Assign a collaboration to a change record		X
Change record epd collaboration	Read a specific change record - collaboration assignment	X	
Change record epd collaboration	Remove a collaboration from a change record		X
Equipment BOM assign to chg records	Read the equipment BOM assigned to a change record	X	
Equipment BOM assign to chg records	Assign an equipment BOM to a change record		X
Equipment BOM assign to chg records	Read all change record - equipment BOM assignments in the system	X	
Equipment BOM assign to chg records	Assign an equipment BOM to a change record		X
Equipment BOM assign to chg records	Read a specific change record - equipment BOM assignment	X	
Equipment BOM assign to chg records	Update an equipment BOM to a change record		X
Equipment BOM assign to chg records	Remove an equipment BOM from a change record		X
Functional loc BOM assign to chg records	Read the functional location BOM assigned to a change record	X	
Functional loc BOM assign to chg records	Assign functional location BOM to a change record		X
Functional loc BOM assign to chg records	Read all change record - functional location BOM assignments in the system	X	
Functional loc BOM assign to chg records	Assign a functional location BOM to a change record		X
Functional loc BOM assign to chg records	Read a specific change record - functional location BOM assignment	X	
Functional loc BOM assign to chg records	Update a functional location BOM to a change record		X
Functional loc BOM assign to chg records	Remove a functional location BOM from a change record		X
Change record ref engineering bom	Read the engineering BOM assigned to a change record	X	
Change record ref engineering bom	Assign an engineering BOM to a change record		X
Change record ref engineering bom	Read all change record - engineering BOM assignments in the system	X	
Change record ref engineering bom	Assign an engineering BOM to a change record		X
Change record ref engineering bom	Read a specific change record - engineering BOM assignment	X	
Change record ref engineering bom	Update an engineering BOM to a change record		X
Change record ref engineering bom	Remove an engineering BOM from a change record		X
Maint tsk lst assign to change records	Read the maintenance task list assigned to a change record	X	
Maint tsk lst assign to change records	Assign a maintenance task list to a change record		X
Maint tsk lst assign to change records	Read all change record - maintenance task list assignments in the system	X	
Maint tsk lst assign to change records	Assign a maintenance task list to a change record		X
Maint tsk lst assign to change records	Read a specific change record - maintenance task list assignment	X	
Maint tsk lst assign to change records	Update a maintenance task list to a change record		X
Maint tsk lst assign to change records	Remove a maintenance task list from a change record		X
Change record ref manufacturing bom	Read the manufacturing BOM assigned to a change record	X	
Change record ref manufacturing bom	Assign a manufacturing BOM to a change record		X
Change record ref manufacturing bom	Read all change record - manufacturing BOM assignments in the system	X	
Change record ref manufacturing bom	Assign a manufacturing BOM to a change record		X
Change record ref manufacturing bom	Read a specific change record - manufacturing BOM assignment	X	
Change record ref manufacturing bom	Update a manufacturing BOM to a change record		X
Change record ref manufacturing bom	Remove a manufacturing BOM from a change record		X

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import

Follow up subscriptions	Read all follow-up subscription billing subscriptions created from the business solution order by the key	X	
Subscription billing item	Read subscription billing items created from a business solution order	X	
Subscription billing item	Create subscription billing item in a business solution order		X
Subscription billing item	Read business solution order from subscription billing item	X	
Subscription billing item	Read subscription billing item	X	
Subscription billing item	Create subscription billing item for a business solution order		X
Subscription billing item	Read subscription billing item by the key	X	
Subscription billing item	Update subscription billing item for a business solution order		X
Subscription billing item	Delete subscription billing item for a business solution order		X

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import
Header text	Read texts of a business solution order	X	
Header text	Create texts for a business solution order		X
Header text	Read texts of a business solution order	X	
Header text	Create texts for a business solution order		X
Header text	Read the texts of a business solution order by the key	X	
Header text	Update texts for a business solution order		X
Header text	Delete texts for a business solution order		X
Header user status	Read custom user statuses created for a business solution order	X	
Header user status	Create custom user statuses for a business solution order		X
Header user status	Read custom user statuses of a business solution order	X	
Header user status	Create custom user statuses for a business solution order		X
Header user status	Read the custom user statuses of a business solution order by the key	X	
Header user status	Update custom user statuses of a business solution order		X
Header user status	Delete custom user statuses of a business solution order		X
Subscription billing item rate elements	Read rate element of a business solution order item	X	
Subscription billing item rate elements	Read rate element of subscription billing item in a business solution order	X	
Subscription billing item rate elements	Read subscription rate elements for a subscription billing item in a business solution order	X	
Subscription billing item rate elements	Read subscription rate elements of a business solution order subscription billing item	X	
Subscription billing item rate elements	Read rate elements of a business solution order subscription billing item by the key	X	
Follow up enterprise project items	Read follow-up enterprise projects created from a business solution order item	X	
Follow up enterprise project items	Read all follow-up enterprise projects created from the business solution order item in the system	X	
Follow up enterprise project items	Read all follow-up enterprise project created from the business solution order item by the key	X	
Service order item reference object	Read reference objects for a expense item in a business solution order	X	
Service order item reference object	Create reference objects for a expense item in a business solution order		X
Service order item reference object	Read reference objects for a service item in a business solution order	X	
Service order item reference object	Create reference objects for a service item in a business solution order		X
Service order item reference object	Read reference objects for a service part item in a business solution order	X	
Service order item reference object	Create reference objects for a service part item in a business solution order		X
Service order item reference object	Read all reference objects of a business solution order item	X	
Service order item reference object	Create reference objects for a business solution order item		X
Service order item reference object	Read reference objects of a business solution order item by the key	X	
Service order item reference object	Update reference objects for a business solution order item		X
Service order item reference object	Delete reference objects for a business solution order item		X
Follow up service order items	Read service order and service expense item created from a business solution order	X	
Follow up service order items	Read service order and service order item created from a business solution order	X	
Follow up service order items	Read service order and service part item created from a business solution order	X	
Follow up service order items	Read all follow-up service order items created from business solution order in the system	X	
Follow up service order items	Read all follow-up service order items created from a business solution order by the key	X	
Partner address of solution order	Read partners address for a business solution order partner	X	
Partner address of solution order	Read addresses of all business partners for a business solution order	X	
Partner address of solution order	Read the address of a business partner by key within a business solution order	X	
Partner address of solution order	Update addresses of business partners for a business solution order		X

Resource	API endpoint	Export	Import
Follow up sales order items	Read sales order and sales order item created from a business solution order	X	
Follow up sales order items	Read all follow-up sales order items created from business solution order in the system	X	
Follow up sales order items	Read all follow-up sales order items created from a business solution order by the key	X	
Sales item schedule line	Read schedule lines of a sales item in a business solution order	X	
Sales item schedule line	Read schedule line items of a sales order item from a business solution order in the system	X	
Sales item schedule line	Read schedule line items of a sales order item from a business solution order by the key	X	
Subscription pricing parameters	Read subscription pricing parameters for a subscription billing item in a business solution order	X	
Subscription pricing parameters	Create subscription pricing parameters for a subscription billing item in a business solution order		X
Subscription pricing parameters	Read subscription pricing parameter details of a business solution order subscription billing item	X	
Subscription pricing parameters	Create subscription pricing parameters for a subscription billing item in a business solution order		X
Subscription pricing parameters	Read subscription pricing parameter details of a business solution order subscription billing item by the key	X	
Subscription pricing parameters	Update a subscription pricing parameter for a subscription billing item in a business solution order		X
Subscription pricing parameters	Delete a pricing parameter for a business solution order subscription item		X
Follow up subscription billing items	Read follow-up subscription billing subscriptions created from a business solution order item	X	
Follow up subscription billing items	Read all follow-up subscription billing subscriptions created from the business solution order item in the system	X	
Follow up subscription billing items	Read all follow-up subscription billing subscriptions created from the business solution order item by the key	X	
Subscription parameters	Read subscription parameters for a subscription billing item in a business solution order	X	
Subscription parameters	Create subscription parameters for a subscription billing item in a business solution order		X
Subscription parameters	Read subscription parameter details of a business solution order subscription billing item	X	
Subscription parameters	Create subscription parameters for a subscription billing item in a business solution order		X
Subscription parameters	Read subscription parameter details of a business solution order subscription billing item by the key	X	
Subscription parameters	Update a subscription parameter for a subscription billing item in a business solution order		X
Subscription parameters	Delete a subscription parameter for a subscription billing item in a business solution order		X
Subscription billing price agreement	Read subscription price agreement details of a business solution order subscription billing item	X	
Subscription billing price agreement	Create subscription price agreement lines for a subscription billing item in a business solution order		X
Subscription billing price agreement	Read subscription price agreement details of a business solution order subscription billing item	X	
Subscription billing price agreement	Create subscription price agreement lines for a subscription billing item in a business solution order		X
Subscription billing price agreement	Read subscription price agreement details of a business solution order subscription billing item by the key	X	
Subscription billing price agreement	Update a subscription price agreement line for a subscription billing item in a business solution order		X
Subscription billing price agreement	Delete a subscription price agreement line for a subscription billing item in a business solution order		X
Solution order item partner address	Read partners address for a business solution order item partner	X	
Solution order item partner address	Read addresses of all business partners for a business solution order item	X	
Solution order item partner address	Read the address of a business partner by the key for a business solution order item	X	
Solution order item partner address	Create partner information in a business solution order		X
Item rate element price element	Read pricing elements for a rate element of subscription billing item in a business solution order	X	

Available SAP S/4HANA Public_v2 Cloud APIs

Resource	API endpoint	Export	Import

Item rate element price element	Read the pricing elements of a subscription rate element in a business solution order item by the key	X	
Service operations	Link a project to a business solution order item		X
Service operations	Unlink a project from a business solution order item		X
Service operations	Reject an item in a business solution order		X
Service operations	Redistribute items in a business solution order		X
Batch requests	Send a group of requests		X
Hierarchy for current rev. of EHS loc.	Get entities from current EHS location	X	
Hierarchy for current rev. of EHS loc.	Get entity from current EHS location by key	X	
EHS location	Get entities from EHS location value help	X	
EHS location	Get entity from EHS location value help by key	X	
Location classifier text	Get entities from related to loc classifier text	X	
Location classifier text	Get entities from EHS loc classifier text	X	
Location classifier text	Get entity from EHS loc classifier text by key	X	
Location classifier	Get entities from EHSlocclassifiervh	X	
Location classifier	Get entity from EHSlocclassifiervh by key	X	
EHS person value help	Get entities from EHS person value help	X	
EHS person value help	Get entity from EHS person value help by key	X	
EHS location type	Get entities from EHS location type	X	
EHS location type	Get entity from EHS location type by key	X	
Attachment	Uploads an attachment without assigning it to an incident		X
Incident	Get a list of documents attached to an incident	X	
Incident	Attaches a document to an incident		X
Incident	Get a list of incidents by filter criteria	X	
Incident	Create an incident		X
Incident	Get incident details by global identifier (incident uuid)	X	
Person	Get a list of all persons involved in an incident	X	
Person	Assign a person to an incident		X
Person	Create a person record without assigning it to an incident		X
Location	Get the incident location	X	
Location	Get a list of all locations	X	
Location	Get details of the incident location by global identifier (location uuid)	X	
Batch requests	Send a group of requests		X
Request for quotation	Get the header details of all the requests for quotations in the system	X	
Request for quotation	Create a header of a new RFQ with the details passed in the request body		X
Request for quotation	Get the header details of an RFQ	X	
Request for quotation	Update the header details of an RFQ		X
Request for quotation	Delete an RFQ		X
Bidder	Get the bidder details of an RFQ	X	
Bidder	Add bidder to an RFQ		X
Bidder	Get all bidders from an RFQs	X	
Bidder	Add one or several bidders to an RFQ		X
Bidder	Get the bidder details of an RFQ by partner counter	X	
Bidder	Update the details of a bidder in an RFQ		X
Bidder	Delete the bidder from the RFQ		X
Item	Get the item details from an RFQ	X	
Item	Add an item to an RFQ		X
Item	Get the details of all items in all RFQs in the system	X	
Item	Add an item to an RFQ		X
Item	Get the item details of an RFQ	X	
Item	Update the item details of in an RFQ		X
Item	Delete an item in an RFQ		X
Service operations	Completes the bidding process		X
Service operations	Cancel the bidding process		X
Service operations	Submits RFQ for approval		X
Batch requests	Send a group of requests		X

Resource	API endpoint	Export	Import
Cost center	Read all available cost centers	X	
Cost center	Read a specific cost center	X	
Cost center text	Read all language-dependent fields for a specific cost center	X	
Cost center text	Read cost center header fields for a specific language	X	
Cost center text	Read all language-dependent fields for all cost centers	X	
Cost center text	Read language-dependent fields of a cost center in a specific language	X	
Batch requests	Send a group of requests		X
Characteristic header data	List of characteristic header data	X	
Characteristic header data	Create a characteristic header data		X
Characteristic header data	Characteristic header data for a given key	X	
Characteristic header data	Update a characteristic header data		X
Characteristic header data	Delete a characteristic		X
Characteristic descriptions	Read the descriptions of a characteristic	X	
Characteristic descriptions	Create a description for a characteristic		X
Characteristic descriptions	List of characteristic descriptions	X	
Characteristic descriptions	Create a characteristic description		X
Characteristic descriptions	Characteristic description for a given key	X	
Characteristic descriptions	Update a characteristic description		X
Characteristic descriptions	Delete a characteristic description		X
Characteristic references	Read the references defined for a characteristic	X	
Characteristic references	Create a reference for a characteristic		X
Characteristic references	List of characteristic references	X	
Characteristic references	Create a characteristic reference		X
Characteristic references	Characteristic reference for a given key	X	
Characteristic references	Delete a characteristic reference		X
Characteristic restrictions	Read the restrictions defined for a characteristic	X	
Characteristic restrictions	Create a restriction for a characteristic		X
Characteristic restrictions	List of characteristic restrictions	X	
Characteristic restrictions	Create a characteristic restriction		X
Characteristic restrictions	Characteristic restriction for a given key	X	
Characteristic restrictions	Delete a characteristic restriction		X
Characteristic values	Read the values defined for a characteristic	X	
Characteristic values	Create a value for a characteristic		X
Characteristic values	List of characteristic values	X	
Characteristic values	Create a characteristic value		X
Characteristic values	Characteristic value for a given key	X	
Characteristic values	Update a characteristic value		X
Characteristic values	Delete a characteristic value		X
Characteristic value descriptions	Read the descriptions of a characteristic value	X	
Characteristic value descriptions	Create a description for a characteristic value		X
Characteristic value descriptions	List of characteristic value descriptions	X	
Characteristic value descriptions	Create a characteristic value description		X
Characteristic value descriptions	Characteristic value description for a given key	X	
Characteristic value descriptions	Update a characteristic value description		X
Characteristic value descriptions	Delete a characteristic value description		X
Batch requests	Send a group of requests		X
Characteristic attribute selected sets	Read all selected set of catalog type characteristic attributes	X	
Characteristic attribute selected sets	Read a specific selected set of catalog type characteristic attributes	X	
Characteristic attribute selected set codes and code groups of catalog type characteristic attributes	Read all selected set codes and code groups of catalog type characteristic attributes	X	
Characteristic attribute selected set codes and code groups of catalog type characteristic attributes	Read a specific selected set code of catalog type characteristic attributes	X	
Characteristic attribute selected set code texts of catalog type characteristic attributes	Read all selected set code texts of catalog type characteristic attributes	X	
Characteristic attribute selected set code texts of catalog type characteristic attributes	Read a specific selected set code text of catalog type characteristic attributes in a specific language	X	
Characteristic attribute selected set texts	Read all selected set texts of catalog type characteristic attributes	X	
Characteristic attribute selected set texts	Read a specific selected set text of catalog type characteristic attributes in a specific language	X	
Batch requests	Send a group of requests		X
