Sales Order (A2X) : Sales order: Sales order header	Read all sales order headers	X	
Sales Order (A2X) : Sales order: Sales order header	Read the header of a specific sales order	X	
Sales Order (A2X) : Sales order: Sales order header	Read all items of a specific sales order	X	
Sales Order (A2X) : Sales order: Sales order header	Read the header payment plan of a specific sales order	X	
Sales Order (A2X) : Sales order: Sales order header	Read the header pricing element of a specific sales order	X	
Sales Order (A2X) : Sales order: Sales order header	Create a sales order		X
Sales Order (A2X) : Sales order: Sales order header	Update a sales order		X
Sales Order (A2X) : Sales order: Sales order header	Delete a sales order		X
Sales Order (A2X) : Sales order: Sales order header	Read the billing plan of a sales order	X	
Sales Order (A2X) : Sales order: Sales order header	Create a sales order item for a sales order		X
Sales Order (A2X) : Sales order: Sales order header	Read the header partners of a sales order	X	
Sales Order (A2X) : Sales order: Sales order header	Create a header partner for a sales order		X
Sales Order (A2X) : Sales order: Sales order header	Create a header payment plan for a specific sales order		X
Sales Order (A2X) : Sales order: Sales order header	Get entities from related to preceding proc flow doc	X	
Sales Order (A2X) : Sales order: Sales order header	Create a header pricing element for a specific sales order		X
Sales Order (A2X) : Sales order: Sales order header	Read the related objects of a sales order header	X	
Sales Order (A2X) : Sales order: Sales order header	Create a related object for a sales order header		X
Sales Order (A2X) : Sales order: Sales order header	Get entities from related to subsequent proc flow doc	X	
Sales Order (A2X) : Sales order: Sales order header	Read the header texts of a sales order	X	
Sales Order (A2X) : Sales order: Sales order header	Create a header text for a sales order		X
Sales Order (A2X) : Sales order: Sales order header	Read the sales order header for a billing plan	X	
Sales Order (A2X) : Sales order: Sales order header	Read the sales order header for a header partner	X	
Sales Order (A2X) : Sales order: Sales order header	Read the sales order header for a pricing element	X	
Sales Order (A2X) : Sales order: Sales order header	Read the sales order header of a sales order item	X	
Sales Order (A2X) : Sales order: Sales order header	Read the sales order header data for a preceding document of a sales order	X	
Sales Order (A2X) : Sales order: Sales order header	Read the sales order header for a related object	X	
Sales Order (A2X) : Sales order: Sales order header	Read the sales order header data for a subsequent document of a sales ord	X	
Sales Order (A2X) : Sales order: Sales order header	Read the sales order header for a header text	X	
Sales Order (A2X) : Sales order: Sales order header	Read the sales order header for a payment plan item	X	
Sales Order (A2X) : Sales order: Sales order header	Read the billing plans of all sales orders	X	
Sales Order (A2X) : Sales order: Sales order header	Read the billing plan of a sales order	X	
Sales Order (A2X) : Sales order: Sales order header	Update the billing plan of a sales order		X
Sales Order (A2X) : Sales order: Sales order header	Read all sales order items	X	
Sales Order (A2X) : Sales order: Sales order header	Create a sales order item		X
Sales Order (A2X) : Sales order: Sales order header	Read a sales order item	X	
Sales Order (A2X) : Sales order: Sales order header	Update a sales order item		X
Sales Order (A2X) : Sales order: Sales order header	Delete a sales order item		X
Sales Order (A2X) : Sales order: Sales order header	Read the header partners of all sales orders	X	
Sales Order (A2X) : Sales order: Sales order header	Create a header partner for a specific sales order with a specific partner function		X
Sales Order (A2X) : Sales order: Sales order header	Read the header partners of a sales order and a partner function	X	
Sales Order (A2X) : Sales order: Sales order header	Update a header partner for a specific sales order with a specific partner function		X
Sales Order (A2X) : Sales order: Sales order header	Delete a header partner of a specific sales order with a specific partner function		X
Sales Order (A2X) : Sales order: Sales order header	Read the payment plans of all sales orders	X	
Sales Order (A2X) : Sales order: Sales order header	Create a payment plan for a sales order		X
Sales Order (A2X) : Sales order: Sales order header	Read a payment plan item of a sales order	X	
Sales Order (A2X) : Sales order: Sales order header	Update a payment plan item of a sales order		X
Sales Order (A2X) : Sales order: Sales order header	Delete a payment plan item of a specific sales order		X
Sales Order (A2X) : Sales order: Sales order header	Read the preceding documents of all sales orders	X	
Sales Order (A2X) : Sales order: Sales order header	Read a preceding document for a sales order	X	
Sales Order (A2X) : Sales order: Sales order header	Read the header pricing elements of all sales orders	X	
Sales Order (A2X) : Sales order: Sales order header	Create a header pricing element for a sales order		X
Sales Order (A2X) : Sales order: Sales order header	Read the header pricing element for a sales order	X	
Sales Order (A2X) : Sales order: Sales order header	Update a header pricing element for a sales order		X
Sales Order (A2X) : Sales order: Sales order header	Delete a header pricing element for a sales order		X
Sales Order (A2X) : Sales order: Sales order header	Read related objects from the headers of all sales orders	X	
Sales Order (A2X) : Sales order: Sales order header	Create a related object for a sales order header		X
Sales Order (A2X) : Sales order: Sales order header	Read a related object from the header of a specific sales order	X	
Sales Order (A2X) : Sales order: Sales order header	Delete a related object from a sales order header		X
Sales Order (A2X) : Sales order: Sales order header	Read the subsequent documents of all sales orders	X	
Sales Order (A2X) : Sales order: Sales order header	Read a subsequent document of a sales order	X	
Sales Order (A2X) : Sales order: Sales order header	Read the header texts of all sales orders	X	
Sales Order (A2X) : Sales order: Sales order header	Create a header text for a sales order		X
Sales Order (A2X) : Sales order: Sales order header	Read a header text from a sales order	X	
Sales Order (A2X) : Sales order: Sales order header	Update a header text for a sales order		X
Sales Order (A2X) : Sales order: Sales order header	Delete a header text from a sales order		X
Purchase order: Purchase order header (Deprecated)	Get the header details of all the purchase orders in the system	X	
Purchase order: Purchase order header (Deprecated)	Get the header details of a purchase order	X	
Purchase order: Purchase order header (Deprecated)	Get the item details of all the items in a purchase order	X	
Purchase order: Purchase order header (Deprecated)	Get the header details of an item in a purchase order	X	
Product Master (A2X) : Product master: Product	Return product master records	X	
Product Master (A2X) : Product master: Product	Return product master record by product number	X	
Product Master (A2X) : Product master: Product	Create product master record		X
Product Master (A2X) : Product master: Product	Update product master record		X
Product Master (A2X) : Product master: Product	Return description	X	
Product Master (A2X) : Product master: Product	Create a new description		X
Product Master (A2X) : Product master: Product	Return plant data	X	

Product Master (A2X) : Product master: Product	Create plant data		X
Product Master (A2X) : Product master: Product	Return basic data text	X	
Product Master (A2X) : Product master: Product	Create basic data text		X
Product Master (A2X) : Product master: Product	Return inspection text	X	
Product Master (A2X) : Product master: Product	Create inspection text		X
Product Master (A2X) : Product master: Product	Return basic procurement data	X	
Product Master (A2X) : Product master: Product	Return purchase text	X

External Scheduler Integration : Job schedule check collection	Add new entity to job schedule check collection		X
External Scheduler Integration : Job schedule check collection	Get entity from job schedule check collection by key	X	
External Scheduler Integration : Job schedule check collection	Update entity in job schedule check collection		X
External Scheduler Integration : Job schedule check collection	Delete entity from job schedule check collection		X
External Scheduler Integration : Job schedule check collection	Invoke action job schedule check		X
External Scheduler Integration : Job info	Invoke function job info get	X	
External Scheduler Integration : Job list	Invoke function job list get	X	
External Scheduler Integration : Job status	Invoke action job schedule		X
External Scheduler Integration : Job status	Invoke function job status get	X	
External Scheduler Integration : Job status	Invoke action jobrestart		X
External Scheduler Integration : Function return code	Invoke action jobcancel		X
External Scheduler Integration : Function return code	Invoke action jobabort		X
External Scheduler Integration : Job param values set	Invoke function template values get	X	
External Scheduler Integration : Job param values set	Invoke function job param values get	X	
External Scheduler Integration : Job param values struct set	Invoke function job param values struct get	X	
External Scheduler Integration : Job param values struct set	Invoke function template values struct get	X	
External Scheduler Integration : Batch requests	Send a group of requests		X
SEPA Mandate - Manage in Accounts Receivable : SEPA mandate	Read sepa mandates	X	
SEPA Mandate - Manage in Accounts Receivable : SEPA mandate	Create a new sepa mandate		X
SEPA Mandate - Manage in Accounts Receivable : SEPA mandate	Read a sepa mandate by key	X	
SEPA Mandate - Manage in Accounts Receivable : SEPA mandate	Update an existing sepa mandate		X
SEPA Mandate - Manage in Accounts Receivable : SEPA mandate usage	Read the sepa mandate usage for a specified sepa mandate	X	
SEPA Mandate - Manage in Accounts Receivable : SEPA mandate usage	Create a sepa mandate usage for a specified sepa mandate		X
SEPA Mandate - Manage in Accounts Receivable : SEPA mandate usage	Read the sepa mandate usage	X	
SEPA Mandate - Manage in Accounts Receivable : SEPA mandate usage	Create a new entity for the sepa mandate usage		X
SEPA Mandate - Manage in Accounts Receivable : SEPA mandate usage	Read the sepa mandate usage by key	X	
SEPA Mandate - Manage in Accounts Receivable : Batch requests	Send a group of requests		X
Sales Scheduling Agreement (A2X) : Sales scheduling agreement header	Read all sales scheduling agreement headers	X	
Sales Scheduling Agreement (A2X) : Sales scheduling agreement header	Create a sales scheduling agreement		X
Sales Scheduling Agreement (A2X) : Sales scheduling agreement header	Read the header of a specific sales scheduling agreement	X	
Sales Scheduling Agreement (A2X) : Sales scheduling agreement header	Update the header of a specific sales scheduling agreement		X
Sales Scheduling Agreement (A2X) : Sales scheduling agreement header	Delete a specific sales scheduling agreement		X

Sales Scheduling Agreement (A2X) : Sales scheduling agreement item	Read items of a specific sales scheduling agreement	X	
Sales Scheduling Agreement (A2X) : Sales scheduling agreement item	Create one or more items for a specific sales scheduling agreement		X
Sales Scheduling Agreement (A2X) : Sales scheduling agreement item	Read the sales scheduling agreement header for a specific sales scheduling	X	
Sales Scheduling Agreement (A2X) : Sales scheduling agreement item	Read all sales scheduling agreement items	X	
Sales Scheduling Agreement (A2X) : Sales scheduling agreement item	Create one or more sales scheduling agreement items for a specific sales scheduling agreem		X
Sales Scheduling Agreement (A2X) : Sales scheduling agreement item	Read a specific sales scheduling agreement item	X	
Sales Scheduling Agreement (A2X) : Sales scheduling agreement item	Update a specific sales scheduling agreement item		X
Sales Scheduling Agreement (A2X) : Sales scheduling agreement item	Delete a specific sales scheduling agreement item		X
Sales Scheduling Agreement (A2X) : Header partner	Read the header-level partners of a specific sales scheduling agreement	X	
Sales Scheduling Agreement (A2X) : Header partner	Read the sales scheduling agreement header for a specific header partner	X	
Sales Scheduling Agreement (A2X) : Header partner	Read all header-level partners	X	
Sales Scheduling Agreement (A2X) : Header partner	Read a specific header-level partner	X	
Sales Scheduling Agreement (A2X) : Header partner	Update a specific header-level partner		X
Sales Scheduling Agreement (A2X) : Header partner	Delete a specific header-level partner		X
Sales Scheduling Agreement (A2X) : Header pricing element	Read the header-level pricing elements of a specific sales scheduling agree	X	
Sales Scheduling Agreement (A2X) : Header pricing element	Read the sales scheduling agreement header for a specific header pricing e	X	
Sales Scheduling Agreement (A2X) : Header pricing element	Read all header-level pricing elements	X	
Sales Scheduling Agreement (A2X) : Header pricing element	Read a specific header-level pricing element	X	
Sales Scheduling Agreement (A2X) : Header pricing element	Update a specific header-level pricing element		X
Sales Scheduling Agreement (A2X) : Header pricing element	Delete a specific header-level pricing element		X
Sales Scheduling Agreement (A2X) : Header text	Read the header-level texts of a specific sales scheduling agreement	X	
Sales Scheduling Agreement (A2X) : Header text	Read the sales scheduling agreement header for a specific header text	X	
Sales Scheduling Agreement (A2X) : Header text	Read all header-level texts	X	
Sales Scheduling Agreement (A2X) : Header text	Read a specific header-level text	X	
Sales Scheduling Agreement (A2X) : Header text	Update a specific header-level text		X
Sales Scheduling Agreement (A2X) : Header text	Delete a specific header-level text		X
Sales Scheduling Agreement (A2X) : Delivery schedule	Read the sales scheduling agreement header for a specific delivery schedul	X	
Sales Scheduling Agreement (A2X) : Delivery schedule	Read the sales scheduling agreement item for a specific delivery schedule	X	
Sales Scheduling Agreement (A2X) : Delivery schedule	Read the delivery schedules of a specific sales scheduling agreement item	X	
Sales Scheduling Agreement (A2X) : Delivery schedule	Read all delivery schedules	X	
Sales Scheduling Agreement (A2X) : Delivery schedule	Read a specific delivery schedule	X	
Sales Scheduling Agreement (A2X) : Item partner	Read the sales scheduling agreement header for a specific item partner	X	
Sales Scheduling Agreement (A2X) : Item partner	Read the item-level partner of a specific sales scheduling agreement item	X	
Sales Scheduling Agreement (A2X) : Item partner	Read the sales scheduling agreement item for a specific item partner	X	
Sales Scheduling Agreement (A2X) : Item partner	Read all item-level partners	X	
Sales Scheduling Agreement (A2X) : Item partner	Read a specific item-level partner	X	
Sales Scheduling Agreement (A2X) : Item partner	Update a specific item-level partner		X
Sales Scheduling Agreement (A2X) : Item partner	Delete a specific item-level partner		X
Sales Scheduling Agreement (A2X) : Item text	Read the sales scheduling agreement header for a specific item text	X	
Sales Scheduling Agreement (A2X) : Item text	Read the item-level text of a specific sales scheduling agreement item	X	
Sales Scheduling Agreement (A2X) : Item text	Read the sales scheduling agreement item for a specific item text	X	
Sales Scheduling Agreement (A2X) : Item text	Read all item-level texts	X	
Sales Scheduling Agreement (A2X) : Item text	Read a specific item-level text	X	
Sales Scheduling Agreement (A2X) : Item text	Update a specific item-level text		X
Sales Scheduling Agreement (A2X) : Item text	Delete a specific item-level text		X
Sales Scheduling Agreement (A2X) : Item pricing element	Read the sales scheduling agreement header for a specific item pricing elen	X	
Sales Scheduling Agreement (A2X) : Item pricing element	Read the item-level pricing element of a specific sales scheduling agreemen	X	
Sales Scheduling Agreement (A2X) : Item pricing element	Read the sales scheduling agreement item for a specific item pricing elemer	X	
Sales Scheduling Agreement (A2X) : Item pricing element	Read all item-level pricing elements	X	
Sales Scheduling Agreement (A2X) : Item pricing element	Read a specific item-level pricing element	X	
Sales Scheduling Agreement (A2X) : Item pricing element	Update a specific item-level pricing element		X
Sales Scheduling Agreement (A2X) : Item pricing element	Delete a specific item-level pricing element		X
Sales Scheduling Agreement (A2X) : Schedule line	Read the sales scheduling agreement header for a specific schedule line	X	
Sales Scheduling Agreement (A2X) : Schedule line	Read the sales scheduling agreement item for a specific schedule line	X	
Sales Scheduling Agreement (A2X) : Schedule line	Read the schedule lines of a specific delivery schedule	X	
Sales Scheduling Agreement (A2X) : Schedule line	Read the delivery schedule for a specific schedule line	X	
Sales Scheduling Agreement (A2X) : Schedule line	Read all schedule lines	X	
Sales Scheduling Agreement (A2X) : Schedule line	Read a specific schedule line	X	
Sales Scheduling Agreement (A2X) : Service operations	Create a correction delivery for a specific sales scheduling agreement item		X
Sales Scheduling Agreement (A2X) : Batch requests	Send a group of requests		X
Buffer Sizing : Average daily usage	Get entities from a demand adjustments	X	
Buffer Sizing : Average daily usage	Get entity from a demand adjustments by key	X	
Buffer Sizing : Average daily usage	Update entity in a demand adjustments		X
Buffer Sizing : Buffer proposal details	Get related to proposalhdr	X	
Buffer Sizing : Buffer proposal details	Get entities from related to product buffer proposal demand	X	
Buffer Sizing : Buffer proposal details	Get entities from a proposal header	X	
Buffer Sizing : Buffer proposal details	Add new entity to a proposal header		X
Buffer Sizing : Buffer proposal details	Get entity from a proposal header by key	X	
Buffer Sizing : Buffer proposal details	Invoke action adopt		X
Buffer Sizing : Buffer proposal details	Invoke action discard		X
Buffer Sizing : Buffer proposal details	Invoke action resume		X
Buffer Sizing : Buffer proposal details	Invoke action suspend		X

Buffer Sizing : Demand adjustments	Get entities from related to productbufprpsldmndfctr	X	
Buffer Sizing : Demand adjustments	Get entities from a demandadjustmentfactors	X	
Buffer Sizing : Demand adjustments	Get entity from a demandadjustmentfactors by key	X	
Buffer Sizing : Demand adjustments	Update entity in a demandadjustmentfactors		X

Buffer Sizing : Zone adjustments	Get related to proposalhdr	X	
Buffer Sizing : Zone adjustments	Get entities from related to productbufferproposalzones	X	
Buffer Sizing : Zone adjustments	Get entities from a zone adjustments	X	
Buffer Sizing : Zone adjustments	Get entity from a zone adjustments by key	X	
Buffer Sizing : Zone adjustments	Update entity in a zone adjustments		X
Buffer Sizing : Actual stock	Get entities from related to actual stock	X	
Buffer Sizing : Actual stock	Get related to proposalhdr	X	
Buffer Sizing : Actual stock	Get entities from a actual stock	X	
Buffer Sizing : Actual stock	Get entity from a actual stock by key	X	
Buffer Sizing : Longest path in bom	Get entities from related to prpslbom	X	
Buffer Sizing : Longest path in bom	Get related to proposalhdr	X	
Buffer Sizing : Longest path in bom	Get entities from a longestpathinbom	X	
Buffer Sizing : Longest path in bom	Get entity from a longestpathinbom by key	X	
Buffer Sizing : Batch requests	Send a group of requests		X
Basic Product Availability Info : Service operations	Invoke function determineavailabilityat	X	
Basic Product Availability Info : Service operations	Invoke function determineavailabilityof	X	
Basic Product Availability Info : Service operations	Invoke function calculateavailabilitytimeseries	X	
Basic Product Availability Info : Batch requests	Send a group of requests		X
Statistical Key Figure (A2X) : Statistical key figure	Read all available statistical key figures	X	
Statistical Key Figure (A2X) : Statistical key figure	Create a new statistical key figure		X
Statistical Key Figure (A2X) : Statistical key figure	Read a specific statistical key figure	X	
Statistical Key Figure (A2X) : Statistical key figure	Update a specific statistical key figure		X
Statistical Key Figure (A2X) : Statistical key figure	Delete a specific statistical key figure		X
Statistical Key Figure (A2X) : Statistical key figure text	Read all language-dependent fields for a specific statistical key figure	X	
Statistical Key Figure (A2X) : Statistical key figure text	Create language-dependent fields for a specific statistical key figure		X
Statistical Key Figure (A2X) : Statistical key figure text	Read statistical key figure header fields for a specific language	X	
Statistical Key Figure (A2X) : Statistical key figure text	Read all language-dependent fields for all statistical key figures	X	
Statistical Key Figure (A2X) : Statistical key figure text	Create language-dependent fields for a specific statistical key figure		X
Statistical Key Figure (A2X) : Statistical key figure text	Read language-dependent fields of a statistical key figure in a specific langu	X	
Statistical Key Figure (A2X) : Statistical key figure text	Update language-dependent fields of a statistical key figure in a specific language		X
Statistical Key Figure (A2X) : Statistical key figure text	Delete a specific translation of language-dependent fields for a statistical key figure		X
Statistical Key Figure (A2X) : Batch requests	Send a group of requests		X
Work Center : Capacity assignment	Read the capacity assignments of all work centers	X	
Work Center : Capacity assignment	Read the capacity assignment for a work center and the capacity category a	X	
Work Center : Capacity interval	Read the list of all work center capacity intervals for a work center	X	
Work Center : Capacity interval	Create a new work center capacity interval for the given work center		X
Work Center : Capacity interval	Read all the capacity intervals of all work center capacities	X	
Work Center : Capacity interval	Create a new capacity interval for a given work center capacity		X
Work Center : Capacity interval	Read the capacity interval for the given primary keys	X	
Work Center : Capacity interval	Update the capacity interval for the given primary keys		X
Work Center : Queued operations capacity	Read the list of all the queued operations for a work center	X	
Work Center : Queued operations capacity	Read work center operations	X	
Work Center : Queued operations capacity	Read a single work center operation by its key	X	
Work Center : Daily operations capacity	Read the list of all operations for the current day in a work center	X	
Work Center : Daily operations capacity	Read the current day's operations for a work center	X	
Work Center : Daily operations capacity	Read the current day's operation for a work center	X	
Work Center : Header	Read all the assigned capacities of a given work center ID	X	
Work Center : Header	Read all the assigned capacities of a given work center ID	X	
Work Center : Header	Create a new capacity assignment for a work center		X
Work Center : Header	Read the scheduling relevant capacity header of a given work center ID	X	
Work Center : Header	Read all the cost center allocations of a given work center ID	X	
Work Center : Header	Create a cost center allocation for a work center		X
Work Center : Header	Read the list of all operations for the current day of a given work center ID	X	
Work Center : Header	Read all the work center descriptions of a given work center ID	X	
Work Center : Header	Read the list of all the queued operations of a given work center ID	X	
Work Center : Header	Read all the headers of all work centers	X	
Work Center : Header	Create a new work center		X
Work Center : Header	Read the work center header of a given work center ID	X	
Work Center : Header	Update the work center header of the given work center ID		X
Work Center : Capacity shift	Read all the capacity shifts for the given primary keys	X	
Work Center : Capacity shift	Create a new capacity shift for a work center capacity interval		X
Work Center : Capacity shift	Read all the capacity shifts of all work center capacity intervals	X	
Work Center : Capacity shift	Create a new capacity shift for a work center capacity interval		X
Work Center : Capacity shift	Read capacity shift for the given primary keys	X	
Work Center : Capacity shift	Update capacity shift for the given primary keys		X
Work Center : Capacity assignment version 2	Read the list of all the queued operations for a work center	X	
Work Center : Capacity assignment version 2	Read the list of all operations for the current day in a work center	X	
Work Center : Capacity assignment version 2	Read the capacity assignments of all work centers	X	
Work Center : Capacity assignment version 2	Create a new capacity assignment for a work center		X
Work Center : Capacity assignment version 2	Read the capacity assignment of a work center for the given primary keys	X	
Work Center : Capacity assignment version 2	Update the capacity assignment of a work center for the given primary keys		X
Work Center : Capacity header	Read the capacity header of a work center capacity assignment for the giver	X	
Work Center : Capacity header	Read the capacity headers of all work center capacity assignments	X	
Work Center : Capacity header	Read the capacity header of a given capacity ID	X	
Work Center : Capacity header	Update the capacity header of a given capacity ID		X
Work Center : Capacity interval version 2	Read the capacity interval for the given primary keys	X	
Work Center : Capacity interval version 2	Create a new capacity interval for a work center capacity		X

Work Center : Capacity interval version 2	Read the capacity intervals of all capacities	X	
Work Center : Capacity interval version 2	Create a new capacity interval for a work center capacity		X
Work Center : Capacity interval version 2	Read the capacity interval for the given primary keys	X	
Work Center : Capacity interval version 2	Update the capacity interval for the given primary keys		X
Work Center : Capacity description	Read all the descriptions for a given capacity ID	X	
Work Center : Capacity description	Read the descriptions of all capacities	X	
Work Center : Capacity description	Read the capacity description of a given capacity ID in the given language	X	
Work Center : Capacity description	Update the capacity description for a given capacity ID in the given language		X
Work Center : Capacity shift version 2	Read all the capacity shifts of a capacity interval for the given primary keys	X	
Work Center : Capacity shift version 2	Create a new capacity shift for a work center capacity interval		X
Work Center : Capacity shift version 2	Read the capacity shifts of all capacity intervals	X	
Work Center : Capacity shift version 2	Create a new capacity shift for a work center capacity interval		X
Work Center : Capacity shift version 2	Read the capacity shift for the given primary keys	X	
Work Center : Capacity shift version 2	Update the capacity shift for the given primary keys		X
Work Center : Operation load distribution	Read the evaluation and load distribution of an order for a work center capa	X	
Work Center : Capacity evaluation	Read the evaluation and load distribution for a work center capacity	X	
Work Center : Cost center allocation	Read the cost center allocations of all work centers	X	
Work Center : Cost center allocation	Create a cost center allocation for a work center		X
Work Center : Cost center allocation	Read a work center's cost center allocation for the given primary keys	X	
Work Center : Cost center allocation	Update a work center's cost center allocation for the given primary keys		X
Work Center : Daily operations	Read the list of operations for current day of all work centers	X	
Work Center : Daily operations	Read the operation for current day of a work center for the given primary ke	X	
Work Center : Description	Read the descriptions of all work centers	X	
Work Center : Description	Read the work center description for a given work center ID in the given lan	X	
Work Center : Description	Update the work center description for a given work center ID in the given language		X
Work Center : Queued operations	Read the list of queued operations of all work centers	X	
Work Center : Queued operations	Read the queued operation for the given primary keys	X	
Work Center : Batch requests	Send a group of requests		X
Procurement-Related Activity : Description	Return the list of descriptions	X	
Procurement-Related Activity : Description	Create a description		X
Procurement-Related Activity : Description	Return a description	X	
Procurement-Related Activity : Description	Update a description		X

Sales Order (A2X) : Header billing plan item	Read the billing plan items of all sales orders	X	
Sales Order (A2X) : Header billing plan item	Create a billing plan item of a sales order		X
Sales Order (A2X) : Header billing plan item	Read a billing plan item of a sales order	X	
Sales Order (A2X) : Header billing plan item	Update a billing plan item of a sales order		X
Sales Order (A2X) : Header billing plan item	Delete a billing plan item of a sales order		X
Sales Order (A2X) : Item billing plan	Read the sales order header for an item billing plan	X	
Sales Order (A2X) : Item billing plan	Read the billing plan of a sales order item	X	
Sales Order (A2X) : Item billing plan	Read the sales order item for an item billing plan	X	
Sales Order (A2X) : Item billing plan	Read the billing plans of all sales order items	X	
Sales Order (A2X) : Item billing plan	Read the billing plan of a sales order item	X	
Sales Order (A2X) : Item billing plan	Update the billing plan of a sales order item		X
Sales Order (A2X) : Item partner	Read the sales order header of a partner function of a sales order item	X	
Sales Order (A2X) : Item partner	Read the item partners of a specific sales order item	X	
Sales Order (A2X) : Item partner	Create an item partner for a specific sales order item		X
Sales Order (A2X) : Item partner	Read the sales order item for a partner function of a sales order item	X	
Sales Order (A2X) : Item partner	Read the item partners for all sales orders	X	
Sales Order (A2X) : Item partner	Create a partner for a sales order item with a specific partner function		X
Sales Order (A2X) : Item partner	Read an item partner of an item with a specific partner function in a specific	X	
Sales Order (A2X) : Item partner	Update a partner of a sales order item with a specific partner function		X
Sales Order (A2X) : Item partner	Delete a partner of a specific sales order item with a specific partner function		X
Sales Order (A2X) : Item partner address	Get related to sales order	X	
Sales Order (A2X) : Item partner address	Read the sales order item for an item partner address	X	
Sales Order (A2X) : Item partner address	Read the item address of a sales order item partner	X	
Sales Order (A2X) : Item partner address	Read the sales order item partner for an item partner address	X	
Sales Order (A2X) : Item partner address	Read all addresses for item partners of sales orders	X	
Sales Order (A2X) : Item partner address	Read the address of an item partner of a sales order	X	
Sales Order (A2X) : Item partner address	Update the address of an item partner of a sales order		X
Sales Order (A2X) : Item pricing element	Read the sales order header for a pricing element	X	
Sales Order (A2X) : Item pricing element	Read the pricing element of a sales order item	X	
Sales Order (A2X) : Item pricing element	Create a pricing element for a specific sales order item		X
Sales Order (A2X) : Item pricing element	Read the sales order item for a pricing element	X	
Sales Order (A2X) : Item pricing element	Read the item pricing elements of all sales orders	X	
Sales Order (A2X) : Item pricing element	Create an item pricing element		X
Sales Order (A2X) : Item pricing element	Read the pricing element of a item with specific pricing details	X	
Sales Order (A2X) : Item pricing element	Update an item pricing element		X
Sales Order (A2X) : Item pricing element	Delete an item pricing element		X
Sales Order (A2X) : Item related object	Read the sales order header for a related object of a sales order item	X	
Sales Order (A2X) : Item related object	Read the related object of a sales order item	X	

Sales Order (A2X) : Item related object	Create a related object for a specific sales order item		X
Sales Order (A2X) : Item related object	Read the sales order item for a related object	X	
Sales Order (A2X) : Item related object	Read related objects from the items of all sales orders	X	
Sales Order (A2X) : Item related object	Create a related object for a sales order item		X
Sales Order (A2X) : Item related object	Read a related object from a sales order item	X	
Sales Order (A2X) : Item related object	Delete a related object from a sales order item		X
Sales Order (A2X) : Item text	Read the sales order header for a text of a sales order item	X	
Sales Order (A2X) : Item text	Read the text of a sales order item	X	
Sales Order (A2X) : Item text	Create a text for a specific sales order item		X
Sales Order (A2X) : Item text	Read the sales order item for an item text	X	
Sales Order (A2X) : Item text	Read item texts of all sales orders	X	
Sales Order (A2X) : Item text	Create an item text		X
Sales Order (A2X) : Item text	Read an item text	X	
Sales Order (A2X) : Item text	Update an item text		X
Sales Order (A2X) : Item text	Delete an item text		X
Sales Order (A2X) : Item preceding process flow	Read the sales order header data of a preceding item of a sales order	X	
Sales Order (A2X) : Item preceding process flow	Get entities from related to preceding proc flow doc item	X	
Sales Order (A2X) : Item preceding process flow	Read the sales order item data for a preceding item of a sales order	X	
Sales Order (A2X) : Item preceding process flow	Read the preceding items of all sales orders items	X	
Sales Order (A2X) : Item preceding process flow	Read a preceding item for a sales order item	X	
Sales Order (A2X) : Item subsequent process flow	Read the sales order header data for a subsequent item of a sales order	X	
Sales Order (A2X) : Item subsequent process flow	Get entities from related to subsequent proc flow doc item	X	
Sales Order (A2X) : Item subsequent process flow	Read the sales order item data for a subsequent item of a sales order	X	
Sales Order (A2X) : Item subsequent process flow	Read the subsequent items of all sales orders items	X	
Sales Order (A2X) : Item subsequent process flow	Read a subsequent item for a sales order item	X	
Sales Order (A2X) : Header partner address	Read the sales order for a header partner address	X	
Sales Order (A2X) : Header partner address	Read the address of a sales order header partner	X	
Sales Order (A2X) : Header partner address	Read the sales order header partner for a header partner address	X	
Sales Order (A2X) : Header partner address	Read all addresses for header partners of sales orders	X	
Sales Order (A2X) : Header partner address	Read the address of a header partner of a sales order	X	
Sales Order (A2X) : Header partner address	Update the address of a header partner of a sales order		X
Sales Order (A2X) : Item billing plan item	Read the sales order header for an item billing plan item	X	
Sales Order (A2X) : Item billing plan item	Read the sales order item for a billing plan item of this sales order item	X	
Sales Order (A2X) : Item billing plan item	Read the billing plan items of a sales order item billing plan	X	
Sales Order (A2X) : Item billing plan item	Create a billing plan item for a sales order item billing plan		X
Sales Order (A2X) : Item billing plan item	Read the item billing plan for an item billing plan item	X	
Sales Order (A2X) : Item billing plan item	Read the billing plan items of all sales order items	X	
Sales Order (A2X) : Item billing plan item	Create a billing plan item for a sales order item		X
Sales Order (A2X) : Item billing plan item	Read a billing plan item of a sales order item	X	
Sales Order (A2X) : Item billing plan item	Update a billing plan item of a sales order item		X
Sales Order (A2X) : Item billing plan item	Delete a billing plan item of a sales order item		X
Sales Order (A2X) : Item schedule line	Read the schedule lines of a sales order item	X	
Sales Order (A2X) : Item schedule line	Create schedule lines for a sales order item		X
Sales Order (A2X) : Item schedule line	Read the schedule lines of all sales orders	X	
Sales Order (A2X) : Item schedule line	Create a schedule line		X
Sales Order (A2X) : Item schedule line	Read a schedule line	X	
Sales Order (A2X) : Item schedule line	Update a schedule line		X
Sales Order (A2X) : Item schedule line	Delete a schedule line		X
Sales Order (A2X) : Service operations	Invoke action reject approval request		X
Sales Order (A2X) : Service operations	Invoke action release approval request		X
Sales Order (A2X) : Batch requests	Send a group of requests		X
Inspection Lot : Inspection characteristics	Read inspection characteristics	X	
Inspection Lot : Inspection characteristics	Read a specific inspection characteristic	X	
Inspection Lot : Single inspection results	Read single inspection results for an inspection characteristic	X	
Inspection Lot : Single inspection results	Create a single inspection result for an inspection characteristic		X
Inspection Lot : Single inspection results	Read single inspection result values	X	
Inspection Lot : Single inspection results	Not supported		X
Inspection Lot : Single inspection results	Read a specific single inspection result value	X	
Inspection Lot : Single inspection results	Update a specific single inspection result value		X
Inspection Lot : Summarized inspection results for inspection point	Read a summarized inspection result for an inspection characteristic of an ir	X	
Inspection Lot : Summarized inspection results for inspection point	Create a summarized inspection result for an inspection characteristic of an inspection point		X
Inspection Lot : Summarized inspection results for inspection point	Read summarized inspection results recorded for inspection points	X	
Inspection Lot : Summarized inspection results for inspection point	Not supported		X
Inspection Lot : Summarized inspection results for inspection point	Read a specific summarized inspection result recorded for an inspection poi	X	
Inspection Lot : Summarized inspection results for inspection point	Update a specific summarized inspection result recorded for an inspection point		X
Inspection Lot : Inspection lot data	Read inspection lots with data at header level	X	
Inspection Lot : Inspection lot data	Create an inspection lot		X
Inspection Lot : Inspection lot data	Read the header data of a specific inspection lot	X	
Inspection Lot : Inspection lot data	Update the header data of a specific inspection lot		X
Inspection Lot : Inspection lot statuses	Read status information for an inspection lot	X	
Inspection Lot : Inspection lot statuses	Read inspection lot status information	X	
Inspection Lot : Inspection lot statuses	Read inspection lot status information by its key	X	
Inspection Lot : Inspection operations	Read inspection operations	X	
Inspection Lot : Inspection operations	Read a specific inspection operation	X	
Inspection Lot : Summarized inspection results	Read summarized inspection results	X	
Inspection Lot : Summarized inspection results	Create a summarized inspection result		X
Inspection Lot : Summarized inspection results	Read a specific summarized inspection result for an inspection characteristic	X	

Inspection Lot : Summarized inspection results	Update a specific summarized inspection result for an inspection characteristic		X
Inspection Lot : Inspection points	Read inspection points	X	
Inspection Lot : Inspection points	Create an inspection point and related inspection point characteristics		X
Inspection Lot : Inspection points	Read a specific inspection point	X	
Inspection Lot : Inspection points	Update a specific inspection point		X
Inspection Lot : Inspection points	Triggers the automatic valuation of an inspection point		X
Inspection Lot : Stock postings	Read stock postings for inspection lots in the form of material document iten	X	
Inspection Lot : Stock postings	Create a stock posting for an inspection lot in the form of a material document item		X
Inspection Lot : Stock postings	Read a specific stock posting for an inspection lot	X	
Inspection Lot : Serial numbers for stock posting	Read a specific stock posting with serial numbers posted for an inspection lo	X	
Inspection Lot : Serial numbers for stock posting	Read information on serial numbers for stock postings for inspection lots	X	
Inspection Lot : Serial numbers for stock posting	Read information on a specific serial number for a stock posting for an inspe	X	
Inspection Lot : Serial numbers of inspection lot	Read serial numbers for inspection lots	X	
Inspection Lot : Serial numbers of inspection lot	Read a specific serial number for an inspection lot	X	
Inspection Lot : Usage decisions	Read usage decisions made for inspection lots	X	
Inspection Lot : Usage decisions	Create a usage decision		X
Inspection Lot : Usage decisions	Read a specific usage decision for an inspection lot	X	
Inspection Lot : Usage decisions	Update a specific usage decision for an inspection lot		X
Inspection Lot : Inspection characteristics of inspection points	Read inspection characteristics of inspection points	X	
Inspection Lot : Inspection characteristics of inspection points	Read a specific inspection characteristic of an inspection point	X	
Inspection Lot : Batch requests	Send a group of requests		X
Consolidation Unit : Consolidation unit by time	Get entities from consolidationunitbytime	X	
Consolidation Unit : Consolidation unit by time	Get entity from consolidationunitbytime by key	X	
Consolidation Unit : Consolidation unit by time	Update entity in consolidationunitbytime		X
Consolidation Unit : Consolidation unit	Get related to consolidation unit	X	
Consolidation Unit : Consolidation unit	Get entities from related to cnsldtnunitbytime	X	
Consolidation Unit : Consolidation unit	Get entities from consolidation unit	X	
Consolidation Unit : Consolidation unit	Add new entity to consolidation unit		X
Consolidation Unit : Consolidation unit	Get entity from consolidation unit by key	X	
Consolidation Unit : Consolidation unit	Update entity in consolidation unit		X
Consolidation Unit : Consolidation unit	Delete entity from consolidation unit		X
Consolidation Unit : Consolidation unit by time and version	Get related to consolidation unit	X	
Consolidation Unit : Consolidation unit by time and version	Get entities from related to consolidation unit by time and version	X	
Consolidation Unit : Consolidation unit by time and version	Get entities from consolidationunitbytimeversion	X	
Consolidation Unit : Consolidation unit by time and version	Get entity from consolidation unit by time and version by key	X	
Consolidation Unit : Consolidation unit by time and version	Update entity in consolidation unit by time and version		X
Consolidation Unit : Consolidation unit text	Get related to consolidation unit	X	
Consolidation Unit : Consolidation unit text	Get entities from related to text	X	
Consolidation Unit : Consolidation unit text	Get entities from consolidation unit text	X	
Consolidation Unit : Consolidation unit text	Get entity from consolidation unit text by key	X	
Consolidation Unit : Consolidation unit text	Update entity in consolidation unit text		X
Consolidation Unit : Consolidation unit text	Delete entity from consolidation unit text		X
Consolidation Unit : Batch requests	Send a group of requests		X
Bills of Material Comparison : Comparison result	Get entities from comparison result set	X	
Bills of Material Comparison : Comparison result	Get entity from comparison result set by key	X	
Bills of Material Comparison : Comparison result	Invoke function BOM comparison	X	
Bills of Material Comparison : Batch requests	Send a group of requests		X
Line Item of Treasury Posting Journal Entry - Read : Treasury posting jour	Get entities from a treasury posting journal entry	X	
Line Item of Treasury Posting Journal Entry - Read : Treasury posting jour	Get entity from a treasury posting journal entry by key	X	
Line Item of Treasury Posting Journal Entry - Read : Batch requests	Send a group of requests		X
Condition Record for Pricing in Sales : Condition supplements	Read all condition supplements in the system	X	
Condition Record for Pricing in Sales : Condition supplements	Create one or more condition supplements		X
Condition Record for Pricing in Sales : Condition supplements	Read a specific condition supplement	X	
Condition Record for Pricing in Sales : Condition supplements	Update a specific condition supplement		X
Condition Record for Pricing in Sales : Condition supplements	Delete a specific condition supplement		X
Condition Record for Pricing in Sales : Condition record validity	Read validity of the condition record for a specific condition supplement	X	
Condition Record for Pricing in Sales : Condition record validity	Read the condition supplements for a specific condition record validity perio	X	
Condition Record for Pricing in Sales : Condition record validity	Create one or more condition supplements for a specific condition record validity period		X
Condition Record for Pricing in Sales : Condition record validity	Read validity of all condition records in the system	X	
Condition Record for Pricing in Sales : Condition record validity	Read the validity of a specific condition record	X	
Condition Record for Pricing in Sales : Condition record validity	Update the validity period of a specific condition record		X
Condition Record for Pricing in Sales : Pricing scales	Read the pricing scales of a specific condition supplement	X	
Condition Record for Pricing in Sales : Pricing scales	Create one or more pricing scales for a specific condition supplement		X
Condition Record for Pricing in Sales : Pricing scales	Read the condition supplement for a specific condition supplement pricing s	X	
Condition Record for Pricing in Sales : Pricing scales	Read all pricing scales in the system	X	
Condition Record for Pricing in Sales : Pricing scales	Create one or more pricing scales		X
Condition Record for Pricing in Sales : Pricing scales	Read a specific pricing scale	X	
Condition Record for Pricing in Sales : Pricing scales	Update a specific pricing scale		X
Condition Record for Pricing in Sales : Pricing scales	Delete a specific pricing scale		X
Condition Record for Pricing in Sales : Condition supplement descriptions	Read the pricing supplement texts of a specific condition supplement	X	
Condition Record for Pricing in Sales : Condition supplement descriptions	Create one or more pricing supplement texts for a specific condition supplement		X
Condition Record for Pricing in Sales : Condition supplement descriptions	Read the condition record for a specific pricing supplement text	X	
Condition Record for Pricing in Sales : Condition supplement descriptions	Read all pricing supplement texts in the system	X	
Condition Record for Pricing in Sales : Condition supplement descriptions	Create one or more pricing supplement texts		X
Condition Record for Pricing in Sales : Condition supplement descriptions	Read a specific pricing supplement text	X	
Condition Record for Pricing in Sales : Condition supplement descriptions	Update a specific pricing supplement text		X
Condition Record for Pricing in Sales : Condition supplement descriptions	Delete a specific pricing supplement text		X

Condition Record for Pricing in Sales : Condition records	Read the condition record for a specific condition supplement	X	
Condition Record for Pricing in Sales : Condition records	Read the condition supplements of a specific condition record	X	
Condition Record for Pricing in Sales : Condition records	Create one or more condition supplements for a specific condition record		X
Condition Record for Pricing in Sales : Condition records	Read the condition record for a specific condition record validity period	X	
Condition Record for Pricing in Sales : Condition records	Read the validity of a specific condition record	X	
Condition Record for Pricing in Sales : Condition records	Read the condition record for a specific pricing scale	X	
Condition Record for Pricing in Sales : Condition records	Read the pricing scales of a specific condition record	X	
Condition Record for Pricing in Sales : Condition records	Create one or more pricing scales for a specific condition record		X
Condition Record for Pricing in Sales : Condition records	Read all condition records in the system	X	
Condition Record for Pricing in Sales : Condition records	Create one or more condition records		X
Condition Record for Pricing in Sales : Condition records	Read a specific condition record	X	
Condition Record for Pricing in Sales : Condition records	Update a specific condition record		X
Condition Record for Pricing in Sales : Condition records	Delete a specific condition record		X
Condition Record for Pricing in Sales : Condition record descriptions	Read the pricing record texts of a specific condition record	X	
Condition Record for Pricing in Sales : Condition record descriptions	Create one or more pricing record texts for a specific condition record		X
Condition Record for Pricing in Sales : Condition record descriptions	Read the condition record for a specific pricing record text	X	
Condition Record for Pricing in Sales : Condition record descriptions	Read all pricing record texts in the system	X	
Condition Record for Pricing in Sales : Condition record descriptions	Create one or more pricing record texts		X
Condition Record for Pricing in Sales : Condition record descriptions	Read a specific pricing record text	X	
Condition Record for Pricing in Sales : Condition record descriptions	Update a specific pricing record text		X
Condition Record for Pricing in Sales : Condition record descriptions	Delete a specific pricing record text		X
Condition Record for Pricing in Sales : Batch requests	Send a group of requests		X
Document Info Record : Bill of material object links	Read the object links between the BOM and document info record objects	X	
Document Info Record : Bill of material object links	Retrieve the BOM object links for a document info record	X	
Document Info Record : Document info record	Retrieve the BOM object links for a document info record	X	
Document Info Record : Document info record	Retrieve the BOM objects associated with a document info record	X	
Document Info Record : Document info record	Read the document info records	X	
Document Info Record : Document info record	Create a document info record		X
Document Info Record : Document info record	Retrieve the details of a document info record by key	X	
Document Info Record : Document info record	Update the details of a document info record		X
Document Info Record : Document info record	Invoke action change status		X
Document Info Record : Change record object links	Retrieve the change record object links for a document info record	X	
Document Info Record : Change record object links	Retrieve the change record objects associated with a document info record	X	
Document Info Record : Change record object links	Read the object links between the change record and document info record	X	
Document Info Record : Change record object links	Retrieve the change record object links for a document info record	X	
Document Info Record : Product object links	Retrieve the product object links for the document info record	X	
Document Info Record : Product object links	Retrieve the product object links associated with a document info record	X	
Document Info Record : Product object links	Create an object link between a product and a document info record		X
Document Info Record : Product object links	Read the object links between the product and document info record objects	X	
Document Info Record : Product object links	Create an object link between a product and a document info record		X
Document Info Record : Product object links	Retrieve the product object links for a document info record	X	
Document Info Record : Product object links	Delete the object link between a product and document info record		X
Document Info Record : Classification characteristics	Retrieve the characteristics associated with a document info record	X	
Document Info Record : Classification characteristics	Retrieve the list of characteristics	X	
Document Info Record : Classification characteristics	Retrieve the characteristics maintained for a document info record	X	
Document Info Record : Classification class	Retrieve the classification objects associated with a document info record	X	
Document Info Record : Classification class	Retrieve the list of classes	X	
Document Info Record : Classification class	Retrieve the class associated with a document info record	X	
Document Info Record : Document info record description	Retrieve the document description maintained for a document info record	X	
Document Info Record : Document info record description	Create a description for a document info record		X
Document Info Record : Document info record description	Retrieve the description maintained for a document info record in a specific l	X	
Document Info Record : Document info record description	Read the document descriptions maintained for document info records	X	
Document Info Record : Document info record description	Create a document description for a document info record		X
Document Info Record : Document info record description	Retrieve the document description maintained for a document info record in	X	
Document Info Record : Document info record description	Update the document description maintained for a document info record in a specific languag		X
Document Info Record : Document info record description	Delete the document description maintained for a document info record in a specific language		X
Document Info Record : Document status value help	Retrieve the document status for a document info record	X	
Document Info Record : Document status value help	Read the document statuses for the document types	X	
Document Info Record : Document status value help	Read the internal document status	X	
Document Info Record : Classification characteristic values	Retrieve the classification characteristic values maintained for a document ir	X	
Document Info Record : Classification characteristic values	Retrieve the list of characteristic values	X	
Document Info Record : Classification characteristic values	Retrieve the classification characteristic values maintained for a document ir	X	
Document Info Record : Classification class characteristics	Retrieve the characteristics associated with a class for a document info reco	X	
Document Info Record : Classification class characteristics	Retrieve the list of characteristics	X	
Document Info Record : Classification class characteristics	Retrieve the characteristics associated with a class for a document info reco	X	
Document Info Record : Batch requests	Send a group of requests		X
Post Lockbox : Lockbox batch	Get entities from lockbox batch	X	
Post Lockbox : Lockbox batch	Add new entity to lockbox batch		X
Post Lockbox : Lockbox batch	Get entity from lockbox batch by key	X	
Post Lockbox : Lockbox batch item	Get entities from related to item	X	
Post Lockbox : Lockbox batch item	Get related to header	X	
Post Lockbox : Lockbox batch item	Get entities from lockbox batch item	X	
Post Lockbox : Lockbox batch item	Get entity from lockbox batch item by key	X	
Post Lockbox : Lockbox payment advice item	Get related to root	X	
Post Lockbox : Lockbox payment advice item	Get entities from related to lockbox clearing	X	
Post Lockbox : Lockbox payment advice item	Get related to batchitem	X	
Post Lockbox : Lockbox payment advice item	Get entities from lockbox clearing	X	

Post Lockbox : Lockbox payment advice item	Get entity from lockbox clearing by key	X	
Post Lockbox : Batch requests	Send a group of requests		X
Manual Contract Accruals - Post (Synchronous) : Accrual output items	Post manual contract accruals	X	
Supplier Evaluation Operational Score - Read : Read supplier scores	Get entities from related results	X	
Supplier Evaluation Operational Score - Read : SAP value help set	Get entities from SAP value help set	X	
Supplier Evaluation Operational Score - Read : SAP value help set	Add new entity to SAP value help set		X
Supplier Evaluation Operational Score - Read : SAP value help set	Get entity from SAP value help set by key	X	
Supplier Evaluation Operational Score - Read : SAP value help set	Update entity in SAP value help set		X
Supplier Evaluation Operational Score - Read : SAP value help set	Delete entity from SAP value help set		X
Supplier Evaluation Operational Score - Read : SAP currencies	Get entities from SAP currencies	X	
Supplier Evaluation Operational Score - Read : SAP currencies	Add new entity to SAP currencies		X

Supplier Evaluation Operational Score - Read : SAP format set	Get related format	X	
Supplier Evaluation Operational Score - Read : SAP file share set	Get related fileshare	X	
Supplier Evaluation Operational Score - Read : SAP table columns set	Get entities from related tablecolumns	X	
Supplier Evaluation Operational Score - Read : SAP cover page set	Get entities from related coverpage	X	
Supplier Evaluation Operational Score - Read : SAP signature set	Get related signature	X	
Supplier Evaluation Operational Score - Read : SAP pdfstandard set	Get related PDF standard	X	
Supplier Evaluation Operational Score - Read : SAP hierarchy set	Get related hierarchy	X	
Supplier Evaluation Operational Score - Read : SAP pdfheader set	Get related header	X	
Supplier Evaluation Operational Score - Read : SAP pdffooter set	Get related footer	X	
Supplier Evaluation Operational Score - Read : Batch requests	Send a group of requests		X
Ledger - Read : Ledger	Read the items of all ledgers	X	
Ledger - Read : Ledger	Read a ledger by key	X	
Ledger - Read : Ledger text	Read the texts of a specific ledger	X	
Ledger - Read : Ledger text	Read the ledger related to the text item	X	
Ledger - Read : Ledger text	Read the texts of all ledgers	X	
Ledger - Read : Ledger text	Read the texts of a ledger for a specific language and ledger ID	X	
Bills of Material Where-Used List : Where used list	Read bills of material for a component	X	
Bills of Material Where-Used List : Where used list	Read bills of material for a component based on the specified component ke	X	
Bills of Material Where-Used List : Batch requests	Send a group of requests		X
Phase Relationship Type : Relationship type	Get entities from phase relationship type	X	
Phase Relationship Type : Relationship type	Get entity from phase relationship type by key	X	
Phase Relationship Type : Relationship type text	Get entities from related to text	X	
Phase Relationship Type : Relationship type text	Get related to relshptype	X	
Phase Relationship Type : Relationship type text	Get entities from phase relationship type text	X	
Phase Relationship Type : Relationship type text	Get entity from phase relationship type text by key	X	
Phase Relationship Type : Batch requests	Send a group of requests		X
Condition Contract Type - Read : Field combination assignment	Set of field combination assignments to a condition contract type	X	
Condition Contract Type - Read : Field combination assignment	Set of field combination assignments to a condition contract type	X	
Condition Contract Type - Read : Field assignment to combination type	Set of field combination assignments to a condition contract type	X	
Condition Contract Type - Read : Condition contract type	Set of field combination assignments to a condition contract type	X	
Condition Contract Type - Read : Condition contract type	Condition contract types used in the settlement processes	X	
Condition Contract Type - Read : Condition contract type	Condition contract types used in the settlement processes	X	
Condition Contract Type - Read : Batch requests	Send a group of requests		X
Payment Item - Read Update (Synchronous) : Payment header	Read payment header information	X	
Payment Item - Read Update (Synchronous) : Payment header	Read payment header information of a specific key	X	
Payment Item - Read Update (Synchronous) : Payment items	Read payment items of a single payment header	X	
Payment Item - Read Update (Synchronous) : Payment items	Read payment items information	X	
Payment Item - Read Update (Synchronous) : Payment items	Read information of a single payment item	X	
Payment Item - Read Update (Synchronous) : Payment items	Update item approval status and custom field data		X
Payment Item - Read Update (Synchronous) : Batch requests	Send a group of requests		X
Sales Quotation (A2X) : Sales quotation header	Read all sales quotation headers	X	
Sales Quotation (A2X) : Sales quotation header	Create a sales quotation		X
Sales Quotation (A2X) : Sales quotation header	Read the header of a specific sales quotation	X	
Sales Quotation (A2X) : Sales quotation header	Update a specific sales quotation		X
Sales Quotation (A2X) : Sales quotation header	Delete a specific sales quotation		X
Sales Quotation (A2X) : Sales quotation item	Read all items of a specific sales quotation	X	
Sales Quotation (A2X) : Sales quotation item	Create a sales quotation item for a specific sales quotation		X
Sales Quotation (A2X) : Sales quotation item	Read the sales quotation header for a specific item	X	
Sales Quotation (A2X) : Sales quotation item	Read all sales quotation items	X	
Sales Quotation (A2X) : Sales quotation item	Create a sales quotation item		X
Sales Quotation (A2X) : Sales quotation item	Read a specific sales quotation item	X	
Sales Quotation (A2X) : Sales quotation item	Update a specific sales quotation item		X
Sales Quotation (A2X) : Sales quotation item	Delete a specific sales quotation item		X

Sales Quotation (A2X) : Header partner	Read the header partners of a specific sales quotation	X	
Sales Quotation (A2X) : Header partner	Read the sales quotation header for a specific header partner	X	
Sales Quotation (A2X) : Header partner	Read the header partners of all sales quotations	X	
Sales Quotation (A2X) : Header partner	Read the header partners of a specific sales quotation and with a specific pa	X	
Sales Quotation (A2X) : Header partner	Update the header partners of a specific sales quotation and with a specific partner function		X
Sales Quotation (A2X) : Header partner	Delete the header partners of a specific sales quotation and with a specific partner function		X
Sales Quotation (A2X) : Header preceding process flow	Read the preceding documents of a sales quotation	X	
Sales Quotation (A2X) : Header preceding process flow	Read the sales quotation header for a preceding document of a sales quotat	X	
Sales Quotation (A2X) : Header preceding process flow	Read the preceding documents of all sales quotations	X	
Sales Quotation (A2X) : Header preceding process flow	Read a preceding document of a sales quotation	X	
Sales Quotation (A2X) : Header pricing element	Read the header pricing element of a specific sales quotation	X	
Sales Quotation (A2X) : Header pricing element	Create a header pricing element for a specific sales quotation		X
Sales Quotation (A2X) : Header pricing element	Read the sales quotation header for a specific pricing element	X	
Sales Quotation (A2X) : Header pricing element	Read the header pricing elements of all sales quotations	X	
Sales Quotation (A2X) : Header pricing element	Create a header pricing element for a sales quotation		X
Sales Quotation (A2X) : Header pricing element	Read the header pricing element for a specific sales quotation	X	
Sales Quotation (A2X) : Header pricing element	Update a header pricing element for a specific sales quotation		X
Sales Quotation (A2X) : Header pricing element	Delete a header pricing element for a specific sales quotation		X
Sales Quotation (A2X) : Header related object	Read the related objects of a sales quotation	X	
Sales Quotation (A2X) : Header related object	Create related objects for a sales quotation		X
Sales Quotation (A2X) : Header related object	Read the sales quotation header for a related object of a sales quotation	X	
Sales Quotation (A2X) : Header related object	Read the related objects of all sales quotations	X	
Sales Quotation (A2X) : Header related object	Create a related object for a sales quotation		X
Sales Quotation (A2X) : Header related object	Read a related object of a sales quotation	X	
Sales Quotation (A2X) : Header related object	Delete a related object from a sales quotation		X
Sales Quotation (A2X) : Header subsequent process flow	Read the subsequent documents of a sales quotation	X	
Sales Quotation (A2X) : Header subsequent process flow	Read the sales quotation header for a subsequent document of a sales quot	X	
Sales Quotation (A2X) : Header subsequent process flow	Read the subsequent documents of all sales quotations	X	
Sales Quotation (A2X) : Header subsequent process flow	Read a subsequent document of a sales quotation	X	
Sales Quotation (A2X) : Header text	Read the header texts of a specific sales quotation	X	
Sales Quotation (A2X) : Header text	Read the sales quotation header for a specific header text	X	
Sales Quotation (A2X) : Header text	Read the header texts of all sales quotations	X	
Sales Quotation (A2X) : Header text	Read the header texts of a specific sales quotation	X	
Sales Quotation (A2X) : Header text	Update a specific header text for a specific sales quotation		X
Sales Quotation (A2X) : Header text	Delete a specific header text for a specific sales quotation		X
Sales Quotation (A2X) : Item partner	Read the sales quotation header for a specific partner function of a sales qu	X	
Sales Quotation (A2X) : Item partner	Read the item partners of a specific sales quotation item	X	
Sales Quotation (A2X) : Item partner	Read the sales quotation item for a specific partner function of a sales quota	X	
Sales Quotation (A2X) : Item partner	Read the item partners for all sales quotations	X	
Sales Quotation (A2X) : Item partner	Read the item partners of a specific item and with a specific partner function	X	
Sales Quotation (A2X) : Item partner	Update the item partners of a specific item and with a specific partner function in a specific sa		X
Sales Quotation (A2X) : Item partner	Delete the item partners of a specific item and with a specific partner function in a specific sal		X
Sales Quotation (A2X) : Item pricing element	Read the sales quotation header for a specific pricing element	X	
Sales Quotation (A2X) : Item pricing element	Read the pricing element of a specific sales quotation item	X	
Sales Quotation (A2X) : Item pricing element	Create a pricing element for a specific sales quotation item		X
Sales Quotation (A2X) : Item pricing element	Read the sales quotation item for a specific pricing element	X	
Sales Quotation (A2X) : Item pricing element	Read the item pricing elements of all sales quotations	X	
Sales Quotation (A2X) : Item pricing element	Create an item pricing element		X
Sales Quotation (A2X) : Item pricing element	Read the pricing element of a specific sales quotation item	X	
Sales Quotation (A2X) : Item pricing element	Update an item pricing element		X
Sales Quotation (A2X) : Item pricing element	Delete an item pricing element		X
Sales Quotation (A2X) : Item text	Read the sales quotation header for a specific text of a sales quotation item	X	
Sales Quotation (A2X) : Item text	Read the text of a specific sales quotation item	X	
Sales Quotation (A2X) : Item text	Read the sales quotation item for a specific item text	X	
Sales Quotation (A2X) : Item text	Read item texts of all sales quotations	X	
Sales Quotation (A2X) : Item text	Read a specific item text	X	
Sales Quotation (A2X) : Item text	Update a specific item text		X
Sales Quotation (A2X) : Item text	Delete a specific item text		X
Sales Quotation (A2X) : Item related object	Read the sales quotation header for a related object of a sales quotation iter	X	
Sales Quotation (A2X) : Item related object	Read the related objects of a sales quotation item	X	
Sales Quotation (A2X) : Item related object	Create related objects for a sales quotation item		X
Sales Quotation (A2X) : Item related object	Read the sales quotation item for a related object of a sales quotation item	X	
Sales Quotation (A2X) : Item related object	Read related objects from all sales quotation items	X	
Sales Quotation (A2X) : Item related object	Create a related object for a sales quotation item		X
Sales Quotation (A2X) : Item related object	Read a related object from a sales quotation item	X	
Sales Quotation (A2X) : Item related object	Delete a related object from a sales quotation item		X
Sales Quotation (A2X) : Item preceding process flow	Read the sales quotation header for a preceding item of a sales quotation ite	X	
Sales Quotation (A2X) : Item preceding process flow	Read the preceding items of a sales quotation item	X	
Sales Quotation (A2X) : Item preceding process flow	Read the sales quotation item for a preceding item of a sales quotation item	X	
Sales Quotation (A2X) : Item preceding process flow	Read the preceding items of all sales quotation items	X	
Sales Quotation (A2X) : Item preceding process flow	Read a preceding item of a sales quotation item	X	
Sales Quotation (A2X) : Item subsequent process flow	Read the sales quotation header for a subsequent item of a sales quotation	X	
Sales Quotation (A2X) : Item subsequent process flow	Read the subsequent items of a sales quotation item	X	
Sales Quotation (A2X) : Item subsequent process flow	Read the sales quotation item for a subsequent item of a sales quotation ite	X	
Sales Quotation (A2X) : Item subsequent process flow	Read the subsequent items of all sales quotation items	X	
Sales Quotation (A2X) : Item subsequent process flow	Read a subsequent item of a sales quotation item	X	
Sales Quotation (A2X) : Service operations	Invoke action release approval request		X

Sales Quotation (A2X) : Service operations	Invoke action reject approval request		X
Sales Quotation (A2X) : Batch requests	Send a group of requests		X
Reservation Document : Document header	Read information on reservation document header level	X	
Reservation Document : Document header	Create a reservation document		X
Reservation Document : Document header	Read information for a specific reservation document header	X	
Reservation Document : Document header	Delete a reservation document		X
Reservation Document : Document items	Read information for a specific reservation document and reservation docum	X	
Reservation Document : Document items	Read information on reservation document items level	X	
Reservation Document : Document items	Read information on reservation document items level for a specific reservat	X	
Reservation Document : Batch requests	Send a group of requests		X
Business Situation Type - Read : Situation action (Latest version)	Get entities from situation action	X

Commercial Project - Create Update : Sales order header partner	Create a header partner for a sales order in a customer project		X
Commercial Project - Create Update : Sales order header partner	Read the header partners with a specific partner function of a sales order in	X	
Commercial Project - Create Update : Sales order header partner	Update the header partners of a sales order with a specific partner function in a customer pro		X
Commercial Project - Create Update : Sales order header text	Read the header texts of a sales order in a specific customer project	X	
Commercial Project - Create Update : Sales order header text	Create a header text for a sales order in a specific customer project		X
Commercial Project - Create Update : Sales order header text	Read the header texts of all sales orders in customer projects	X	
Commercial Project - Create Update : Sales order header text	Create a header text for a sales order in a customer project		X
Commercial Project - Create Update : Sales order header text	Read a specific header text for a sales order in a customer project	X	
Commercial Project - Create Update : Sales order header text	Update a specific header text for a sales order in a customer project		X
Commercial Project - Create Update : Sales order header text	Delete a specific header text for a sales order in a customer project		X
Commercial Project - Create Update : Sales order item partner	Read the partners of a sales order item in a customer project	X	
Commercial Project - Create Update : Sales order item partner	Create a partner for a sales order item in a customer project		X
Commercial Project - Create Update : Sales order item partner	Read the item partners for all sales orders in customer projects	X	
Commercial Project - Create Update : Sales order item partner	Create an item partner for a sales order in a customer project		X
Commercial Project - Create Update : Sales order item partner	Read the item partners with a specific partner function of a sales order in a c	X	
Commercial Project - Create Update : Sales order item partner	Update the item partners with a specific partner function of a sales order in a customer projec		X
Commercial Project - Create Update : Sales order item text	Read the text of a sales order item in a customer project	X	
Commercial Project - Create Update : Sales order item text	Create a text for a sales order item in a customer project		X
Commercial Project - Create Update : Sales order item text	Read item texts of all sales orders in customer projects	X	
Commercial Project - Create Update : Sales order item text	Create an item text for a sales order in a customer project		X
Commercial Project - Create Update : Sales order item text	Read a specific item text in a customer project	X	
Commercial Project - Create Update : Sales order item text	Update a specific item text in a customer project		X
Commercial Project - Create Update : Sales order item text	Delete a specific item text in a customer project		X
Commercial Project - Create Update : Sales order item work package	Read the work package of a sales order item in a customer project	X	
Commercial Project - Create Update : Sales order item work package	Assign a work package to a sales order item in a customer project		X
Commercial Project - Create Update : Sales order item work package	Read the work packages of all sales order items in customer projects	X	
Commercial Project - Create Update : Sales order item work package	Assign a work package to a sales order item in a customer project		X
Commercial Project - Create Update : Sales order item work package	Read a specific work package in a customer project	X	
Commercial Project - Create Update : Sales order item work package	Unassign a specific work package in a customer project		X
Commercial Project - Create Update : Sales order item pricing element	Read the pricing elements of a sales order item in a customer project	X	
Commercial Project - Create Update : Sales order item pricing element	Read the item pricing elements for all sales orders in customer projects	X	
Commercial Project - Create Update : Sales order item pricing element	Read specific item pricing element data of a sales order in a customer proje	X	
Commercial Project - Create Update : Sales order item billing plan	Read the billing plan of a sales order item in a customer project	X	
Commercial Project - Create Update : Sales order item billing plan	Create a billing plan item for a sales order item in a customer project		X
Commercial Project - Create Update : Sales order item billing plan	Read the billing plans of all sales order items in customer projects	X	
Commercial Project - Create Update : Sales order item billing plan	Create a billing plan item for a sales order item in a customer project		X
Commercial Project - Create Update : Sales order item billing plan	Read a specific billing plan item in a customer project	X	
Commercial Project - Create Update : Sales order item billing plan	Update a specific billing plan item in a customer project		X
Commercial Project - Create Update : Sales order item billing plan	Delete a specific billing plan item in a customer project		X
Commercial Project - Create Update : Resource demands	Return all team-related resource demands in work packages of customer an	X	
Commercial Project - Create Update : Resource demands	Create a resource demand for a work package team		X
Commercial Project - Create Update : Resource demands	Return details about a specific resource demand in a work package	X	
Commercial Project - Create Update : Resource demands	Update information for a resource demand		X
Commercial Project - Create Update : Resource demands	Delete a resource demand in a work package		X
Commercial Project - Create Update : Resource demand distribution	Return details about the effort distribution for a specific resource demand	X	
Commercial Project - Create Update : Resource demand distribution	Create distribution of efforts for a resource demand in a work package		X
Commercial Project - Create Update : Resource demand distribution	Return information about the resource demand for an item in the demand dis	X	
Commercial Project - Create Update : Resource demand distribution	Return details about demand distributions for resource demands in the syste	X	
Commercial Project - Create Update : Resource demand distribution	Create a new distribution for a resource demand in a work package		X
Commercial Project - Create Update : Resource demand distribution	Return details about effort distribution in a resource demand, for a given mo	X	

Commercial Project - Create Update : Resource demand distribution	Update a demand distribution for a resource demand in a work package		X
Commercial Project - Create Update : Resource demand distribution	Delete a demand distribution item from a resource demand in a work package		X
Commercial Project - Create Update : Resource demand skills	Return information about the skills assigned to a specific resource demand	X	
Commercial Project - Create Update : Resource demand skills	Return skills assigned to resource demands in all work packages	X	
Commercial Project - Create Update : Resource demand skills	Return information about skills assigned to a resource demand in a work pa	X	
Commercial Project - Create Update : Resource supplies	Return details about confirmed staffing assignments for a resource demand	X	
Commercial Project - Create Update : Resource supplies	Create a resource supply for a resource demand in a work package		X
Commercial Project - Create Update : Resource supplies	Return information about the resource demand for a confirmed staffing assig	X	
Commercial Project - Create Update : Resource supplies	Return all resource supplies in work packages of customer and internal proje	X	
Commercial Project - Create Update : Resource supplies	Create a resource supply for a resource demand in a work package		X
Commercial Project - Create Update : Resource supplies	Return details about a specific resource supply in a work package	X	
Commercial Project - Create Update : Resource supplies	Update information for a resource supply		X
Commercial Project - Create Update : Resource supplies	Delete a resource supply in a work package		X
Commercial Project - Create Update : Work packages	Return details about team resources planned in a work package	X	
Commercial Project - Create Update : Work packages	Create a resource demand for a specific work package		X
Commercial Project - Create Update : Work packages	Return the status of all work package functions in a work package	X	
Commercial Project - Create Update : Work packages	Set the status of a work package function in a work package		X
Commercial Project - Create Update : Work packages	Return work packages and their details, for a given customer or internal proj	X	
Commercial Project - Create Update : Work packages	Create work packages for an internal or customer project		X
Commercial Project - Create Update : Work packages	Return header information for the project of a work package	X	
Commercial Project - Create Update : Work packages	Return information about work packages in customer and internal projects	X	
Commercial Project - Create Update : Work packages	Create a work package for a customer or internal project		X
Commercial Project - Create Update : Work packages	Return information about a specific work package in a customer or internal p	X	
Commercial Project - Create Update : Work packages	Update basic information for a work package		X
Commercial Project - Create Update : Work packages	Delete a work package in a customer or internal project		X
Commercial Project - Create Update : Resource supply distribution	Return the supply distributions for a resource supply	X	
Commercial Project - Create Update : Resource supply distribution	Create distribution of efforts for a resource supply in a work package		X
Commercial Project - Create Update : Resource supply distribution	Return information about a resource supply for a given supply distribution	X	
Commercial Project - Create Update : Resource supply distribution	Return details about supply distributions for resource supplies in the system	X	
Commercial Project - Create Update : Resource supply distribution	Create a new distribution for a resource supply in a work package		X
Commercial Project - Create Update : Resource supply distribution	Return details about effort distribution in a resource supply, for a given mont	X	
Commercial Project - Create Update : Resource supply distribution	Update a supply distribution for a resource supply in a work package		X
Commercial Project - Create Update : Resource supply distribution	Delete a supply distribution item from a resource supply in a work package		X
Commercial Project - Create Update : Work package functions	Return the work package functions in work packages of customer and intern	X	
Commercial Project - Create Update : Work package functions	Set the status of a work package function in a work package		X
Commercial Project - Create Update : Work package functions	Return information about a work package function in the work package of a	X	
Commercial Project - Create Update : Work package functions	Update the status of a work package function in a work package		X
Commercial Project - Create Update : Project	Return details about customer and internal projects	X	
Commercial Project - Create Update : Project	Create a customer or internal project		X
Commercial Project - Create Update : Project	Return details about a customer or internal project	X	
Commercial Project - Create Update : Project	Update the basic information for a customer or internal project		X
Commercial Project - Create Update : Project roles	Return, for a project, the project roles and the business partners assigned to	X	
Commercial Project - Create Update : Project roles	Create project roles for a customer or internal project		X
Commercial Project - Create Update : Project roles	Return the project roles and business partners assigned to them	X	
Commercial Project - Create Update : Project roles	Assign a project role and a business partner to a project		X
Commercial Project - Create Update : Project roles	Return the business partner assigned to a project role	X	
Commercial Project - Create Update : Project roles	Update the business partner assigned to a project role		X
Commercial Project - Create Update : Project roles	Delete an assigned project role from a project		X
Commercial Project - Create Update : Work items	Return all the work items assigned to a work package	X	
Commercial Project - Create Update : Work items	Assign work items to a work package		X
Commercial Project - Create Update : Work items	Return the work items assigned to a work package	X	
Commercial Project - Create Update : Work items	Assign a work item to a work package		X
Commercial Project - Create Update : Work items	Return information about a work item in a work package	X	
Commercial Project - Create Update : Work items	Delete a work item from a work package		X
Commercial Project - Create Update : Demands	Return all the resources and expenses planned in a work package	X	
Commercial Project - Create Update : Demands	Create a resource plan for a work package		X
Commercial Project - Create Update : Demands	Return items planned in work packages of customer and internal projects	X	
Commercial Project - Create Update : Demands	Create a resource plan item in a work package		X
Commercial Project - Create Update : Demands	Return details about a specific item planned in a work package	X	
Commercial Project - Create Update : Demands	Update a plan item in a work package		X
Commercial Project - Create Update : Demands	Delete a plan item from a work package		X
Commercial Project - Create Update : Service operations	Invoke action updatecustprojslsorditemmaterial		X
Commercial Project - Create Update : Batch requests	Send a group of requests		X
Business Events Subscription : Maintain subscriptions	Read subscription information for business events	X	
Business Events Subscription : Maintain subscriptions	Create business event subscriptions		X
Business Events Subscription : Maintain subscriptions	Read business event subscription information	X	
Business Events Subscription : Maintain subscriptions	Update business events subscription status		X
Business Events Subscription : Read subscriptions	Read business event subscription information	X	
Business Events Subscription : Read subscriptions	Read business event subscription information	X	
Sold-to Party Assignment of Sales Scheduling Agreement - Read (A2X) : S	Read all sold-to party assignments	X

Grant (A2X) : Grant	Get entity from grant by key	X	
Grant (A2X) : Grant	Update entity in grant		X
Grant (A2X) : Grant	Delete entity from grant		X
Grant (A2X) : Grant	Invoke action change life cycle status		X
Grant (A2X) : Cost sharing for grant	Get entities from related to grant cost sharing link	X	
Grant (A2X) : Cost sharing for grant	Get related to grant	X	
Grant (A2X) : Cost sharing for grant	Get entities from grant cost sharing link	X	
Grant (A2X) : Cost sharing for grant	Get entity from grant cost sharing link by key	X	
Grant (A2X) : Cost sharing for grant	Update entity in grant cost sharing link		X
Grant (A2X) : Cost sharing for grant	Delete entity from grant cost sharing link		X
Grant (A2X) : Grant specific funds	Get entities from related to grant funds link	X	
Grant (A2X) : Grant specific funds	Get related to grant	X	
Grant (A2X) : Grant specific funds	Get entities from grant funds link	X	

Grant (A2X) : Grant specific funds	Get entity from grant funds link by key	X	
Grant (A2X) : Grant specific funds	Update entity in grant funds link		X
Grant (A2X) : Grant specific funds	Delete entity from grant funds link		X
Grant (A2X) : Object overhead cost cap for grant	Get entities from related to grantobjovrheadcostcaplink	X	
Grant (A2X) : Object overhead cost cap for grant	Get related to grant	X	
Grant (A2X) : Object overhead cost cap for grant	Get entities from grantobjovrheadcostcaplink	X	
Grant (A2X) : Object overhead cost cap for grant	Get entity from grantobjovrheadcostcaplink by key	X	
Grant (A2X) : Object overhead cost cap for grant	Update entity in grantobjovrheadcostcaplink		X
Grant (A2X) : Object overhead cost cap for grant	Delete entity from grantobjovrheadcostcaplink		X
Grant (A2X) : Overhead cost cap for grant	Get entities from related to grant overhead cost cap link	X	
Grant (A2X) : Overhead cost cap for grant	Get related to grant	X	
Grant (A2X) : Overhead cost cap for grant	Get entities from grant overhead cost cap link	X	
Grant (A2X) : Overhead cost cap for grant	Get entity from grant overhead cost cap link by key	X	
Grant (A2X) : Overhead cost cap for grant	Update entity in grant overhead cost cap link		X
Grant (A2X) : Overhead cost cap for grant	Delete entity from grant overhead cost cap link		X
Grant (A2X) : Overhead cost for grant	Get entities from related to grant overhead cost link	X	
Grant (A2X) : Overhead cost for grant	Get related to grant	X	
Grant (A2X) : Overhead cost for grant	Get entities from grant overhead cost link	X	
Grant (A2X) : Overhead cost for grant	Get entity from grant overhead cost link by key	X	
Grant (A2X) : Overhead cost for grant	Update entity in grant overhead cost link		X
Grant (A2X) : Overhead cost for grant	Delete entity from grant overhead cost link		X
Grant (A2X) : Grant specific sponsored classes	Get entities from related to grant sponsored classes link	X	
Grant (A2X) : Grant specific sponsored classes	Get related to grant	X	
Grant (A2X) : Grant specific sponsored classes	Get entities from grant sponsored classes link	X	
Grant (A2X) : Grant specific sponsored classes	Get entity from grant sponsored classes link by key	X	
Grant (A2X) : Grant specific sponsored classes	Update entity in grant sponsored classes link		X
Grant (A2X) : Grant specific sponsored classes	Delete entity from grant sponsored classes link		X
Grant (A2X) : Grant specific sponsored programs	Get entities from related to grant sponsored programs link	X	
Grant (A2X) : Grant specific sponsored programs	Get related to grant	X	
Grant (A2X) : Grant specific sponsored programs	Get entities from grant sponsored programs link	X	
Grant (A2X) : Grant specific sponsored programs	Get entity from grant sponsored programs link by key	X	
Grant (A2X) : Grant specific sponsored programs	Update entity in grant sponsored programs link		X
Grant (A2X) : Grant specific sponsored programs	Delete entity from grant sponsored programs link		X
Grant (A2X) : Grant text	Get entities from related to text	X	
Grant (A2X) : Grant text	Get related to grant	X	
Grant (A2X) : Grant text	Get entities from granttext	X	
Grant (A2X) : Grant text	Get entity from granttext by key	X	
Grant (A2X) : Grant text	Update entity in granttext		X
Grant (A2X) : Batch requests	Send a group of requests		X
Credit Memo Request - Simulate (A2X) : Credit memo request simulation	Simulates the creation of a credit memo request		X
Credit Memo Request - Simulate (A2X) : Batch requests	Send a group of requests		X
Maintenance Order Operation Confirmation : Maintenance order confirmat	Get entities from maint order confirmation	X	
Maintenance Order Operation Confirmation : Maintenance order confirmat	Add new entity to maint order confirmation		X
Maintenance Order Operation Confirmation : Maintenance order confirmat	Get entity from maint order confirmation by key	X	
Maintenance Order Operation Confirmation : Maintenance order confirmat	Invoke action cancelmaintenance order confirmation		X
Maintenance Order Operation Confirmation : Maintenance order confirmat	Get related to longtext	X	
Maintenance Order Operation Confirmation : Maintenance order confirmat	Get related to maint order confirmation	X	
Maintenance Order Operation Confirmation : Maintenance order confirmat	Get entities from longtext	X	
Maintenance Order Operation Confirmation : Maintenance order confirmat	Get entity from longtext by key	X	
Maintenance Order Operation Confirmation : Batch requests	Send a group of requests		X
Fund Hierarchy (A2X) : Fund hierarchy	Get entities from fund hierarchy	X	
Fund Hierarchy (A2X) : Fund hierarchy	Get entity from fund hierarchy by key	X	
Fund Hierarchy (A2X) : Fund hierarchy text	Get entities from related to fundcorehierarchy text	X	
Fund Hierarchy (A2X) : Fund hierarchy text	Get entities from fund hierarchy text	X	
Fund Hierarchy (A2X) : Fund hierarchy text	Get entity from fund hierarchy text by key	X	
Fund Hierarchy (A2X) : Fund hierarchy node	Get entities from related to fund core hierarchy node	X	
Fund Hierarchy (A2X) : Fund hierarchy node	Get related to fundcorehierarchy	X	
Fund Hierarchy (A2X) : Fund hierarchy node	Get entities from fund hierarchy node	X	
Fund Hierarchy (A2X) : Fund hierarchy node	Get entity from fund hierarchy node by key	X	
Fund Hierarchy (A2X) : Fund hierarchy node text	Get entities from related to fund core hierarchy node text	X	
Fund Hierarchy (A2X) : Fund hierarchy node text	Get entities from fund hierarchy node text	X	
Fund Hierarchy (A2X) : Fund hierarchy node text	Get entity from fund hierarchy node text by key	X	
Fund Hierarchy (A2X) : Batch requests	Send a group of requests		X
Country/Region - Read : A country	Read the items of all countries/regions	X	
Country/Region - Read : A country	Read a country/region by key	X	
Country/Region - Read : A country text	Read the texts of a specific country/region	X	
Country/Region - Read : A country text	Read the country/region related to the text item	X	
Country/Region - Read : A country text	Read the texts of all country/region items	X	
Country/Region - Read : A country text	Read the texts of a country/region for a specific language and country/regior	X	
Defect Category - Read : Defect categories	Read all defect categories	X	
Defect Category - Read : Defect categories	Read a specific defect category	X	
Defect Category - Read : Defect category texts	Read defect categories with text associations	X	
Defect Category - Read : Defect category texts	Read a set of defect category texts	X	
Defect Category - Read : Defect category texts	Read the text of a defect category in a specific language	X	
Defect Category - Read : Batch requests	Send a group of requests		X
Sales Order - Simulate (A2X) : Sales order simulation	Simulates the creation of a sales order		X
Sales Order - Simulate (A2X) : Value added service for so simulation	Get entities from a sales order value added service	X	

Sales Order - Simulate (A2X) : Value added service for so simulation	Add new entity to a sales order value added service		X
Sales Order - Simulate (A2X) : Value added service for so simulation	Get entity from a sales order value added service by key	X	
Sales Order - Simulate (A2X) : Value added service for so simulation	Update entity in a sales order value added service		X
Sales Order - Simulate (A2X) : Value added service for so simulation	Delete entity from a sales order value added service		X
Sales Order - Simulate (A2X) : Batch requests	Send a group of requests		X
Customer Return (A2X) : Item partner	Read the return order header for a specific item-level business partner	X	
Customer Return (A2X) : Item partner	Read the item-level business partners of a specific item	X	
Customer Return (A2X) : Item partner	Create a header partner for a return order		X
Customer Return (A2X) : Item partner	Read the return order item for a specific item-level business partner	X	
Customer Return (A2X) : Item partner	Read all item-level business partners	X	
Customer Return (A2X) : Item partner	Create a partner for a return order item with a specific partner function		X
Customer Return (A2X) : Item partner	Read a specific item-level business partner	X	
Customer Return (A2X) : Item partner	Update a specific item-level business partner		X
Customer Return (A2X) : Item partner	Delete a specific item-level business partner		X
Customer Return (A2X) : Item pricing element	Read the return order header for a specific item-level pricing element	X	
Customer Return (A2X) : Item pricing element	Read the item-level pricing elements of a specific item	X	
Customer Return (A2X) : Item pricing element	Read the return order item for a specific item-level pricing element	X	
Customer Return (A2X) : Item pricing element	Read all item-level pricing elements	X	
Customer Return (A2X) : Item pricing element	Read a specific item-level pricing element	X	
Customer Return (A2X) : Item pricing element	Update a specific item-level pricing element		X
Customer Return (A2X) : Item pricing element	Delete a specific item-level pricing element		X
Customer Return (A2X) : Item related object	Read the return order header for a specific item-level related object	X	
Customer Return (A2X) : Item related object	Reads the related objects of a specific returns order item.	X	
Customer Return (A2X) : Item related object	Create related objects for a specific return order item		X
Customer Return (A2X) : Item related object	Read the return order item for a specific related object	X	
Customer Return (A2X) : Item related object	Read the related objects of all return order items	X	
Customer Return (A2X) : Item related object	Create a specific related object for a specific return order item		X
Customer Return (A2X) : Item related object	Read a specific related object of a specific return order item	X	
Customer Return (A2X) : Item related object	Delete a specific related object from a specific return order item		X
Customer Return (A2X) : Item text	Read the return order header for a specific piece of item-level text	X	
Customer Return (A2X) : Item text	Read the item-level texts of a specific item	X	
Customer Return (A2X) : Item text	Read the return order item for a specific piece of item-level text	X	
Customer Return (A2X) : Item text	Read all item-level texts	X	
Customer Return (A2X) : Item text	Read a specific piece of item-level text	X	
Customer Return (A2X) : Item text	Updates a specific piece of item-level text.		X
Customer Return (A2X) : Item text	Deletes a specific piece of item-level text.		X
Customer Return (A2X) : Return process step	Read the return order header for a specific advanced return process step	X	
Customer Return (A2X) : Return process step	Read the advanced return process steps of a specific item	X	
Customer Return (A2X) : Return process step	Read the return order item for a specific advanced return process step	X	
Customer Return (A2X) : Return process step	Read all advanced return process steps	X	
Customer Return (A2X) : Return process step	Read a specific advanced return process step	X	
Customer Return (A2X) : Schedule line	Read the return order header for a specific schedule line	X	
Customer Return (A2X) : Schedule line	Read the schedule lines of a specific item	X	
Customer Return (A2X) : Schedule line	Read the return order item for a specific schedule line	X	
Customer Return (A2X) : Schedule line	Read all schedule lines	X	
Customer Return (A2X) : Schedule line	Read a specific schedule line	X	
Customer Return (A2X) : Service operations	Reject a specific return order		X
Customer Return (A2X) : Service operations	Approves a specific return order		X
Customer Return (A2X) : Batch requests	Send a group of requests		X
Payment Advice (A2X) : Payment advice	Read all available payment advices	X	
Payment Advice (A2X) : Payment advice	Create a new payment advice		X
Payment Advice (A2X) : Payment advice	Read a specific payment advice	X	
Payment Advice (A2X) : Payment advice	Update a specific payment advice		X
Payment Advice (A2X) : Payment advice	Delete a specific payment advice		X
Payment Advice (A2X) : Payment advice line item	Read all item fields for a specific payment advice header	X	
Payment Advice (A2X) : Payment advice line item	Create items for a specific payment advice header		X
Payment Advice (A2X) : Payment advice line item	Read all item fields for all payment advice headers	X	
Payment Advice (A2X) : Payment advice line item	Create items for a specific payment advice header		X
Payment Advice (A2X) : Payment advice line item	Read all fields of a specific payment advice item	X	
Payment Advice (A2X) : Payment advice line item	Update items for a specific payment advice header		X
Payment Advice (A2X) : Payment advice line item	Delete a specific payment advice item		X
Payment Advice (A2X) : Batch requests	Send a group of requests		X
Customer Return - Simulate (A2X) : Returns order simulation	Simulates the creation of a return order		X
Customer Return - Simulate (A2X) : Batch requests	Send a group of requests		X
Quota Arrangement : Quota arrangement	Get the header details of all the quota arrangements in the system	X	
Quota Arrangement : Quota arrangement	Create a quota arrangement header		X
Quota Arrangement : Quota arrangement	Get the header details of a quota arrangement	X	
Quota Arrangement : Quota arrangement	Update the header details of a quota arrangement		X
Quota Arrangement : Quota arrangement	Delete the header of a quota arrangement		X
Quota Arrangement : Item	Get the item details of all the items in a quota arrangement	X	
Quota Arrangement : Item	Add an item to a quota arrangement		X
Quota Arrangement : Item	Get the header details of an item in a quota arrangement	X	
Quota Arrangement : Item	Get the item details of all the items, in all the quota arrangements in the syst	X	
Quota Arrangement : Item	Add an item to a quota arrangement		X
Quota Arrangement : Item	Get the item details of an item in a quota arrangement	X	
Quota Arrangement : Item	Update the item details of an item in a quota arrangement		X
Quota Arrangement : Item	Delete an item in a quota arrangement		X

Quota Arrangement : Batch requests	Send a group of requests		X
Budget Account (A2X) : Budget account	Get entities from budget account	X	
Budget Account (A2X) : Budget account	Get entity from budget account by key	X	
Budget Account (A2X) : Budget account text	Get entities from related to text	X	
Budget Account (A2X) : Budget account text	Get related to budget account	X	
Budget Account (A2X) : Budget account text	Get entities from budget account text	X	
Budget Account (A2X) : Budget account text	Get entity from budget account text by key	X	
Budget Account (A2X) : Batch requests	Send a group of requests		X
Legal Document Status - Read : Legal document status	Get entities from legal document status	X	
Legal Document Status - Read : Legal document status	Get entity from legal document status by key	X	
Legal Document Status - Read : Legal document status text	Get entities from related to lglcntntmdocstatus text	X	
Legal Document Status - Read : Legal document status text	Get related to lglcntntmdocstatus	X	
Legal Document Status - Read : Legal document status text	Get entities from legal document status text	X	
Legal Document Status - Read : Legal document status text	Get entity from legal document status text by key	X	
Legal Document Status - Read : Batch requests	Send a group of requests		X
Product Master (A2X) : Mrp area data	Return mrp area data	X	
Product Master (A2X) : Mrp area data	Create mrp area data		X
Product Master (A2X) : Mrp area data	Return mrp area data	X	
Product Master (A2X) : Mrp area data	Create mrp area data		X
Product Master (A2X) : Mrp area data	Return mrp area data by product number, plant and mrp area	X	
Product Master (A2X) : Mrp area data	Update mrp area data		X
Product Master (A2X) : Quality management data	Return quality management data	X	
Product Master (A2X) : Quality management data	Return quality management data	X	
Product Master (A2X) : Quality management data	Create quality management data		X
Product Master (A2X) : Quality management data	Return quality management data by product number and plant	X	
Product Master (A2X) : Quality management data	Update quality management data		X
Product Master (A2X) : Sales data at plant level	Return sales data	X	
Product Master (A2X) : Sales data at plant level	Return sales data	X	
Product Master (A2X) : Sales data at plant level	Create sales data		X
Product Master (A2X) : Sales data at plant level	Return sales data by product number and plant	X	
Product Master (A2X) : Sales data at plant level	Update sales data		X
Product Master (A2X) : Storage data at plant level	Return storage data	X	
Product Master (A2X) : Storage data at plant level	Return storage data	X	
Product Master (A2X) : Storage data at plant level	Create storage data		X
Product Master (A2X) : Storage data at plant level	Return storage data by product number and plant	X	
Product Master (A2X) : Storage data at plant level	Update storage data		X
Product Master (A2X) : Plant text	Return plant text	X	
Product Master (A2X) : Plant text	Return plant text	X	
Product Master (A2X) : Plant text	Create plant text		X
Product Master (A2X) : Plant text	Return plant text by product number and plant	X	
Product Master (A2X) : Plant text	Update plant text		X
Product Master (A2X) : Plant text	Delete plant text		X
Product Master (A2X) : International trade data	Return international trade data	X	
Product Master (A2X) : International trade data	Return international trade data	X	
Product Master (A2X) : International trade data	Create international trade data		X
Product Master (A2X) : International trade data	Return international trade data by product number and plant	X	
Product Master (A2X) : International trade data	Update international trade data		X
Product Master (A2X) : Costing data at plant level	Return costing data	X	
Product Master (A2X) : Costing data at plant level	Return costing data	X	
Product Master (A2X) : Costing data at plant level	Create costing data		X
Product Master (A2X) : Costing data at plant level	Return costing data by product number and plant	X	
Product Master (A2X) : Costing data at plant level	Update costing data		X
Product Master (A2X) : Forecasting data	Return forecasting data	X	
Product Master (A2X) : Forecasting data	Return forecasting data	X	
Product Master (A2X) : Forecasting data	Create forecasting data		X
Product Master (A2X) : Forecasting data	Return forecasting data by product number and plant	X	
Product Master (A2X) : Forecasting data	Update forecasting data		X
Product Master (A2X) : Procurement data	Return procurement data	X	
Product Master (A2X) : Procurement data	Return procurement data	X	
Product Master (A2X) : Procurement data	Create procurement data		X
Product Master (A2X) : Procurement data	Return procurement data by product number and plant	X	
Product Master (A2X) : Procurement data	Update procurement data		X
Product Master (A2X) : Supply planning data	Return supply planning data	X	
Product Master (A2X) : Supply planning data	Return supply planning data	X	
Product Master (A2X) : Supply planning data	Create supply planning data		X
Product Master (A2X) : Supply planning data	Return supply planning data by product number and plant	X	
Product Master (A2X) : Supply planning data	Update supply planning data		X
Product Master (A2X) : Work scheduling data	Return work scheduling data	X	
Product Master (A2X) : Work scheduling data	Return work scheduling data	X	
Product Master (A2X) : Work scheduling data	Create work scheduling data		X
Product Master (A2X) : Work scheduling data	Return work scheduling data by product number and plant	X	
Product Master (A2X) : Work scheduling data	Update work scheduling data		X
Product Master (A2X) : Storage location data	Return storage location data	X	
Product Master (A2X) : Storage location data	Create storage location data		X
Product Master (A2X) : Storage location data	Return storage location data	X	
Product Master (A2X) : Storage location data	Create storage location data		X
Product Master (A2X) : Storage location data	Return storage location data by product number, plant and storage location	X	

Product Master (A2X) : Storage location data	Update storage location data		X
Product Master (A2X) : Gtin data	Return gtin data	X	
Product Master (A2X) : Gtin data	Create gtin data		X
Product Master (A2X) : Gtin data	Return gtin data	X	
Product Master (A2X) : Gtin data	Create gtin data		X
Product Master (A2X) : Gtin data	Return gtin data by product number, alternative unit and consecutive numbe	X	
Product Master (A2X) : Gtin data	Update gtin data		X
Product Master (A2X) : Gtin data	Delete gtin data		X
Product Master (A2X) : Sales text	Return sales text	X	
Product Master (A2X) : Sales text	Create sales text		X
Product Master (A2X) : Sales text	Return sales text	X	
Product Master (A2X) : Sales text	Create sales text		X
Product Master (A2X) : Sales text	Return sales text by product number, sales organization, distribution channe	X	
Product Master (A2X) : Sales text	Update sales text		X
Product Master (A2X) : Sales text	Delete sales text		X
Product Master (A2X) : Material ledger account	Return material ledger account data	X	
Product Master (A2X) : Material ledger account	Create material ledger account data		X
Product Master (A2X) : Material ledger account	Return material ledger account data	X	
Product Master (A2X) : Material ledger account	Create material ledger account data		X
Product Master (A2X) : Material ledger account	Return material ledger account data by product number, valuation area, valu	X	
Product Master (A2X) : Material ledger account	Update material ledger account data		X
Product Master (A2X) : Material ledger prices	Return material ledger price data	X	
Product Master (A2X) : Material ledger prices	Create material ledger price data		X
Product Master (A2X) : Material ledger prices	Return material ledger price data	X	
Product Master (A2X) : Material ledger prices	Create material ledger price data		X
Product Master (A2X) : Material ledger prices	Return material ledger price data by product number, valuation area, valuati	X	
Product Master (A2X) : Material ledger prices	Update material ledger price data		X
Product Master (A2X) : Valuation account data	Return valuation account data	X	
Product Master (A2X) : Valuation account data	Return valuation account data	X	
Product Master (A2X) : Valuation account data	Create valuation account data		X
Product Master (A2X) : Valuation account data	Return valuation account data by product number, valuation area and valuat	X	
Product Master (A2X) : Valuation account data	Update valuation account data		X
Product Master (A2X) : Valuation costing data	Return costing data	X	
Product Master (A2X) : Valuation costing data	Return costing data	X	
Product Master (A2X) : Valuation costing data	Create costing data		X
Product Master (A2X) : Valuation costing data	Return costing data by product number, valuation area and valuation type	X	
Product Master (A2X) : Valuation costing data	Update costing data		X
Product Master (A2X) : Batch requests	Send a group of requests		X
Batch Master Record : Batches	Get entities from batch	X	
Batch Master Record : Batches	Add new entity to batch		X
Batch Master Record : Batches	Get entity from batch by key	X	
Batch Master Record : Batches	Update entity in batch		X
Batch Master Record : Batch characteristics	Get entities from related to batch charc	X	
Batch Master Record : Batch characteristics	Get related to batch	X	
Batch Master Record : Batch characteristics	Get entities from batch charc	X	
Batch Master Record : Batch characteristics	Get entity from batch charc by key	X	
Batch Master Record : Batch class assignments	Get related to batch class	X	
Batch Master Record : Batch class assignments	Get related to batch	X	
Batch Master Record : Batch class assignments	Get entities from batch class	X	
Batch Master Record : Batch class assignments	Add new entity to batch class		X
Batch Master Record : Batch class assignments	Get entity from batch class by key	X	
Batch Master Record : Batch class assignments	Delete entity from batch class		X
Batch Master Record : Plant specific batch information	Get entities from related to batch plant	X	
Batch Master Record : Plant specific batch information	Get related to batch	X	
Batch Master Record : Plant specific batch information	Get entities from batch plant	X	
Batch Master Record : Plant specific batch information	Get entity from batch plant by key	X	
Batch Master Record : Plant specific batch information	Update entity in batch plant		X
Batch Master Record : Batch texts	Get entities from related to batchtext	X	
Batch Master Record : Batch texts	Get related to batch	X	
Batch Master Record : Batch texts	Get entities from batchtext	X	
Batch Master Record : Batch texts	Get entity from batchtext by key	X	
Batch Master Record : Batch texts	Update entity in batchtext		X
Batch Master Record : Batch texts	Delete entity from batchtext		X
Batch Master Record : Batch characteristics valuation	Get entities from related to batch charc value	X	
Batch Master Record : Batch characteristics valuation	Add new entity to related to batch charc value		X
Batch Master Record : Batch characteristics valuation	Get related to batch charc	X	
Batch Master Record : Batch characteristics valuation	Get entities from batch charc value	X	
Batch Master Record : Batch characteristics valuation	Add new entity to batch charc value		X
Batch Master Record : Batch characteristics valuation	Get entity from batch charc value by key	X	
Batch Master Record : Batch characteristics valuation	Update entity in batch charc value		X
Batch Master Record : Batch characteristics valuation	Delete entity from batch charc value		X
Batch Master Record : Batch requests	Send a group of requests		X
Journal Entry Item - Read : Company code data	Read the items of all company codes	X	
Journal Entry Item - Read : Company code data	Read a company code by key	X	
Journal Entry Item - Read : Journal entry item basic data	Read the company code data of a specific universal entry item	X	
Journal Entry Item - Read : Journal entry item basic data	Read the current cost center data of a specific universal entry item	X	
Journal Entry Item - Read : Journal entry item basic data	Read the chart of accounts data of a specific universal entry item	X	

Journal Entry Item - Read : Journal entry item basic data	Read universal journal entry items	X	
Journal Entry Item - Read : Journal entry item basic data	Read a universal journal entry item by key	X	
Journal Entry Item - Read : Cost center data	Read the items of all cost centers	X	
Journal Entry Item - Read : Cost center data	Read a cost center by key	X	
Journal Entry Item - Read : General ledger account in chart of accounts da	Read the items of all chart of accounts	X	
Journal Entry Item - Read : General ledger account in chart of accounts da	Read a chart of account by key	X	
Journal Entry Item - Read : Profit center data	Read the current profit center data of a specific universal entry item	X	
Journal Entry Item - Read : Profit center data	Read the items of all profit centers	X	
Journal Entry Item - Read : Profit center data	Read a profit center by key	X	
Process Order Confirmation : Process order confirmation	Read information on the header data of process order confirmations	X	
Process Order Confirmation : Process order confirmation	Create a new process order confirmation		X
Process Order Confirmation : Process order confirmation	Read information on the header data of a single process order confirmation	X	
Process Order Confirmation : Process order confirmation	Cancel a process order confirmation		X
Process Order Confirmation : Material movements for confirmation	Read the header data of a process order confirmation together with the corr	X	
Process Order Confirmation : Material movements for confirmation	This operation is not supported		X
Process Order Confirmation : Material movements for confirmation	Read the material document for goods movements	X	
Process Order Confirmation : Material movements for confirmation	Read information on a single material document for goods movements	X	
Process Order Confirmation : Batch characteristics for material movement	Read the material document for goods movements together with the corresp	X	
Process Order Confirmation : Batch characteristics for material movement	This operation is not supported		X
Process Order Confirmation : Batch characteristics for material movement	Read the batch characteristics in material documents for goods movements	X	
Process Order Confirmation : Batch characteristics for material movement	Read information on a single batch characteristic in a material document for	X	
Process Order Confirmation : Service operations	Fetches proposal data for quantities, work activities, dates and times, and personnel data for		X
Process Order Confirmation : Service operations	Fetches proposal data for goods movements of a confirmation		X
Process Order Confirmation : Batch requests	Send a group of requests		X
Kanban Control Cycle : Kanban containers	Read kanban containers	X	
Kanban Control Cycle : Kanban containers	Read a single kanban container by its key	X	
Kanban Control Cycle : Kanban containers	Set the status of a kanban container		X
Kanban Control Cycle : Kanban containers	Set the locking status of a kanban container		X
Kanban Control Cycle : Kanban containers	Withdraws a given quantity from a kanban container		X
Kanban Control Cycle : Kanban containers	Retries the failed status change of a kanban container		X
Kanban Control Cycle : Kanban container detailed quantities	Read the batch quantities for a kanban container	X	
Kanban Control Cycle : Kanban container detailed quantities	Read batch quantities of kanban containers	X	
Kanban Control Cycle : Kanban container detailed quantities	Read the batch quantity for a single kanban container and batch combinatio	X	
Kanban Control Cycle : Kanban deliveries	Read the delivery information of a kanban container	X	
Kanban Control Cycle : Kanban deliveries	Read the kanban container of a delivery information	X	
Kanban Control Cycle : Kanban deliveries	Read delivery information related to kanban containers	X	
Kanban Control Cycle : Kanban deliveries	Read the delivery information for a single kanban container by the container	X	
Kanban Control Cycle : Kanban control cycles	Read the kanban control cycle of a kanban container	X	
Kanban Control Cycle : Kanban control cycles	Read the kanban containers of a kanban control cycle	X	
Kanban Control Cycle : Kanban control cycles	Read the kanban control cycle of a delivery information	X	
Kanban Control Cycle : Kanban control cycles	Read kanban control cycles	X	
Kanban Control Cycle : Kanban control cycles	Create a kanban control cycle		X
Kanban Control Cycle : Kanban control cycles	Read a single kanban control cycle by its key	X	
Kanban Control Cycle : Kanban control cycles	Update a single kanban control cycle		X
Kanban Control Cycle : Kanban control cycles	Delete an existing kanban control cycle		X
Kanban Control Cycle : Kanban control cycles	Set the life cycle status of a kanban control cycle		X
Kanban Control Cycle : Kanban control cycles	Add a kanban container to an event-driven kanban control cycle		X
Kanban Control Cycle : Kanban control cycles	Withdraws a quantity from a control cycle		X
Kanban Control Cycle : Kanban container delivery addresses	Read the kanban control cycle of a kanban container delivery address	X	
Kanban Control Cycle : Kanban container delivery addresses	Read kanban container delivery addresses	X	
Kanban Control Cycle : Kanban container delivery addresses	Read a single kanban container delivery address by its key	X	
Kanban Control Cycle : Batch requests	Send a group of requests		X
Product Master Data Including Classification - Read : Procurement data	Return procurement data	X	
Product Master Data Including Classification - Read : Procurement data	Return procurement data by product number and plant	X	
Product Master Data Including Classification - Read : Plant data	Return procurement data	X	
Product Master Data Including Classification - Read : Plant data	Return storage location data	X	
Product Master Data Including Classification - Read : Plant data	Return supply planning data	X	
Product Master Data Including Classification - Read : Plant data	Return plant data	X	
Product Master Data Including Classification - Read : Plant data	Return plant data	X	
Product Master Data Including Classification - Read : Plant data	Return plant data by product number and plant	X	
Product Master Data Including Classification - Read : Storage location dat	Return storage location data	X	
Product Master Data Including Classification - Read : Storage location dat	Return storage location data by product number, plant and storage location	X	
Product Master Data Including Classification - Read : Supply planning dat	Return supply planning data	X	
Product Master Data Including Classification - Read : Supply planning dat	Return supply planning data by product number and plant	X	
Product Master Data Including Classification - Read : Product	Return product master records	X	
Product Master Data Including Classification - Read : Product	Return product master record by product number	X	
Product Master Data Including Classification - Read : Product description	Return description	X	
Product Master Data Including Classification - Read : Product description	Return description	X	
Product Master Data Including Classification - Read : Product description	Return description by product number and language	X	
Product Master Data Including Classification - Read : Characteristics	List of characteristics assigned to any class used in product classification	X	
Product Master Data Including Classification - Read : Characteristics	List of characteristics assigned to any class used in product classification	X	
Product Master Data Including Classification - Read : Characteristics	Characteristic assigned to any class that is used in product classification for	X	
Product Master Data Including Classification - Read : Class assignments	List of classes assigned to products	X	
Product Master Data Including Classification - Read : Class assignments	List of classes assigned to products	X	
Product Master Data Including Classification - Read : Class assignments	Product class assignment for a given key	X	
Product Master Data Including Classification - Read : Sales tax data	Return sales tax data	X	
Product Master Data Including Classification - Read : Sales tax data	Return sales tax data	X	

Product Master Data Including Classification - Read : Sales tax data	Return sales tax data by product number and country	X	
Product Master Data Including Classification - Read : Sales organization d	Return sales organization data	X	
Product Master Data Including Classification - Read : Sales organization d	Return sales organization data	X	
Product Master Data Including Classification - Read : Sales organization d	Return sales organization data by product, sales organization and distributio	X	
Product Master Data Including Classification - Read : Work scheduling dat	Return work scheduling data	X	
Product Master Data Including Classification - Read : Work scheduling dat	Return work scheduling data	X	
Product Master Data Including Classification - Read : Work scheduling dat	Return work scheduling data by product number and plant	X	
Product Master Data Including Classification - Read : Characteristic valuat	Read the valuation of the selected characteristic, class type and product	X	
Product Master Data Including Classification - Read : Characteristic valuat	List of characteristic valuations for products	X	
Product Master Data Including Classification - Read : Characteristic valuat	Characteristic valuation of a product for a given key	X	
Product Master Data Including Classification - Read : Class characteristics	Read the characteristics assigned to the class	X	
Product Master Data Including Classification - Read : Class characteristics	Read the valuation of the selected characteristic, class type and product	X	
Product Master Data Including Classification - Read : Class characteristics	List of characteristics assigned to a class	X	
Product Master Data Including Classification - Read : Class characteristics	Class characteristic assignment for a given key	X	
Product Master Data Including Classification - Read : Class header data	Header data of the selected class	X	
Product Master Data Including Classification - Read : Class header data	List of class header data	X	
Product Master Data Including Classification - Read : Class header data	Class header data for a given key	X	
Product Master Data Including Classification - Read : Batch requests	Send a group of requests		X

Nota Fiscal - Create Update : Brazil nota fiscal trade note	Read the trade note data of all notas fiscais and lists their fields with empty v	X	
Nota Fiscal - Create Update : Brazil nota fiscal trade note	Read a specific trade note of a nota fiscal and lists its fields with empty value	X	
Nota Fiscal - Create Update : Brazil nota fiscal trade note	Update a specific trade note data of a nota fiscal		X
Nota Fiscal - Create Update : Brazil nota fiscal trailer	Read the trailer information data of all notas fiscais and lists their fields with	X	
Nota Fiscal - Create Update : Brazil nota fiscal trailer	Read a specific trailer information of a nota fiscal and lists its fields with emp	X	
Nota Fiscal - Create Update : Brazil nota fiscal trailer	Update a specific trailer information data of a nota fiscal		X

Nota Fiscal - Create Update : Brazil nota fiscal transported volume	Read the transported volume data of all notas fiscais and lists their fields wit	X	
Nota Fiscal - Create Update : Brazil nota fiscal transported volume	Read a specific transported volume of a nota fiscal and lists its fields with en	X	
Nota Fiscal - Create Update : Brazil nota fiscal transported volume	Update a specific transported volume data of a nota fiscal		X
Nota Fiscal - Create Update : Brazil nota fiscal vehicle	Read the vehicle information data of all the nota fiscal items and lists their fie	X	
Nota Fiscal - Create Update : Brazil nota fiscal vehicle	Read a specific vehicle information of a nota fiscal item and lists its fields wit	X	
Nota Fiscal - Create Update : Brazil nota fiscal vehicle	Update a specific vehicle information data of a nota fiscal item		X
Nota Fiscal - Create Update : Brazil nota fiscal one time partner	Read the one time partner data of all notas fiscais and lists their fields with e	X	
Nota Fiscal - Create Update : Brazil nota fiscal one time partner	Read a specific one time partner of a nota fiscal and lists its fields with empt	X	
Nota Fiscal - Create Update : Brazil nota fiscal one time partner	Update a specific one time partner data of a nota fiscal		X
Nota Fiscal - Create Update : Brazil nota fiscal technical responsible	Read the technical responsible information data of all notas fiscais and lists	X	
Nota Fiscal - Create Update : Brazil nota fiscal technical responsible	Read a specific technical responsible information of a nota fiscal and lists its	X	
Nota Fiscal - Create Update : Brazil nota fiscal technical responsible	Update a specific technical responsible information data of a nota fiscal		X
Nota Fiscal - Create Update : Batch requests	Send a group of requests		X
Production Order (Version 2) : Production order serial numbers	Read the data of production order serial numbers	X	
Production Order (Version 2) : Production order serial numbers	Read the data of a single serial number	X	
Production Order (Version 2) : Production order serial numbers	Delete a serial number from a production order item		X
Production Order (Version 2) : Production order items	Read the data of the production order item including the associated serial nu	X	
Production Order (Version 2) : Production order items	Read the data of production order items	X	
Production Order (Version 2) : Production order items	Read the data of a single item	X	
Production Order (Version 2) : Production order	Read the serial numbers assigned to the production order item	X	
Production Order (Version 2) : Production order	Read the header data of a production order including the components withou	X	
Production Order (Version 2) : Production order	Read the header data of a production order including all components	X	
Production Order (Version 2) : Production order	Read the header data of a production order including all components	X	
Production Order (Version 2) : Production order	Read the header data of a production order including the items	X	
Production Order (Version 2) : Production order	Read the header data of a production order including the operations	X	
Production Order (Version 2) : Production order	Read the header data of a production order including the status	X	
Production Order (Version 2) : Production order	Read information on the header data of production orders	X	
Production Order (Version 2) : Production order	Create a new production order		X
Production Order (Version 2) : Production order	Read information on the header data of a single production order	X	
Production Order (Version 2) : Production order	Update header data of a production order		X
Production Order (Version 2) : Production order	Releases a production order		X
Production Order (Version 2) : Production order	Releases an operation of a production order		X
Production Order (Version 2) : Production order	Technically completes a production order		X
Production Order (Version 2) : Production order	Closes a production order		X
Production Order (Version 2) : Production order	Set the deletion flag for a production order		X
Production Order (Version 2) : Production order	Set the deletion indicator for a production order		X
Production Order (Version 2) : Production order	Discards a production order		X
Production Order (Version 2) : Production order	Converts a planned order into a production order		X
Production Order (Version 2) : Production order	Set the delivery completed indicator for a production order		X
Production Order (Version 2) : Production order	Set the status releasedbymes for a production order		X
Production Order (Version 2) : Production order components	Read the data of production order components without follow-up materials	X	
Production Order (Version 2) : Production order components	Read the data of a single component	X	
Production Order (Version 2) : Production order components extended	Read the data of all production order components	X	
Production Order (Version 2) : Production order components extended	Read the data of a single component	X	
Production Order (Version 2) : Production order components extended	Update component data of a production order		X
Production Order (Version 2) : Production order components using rap bo	Read the data of all production order components	X	
Production Order (Version 2) : Production order components using rap bo	Read the data of a single component	X	
Production Order (Version 2) : Production order components using rap bo	Update component data of a production order		X
Production Order (Version 2) : Production order components using rap bo	Delete component data of a production order		X
Production Order (Version 2) : Production order operations	Read the operations of production orders	X	
Production Order (Version 2) : Production order operations	Read information on a single operation	X	
Production Order (Version 2) : Production order operations	Update operation data of a production order		X
Production Order (Version 2) : Production order operations	Schedules order operations		X
Production Order (Version 2) : Production order status	Read the status of production orders	X	
Production Order (Version 2) : Production order status	Read the status of a single production order	X	
Production Order (Version 2) : Production resources tools	Read the header data of a production order including the production resourc	X	
Production Order (Version 2) : Production resources tools	Read the production resources/tools (prts) of production orders	X	
Production Order (Version 2) : Production resources tools	Read the information on a single production resource/tool (prt) for an operati	X	
Production Order (Version 2) : Batch requests	Send a group of requests		X
Master Recipe : Change record type	Get entities from change record type	X	
Master Recipe : Change record type	Get entity from change record type by key	X	
Master Recipe : Change record type text	Get entities from change record type text	X	
Master Recipe : Change record type text	Get entity from change record type text by key	X	
Master Recipe : Header	Get entities from master recipe header	X	
Master Recipe : Header	Add new entity to master recipe header		X
Master Recipe : Header	Get entity from master recipe header by key	X	
Master Recipe : Header	Update entity in master recipe header		X
Master Recipe : Material assignment	Get entities from related to matlassgmt	X	
Master Recipe : Material assignment	Get entities from master recipe matlassgmt	X	
Master Recipe : Material assignment	Get entity from master recipe matlassgmt by key	X	
Master Recipe : Operation	Get entities from related to operation	X	
Master Recipe : Operation	Add new entity to related to operation		X
Master Recipe : Operation	Get entities from master recipe operation	X	
Master Recipe : Operation	Add new entity to master recipe operation		X
Master Recipe : Operation	Get entity from master recipe operation by key	X	
Master Recipe : Operation	Update entity in master recipe operation		X
Master Recipe : Inspection characteristics assignment	Get entities from related to inspcharcsassgmt	X	

Master Recipe : Inspection characteristics assignment	Get entities from master recipe inspcharcsassgmt	X	
Master Recipe : Inspection characteristics assignment	Get entity from master recipe inspcharcsassgmt by key	X	
Master Recipe : Operation component allocation	Get entities from related to opcompalloc	X	
Master Recipe : Operation component allocation	Get entities from master recipe opcompalloc	X	
Master Recipe : Operation component allocation	Get entity from master recipe opcompalloc by key	X	
Master Recipe : Operation secondary resource	Get entities from related to opsecdryrsce	X	
Master Recipe : Operation secondary resource	Add new entity to related to opsecdryrsce		X
Master Recipe : Operation secondary resource	Get entities from master recipe opsecdryrsce	X	
Master Recipe : Operation secondary resource	Add new entity to master recipe opsecdryrsce		X
Master Recipe : Operation secondary resource	Get entity from master recipe opsecdryrsce by key	X	
Master Recipe : Operation secondary resource	Update entity in master recipe opsecdryrsce		X
Master Recipe : Phase	Get entities from related to phase	X	
Master Recipe : Phase	Add new entity to related to phase		X
Master Recipe : Phase	Get entities from related to inspcharcsassgmt	X	
Master Recipe : Phase	Get entities from master recipe phase	X	
Master Recipe : Phase	Add new entity to master recipe phase		X
Master Recipe : Phase	Get entity from master recipe phase by key	X	
Master Recipe : Phase	Update entity in master recipe phase		X
Master Recipe : Control key	Get entities from master recipe control key	X	
Master Recipe : Control key	Get entity from master recipe control key by key	X	
Master Recipe : Control key text	Get entities from related to text	X	
Master Recipe : Control key text	Get entities from master recipe control key text	X	
Master Recipe : Control key text	Get entity from master recipe control key text by key	X	
Master Recipe : Profile	Get entities from master recipe header profile	X	
Master Recipe : Profile	Get entity from master recipe header profile by key	X	
Master Recipe : Profile text	Get entities from related to text	X	
Master Recipe : Profile text	Get entities from mstr recipe header profile text	X	
Master Recipe : Profile text	Get entity from mstr recipe header profile text by key	X	
Master Recipe : Phase component allocation	Get entities from related to phase component allocation	X	
Master Recipe : Phase component allocation	Add new entity to related to phase component allocation		X
Master Recipe : Phase component allocation	Get entities from master recipe phase component allocation	X	
Master Recipe : Phase component allocation	Add new entity to master recipe phase component allocation		X
Master Recipe : Phase component allocation	Get entity from master recipe phase component allocation by key	X	
Master Recipe : Phase component allocation	Update entity in master recipe phase component allocation		X
Master Recipe : Phase relationship	Get entities from related to phase relationship	X	
Master Recipe : Phase relationship	Add new entity to related to phase relationship		X
Master Recipe : Phase relationship	Get entities from master recipe phase relationship	X	
Master Recipe : Phase relationship	Add new entity to master recipe phase relationship		X
Master Recipe : Phase relationship	Get entity from master recipe phase relationship by key	X	
Master Recipe : Phase relationship	Update entity in master recipe phase relationship		X
Master Recipe : Phase secondary resource	Get entities from related to phase secondary resource	X	
Master Recipe : Phase secondary resource	Add new entity to related to phase secondary resource		X
Master Recipe : Phase secondary resource	Get entities from master recipe phase secondary resource	X	
Master Recipe : Phase secondary resource	Add new entity to master recipe phase secondary resource		X
Master Recipe : Phase secondary resource	Get entity from master recipe phase secondary resource by key	X	
Master Recipe : Phase secondary resource	Update entity in master recipe phase secondary resource		X
Master Recipe : Master recipe status	Get entities from master recipe status	X	
Master Recipe : Master recipe status	Get entity from master recipe status by key	X	
Master Recipe : Status text	Get entities from related to text	X	
Master Recipe : Status text	Get entities from master recipe status text	X	
Master Recipe : Status text	Get entity from master recipe status text by key	X	
Master Recipe : Master recipe usage	Get entities from master recipe usage	X	
Master Recipe : Master recipe usage	Get entity from master recipe usage by key	X	
Master Recipe : Usage text	Get entities from related to text	X	
Master Recipe : Usage text	Get entities from master recipe usage text	X	
Master Recipe : Usage text	Get entity from master recipe usage text by key	X	
Master Recipe : Master recipe operation relationship type	Get entities from master recipe operation relationship type text	X	
Master Recipe : Master recipe operation relationship type	Get entity from master recipe operation relationship type text by key	X	
Master Recipe : Master recipe operation relationship type text	Get entities from related to text	X	
Master Recipe : Master recipe operation relationship type text	Get entities from master recipe operation relationship type text	X	
Master Recipe : Master recipe operation relationship type text	Get entity from master recipe operation relationship type text by key	X	
Master Recipe : Batch requests	Send a group of requests		X
Product Group - Read : Product group	Get entities from a product group	X	
Product Group - Read : Product group	Get entity from a product group by key	X	
Product Group - Read : Product group text	Get entities from related to text	X	
Product Group - Read : Product group text	Get related to material group	X	
Product Group - Read : Product group text	Get entities from a product group text	X	
Product Group - Read : Product group text	Get entity from a product group text by key	X	
Product Allocation Sequence : Product allocation sequence	Read product allocation sequences	X	
Product Allocation Sequence : Product allocation sequence	Read product allocation sequence	X	
Product Allocation Sequence : Product allocation sequence description	Read product allocation sequence description	X	
Product Allocation Sequence : Product allocation sequence description	Read product allocation sequence	X	
Product Allocation Sequence : Product allocation sequence description	Read sequence descriptions	X	
Product Allocation Sequence : Product allocation sequence description	Read sequence description	X	
Product Allocation Sequence : Product allocation sequence assignment	Read product-location assignments	X	
Product Allocation Sequence : Product allocation sequence assignment	Create product-location assignment		X
Product Allocation Sequence : Product allocation sequence assignment	Read product allocation sequence	X	

Product Allocation Sequence : Product allocation sequence assignment	Read product-location assignments	X	
Product Allocation Sequence : Product allocation sequence assignment	Read product-location assignment	X	
Product Allocation Sequence : Product allocation sequence assignment	Update product-location assignment		X
Product Allocation Sequence : Product allocation sequence assignment	Delete product-location assignment		X
Product Allocation Sequence : Batch requests	Send a group of requests		X
Print Queue Item - Read (A2X) : Print queue parameters	Add new entity to printqueueparamsset		X
Print Queue Item - Read (A2X) : Print item status	Add new entity to print item status set		X
Print Queue Item - Read (A2X) : Item result	Invoke function retrieve next queue item	X	
Print Queue Item - Read (A2X) : Cache result	Invoke function get icmcache	X	
Print Queue Item - Read (A2X) : Print queue info	Invoke function get printqueuesofuser	X	
Print Queue Item - Read (A2X) : Function return code	Invoke function set qitem status	X	
Print Queue Item - Read (A2X) : Function return code	Invoke function set print parameter	X	
Print Queue Item - Read (A2X) : Function return code	Invoke function set qitems lasterrorext	X	
Print Queue Item - Read (A2X) : Print document	Invoke function get qitem document	X	
Print Queue Item - Read (A2X) : Print options	Invoke function get printoptions	X	
Print Queue Item - Read (A2X) : Number of new items	Invoke function get numberofqitemsext	X	
Print Queue Item - Read (A2X) : Print queue info extended	Invoke function get printqueuesofuserext	X	
Print Queue Item - Read (A2X) : Print item documents	Invoke function get next qitemsext	X	
Print Queue Item - Read (A2X) : Batch requests	Send a group of requests		X
Supplier Quotation - Create with Reference Update Delete : Supplier quota	Get the header details of all supplier quotations in the system	X	
Supplier Quotation - Create with Reference Update Delete : Supplier quota	Create a header of a supplier quotation with the details passed in the request body		X
Supplier Quotation - Create with Reference Update Delete : Supplier quota	Get the header details of a supplier quotation	X	
Supplier Quotation - Create with Reference Update Delete : Supplier quota	Changes the header details of a supplier quotation		X
Supplier Quotation - Create with Reference Update Delete : Supplier quota	Delete a complete supplier quotation		X
Supplier Quotation - Create with Reference Update Delete : Item	Get details of all items from a supplier quotation	X	
Supplier Quotation - Create with Reference Update Delete : Item	Get the header information of the supplier quotation that includes the specifi	X	
Supplier Quotation - Create with Reference Update Delete : Item	Get details of all items from all existing supplier quotations	X	
Supplier Quotation - Create with Reference Update Delete : Item	Get the item details from the supplier quotation	X	
Supplier Quotation - Create with Reference Update Delete : Item	Change the item details in a supplier quotation		X
Supplier Quotation - Create with Reference Update Delete : Service opera	Submits a supplier quotation		X
Supplier Quotation - Create with Reference Update Delete : Service opera	Completes the bidding process		X
Supplier Quotation - Create with Reference Update Delete : Service opera	Cancel a supplier quotation		X
Supplier Quotation - Create with Reference Update Delete : Service opera	Submits a supplier quotation for approval		X
Supplier Quotation - Create with Reference Update Delete : Service opera	Create a supplier quotation from an RFQ		X
Supplier Quotation - Create with Reference Update Delete : Batch request	Send a group of requests		X
Chart of Accounts - Read : Chart of accounts	Read the items of all chart of accounts	X	
Chart of Accounts - Read : Chart of accounts	Read a chart of accounts by key	X	
Chart of Accounts - Read : Chart of accounts text	Read the texts of a specific chart of accounts	X	
Chart of Accounts - Read : Chart of accounts text	Read the specific chart of accounts related to the text item	X	
Chart of Accounts - Read : Chart of accounts text	Read the texts of all chart of accounts	X	
Chart of Accounts - Read : Chart of accounts text	Read the texts of a specific chart of accounts for a specific language and ch	X	
Event-Based Revenue Recognition Integration : Action result	Clears or reevaluates all revenue recognition postings for WBS elements (pr	X	
Event-Based Revenue Recognition Integration : Service operations	Changes the revenue recognition key for a WBS element (project)		X
Master Inspection Characteristic - Read : Master inspection characteristics	Read a set of master inspection characteristics	X	
Master Inspection Characteristic - Read : Master inspection characteristics	Read a specific master inspection characteristic	X	
Master Inspection Characteristic - Read : Master inspection characteristic	Read master inspection characteristics with text associations	X	
Master Inspection Characteristic - Read : Master inspection characteristic	Read master inspection characteristic texts with associations to master insp	X	
Master Inspection Characteristic - Read : Master inspection characteristic	Read all master inspection characteristic texts	X	
Master Inspection Characteristic - Read : Master inspection characteristic	Read the text of a master inspection characteristic in a specific language	X	
Master Inspection Characteristic - Read : Batch requests	Send a group of requests		X
Incoming VAT Invoice : China input tax invoice	Get the list of china input tax invoices	X	
Incoming VAT Invoice : China input tax invoice	Create a china input tax invoice		X
Incoming VAT Invoice : China input tax invoice	Get a single china input tax invoice with a uuid	X	
Incoming VAT Invoice : China input tax invoice	Update a china input tax invoice		X
Incoming VAT Invoice : China input tax invoice binding record	Get a single record of china input tax invoice and related binding information	X	
Incoming VAT Invoice : China input tax invoice binding record	Create a binding record for a given china input tax invoice		X
Incoming VAT Invoice : China input tax invoice binding record	Get a single record of invoice related to a specified binding document	X	
Incoming VAT Invoice : China input tax invoice binding record	Get the list of china input tax invoice binding documents	X	
Incoming VAT Invoice : China input tax invoice binding record	Create a single binding record of china input tax invoice		X
Incoming VAT Invoice : China input tax invoice binding record	Get a single china input tax invoice binding document with a binding and bin	X	
Incoming VAT Invoice : China input tax invoice item	Get a single record of china input tax invoice and related item information	X	
Incoming VAT Invoice : China input tax invoice item	Create an item record for a given china input tax invoice		X
Incoming VAT Invoice : China input tax invoice item	Get a single record of invoice related to a specified china input tax invoice w	X	
Incoming VAT Invoice : China input tax invoice item	Get the list of china input tax invoice items	X	
Incoming VAT Invoice : China input tax invoice item	Create a china input tax invoice item		X
Incoming VAT Invoice : China input tax invoice item	Get a single china input tax invoice item with an invoice and item uuid	X	
Incoming VAT Invoice : Service operations	Receives a china input tax invoice		X
Incoming VAT Invoice : Service operations	Signs off a china input tax invoice		X
Incoming VAT Invoice : Service operations	Declares a china input tax invoice		X
Incoming VAT Invoice : Batch requests	Send a group of requests		X
Enterprise Project : Project block function	Read blocked functions information of enterprise project definitions	X	
Enterprise Project : Project block function	Create blocked functions information for enterprise project definitions		X
Enterprise Project : Project block function	Read blocked functions information of enterprise project definitions by projec	X	
Enterprise Project : Project block function	Update blocked functions information of enterprise project definitions		X
Enterprise Project : Project	Read the project to which the blocked functions information is related	X	
Enterprise Project : Project	Read the project block function of one particular project	X	
Enterprise Project : Project	Read enterprise project definitions	X	

Enterprise Project : Project	Create enterprise project definitions		X
Enterprise Project : Project	Read enterprise project definitions by project uuid	X	
Enterprise Project : Project	Update enterprise project definitions		X
Enterprise Project : Project	Delete enterprise project definitions by project uuid		X
Enterprise Project : Project	Set the processing status for enterprise project definitions		X
Enterprise Project : Project	Create a project by copying data from an existing project		X
Enterprise Project : Project element	Read the project that is related to one particular project element	X	
Enterprise Project : Project element	Read enterprise project elements of a certain enterprise project	X	
Enterprise Project : Project element	Create enterprise project element for a certain project		X
Enterprise Project : Project element	Read enterprise project elements	X	
Enterprise Project : Project element	Create enterprise project elements		X
Enterprise Project : Project element	Read enterprise project elements by project element uuid	X	
Enterprise Project : Project element	Update enterprise project elements		X
Enterprise Project : Project element	Delete enterprise project elements by project element uuid		X
Enterprise Project : Project element	Read the parent project element that is related to one particular project elem	X	
Enterprise Project : Project element	Read sub project elements of one particular project element	X	
Enterprise Project : Project element	Create sub project element for a certain project element		X
Enterprise Project : Project element	Changes the position of enterprise project elements		X
Enterprise Project : Project element	Set the processing status for enterprise project elements		X
Enterprise Project : Project element	Invoke action changeperioddistributionoption		X
Enterprise Project : Project JVA	Read the project to which the joint venture accounting data is related	X	
Enterprise Project : Project JVA	Read the project jva of one particular project	X	
Enterprise Project : Project JVA	Read joint venture accounting data of enterprise project definitions	X	
Enterprise Project : Project JVA	Read joint venture accounting data of enterprise project definition by project	X	
Enterprise Project : Project JVA	Update joint venture accounting data of enterprise project definitions		X
Enterprise Project : Project role	Read the project that is related to a particular project role	X	
Enterprise Project : Project role	Read the project roles of one particular project	X	
Enterprise Project : Project role	Create a project role for a certain project		X
Enterprise Project : Project role	Read project role data of enterprise projects	X	
Enterprise Project : Project role	Create project roles		X
Enterprise Project : Project role	Read projects roles by project role uuid	X	
Enterprise Project : Project team member	Read the project that is related to one particular project team member	X	
Enterprise Project : Project team member	Read the project team members of one particular project	X	
Enterprise Project : Project team member	Create a project team member for a certain project		X
Enterprise Project : Project team member	Read project team member data of enterprise projects	X	
Enterprise Project : Project team member	Create project team members		X
Enterprise Project : Project team member	Read project team members by project team member uuid	X	
Enterprise Project : Project public sector	Read the project public sector of one particular project	X	
Enterprise Project : Project public sector	Read the project to which the public sector data is related	X	
Enterprise Project : Project public sector	Read public sector data of enterprise project definitions	X	
Enterprise Project : Project public sector	Read public sector data of enterprise project definitions by project uuid	X	
Enterprise Project : Project public sector	Update public sector data of enterprise project definitions		X
Enterprise Project : Project element jva	Read the project containing the project element to which the joint venture ac	X	
Enterprise Project : Project element jva	Read the joint venture accounting data of one particular project element	X	
Enterprise Project : Project element jva	Read the project element to which the joint venture accounting data is relate	X	
Enterprise Project : Project element jva	Read joint venture accounting data of enterprise project elements	X	
Enterprise Project : Project element jva	Read joint venture accounting data of enterprise project element by project e	X	
Enterprise Project : Project element jva	Update joint venture accounting data of enterprise project elements		X
Enterprise Project : Project element block function	Read the project containing the project element to which the blocked functio	X	
Enterprise Project : Project element block function	Read the project element block function of one particular project element	X	
Enterprise Project : Project element block function	Read the project element to which the blocked functions information is relate	X	
Enterprise Project : Project element block function	Read blocked functions information of enterprise project elements	X	
Enterprise Project : Project element block function	Create blocked functions information for enterprise project elements		X
Enterprise Project : Project element block function	Read blocked functions information of enterprise project elements by project	X	
Enterprise Project : Project element block function	Update blocked functions information of enterprise project elements		X
Enterprise Project : Project element public sector	Read the project containing the project element to which the public sector da	X	
Enterprise Project : Project element public sector	Read the project element public sector of one particular project element	X	
Enterprise Project : Project element public sector	Read the project element that is related to one particular project element pul	X	
Enterprise Project : Project element public sector	Read public sector data of enterprise project elements	X	
Enterprise Project : Project element public sector	Read public sector data of enterprise project elements by project element uu	X	
Enterprise Project : Project element public sector	Update public sector data of enterprise project elements		X
Enterprise Project : Project element work item	Read the project containing the project element that is related to a particular	X	
Enterprise Project : Project element work item	Read the work items of a particular project element	X	
Enterprise Project : Project element work item	Create work items for project elements		X
Enterprise Project : Project element work item	Read the project element that is related to a particular work item	X	
Enterprise Project : Project element work item	Read work item data of enterprise project elements	X	
Enterprise Project : Project element work item	Read work item data of enterprise project elements by work item uuid	X	
Enterprise Project : Project element work item	Update work items of project elements		X
Enterprise Project : Project element work item	Delete work items of project elements		X
Enterprise Project : Project entitlement	Read the project that is related to one particular project entitlement	X	
Enterprise Project : Project entitlement	Read the project role that is related to a project entitlement	X	
Enterprise Project : Project entitlement	Read the entitlement data of one particular project team member	X	
Enterprise Project : Project entitlement	Create project entitlement for a team member		X
Enterprise Project : Project entitlement	Read the project team member that is related to a project entitlement	X	
Enterprise Project : Project entitlement	Read project entitlement data of enterprise projects	X	
Enterprise Project : Project entitlement	Create project entitlements		X
Enterprise Project : Project entitlement	Read project entitlements by project entitlement uuid	X	

Enterprise Project : Project entitlement	Update project entitlement data		X
Enterprise Project : Project entitlement	Delete project entitlement data		X
Enterprise Project : Project element deliverable	Read the project element deliverable of one particular project element	X	
Enterprise Project : Project element deliverable	Create deliverable for an enterprise project element		X
Enterprise Project : Project element deliverable	Read the project element that is related to one particular project element del	X	
Enterprise Project : Project element deliverable	Read deliverable data of enterprise project elements	X	
Enterprise Project : Project element deliverable	Read deliverable data of enterprise project elements by deliverable uuid	X	
Enterprise Project : Project element deliverable	Update deliverable data of enterprise project elements		X
Enterprise Project : Project element deliverable distribution	Read the deliverable distribution of one particular project element deliverabl	X	
Enterprise Project : Project element deliverable distribution	Create deliverable distribution for a deliverable		X
Enterprise Project : Project element deliverable distribution	Read the deliverable that is related to one particular deliverable distribution	X	
Enterprise Project : Project element deliverable distribution	Read deliverable distribution data of enterprise project element deliverables	X	
Enterprise Project : Project element deliverable distribution	Read deliverable distribution data of enterprise project element deliverables	X	
Enterprise Project : Project element deliverable distribution	Update deliverable distribution data of enterprise project element deliverables		X
Enterprise Project : Project element work item text	Read the work item text of a particular configured work item	X	
Enterprise Project : Project element work item text	Read the configured work item text data of project elements by work item ID	X	
Enterprise Project : Project element work item text	Read the configured work item text data of project elements by work item ID	X	
Enterprise Project : Batch requests	Send a group of requests		X
Sales Contract (A2X) : Sales contract header	Read all sales contract headers	X	
Sales Contract (A2X) : Sales contract header	Create a sales contract		X
Sales Contract (A2X) : Sales contract header	Read the header of a specific sales contract	X	
Sales Contract (A2X) : Sales contract header	Update the header of a specific sales contract		X
Sales Contract (A2X) : Sales contract header	Delete a specific sales contract		X
Sales Contract (A2X) : Sales contract item	Read items of a specific sales contract	X	
Sales Contract (A2X) : Sales contract item	Create one or more items for a specific sales contract		X
Sales Contract (A2X) : Sales contract item	Read the sales contract header for a specific sales contract item	X	
Sales Contract (A2X) : Sales contract item	Read all sales contract items	X	
Sales Contract (A2X) : Sales contract item	Create one or more sales contract items for a specific sales contract		X
Sales Contract (A2X) : Sales contract item	Read a specific sales contract item	X	
Sales Contract (A2X) : Sales contract item	Update a specific sales contract item		X
Sales Contract (A2X) : Sales contract item	Delete a specific sales contract item		X
Sales Contract (A2X) : Header partner	Read the header-level partners of a specific sales contract	X	
Sales Contract (A2X) : Header partner	Create the header partners of a specific sales contract		X
Sales Contract (A2X) : Header partner	Read the sales contract header for a specific header partner	X	
Sales Contract (A2X) : Header partner	Read all header-level partners	X	
Sales Contract (A2X) : Header partner	Read a specific header-level partner	X	
Sales Contract (A2X) : Header partner	Update a specific header-level partner		X
Sales Contract (A2X) : Header partner	Delete a specific header-level partner		X
Sales Contract (A2X) : Header pricing element	Read the header-level pricing elements of a specific sales contract	X	
Sales Contract (A2X) : Header pricing element	Read the sales contract header for a specific header pricing element	X	
Sales Contract (A2X) : Header pricing element	Read all header-level pricing elements	X	
Sales Contract (A2X) : Header pricing element	Read a specific header-level pricing element	X	
Sales Contract (A2X) : Header pricing element	Update a specific header-level pricing element		X
Sales Contract (A2X) : Header pricing element	Delete a specific header-level pricing element		X
Sales Contract (A2X) : Header text	Read the header-level texts of a specific sales contract	X	
Sales Contract (A2X) : Header text	Read the sales contract header for a specific header text	X	
Sales Contract (A2X) : Header text	Read all header-level texts	X	
Sales Contract (A2X) : Header text	Read a specific header-level text	X	
Sales Contract (A2X) : Header text	Update a specific header-level text		X
Sales Contract (A2X) : Header text	Delete a specific header-level text		X
Sales Contract (A2X) : Item partner	Read the sales contract header for a specific item partner	X	
Sales Contract (A2X) : Item partner	Read the item-level partner of a specific sales contract item	X	
Sales Contract (A2X) : Item partner	Read the sales contract item for a specific item partner	X	
Sales Contract (A2X) : Item partner	Read all item-level partners	X	
Sales Contract (A2X) : Item partner	Read a specific item-level partner	X	
Sales Contract (A2X) : Item partner	Update a specific item-level partner		X
Sales Contract (A2X) : Item partner	Delete a specific item-level partner		X
Sales Contract (A2X) : Item pricing element	Read the sales contract header for a specific item pricing element	X	
Sales Contract (A2X) : Item pricing element	Read the item-level pricing element of a specific sales contract item	X	
Sales Contract (A2X) : Item pricing element	Read the sales contract item for a specific item pricing element	X	
Sales Contract (A2X) : Item pricing element	Read all item-level pricing elements	X	
Sales Contract (A2X) : Item pricing element	Read a specific item-level pricing element	X	
Sales Contract (A2X) : Item pricing element	Update a specific item-level partner		X
Sales Contract (A2X) : Item pricing element	Update a specific item-level pricing element		X
Sales Contract (A2X) : Item text	Read the sales contract header for a specific item text	X	
Sales Contract (A2X) : Item text	Read the item-level text of a specific sales contract item	X	
Sales Contract (A2X) : Item text	Read the sales contract item for a specific item text	X	
Sales Contract (A2X) : Item text	Read all item-level texts	X	
Sales Contract (A2X) : Item text	Read a specific item-level text	X	
Sales Contract (A2X) : Item text	Update a specific item-level text		X
Sales Contract (A2X) : Item text	Delete a specific item-level text		X
Sales Contract (A2X) : Service operations	Approves a specific sales contract		X
Sales Contract (A2X) : Service operations	Reject a specific sales contract		X
Sales Contract (A2X) : Batch requests	Send a group of requests		X
Segment - Read : Segment	Read the items of all segments	X	
Segment - Read : Segment	Read a segment by key	X	
Segment - Read : Segment text	Read the texts of a specific segment	X	

Segment - Read : Segment text	Read the segment related to the text item	X	
Segment - Read : Segment text	Read the texts of all segments	X	
Segment - Read : Segment text	Read the texts of a segment for a specific language and segment ID	X	
Supplier Invoice : Nota fiscal data	Get entities from a br supplierinvoicenfdocument	X

Master Data for Group Reporting - Read : Combined cost center	Read a set of entries from combined cost center	X	
Master Data for Group Reporting - Read : Combined cost center	Read an entry by key from combined cost center	X	
Master Data for Group Reporting - Read : Combined cost center hierarchy	Read associated entries of combined cost center hierarchy	X	
Master Data for Group Reporting - Read : Combined cost center hierarchy	Read associated entries of combined cost center	X	
Master Data for Group Reporting - Read : Combined cost center hierarchy	Read a set of entries from combined cost center hierarchy	X	
Master Data for Group Reporting - Read : Combined cost center hierarchy	Read an entry by key from combined cost center hierarchy	X	
Master Data for Group Reporting - Read : Combined cost center text	Read associated entries of combined cost center text	X	
Master Data for Group Reporting - Read : Combined cost center text	Read associated entries of combined cost center	X	
Master Data for Group Reporting - Read : Combined cost center text	Read a set of entries from combined cost center text	X	
Master Data for Group Reporting - Read : Combined cost center text	Read an entry by key from combined cost center text	X	
Master Data for Group Reporting - Read : Combined cost center hierarchy	Read associated entries of combined cost center hierarchy text	X	
Master Data for Group Reporting - Read : Combined cost center hierarchy	Read a set of entries from combined cost center hierarchy text	X	
Master Data for Group Reporting - Read : Combined cost center hierarchy	Read an entry by key from combined cost center hierarchy text	X	
Master Data for Group Reporting - Read : Combined country/region	Read a set of entries from combined customer or supplier country/region	X	
Master Data for Group Reporting - Read : Combined country/region	Read an entry by key from combined customer or supplier country/region	X	
Master Data for Group Reporting - Read : Combined country/region hierar	Read associated entries of combined customer or supplier country/region hi	X	
Master Data for Group Reporting - Read : Combined country/region hierar	Read associated entries of combined customer or supplier country/region	X	
Master Data for Group Reporting - Read : Combined country/region hierar	Read a set of entries from combined customer or supplier country/region hie	X	
Master Data for Group Reporting - Read : Combined country/region hierar	Read an entry by key from combined customer or supplier country/region hie	X	
Master Data for Group Reporting - Read : Combined country/region text	Read associated entries of combined customer or supplier country/region te	X	
Master Data for Group Reporting - Read : Combined country/region text	Read associated entries of combined customer or supplier country/region	X	
Master Data for Group Reporting - Read : Combined country/region text	Read a set of entries from combined customer or supplier country/region tex	X	
Master Data for Group Reporting - Read : Combined country/region text	Read an entry by key from combined customer or supplier country/region tex	X	
Master Data for Group Reporting - Read : Combined country/region hierar	Read associated entries of combined customer or supplier ctryreg hier txt	X	
Master Data for Group Reporting - Read : Combined country/region hierar	Read a set of entries from combined customer or supplier ctryreg hier txt	X	
Master Data for Group Reporting - Read : Combined country/region hierar	Read an entry by key from combined customer or supplier ctryreg hier txt	X	
Master Data for Group Reporting - Read : Combined customer	Read a set of entries from combined customer	X	
Master Data for Group Reporting - Read : Combined customer	Read an entry by key from combined customer	X	
Master Data for Group Reporting - Read : Combined customer hierarchy	Read associated entries of combined customer hierarchy	X	
Master Data for Group Reporting - Read : Combined customer hierarchy	Read associated entries of combined customer	X	
Master Data for Group Reporting - Read : Combined customer hierarchy	Read a set of entries from combined customer hierarchy	X	
Master Data for Group Reporting - Read : Combined customer hierarchy	Read an entry by key from combined customer hierarchy	X	
Master Data for Group Reporting - Read : Combined customer text	Read associated entries of combined customer text	X	
Master Data for Group Reporting - Read : Combined customer text	Read associated entries of combined customer	X	
Master Data for Group Reporting - Read : Combined customer text	Read a set of entries from combined customer text	X	
Master Data for Group Reporting - Read : Combined customer text	Read an entry by key from combined customer text	X	
Master Data for Group Reporting - Read : Combined customer hierarchy t	Read associated entries of combined customer hierarchy text	X	
Master Data for Group Reporting - Read : Combined customer hierarchy t	Read a set of entries from combined customer hierarchy text	X	
Master Data for Group Reporting - Read : Combined customer hierarchy t	Read an entry by key from combined customer hierarchy text	X	
Master Data for Group Reporting - Read : Combined customer group	Read a set of entries from combined customer group	X	
Master Data for Group Reporting - Read : Combined customer group	Read an entry by key from combined customer group	X	
Master Data for Group Reporting - Read : Combined customer group hiera	Read associated entries of combined customer group hierarchy	X	
Master Data for Group Reporting - Read : Combined customer group hiera	Read associated entries of combined customer group	X	
Master Data for Group Reporting - Read : Combined customer group hiera	Read a set of entries from combined customer group hierarchy	X	
Master Data for Group Reporting - Read : Combined customer group hiera	Read an entry by key from combined customer group hierarchy	X	
Master Data for Group Reporting - Read : Combined customer group text	Read associated entries of combined customer group text	X	

Master Data for Group Reporting - Read : Combined customer group text	Read associated entries of combined customer group	X	
Master Data for Group Reporting - Read : Combined customer group text	Read a set of entries from combined customer group text	X	
Master Data for Group Reporting - Read : Combined customer group text	Read an entry by key from combined customer group text	X	
Master Data for Group Reporting - Read : Combined customer group hiera	Read associated entries of combined customer group hierarchy text	X	
Master Data for Group Reporting - Read : Combined customer group hiera	Read a set of entries from combined customer group hierarchy text	X	
Master Data for Group Reporting - Read : Combined customer group hiera	Read an entry by key from combined customer group hierarchy text	X	
Master Data for Group Reporting - Read : Combined distribution channel	Read a set of entries from combined distribution channel	X	
Master Data for Group Reporting - Read : Combined distribution channel	Read an entry by key from combined distribution channel	X	
Master Data for Group Reporting - Read : Combined distribution channel t	Read associated entries of combined distribution channel text	X	
Master Data for Group Reporting - Read : Combined distribution channel t	Read associated entries of combined distribution channel	X	
Master Data for Group Reporting - Read : Combined distribution channel t	Read a set of entries from combined distribution channel text	X	
Master Data for Group Reporting - Read : Combined distribution channel t	Read an entry by key from combined distribution channel text	X	
Master Data for Group Reporting - Read : Combined division	Read a set of entries from combined division	X	
Master Data for Group Reporting - Read : Combined division	Read an entry by key from combined division	X	
Master Data for Group Reporting - Read : Combined division text	Read associated entries of combined division text	X	
Master Data for Group Reporting - Read : Combined division text	Read associated entries of combined division	X	
Master Data for Group Reporting - Read : Combined division text	Read a set of entries from combined division text	X	
Master Data for Group Reporting - Read : Combined division text	Read an entry by key from combined division text	X	
Master Data for Group Reporting - Read : Consolidation document type	Read a set of entries from consolidation document type	X	
Master Data for Group Reporting - Read : Consolidation document type	Read an entry by key from consolidation document type	X	
Master Data for Group Reporting - Read : Consolidation document type hi	Read associated entries of consolidation document type hierarchy	X	
Master Data for Group Reporting - Read : Consolidation document type hi	Read associated entries of consolidation document type	X	
Master Data for Group Reporting - Read : Consolidation document type hi	Read a set of entries from consolidation document type hierarchy	X	
Master Data for Group Reporting - Read : Consolidation document type hi	Read an entry by key from consolidation document type hierarchy	X	
Master Data for Group Reporting - Read : Consolidation document type te	Read associated entries of consolidation document type text	X	
Master Data for Group Reporting - Read : Consolidation document type te	Read associated entries of consolidation document type	X	
Master Data for Group Reporting - Read : Consolidation document type te	Read a set of entries from consolidation document type text	X	
Master Data for Group Reporting - Read : Consolidation document type te	Read an entry by key from consolidation document type text	X	
Master Data for Group Reporting - Read : Consolidation doc type hier nod	Read associated entries of consolidation document type hierarchy text	X	
Master Data for Group Reporting - Read : Consolidation doc type hier nod	Read associated entries of consolidation document type hierarchy	X	
Master Data for Group Reporting - Read : Consolidation doc type hier nod	Read a set of entries from consolidation document type hierarchy text	X	
Master Data for Group Reporting - Read : Consolidation doc type hier nod	Read an entry by key from consolidation document type hierarchy text	X	
Master Data for Group Reporting - Read : Consolidation feature	Read a set of entries from feature	X	
Master Data for Group Reporting - Read : Consolidation feature	Read an entry by key from feature	X	
Master Data for Group Reporting - Read : Combined financial transaction t	Read a set of entries from combined financial transaction type	X	
Master Data for Group Reporting - Read : Combined financial transaction t	Read an entry by key from combined financial transaction type	X	
Master Data for Group Reporting - Read : Combined fin transaction type h	Read associated entries of combined financial transaction type hierarchy	X	
Master Data for Group Reporting - Read : Combined fin transaction type h	Read associated entries of combined financial transaction type	X	
Master Data for Group Reporting - Read : Combined fin transaction type h	Read a set of entries from combined financial transaction type hierarchy	X	
Master Data for Group Reporting - Read : Combined fin transaction type h	Read an entry by key from combined financial transaction type hierarchy	X	
Master Data for Group Reporting - Read : Combined financial transaction t	Read associated entries of combined financial transaction type text	X	
Master Data for Group Reporting - Read : Combined financial transaction t	Read associated entries of combined financial transaction type	X	
Master Data for Group Reporting - Read : Combined financial transaction t	Read a set of entries from combined financial transaction type text	X	
Master Data for Group Reporting - Read : Combined financial transaction t	Read an entry by key from combined financial transaction type text	X	
Master Data for Group Reporting - Read : Combined fin transaction type h	Read associated entries of combined financial transaction type hierarchy tex	X	
Master Data for Group Reporting - Read : Combined fin transaction type h	Read a set of entries from combined financial transaction type hierarchy text	X	
Master Data for Group Reporting - Read : Combined fin transaction type h	Read an entry by key from combined financial transaction type hierarchy tex	X	
Master Data for Group Reporting - Read : Financial statement item	Read a set of entries from financial statement item - deprecated	X	
Master Data for Group Reporting - Read : Financial statement item	Read an entry by key from financial statement item - deprecated	X	
Master Data for Group Reporting - Read : Financial statement item hier no	Read associated entries of financial statement item hierarchy node - deprec	X	
Master Data for Group Reporting - Read : Financial statement item hier no	Read associated entries of financial statement item - deprecated	X	
Master Data for Group Reporting - Read : Financial statement item hier no	Read a set of entries from financial statement item hierarchy node - depreca	X	
Master Data for Group Reporting - Read : Financial statement item hier no	Read an entry by key from financial statement item hierarchy node - deprec	X	
Master Data for Group Reporting - Read : Financial statement item text	Read associated entries of financial statement item text - deprecated	X	
Master Data for Group Reporting - Read : Financial statement item text	Read associated entries of financial statement item - deprecated	X	
Master Data for Group Reporting - Read : Financial statement item text	Read a set of entries from financial statement item text - deprecated	X	
Master Data for Group Reporting - Read : Financial statement item text	Read an entry by key from financial statement item text - deprecated	X	
Master Data for Group Reporting - Read : Financial statement item hier no	Read associated entries of financial statement item hierarchy node text - dep	X	
Master Data for Group Reporting - Read : Financial statement item hier no	Read associated entries of financial statement item hierarchy node - deprec	X	
Master Data for Group Reporting - Read : Financial statement item hier no	Read a set of entries from financial statement item hierarchy node text - dep	X	
Master Data for Group Reporting - Read : Financial statement item hier no	Read an entry by key from financial statement item hierarchy node text - dep	X	
Master Data for Group Reporting - Read : Financial statement item attribut	Read a set of entries from financial statement item by time and version	X	
Master Data for Group Reporting - Read : Financial statement item attribut	Read an entry by key from financial statement item by time and version	X	
Master Data for Group Reporting - Read : Financial statement item versior	Read associated entries of financial statement item version 2	X	
Master Data for Group Reporting - Read : Financial statement item versior	Read associated entries of financial statement item by time and version	X	
Master Data for Group Reporting - Read : Financial statement item versior	Read a set of entries from financial statement item version 2	X	
Master Data for Group Reporting - Read : Financial statement item versior	Read an entry by key from financial statement item version 2	X	
Master Data for Group Reporting - Read : Financial statement item v2 hier	Read associated entries of financial statement item version 2	X	
Master Data for Group Reporting - Read : Financial statement item v2 hier	Read associated entries of financial statement item hierarchy node version 2	X	
Master Data for Group Reporting - Read : Financial statement item v2 hier	Read associated entries of financial statement item hierarchy node version 2	X	
Master Data for Group Reporting - Read : Financial statement item v2 hier	Read associated entries of financial statement item hierarchy node text vers	X	
Master Data for Group Reporting - Read : Financial statement item v2 hier	Read a set of entries from financial statement item hierarchy node version 2	X	
Master Data for Group Reporting - Read : Financial statement item v2 hier	Read an entry by key from financial statement item hierarchy node version 2	X	
Master Data for Group Reporting - Read : Financial statement item v2 text	Read associated entries of financial statement item version 2	X	
Master Data for Group Reporting - Read : Financial statement item v2 text	Read associated entries of financial statement item text version 2	X	
Master Data for Group Reporting - Read : Financial statement item v2 text	Read a set of entries from financial statement item text version 2	X	
Master Data for Group Reporting - Read : Financial statement item v2 text	Read an entry by key from financial statement item text version 2	X	

Master Data for Group Reporting - Read : Financial statement item hier no	Read a set of entries from financial statement item hierarchy node text versi	X	
Master Data for Group Reporting - Read : Financial statement item hier no	Read an entry by key from financial statement item hierarchy node text versi	X	
Master Data for Group Reporting - Read : Selection attribute	Read a set of entries from selection attribute	X	
Master Data for Group Reporting - Read : Selection attribute	Read an entry by key from selection attribute	X	
Master Data for Group Reporting - Read : Selection attribute text	Read associated entries of selection attribute text	X	
Master Data for Group Reporting - Read : Selection attribute text	Read associated entries of selection attribute	X	
Master Data for Group Reporting - Read : Selection attribute text	Read a set of entries from selection attribute text	X	
Master Data for Group Reporting - Read : Selection attribute text	Read an entry by key from selection attribute text	X	
Master Data for Group Reporting - Read : Selection attribute value	Read associated entries of selection attribute value	X	
Master Data for Group Reporting - Read : Selection attribute value	Read a set of entries from selection attribute value	X	
Master Data for Group Reporting - Read : Selection attribute value	Read an entry by key from selection attribute value	X	
Master Data for Group Reporting - Read : Selection attribute value text	Read associated entries of selection attribute value text	X	
Master Data for Group Reporting - Read : Selection attribute value text	Read associated entries of selection attribute value	X	
Master Data for Group Reporting - Read : Selection attribute value text	Read a set of entries from selection attribute value text	X	
Master Data for Group Reporting - Read : Selection attribute value text	Read an entry by key from selection attribute value text	X	
Master Data for Group Reporting - Read : Target attribute	Read a set of entries from target attribute	X	
Master Data for Group Reporting - Read : Target attribute	Read an entry by key from target attribute	X	
Master Data for Group Reporting - Read : Target attribute text	Read associated entries of target attribute text	X	
Master Data for Group Reporting - Read : Target attribute text	Read associated entries of target attribute	X	
Master Data for Group Reporting - Read : Target attribute text	Read a set of entries from target attribute text	X	
Master Data for Group Reporting - Read : Target attribute text	Read an entry by key from target attribute text	X	
Master Data for Group Reporting - Read : Target attribute value	Read a set of entries from target attribute value	X	
Master Data for Group Reporting - Read : Target attribute value	Read an entry by key from target attribute value	X	
Master Data for Group Reporting - Read : Target attribute value text	Read associated entries of target attribute value text	X	
Master Data for Group Reporting - Read : Target attribute value text	Read associated entries of target attribute value	X	
Master Data for Group Reporting - Read : Target attribute value text	Read a set of entries from target attribute value text	X	
Master Data for Group Reporting - Read : Target attribute value text	Read an entry by key from target attribute value text	X	
Master Data for Group Reporting - Read : Financial statement item type	Read a set of entries from financial statement item type	X	
Master Data for Group Reporting - Read : Financial statement item type	Read an entry by key from financial statement item type	X	
Master Data for Group Reporting - Read : Financial statement item type te	Read associated entries of financial statement item type text	X	
Master Data for Group Reporting - Read : Financial statement item type te	Read associated entries of financial statement item type	X	
Master Data for Group Reporting - Read : Financial statement item type te	Read a set of entries from financial statement item type text	X	
Master Data for Group Reporting - Read : Financial statement item type te	Read an entry by key from financial statement item type text	X	
Master Data for Group Reporting - Read : Combined functional area hierar	Read a set of entries from combined functional area hierarchy text	X	
Master Data for Group Reporting - Read : Combined functional area hierar	Read an entry by key from combined functional area hierarchy text	X	
Master Data for Group Reporting - Read : Combined functional area hierar	Read associated entries of combined functional area hierarchy text	X	
Master Data for Group Reporting - Read : Combined functional area hierar	Read associated entries of combined functional area hierarchy	X	
Master Data for Group Reporting - Read : Combined functional area hierar	Read associated entries of combined functional area	X	
Master Data for Group Reporting - Read : Combined functional area hierar	Read a set of entries from combined functional area hierarchy	X	
Master Data for Group Reporting - Read : Combined functional area hierar	Read an entry by key from combined functional area hierarchy	X	
Master Data for Group Reporting - Read : Combined functional area	Read a set of entries from combined functional area	X	
Master Data for Group Reporting - Read : Combined functional area	Read an entry by key from combined functional area	X	
Master Data for Group Reporting - Read : Combined functional area text	Read associated entries of combined functional area text	X	
Master Data for Group Reporting - Read : Combined functional area text	Read associated entries of combined functional area	X	
Master Data for Group Reporting - Read : Combined functional area text	Read a set of entries from combined functional area text	X	
Master Data for Group Reporting - Read : Combined functional area text	Read an entry by key from combined functional area text	X	
Master Data for Group Reporting - Read : Consolidation greenhouse gas c	Read a set of entries from greenhouse gas category	X	
Master Data for Group Reporting - Read : Consolidation greenhouse gas c	Read an entry by key from greenhouse gas category	X	
Master Data for Group Reporting - Read : Consolidation ghg category text	Read associated entries of greenhouse gas category text	X	
Master Data for Group Reporting - Read : Consolidation ghg category text	Read associated entries of greenhouse gas category	X	
Master Data for Group Reporting - Read : Consolidation ghg category text	Read a set of entries from greenhouse gas category text	X	
Master Data for Group Reporting - Read : Consolidation ghg category text	Read an entry by key from greenhouse gas category text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg data quality charac	Read a set of entries from greenhouse gas data quality characteristic	X	
Master Data for Group Reporting - Read : Cnsldtn ghg data quality charac	Read an entry by key from greenhouse gas data quality characteristic	X	
Master Data for Group Reporting - Read : Cnsldtn ghg data quality charc t	Read associated entries of greenhouse gas data quality characteristic text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg data quality charc t	Read associated entries of greenhouse gas data quality characteristic	X	
Master Data for Group Reporting - Read : Cnsldtn ghg data quality charc t	Read a set of entries from greenhouse gas data quality characteristic text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg data quality charc t	Read an entry by key from greenhouse gas data quality characteristic text	X	
Master Data for Group Reporting - Read : Consolidation greenhouse gas e	Read a set of entries from greenhouse gas energy mix	X	
Master Data for Group Reporting - Read : Consolidation greenhouse gas e	Read an entry by key from greenhouse gas energy mix	X	
Master Data for Group Reporting - Read : Cnsldtn greenhouse gas energy	Read associated entries of greenhouse gas energy mix text	X	
Master Data for Group Reporting - Read : Cnsldtn greenhouse gas energy	Read associated entries of greenhouse gas energy mix	X	
Master Data for Group Reporting - Read : Cnsldtn greenhouse gas energy	Read a set of entries from greenhouse gas energy mix text	X	
Master Data for Group Reporting - Read : Cnsldtn greenhouse gas energy	Read an entry by key from greenhouse gas energy mix text	X	
Master Data for Group Reporting - Read : Consolidation ghg energy sourc	Read a set of entries from greenhouse gas energy sourcing type	X	
Master Data for Group Reporting - Read : Consolidation ghg energy sourc	Read an entry by key from greenhouse gas energy sourcing type	X	
Master Data for Group Reporting - Read : Cnsldtn ghg energy sourcing typ	Read associated entries of greenhouse gas energy sourcing type text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg energy sourcing typ	Read associated entries of greenhouse gas energy sourcing type	X	
Master Data for Group Reporting - Read : Cnsldtn ghg energy sourcing typ	Read a set of entries from greenhouse gas energy sourcing type text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg energy sourcing typ	Read an entry by key from greenhouse gas energy sourcing type text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg energy classificatio	Read a set of entries from greenhouse gas energy classification text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg energy classificatio	Read an entry by key from greenhouse gas energy classification text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg energy classificatio	Read associated entries of greenhouse gas energy classification	X	
Master Data for Group Reporting - Read : Cnsldtn ghg energy classificatio	Read associated entries of greenhouse gas energy classification text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg energy classificatio	Read a set of entries from greenhouse gas energy classification	X	
Master Data for Group Reporting - Read : Cnsldtn ghg energy classificatio	Read an entry by key from greenhouse gas energy classification	X	
Master Data for Group Reporting - Read : Consolidation greenhouse gas s	Read a set of entries from greenhouse gas scope	X	

Master Data for Group Reporting - Read : Consolidation greenhouse gas s	Read an entry by key from greenhouse gas scope	X	
Master Data for Group Reporting - Read : Consolidation ghg scope text	Read associated entries of greenhouse gas scope text	X	
Master Data for Group Reporting - Read : Consolidation ghg scope text	Read associated entries of greenhouse gas scope	X	
Master Data for Group Reporting - Read : Consolidation ghg scope text	Read a set of entries from greenhouse gas scope text	X	
Master Data for Group Reporting - Read : Consolidation ghg scope text	Read an entry by key from greenhouse gas scope text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg scope 2 calculation	Read a set of entries from greenhouse gas scope 2 calculation method	X	
Master Data for Group Reporting - Read : Cnsldtn ghg scope 2 calculation	Read an entry by key from greenhouse gas scope 2 calculation method	X	
Master Data for Group Reporting - Read : Cnsldtn ghg scope 2 calc metho	Read associated entries of greenhouse gas scope 2 calculation method text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg scope 2 calc metho	Read associated entries of greenhouse gas scope 2 calculation method	X	
Master Data for Group Reporting - Read : Cnsldtn ghg scope 2 calc metho	Read a set of entries from greenhouse gas scope 2 calculation method text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg scope 2 calc metho	Read an entry by key from greenhouse gas scope 2 calculation method text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg scp 2 cntrctl instr te	Read a set of entries from greenhouse gas scope 2 contractual instrument t	X	
Master Data for Group Reporting - Read : Cnsldtn ghg scp 2 cntrctl instr te	Read an entry by key from greenhouse gas scope 2 contractual instrument t	X	
Master Data for Group Reporting - Read : Cnsldtn ghg scp 2 contractual in	Read associated entries of greenhouse gas scope 2 contractual instrument	X	
Master Data for Group Reporting - Read : Cnsldtn ghg scp 2 contractual in	Read associated entries of greenhouse gas scope 2 contractual instrument t	X	
Master Data for Group Reporting - Read : Cnsldtn ghg scp 2 contractual in	Read a set of entries from greenhouse gas scope 2 contractual instrument	X	
Master Data for Group Reporting - Read : Cnsldtn ghg scp 2 contractual in	Read an entry by key from greenhouse gas scope 2 contractual instrument	X	
Master Data for Group Reporting - Read : Combined g/l account	Read a set of entries from combined G/L account	X	
Master Data for Group Reporting - Read : Combined g/l account	Read an entry by key from combined G/L account	X	
Master Data for Group Reporting - Read : Combined g/l account hier node	Read associated entries of combined G/L account hierarchy	X	
Master Data for Group Reporting - Read : Combined g/l account hier node	Read associated entries of combined G/L account	X	
Master Data for Group Reporting - Read : Combined g/l account hier node	Read a set of entries from combined G/L account hierarchy	X	
Master Data for Group Reporting - Read : Combined g/l account hier node	Read an entry by key from combined G/L account hierarchy	X	
Master Data for Group Reporting - Read : Combined g/l account text	Read associated entries of combined G/L account text	X	
Master Data for Group Reporting - Read : Combined g/l account text	Read associated entries of combined G/L account	X	
Master Data for Group Reporting - Read : Combined g/l account text	Read a set of entries from combined G/L account text	X	
Master Data for Group Reporting - Read : Combined g/l account text	Read an entry by key from combined G/L account text	X	
Master Data for Group Reporting - Read : Combined g/l account hier node	Read associated entries of combined G/L account hierarchy text	X	
Master Data for Group Reporting - Read : Combined g/l account hier node	Read a set of entries from combined G/L account hierarchy text	X	
Master Data for Group Reporting - Read : Combined g/l account hier node	Read an entry by key from combined G/L account hierarchy text	X	
Master Data for Group Reporting - Read : Combined g/l chart of accounts	Read a set of entries from combined G/L chart of accounts	X	
Master Data for Group Reporting - Read : Combined g/l chart of accounts	Read an entry by key from combined G/L chart of accounts	X	
Master Data for Group Reporting - Read : Combined g/l chart of accounts	Read associated entries of combined G/L chart of accounts text	X	
Master Data for Group Reporting - Read : Combined g/l chart of accounts	Read associated entries of combined G/L account	X	
Master Data for Group Reporting - Read : Combined g/l chart of accounts	Read a set of entries from combined G/L chart of accounts text	X	
Master Data for Group Reporting - Read : Combined g/l chart of accounts	Read an entry by key from combined G/L chart of accounts text	X	
Master Data for Group Reporting - Read : Partner global company	Read a set of entries from partner global company	X	
Master Data for Group Reporting - Read : Partner global company	Read an entry by key from partner global company	X	
Master Data for Group Reporting - Read : Global company text	Read associated entries of global company text	X	
Master Data for Group Reporting - Read : Global company text	Read associated entries of partner global company	X	
Master Data for Group Reporting - Read : Global company text	Read a set of entries from global company text	X	
Master Data for Group Reporting - Read : Global company text	Read an entry by key from global company text	X	
Master Data for Group Reporting - Read : Consolidation global parameter	Read a set of entries from consolidation global parameter	X	
Master Data for Group Reporting - Read : Consolidation global parameter	Read an entry by key from consolidation global parameter	X	
Master Data for Group Reporting - Read : Consolidation group	Read a set of entries from consolidation group	X	
Master Data for Group Reporting - Read : Consolidation group	Read an entry by key from consolidation group	X	
Master Data for Group Reporting - Read : Consolidation group text	Read associated entries of consolidation group text	X

Master Data for Group Reporting - Read : Investee consolidation unit text	Read an entry by key from investee consolidation unit text	X	
Master Data for Group Reporting - Read : Investee consolidation unit hier	Read associated entries of investee consolidation unit hierarchy text	X	
Master Data for Group Reporting - Read : Investee consolidation unit hier	Read a set of entries from investee consolidation unit hierarchy text	X	
Master Data for Group Reporting - Read : Investee consolidation unit hier	Read an entry by key from investee consolidation unit hierarchy text	X	
Master Data for Group Reporting - Read : Investment activity type	Read a set of entries from investment activity type	X	
Master Data for Group Reporting - Read : Investment activity type	Read an entry by key from investment activity type	X	

Master Data for Group Reporting - Read : Investment activity type text	Read associated entries of investment activity type text	X	
Master Data for Group Reporting - Read : Investment activity type text	Read associated entries of investment activity type	X	
Master Data for Group Reporting - Read : Investment activity type text	Read a set of entries from investment activity type text	X	
Master Data for Group Reporting - Read : Investment activity type text	Read an entry by key from investment activity type text	X	
Master Data for Group Reporting - Read : Investment activity type text	Read a set of entries from investment activity type text - deprecated	X	
Master Data for Group Reporting - Read : Investment activity type text	Read an entry by key from investment activity type text - deprecated	X	
Master Data for Group Reporting - Read : Consolidation of investments ac	Read associated entries of investment activity type text - deprecated	X	
Master Data for Group Reporting - Read : Consolidation of investments ac	Read a set of entries from investment activity type - deprecated	X	
Master Data for Group Reporting - Read : Consolidation of investments ac	Read an entry by key from investment activity type - deprecated	X	
Master Data for Group Reporting - Read : Consolidation ledger	Read a set of entries from consolidation ledger	X	
Master Data for Group Reporting - Read : Consolidation ledger	Read an entry by key from consolidation ledger	X	
Master Data for Group Reporting - Read : Consolidation ledger text	Read associated entries of consolidation ledger text	X	
Master Data for Group Reporting - Read : Consolidation ledger text	Read associated entries of consolidation ledger	X	
Master Data for Group Reporting - Read : Consolidation ledger text	Read a set of entries from consolidation ledger text	X	
Master Data for Group Reporting - Read : Consolidation ledger text	Read an entry by key from consolidation ledger text	X	
Master Data for Group Reporting - Read : Combined material	Read a set of entries from combined material	X	
Master Data for Group Reporting - Read : Combined material	Read an entry by key from combined material	X	
Master Data for Group Reporting - Read : Combined material hierarchy no	Read associated entries of combined material hierarchy	X	
Master Data for Group Reporting - Read : Combined material hierarchy no	Read associated entries of combined material	X	
Master Data for Group Reporting - Read : Combined material hierarchy no	Read a set of entries from combined material hierarchy	X	
Master Data for Group Reporting - Read : Combined material hierarchy no	Read an entry by key from combined material hierarchy	X	
Master Data for Group Reporting - Read : Combined material text	Read associated entries of combined material text	X	
Master Data for Group Reporting - Read : Combined material text	Read associated entries of combined material	X	
Master Data for Group Reporting - Read : Combined material text	Read a set of entries from combined material text	X	
Master Data for Group Reporting - Read : Combined material text	Read an entry by key from combined material text	X	
Master Data for Group Reporting - Read : Combined material hierarchy no	Read associated entries of combined material hierarchy text	X	
Master Data for Group Reporting - Read : Combined material hierarchy no	Read a set of entries from combined material hierarchy text	X	
Master Data for Group Reporting - Read : Combined material hierarchy no	Read an entry by key from combined material hierarchy text	X	
Master Data for Group Reporting - Read : Combined material group	Read a set of entries from combined material group	X	
Master Data for Group Reporting - Read : Combined material group	Read an entry by key from combined material group	X	
Master Data for Group Reporting - Read : Combined material group hierar	Read associated entries of combined material group hierarchy	X	
Master Data for Group Reporting - Read : Combined material group hierar	Read associated entries of combined material group	X	
Master Data for Group Reporting - Read : Combined material group hierar	Read a set of entries from combined material group hierarchy	X	
Master Data for Group Reporting - Read : Combined material group hierar	Read an entry by key from combined material group hierarchy	X	
Master Data for Group Reporting - Read : Combined material group text	Read associated entries of combined material group text	X	
Master Data for Group Reporting - Read : Combined material group text	Read associated entries of combined material group	X	
Master Data for Group Reporting - Read : Combined material group text	Read a set of entries from combined material group text	X	
Master Data for Group Reporting - Read : Combined material group text	Read an entry by key from combined material group text	X	
Master Data for Group Reporting - Read : Combined material group hier n	Read associated entries of combined material group hierarchy text	X	
Master Data for Group Reporting - Read : Combined material group hier n	Read associated entries of combined material group hierarchy	X	
Master Data for Group Reporting - Read : Combined material group hier n	Read a set of entries from combined material group hierarchy text	X	
Master Data for Group Reporting - Read : Combined material group hier n	Read an entry by key from combined material group hierarchy text	X	
Master Data for Group Reporting - Read : Combined partner functional are	Read a set of entries from combined partner functional area hierarchy	X	
Master Data for Group Reporting - Read : Combined partner functional are	Read an entry by key from combined partner functional area hierarchy	X	
Master Data for Group Reporting - Read : Combined partner functional are	Read associated entries of combined partner functional area hierarchy text	X	
Master Data for Group Reporting - Read : Combined partner functional are	Read a set of entries from combined partner functional area hierarchy text	X	
Master Data for Group Reporting - Read : Combined partner functional are	Read an entry by key from combined partner functional area hierarchy text	X	
Master Data for Group Reporting - Read : Combined partner functional are	Read associated entries of combined partner functional area	X	
Master Data for Group Reporting - Read : Combined partner functional are	Read associated entries of combined partner functional area hierarchy	X	
Master Data for Group Reporting - Read : Combined partner functional are	Read a set of entries from combined partner functional area	X	
Master Data for Group Reporting - Read : Combined partner functional are	Read an entry by key from combined partner functional area	X	
Master Data for Group Reporting - Read : Combined partner functional are	Read associated entries of combined partner functional area	X	
Master Data for Group Reporting - Read : Combined partner functional are	Read associated entries of combined partner functional area text	X	
Master Data for Group Reporting - Read : Combined partner functional are	Read a set of entries from combined partner functional area text	X	
Master Data for Group Reporting - Read : Combined partner functional are	Read an entry by key from combined partner functional area text	X	
Master Data for Group Reporting - Read : Combined partner business area	Read a set of entries from combined partner business area	X	
Master Data for Group Reporting - Read : Combined partner business area	Read an entry by key from combined partner business area	X	
Master Data for Group Reporting - Read : Combined partner business area	Read associated entries of combined partner business area hierarchy	X	
Master Data for Group Reporting - Read : Combined partner business area	Read associated entries of combined partner business area	X	
Master Data for Group Reporting - Read : Combined partner business area	Read a set of entries from combined partner business area hierarchy	X	
Master Data for Group Reporting - Read : Combined partner business area	Read an entry by key from combined partner business area hierarchy	X	
Master Data for Group Reporting - Read : Combined partner business area	Read associated entries of combined partner business area text	X	
Master Data for Group Reporting - Read : Combined partner business area	Read associated entries of combined partner business area	X	
Master Data for Group Reporting - Read : Combined partner business area	Read a set of entries from combined partner business area text	X	
Master Data for Group Reporting - Read : Combined partner business area	Read an entry by key from combined partner business area text	X	
Master Data for Group Reporting - Read : Cmbnd partner business area h	Read associated entries of combined partner business area hierarchy text	X	
Master Data for Group Reporting - Read : Cmbnd partner business area h	Read a set of entries from combined partner business area hierarchy text	X	
Master Data for Group Reporting - Read : Cmbnd partner business area h	Read an entry by key from combined partner business area hierarchy text	X	
Master Data for Group Reporting - Read : Combined partner cost center	Read a set of entries from combined partner cost center	X	
Master Data for Group Reporting - Read : Combined partner cost center	Read an entry by key from combined partner cost center	X	
Master Data for Group Reporting - Read : Combined partner cost center h	Read associated entries of combined partner cost center hierarchy	X	
Master Data for Group Reporting - Read : Combined partner cost center h	Read associated entries of combined partner cost center	X	
Master Data for Group Reporting - Read : Combined partner cost center h	Read a set of entries from combined partner cost center hierarchy	X	
Master Data for Group Reporting - Read : Combined partner cost center h	Read an entry by key from combined partner cost center hierarchy	X	
Master Data for Group Reporting - Read : Combined partner cost center te	Read associated entries of combined partner cost center text	X	
Master Data for Group Reporting - Read : Combined partner cost center te	Read associated entries of combined partner cost center	X	
Master Data for Group Reporting - Read : Combined partner cost center te	Read a set of entries from combined partner cost center text	X	

Master Data for Group Reporting - Read : Combined partner cost center te	Read an entry by key from combined partner cost center text	X	
Master Data for Group Reporting - Read : Combined partner cost ctr hier r	Read associated entries of combined partner cost center hierarchy text	X	
Master Data for Group Reporting - Read : Combined partner cost ctr hier r	Read a set of entries from combined partner cost center hierarchy text	X	
Master Data for Group Reporting - Read : Combined partner cost ctr hier r	Read an entry by key from combined partner cost center hierarchy text	X	
Master Data for Group Reporting - Read : Combined partner profit center h	Read a set of entries from combined partner profit center hierarchy	X	
Master Data for Group Reporting - Read : Combined partner profit center h	Read an entry by key from combined partner profit center hierarchy	X	
Master Data for Group Reporting - Read : Combined partner prft ctr hier no	Read associated entries of combined partner profit center hierarchy text	X	
Master Data for Group Reporting - Read : Combined partner prft ctr hier no	Read a set of entries from combined partner profit center hierarchy text	X	
Master Data for Group Reporting - Read : Combined partner prft ctr hier no	Read an entry by key from combined partner profit center hierarchy text	X

Master Data for Group Reporting - Read : Combined partner profit center	Read associated entries of combined partner profit center hierarchy	X	
Master Data for Group Reporting - Read : Combined partner profit center	Read a set of entries from combined partner profit center	X	
Master Data for Group Reporting - Read : Combined partner profit center	Read an entry by key from combined partner profit center	X	
Master Data for Group Reporting - Read : Combined partner profit center t	Read associated entries of combined partner profit center	X	
Master Data for Group Reporting - Read : Combined partner profit center t	Read associated entries of combined partner profit center text	X	
Master Data for Group Reporting - Read : Combined partner profit center t	Read a set of entries from combined partner profit center text	X	
Master Data for Group Reporting - Read : Combined partner profit center t	Read an entry by key from combined partner profit center text	X	
Master Data for Group Reporting - Read : Combined partner segment	Read a set of entries from combined partner segment	X	
Master Data for Group Reporting - Read : Combined partner segment	Read an entry by key from combined partner segment	X	
Master Data for Group Reporting - Read : Combined partner segment hier	Read associated entries of combined partner segment hierarchy	X	
Master Data for Group Reporting - Read : Combined partner segment hier	Read associated entries of combined partner segment	X	
Master Data for Group Reporting - Read : Combined partner segment hier	Read a set of entries from combined partner segment hierarchy	X	
Master Data for Group Reporting - Read : Combined partner segment hier	Read an entry by key from combined partner segment hierarchy	X	
Master Data for Group Reporting - Read : Combined partner segment text	Read associated entries of combined partner segment text	X	
Master Data for Group Reporting - Read : Combined partner segment text	Read associated entries of combined partner segment	X	
Master Data for Group Reporting - Read : Combined partner segment text	Read a set of entries from combined partner segment text	X	
Master Data for Group Reporting - Read : Combined partner segment text	Read an entry by key from combined partner segment text	X	
Master Data for Group Reporting - Read : Combined partner segment hier	Read associated entries of combined partner segment hierarchy text	X	
Master Data for Group Reporting - Read : Combined partner segment hier	Read a set of entries from combined partner segment hierarchy text	X	
Master Data for Group Reporting - Read : Combined partner segment hier	Read an entry by key from combined partner segment hierarchy text	X	
Master Data for Group Reporting - Read : Partner consolidation unit	Read a set of entries from partner consolidation unit	X	
Master Data for Group Reporting - Read : Partner consolidation unit	Read an entry by key from partner consolidation unit	X	
Master Data for Group Reporting - Read : Partner consolidation unit hierar	Read associated entries of partner consolidation unit hierarchy	X	
Master Data for Group Reporting - Read : Partner consolidation unit hierar	Read associated entries of partner consolidation unit	X	
Master Data for Group Reporting - Read : Partner consolidation unit hierar	Read a set of entries from partner consolidation unit hierarchy	X	
Master Data for Group Reporting - Read : Partner consolidation unit hierar	Read an entry by key from partner consolidation unit hierarchy	X	
Master Data for Group Reporting - Read : Partner consolidation unit text	Read associated entries of partner consolidation unit text	X	
Master Data for Group Reporting - Read : Partner consolidation unit text	Read associated entries of partner consolidation unit	X	
Master Data for Group Reporting - Read : Partner consolidation unit text	Read a set of entries from partner consolidation unit text	X	
Master Data for Group Reporting - Read : Partner consolidation unit text	Read an entry by key from partner consolidation unit text	X	
Master Data for Group Reporting - Read : Partner consolidation unit hierar	Read associated entries of partner consolidation unit hierarchy text	X	
Master Data for Group Reporting - Read : Partner consolidation unit hierar	Read a set of entries from partner consolidation unit hierarchy text	X	
Master Data for Group Reporting - Read : Partner consolidation unit hierar	Read an entry by key from partner consolidation unit hierarchy text	X	
Master Data for Group Reporting - Read : Combined plant	Read a set of entries from combined plant	X	
Master Data for Group Reporting - Read : Combined plant	Read an entry by key from combined plant	X	
Master Data for Group Reporting - Read : Combined plant text	Read associated entries of combined plant text	X	
Master Data for Group Reporting - Read : Combined plant text	Read associated entries of combined plant	X	
Master Data for Group Reporting - Read : Combined plant text	Read a set of entries from combined plant text	X	
Master Data for Group Reporting - Read : Combined plant text	Read an entry by key from combined plant text	X	
Master Data for Group Reporting - Read : Posting level	Read a set of entries from posting level	X	
Master Data for Group Reporting - Read : Posting level	Read an entry by key from posting level	X	
Master Data for Group Reporting - Read : Posting level hierarchy node	Read associated entries of posting level hierarchy	X	
Master Data for Group Reporting - Read : Posting level hierarchy node	Read associated entries of posting level	X	
Master Data for Group Reporting - Read : Posting level hierarchy node	Read a set of entries from posting level hierarchy	X	
Master Data for Group Reporting - Read : Posting level hierarchy node	Read an entry by key from posting level hierarchy	X	
Master Data for Group Reporting - Read : Posting level text	Read associated entries of posting level text	X	
Master Data for Group Reporting - Read : Posting level text	Read associated entries of posting level	X	
Master Data for Group Reporting - Read : Posting level text	Read a set of entries from posting level text	X	
Master Data for Group Reporting - Read : Posting level text	Read an entry by key from posting level text	X	
Master Data for Group Reporting - Read : Posting level hierarchy node tex	Read associated entries of posting level hierarchy text	X	
Master Data for Group Reporting - Read : Posting level hierarchy node tex	Read associated entries of posting level hierarchy	X	
Master Data for Group Reporting - Read : Posting level hierarchy node tex	Read a set of entries from posting level hierarchy text	X	
Master Data for Group Reporting - Read : Posting level hierarchy node tex	Read an entry by key from posting level hierarchy text	X	
Master Data for Group Reporting - Read : Combined profit center for elimi	Read a set of entries from combined profit center for elimination	X	
Master Data for Group Reporting - Read : Combined profit center for elimi	Read an entry by key from combined profit center for elimination	X	
Master Data for Group Reporting - Read : Combined profit center for elim h	Read associated entries of combined profit center for elimination hierarchy	X	
Master Data for Group Reporting - Read : Combined profit center for elim h	Read associated entries of combined profit center for elimination	X	
Master Data for Group Reporting - Read : Combined profit center for elim h	Read a set of entries from combined profit center for elimination hierarchy	X	
Master Data for Group Reporting - Read : Combined profit center for elim h	Read an entry by key from combined profit center for elimination hierarchy	X	
Master Data for Group Reporting - Read : Combined profit center for elim t	Read associated entries of combined profit center for elimination text	X	
Master Data for Group Reporting - Read : Combined profit center for elim t	Read associated entries of combined profit center for elimination	X	
Master Data for Group Reporting - Read : Combined profit center for elim t	Read a set of entries from combined profit center for elimination text	X	
Master Data for Group Reporting - Read : Combined profit center for elim t	Read an entry by key from combined profit center for elimination text	X	
Master Data for Group Reporting - Read : Cmbnd profit center for elim hie	Read associated entries of combined profit center for elimination hierarchy t	X	
Master Data for Group Reporting - Read : Cmbnd profit center for elim hie	Read a set of entries from combined profit center for elimination hierarchy te	X	
Master Data for Group Reporting - Read : Cmbnd profit center for elim hie	Read an entry by key from combined profit center for elimination hierarchy te	X	
Master Data for Group Reporting - Read : Combined product sold	Read a set of entries from combined product sold	X	

Master Data for Group Reporting - Read : Combined product sold	Read an entry by key from combined product sold	X	
Master Data for Group Reporting - Read : Combined product sold hierarch	Read associated entries of combined product sold hierarchy	X	
Master Data for Group Reporting - Read : Combined product sold hierarch	Read associated entries of combined product sold	X	
Master Data for Group Reporting - Read : Combined product sold hierarch	Read a set of entries from combined product sold hierarchy	X	
Master Data for Group Reporting - Read : Combined product sold hierarch	Read an entry by key from combined product sold hierarchy	X	
Master Data for Group Reporting - Read : Combined product sold text	Read associated entries of combined product sold text	X	
Master Data for Group Reporting - Read : Combined product sold text	Read associated entries of combined product sold	X	
Master Data for Group Reporting - Read : Combined product sold text	Read a set of entries from combined product sold text	X	
Master Data for Group Reporting - Read : Combined product sold text	Read an entry by key from combined product sold text	X	
Master Data for Group Reporting - Read : Combined product sold hier nod	Read associated entries of combined product sold hierarchy text	X	
Master Data for Group Reporting - Read : Combined product sold hier nod	Read a set of entries from combined product sold hierarchy text	X	
Master Data for Group Reporting - Read : Combined product sold hier nod	Read an entry by key from combined product sold hierarchy text	X	
Master Data for Group Reporting - Read : Combined product sold group	Read a set of entries from combined product sold group	X	
Master Data for Group Reporting - Read : Combined product sold group	Read an entry by key from combined product sold group	X	
Master Data for Group Reporting - Read : Combined product sold group te	Read associated entries of combined product sold group text	X	
Master Data for Group Reporting - Read : Combined product sold group te	Read associated entries of combined product sold group	X	
Master Data for Group Reporting - Read : Combined product sold group te	Read a set of entries from combined product sold group text	X	
Master Data for Group Reporting - Read : Combined product sold group te	Read an entry by key from combined product sold group text	X	
Master Data for Group Reporting - Read : Combined profit center	Read a set of entries from combined profit center	X	
Master Data for Group Reporting - Read : Combined profit center	Read an entry by key from combined profit center	X	
Master Data for Group Reporting - Read : Combined profit center hierarch	Read associated entries of combined profit center hierarchy	X	
Master Data for Group Reporting - Read : Combined profit center hierarch	Read associated entries of combined profit center	X	
Master Data for Group Reporting - Read : Combined profit center hierarch	Read a set of entries from combined profit center hierarchy	X	
Master Data for Group Reporting - Read : Combined profit center hierarch	Read an entry by key from combined profit center hierarchy	X	
Master Data for Group Reporting - Read : Combined profit center text	Read associated entries of combined profit center text	X	
Master Data for Group Reporting - Read : Combined profit center text	Read associated entries of combined profit center	X	
Master Data for Group Reporting - Read : Combined profit center text	Read a set of entries from combined profit center text	X	
Master Data for Group Reporting - Read : Combined profit center text	Read an entry by key from combined profit center text	X	
Master Data for Group Reporting - Read : Combined profit center hierarch	Read associated entries of combined profit center hierarchy text	X	
Master Data for Group Reporting - Read : Combined profit center hierarch	Read a set of entries from combined profit center hierarchy text	X	
Master Data for Group Reporting - Read : Combined profit center hierarch	Read an entry by key from combined profit center hierarchy text	X	
Master Data for Group Reporting - Read : Combined project	Read a set of entries from combined project	X	
Master Data for Group Reporting - Read : Combined project	Read an entry by key from combined project	X	
Master Data for Group Reporting - Read : Combined project hierarchy	Read associated entries of combined project hierarchy	X	
Master Data for Group Reporting - Read : Combined project hierarchy	Read associated entries of combined project	X	
Master Data for Group Reporting - Read : Combined project hierarchy	Read a set of entries from combined project hierarchy	X	
Master Data for Group Reporting - Read : Combined project hierarchy	Read an entry by key from combined project hierarchy	X	
Master Data for Group Reporting - Read : Combined project text	Read associated entries of combined project text	X	
Master Data for Group Reporting - Read : Combined project text	Read associated entries of combined project	X	
Master Data for Group Reporting - Read : Combined project text	Read a set of entries from combined project text	X	
Master Data for Group Reporting - Read : Combined project text	Read an entry by key from combined project text	X	
Master Data for Group Reporting - Read : Combined project hierarchy text	Read associated entries of combined project hierarchy text	X	
Master Data for Group Reporting - Read : Combined project hierarchy text	Read a set of entries from combined project hierarchy text	X	
Master Data for Group Reporting - Read : Combined project hierarchy text	Read an entry by key from combined project hierarchy text	X	
Master Data for Group Reporting - Read : Reporting item	Read a set of entries from reporting item	X	
Master Data for Group Reporting - Read : Reporting item	Read an entry by key from reporting item	X	
Master Data for Group Reporting - Read : Reporting item hierarchy	Read associated entries of reporting item hierarchy	X	
Master Data for Group Reporting - Read : Reporting item hierarchy	Read associated entries of reporting item	X	
Master Data for Group Reporting - Read : Reporting item hierarchy	Read a set of entries from reporting item hierarchy	X	
Master Data for Group Reporting - Read : Reporting item hierarchy	Read an entry by key from reporting item hierarchy	X	
Master Data for Group Reporting - Read : Reporting item text	Read associated entries of reporting item text	X	
Master Data for Group Reporting - Read : Reporting item text	Read associated entries of reporting item	X	
Master Data for Group Reporting - Read : Reporting item text	Read a set of entries from reporting item text	X	
Master Data for Group Reporting - Read : Reporting item text	Read an entry by key from reporting item text	X	
Master Data for Group Reporting - Read : Reporting item hierarchy node t	Read associated entries of reporting item hierarchy text	X	
Master Data for Group Reporting - Read : Reporting item hierarchy node t	Read associated entries of reporting item hierarchy	X	
Master Data for Group Reporting - Read : Reporting item hierarchy node t	Read a set of entries from reporting item hierarchy text	X	
Master Data for Group Reporting - Read : Reporting item hierarchy node t	Read an entry by key from reporting item hierarchy text	X	
Master Data for Group Reporting - Read : Combined sales district	Read a set of entries from combined sales district	X	
Master Data for Group Reporting - Read : Combined sales district	Read an entry by key from combined sales district	X	
Master Data for Group Reporting - Read : Combined sales district text	Read associated entries of combined sales district text	X	
Master Data for Group Reporting - Read : Combined sales district text	Read associated entries of combined sales district	X	
Master Data for Group Reporting - Read : Combined sales district text	Read a set of entries from combined sales district text	X	
Master Data for Group Reporting - Read : Combined sales district text	Read an entry by key from combined sales district text	X	
Master Data for Group Reporting - Read : Combined sales organization	Read a set of entries from combined sales organization	X	
Master Data for Group Reporting - Read : Combined sales organization	Read an entry by key from combined sales organization	X	
Master Data for Group Reporting - Read : Combined sales organization hi	Read associated entries of combined sales organization hierarchy	X	
Master Data for Group Reporting - Read : Combined sales organization hi	Read associated entries of combined sales organization	X	
Master Data for Group Reporting - Read : Combined sales organization hi	Read a set of entries from combined sales organization hierarchy	X	
Master Data for Group Reporting - Read : Combined sales organization hi	Read an entry by key from combined sales organization hierarchy	X	
Master Data for Group Reporting - Read : Combined sales organization te	Read associated entries of combined sales organization text	X	
Master Data for Group Reporting - Read : Combined sales organization te	Read associated entries of combined sales organization	X	
Master Data for Group Reporting - Read : Combined sales organization te	Read a set of entries from combined sales organization text	X	
Master Data for Group Reporting - Read : Combined sales organization te	Read an entry by key from combined sales organization text	X	
Master Data for Group Reporting - Read : Combined sales org hier node te	Read associated entries of combined sales organization hierarchy text	X	
Master Data for Group Reporting - Read : Combined sales org hier node te	Read a set of entries from combined sales organization hierarchy text	X	
Master Data for Group Reporting - Read : Combined sales org hier node te	Read an entry by key from combined sales organization hierarchy text	X	

Master Data for Group Reporting - Read : Combined segment	Read a set of entries from combined segment	X	
Master Data for Group Reporting - Read : Combined segment	Read an entry by key from combined segment	X	
Master Data for Group Reporting - Read : Combined segment hierarchy n	Read associated entries of combined segment hierarchy	X	
Master Data for Group Reporting - Read : Combined segment hierarchy n	Read associated entries of combined segment	X	
Master Data for Group Reporting - Read : Combined segment hierarchy n	Read a set of entries from combined segment hierarchy	X	
Master Data for Group Reporting - Read : Combined segment hierarchy n	Read an entry by key from combined segment hierarchy	X	
Master Data for Group Reporting - Read : Combined segment text	Read associated entries of combined segment text	X	
Master Data for Group Reporting - Read : Combined segment text	Read associated entries of combined segment	X	
Master Data for Group Reporting - Read : Combined segment text	Read a set of entries from combined segment text	X	
Master Data for Group Reporting - Read : Combined segment text	Read an entry by key from combined segment text	X	
Master Data for Group Reporting - Read : Combined segment hierarchy te	Read associated entries of combined segment hierarchy text	X	
Master Data for Group Reporting - Read : Combined segment hierarchy te	Read a set of entries from combined segment hierarchy text	X	
Master Data for Group Reporting - Read : Combined segment hierarchy te	Read an entry by key from combined segment hierarchy text	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read a set of entries from combined segment for elimination	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read an entry by key from combined segment for elimination	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read associated entries of combined segment for elimination text	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read associated entries of combined segment for elimination	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read a set of entries from combined segment for elimination text	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read an entry by key from combined segment for elimination text	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read associated entries of combined segment for elimination hierarchy	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read associated entries of combined segment for elimination	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read a set of entries from combined segment for elimination hierarchy	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read an entry by key from combined segment for elimination hierarchy	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read associated entries of combined segment for elimination hierarchy text	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read a set of entries from combined segment for elimination hierarchy text	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read an entry by key from combined segment for elimination hierarchy text	X	
Master Data for Group Reporting - Read : Combined ship to party	Read a set of entries from combined ship to party	X	
Master Data for Group Reporting - Read : Combined ship to party	Read an entry by key from combined ship to party	X	
Master Data for Group Reporting - Read : Combined ship to party text	Read associated entries of combined ship to party text	X	
Master Data for Group Reporting - Read : Combined ship to party text	Read associated entries of combined ship to party	X	
Master Data for Group Reporting - Read : Combined ship to party text	Read a set of entries from combined ship to party text	X	
Master Data for Group Reporting - Read : Combined ship to party text	Read an entry by key from combined ship to party text	X	
Master Data for Group Reporting - Read : Subassignment	Read a set of entries from sub assignment	X	
Master Data for Group Reporting - Read : Subassignment	Read an entry by key from sub assignment	X	
Master Data for Group Reporting - Read : Subassignment text	Read associated entries of sub assignment text	X	
Master Data for Group Reporting - Read : Subassignment text	Read associated entries of sub assignment	X	
Master Data for Group Reporting - Read : Subassignment text	Read a set of entries from sub assignment text	X	
Master Data for Group Reporting - Read : Subassignment text	Read an entry by key from sub assignment text	X	
Master Data for Group Reporting - Read : Subitem	Read a set of entries from subitem	X	
Master Data for Group Reporting - Read : Subitem	Read an entry by key from subitem	X	
Master Data for Group Reporting - Read : Subitem hierarchy	Read associated entries of subitem hierarchy	X	
Master Data for Group Reporting - Read : Subitem hierarchy	Read associated entries of subitem	X	
Master Data for Group Reporting - Read : Subitem hierarchy	Read a set of entries from subitem hierarchy	X	
Master Data for Group Reporting - Read : Subitem hierarchy	Read an entry by key from subitem hierarchy	X	
Master Data for Group Reporting - Read : Subitem text	Read associated entries of subitem text	X	
Master Data for Group Reporting - Read : Subitem text	Read associated entries of subitem	X	
Master Data for Group Reporting - Read : Subitem text	Read a set of entries from subitem text	X	
Master Data for Group Reporting - Read : Subitem text	Read an entry by key from subitem text	X	
Master Data for Group Reporting - Read : Subitem hierarchy text	Read associated entries of subitem hierarchy text	X	
Master Data for Group Reporting - Read : Subitem hierarchy text	Read associated entries of subitem hierarchy	X	
Master Data for Group Reporting - Read : Subitem hierarchy text	Read a set of entries from subitem hierarchy text	X	
Master Data for Group Reporting - Read : Subitem hierarchy text	Read an entry by key from subitem hierarchy text	X	
Master Data for Group Reporting - Read : Subitem category	Read a set of entries from subitem category	X	
Master Data for Group Reporting - Read : Subitem category	Read an entry by key from subitem category	X	
Master Data for Group Reporting - Read : Subitem category text	Read associated entries of subitem category text	X	
Master Data for Group Reporting - Read : Subitem category text	Read associated entries of subitem category	X	
Master Data for Group Reporting - Read : Subitem category text	Read a set of entries from subitem category text	X	
Master Data for Group Reporting - Read : Subitem category text	Read an entry by key from subitem category text	X	
Master Data for Group Reporting - Read : Combined supplier	Read a set of entries from combined supplier	X	
Master Data for Group Reporting - Read : Combined supplier	Read an entry by key from combined supplier	X	
Master Data for Group Reporting - Read : Combined supplier hierarchy	Read associated entries of combined supplier hierarchy	X	
Master Data for Group Reporting - Read : Combined supplier hierarchy	Read associated entries of combined supplier	X	
Master Data for Group Reporting - Read : Combined supplier hierarchy	Read a set of entries from combined supplier hierarchy	X	
Master Data for Group Reporting - Read : Combined supplier hierarchy	Read an entry by key from combined supplier hierarchy	X	
Master Data for Group Reporting - Read : Combined supplier text	Read associated entries of combined supplier text	X	
Master Data for Group Reporting - Read : Combined supplier text	Read associated entries of combined supplier	X	
Master Data for Group Reporting - Read : Combined supplier text	Read a set of entries from combined supplier text	X	
Master Data for Group Reporting - Read : Combined supplier text	Read an entry by key from combined supplier text	X	
Master Data for Group Reporting - Read : Combined supplier hierarchy te	Read associated entries of combined supplier hierarchy text	X	
Master Data for Group Reporting - Read : Combined supplier hierarchy te	Read a set of entries from combined supplier hierarchy text	X	
Master Data for Group Reporting - Read : Combined supplier hierarchy te	Read an entry by key from combined supplier hierarchy text	X	
Master Data for Group Reporting - Read : Cnsldtn sustainability mode of tr	Read a set of entries from sustainability mode of transport	X	
Master Data for Group Reporting - Read : Cnsldtn sustainability mode of tr	Read an entry by key from sustainability mode of transport	X	
Master Data for Group Reporting - Read : Cnsldtn sust mode of transport t	Read associated entries of sustainability mode of transport text	X	
Master Data for Group Reporting - Read : Cnsldtn sust mode of transport t	Read associated entries of sustainability mode of transport	X	
Master Data for Group Reporting - Read : Cnsldtn sust mode of transport t	Read a set of entries from sustainability mode of transport text	X	
Master Data for Group Reporting - Read : Cnsldtn sust mode of transport t	Read an entry by key from sustainability mode of transport text	X	

Master Data for Group Reporting - Read : Transaction currency	Read a set of entries from transaction currency	X	
Master Data for Group Reporting - Read : Transaction currency	Read an entry by key from transaction currency	X	
Master Data for Group Reporting - Read : Transaction currency text	Read associated entries of transaction currency text	X	
Master Data for Group Reporting - Read : Transaction currency text	Read associated entries of transaction currency	X	
Master Data for Group Reporting - Read : Transaction currency text	Read a set of entries from transaction currency text	X	
Master Data for Group Reporting - Read : Transaction currency text	Read an entry by key from transaction currency text	X	
Master Data for Group Reporting - Read : Consolidation unit	Read a set of entries from consolidation unit	X	
Master Data for Group Reporting - Read : Consolidation unit	Read an entry by key from consolidation unit	X	
Master Data for Group Reporting - Read : Consolidation unit hierarchy	Read associated entries of consolidation unit hierarchy	X	
Master Data for Group Reporting - Read : Consolidation unit hierarchy	Read associated entries of consolidation unit	X	
Master Data for Group Reporting - Read : Consolidation unit hierarchy	Read a set of entries from consolidation unit hierarchy	X	
Master Data for Group Reporting - Read : Consolidation unit hierarchy	Read an entry by key from consolidation unit hierarchy	X	
Master Data for Group Reporting - Read : Consolidation unit text	Read associated entries of consolidation unit text	X	
Master Data for Group Reporting - Read : Consolidation unit text	Read associated entries of consolidation unit	X	
Master Data for Group Reporting - Read : Consolidation unit text	Read a set of entries from consolidation unit text	X	
Master Data for Group Reporting - Read : Consolidation unit text	Read an entry by key from consolidation unit text	X	
Master Data for Group Reporting - Read : Consolidation unit hierarchy text	Read associated entries of consolidation unit hierarchy text	X	
Master Data for Group Reporting - Read : Consolidation unit hierarchy text	Read a set of entries from consolidation unit hierarchy text	X	
Master Data for Group Reporting - Read : Consolidation unit hierarchy text	Read an entry by key from consolidation unit hierarchy text	X	
Master Data for Group Reporting - Read : Consolidation unit for eliminatio	Read a set of entries from consolidation unit for elimination	X	
Master Data for Group Reporting - Read : Consolidation unit for eliminatio	Read an entry by key from consolidation unit for elimination	X	
Master Data for Group Reporting - Read : Consolidation unit for eliminatio	Read associated entries of consolidation unit text for elimination	X	
Master Data for Group Reporting - Read : Consolidation unit for eliminatio	Read associated entries of consolidation unit for elimination	X	
Master Data for Group Reporting - Read : Consolidation unit for eliminatio	Read a set of entries from consolidation unit text for elimination	X	
Master Data for Group Reporting - Read : Consolidation unit for eliminatio	Read an entry by key from consolidation unit text for elimination	X	
Master Data for Group Reporting - Read : Consolidation unit for eliminatio	Read associated entries of consolidation unit for elimination hierarchy	X	
Master Data for Group Reporting - Read : Consolidation unit for eliminatio	Read associated entries of consolidation unit for elimination	X	
Master Data for Group Reporting - Read : Consolidation unit for eliminatio	Read a set of entries from consolidation unit for elimination hierarchy	X	
Master Data for Group Reporting - Read : Consolidation unit for eliminatio	Read an entry by key from consolidation unit for elimination hierarchy	X	
Master Data for Group Reporting - Read : Consolidation unit for eliminatio	Read associated entries of consolidation unit for elimination hierarchy text	X	
Master Data for Group Reporting - Read : Consolidation unit for eliminatio	Read a set of entries from consolidation unit for elimination hierarchy text	X	
Master Data for Group Reporting - Read : Consolidation unit for eliminatio	Read an entry by key from consolidation unit for elimination hierarchy text	X	
Master Data for Group Reporting - Read : Consolidation version	Read a set of entries from consolidation version	X	
Master Data for Group Reporting - Read : Consolidation version	Read an entry by key from consolidation version	X	
Master Data for Group Reporting - Read : Consolidation version text	Read associated entries of consolidation version text	X	
Master Data for Group Reporting - Read : Consolidation version text	Read associated entries of consolidation version	X	
Master Data for Group Reporting - Read : Consolidation version text	Read a set of entries from consolidation version text	X	
Master Data for Group Reporting - Read : Consolidation version text	Read an entry by key from consolidation version text	X	
Master Data for Group Reporting - Read : Combined WBS element	Read a set of entries from combined WBS element	X	
Master Data for Group Reporting - Read : Combined WBS element	Read an entry by key from combined WBS element	X	
Master Data for Group Reporting - Read : Combined WBS element text	Read associated entries of combined WBS element text	X	
Master Data for Group Reporting - Read : Combined WBS element text	Read associated entries of combined WBS element	X	
Master Data for Group Reporting - Read : Combined WBS element text	Read a set of entries from combined WBS element text	X	
Master Data for Group Reporting - Read : Combined WBS element text	Read an entry by key from combined WBS element text	X	
Master Data for Group Reporting - Read : WBS element internal ID	Read internal IDs the entity set is deprecated use entity set combined WBS	X	
Master Data for Group Reporting - Read : WBS element internal ID	Read an entry by key from WBS element internal ID - deprecated	X	
Master Data for Group Reporting - Read : Batch requests	Send a group of requests		X
Budget Period Hierarchy (A2X) : Budget period hierarchy	Get entities from budget period hierarchy	X	
Budget Period Hierarchy (A2X) : Budget period hierarchy	Get entity from budget period hierarchy by key	X	
Budget Period Hierarchy (A2X) : Budget period hierarchy node	Get entities from related to budgetperiodcorehiernode	X	
Budget Period Hierarchy (A2X) : Budget period hierarchy node	Get related to budgetperiodcorehierarchy	X	
Budget Period Hierarchy (A2X) : Budget period hierarchy node	Get entities from budget period hierarchy node	X	
Budget Period Hierarchy (A2X) : Budget period hierarchy node	Get entity from budget period hierarchy node by key	X	
Budget Period Hierarchy (A2X) : Budget period hierarchy text	Get entities from related to text	X	
Budget Period Hierarchy (A2X) : Budget period hierarchy text	Get entities from budget period hierarchy text	X	
Budget Period Hierarchy (A2X) : Budget period hierarchy text	Get entity from budget period hierarchy text by key	X	
Budget Period Hierarchy (A2X) : Budget period hierarchy node text	Get entities from related to text	X	
Budget Period Hierarchy (A2X) : Budget period hierarchy node text	Get entities from budget period hierarchy node text	X	
Budget Period Hierarchy (A2X) : Budget period hierarchy node text	Get entity from budget period hierarchy node text by key	X	
Budget Period Hierarchy (A2X) : Batch requests	Send a group of requests		X
Condition Record for Pricing in Purchasing : Condition supplements	Read all condition supplements in the system	X	
Condition Record for Pricing in Purchasing : Condition supplements	Create one or more condition supplements		X
Condition Record for Pricing in Purchasing : Condition supplements	Read a specific condition supplement	X	
Condition Record for Pricing in Purchasing : Condition supplements	Update a specific condition supplement		X
Condition Record for Pricing in Purchasing : Condition supplements	Delete a specific condition supplement		X
Condition Record for Pricing in Purchasing : Condition record validity	Read validity of the condition record for a specific condition supplement	X	
Condition Record for Pricing in Purchasing : Condition record validity	Read the condition supplements for a specific condition record validity perio	X	
Condition Record for Pricing in Purchasing : Condition record validity	Create one or more condition supplements for a specific condition record validity period		X
Condition Record for Pricing in Purchasing : Condition record validity	Read validity of all condition records in the system	X	
Condition Record for Pricing in Purchasing : Condition record validity	Read the validity of a specific condition record	X	
Condition Record for Pricing in Purchasing : Condition record validity	Update the validity period of a specific condition record		X
Condition Record for Pricing in Purchasing : Condition records	Read the condition record for a specific condition supplement	X	
Condition Record for Pricing in Purchasing : Condition records	Read the condition supplements of a specific condition record	X	
Condition Record for Pricing in Purchasing : Condition records	Create one or more condition supplements for a specific condition record		X
Condition Record for Pricing in Purchasing : Condition records	Read the condition record for a specific condition record validity period	X	
Condition Record for Pricing in Purchasing : Condition records	Read the validity of a specific condition record	X	
Condition Record for Pricing in Purchasing : Condition records	Read all condition records in the system	X	

Condition Record for Pricing in Purchasing : Condition records	Create one or more condition records		X
Condition Record for Pricing in Purchasing : Condition records	Read a specific condition record	X	
Condition Record for Pricing in Purchasing : Condition records	Update a specific condition record		X
Condition Record for Pricing in Purchasing : Condition records	Delete a specific condition record		X
Condition Record for Pricing in Purchasing : Pricing scales	Read the pricing scales of a specific condition supplement	X	
Condition Record for Pricing in Purchasing : Pricing scales	Create one or more pricing scales for a specific condition supplement		X
Condition Record for Pricing in Purchasing : Pricing scales	Read the condition supplement for a specific condition supplement pricing s	X	
Condition Record for Pricing in Purchasing : Pricing scales	Read the condition record for a specific pricing scale	X	
Condition Record for Pricing in Purchasing : Pricing scales	Read the pricing scales of a specific condition record	X	
Condition Record for Pricing in Purchasing : Pricing scales	Create one or more pricing scales for a specific condition record		X
Condition Record for Pricing in Purchasing : Pricing scales	Read all pricing scales in the system	X	
Condition Record for Pricing in Purchasing : Pricing scales	Create one or more pricing scales		X
Condition Record for Pricing in Purchasing : Pricing scales	Read a specific pricing scale	X	
Condition Record for Pricing in Purchasing : Pricing scales	Update a specific pricing scale		X
Condition Record for Pricing in Purchasing : Pricing scales	Delete a specific pricing scale		X
Condition Record for Pricing in Purchasing : Batch requests	Send a group of requests		X
Customer Material (A2X) : Customer materials	Read all customer materials	X	
Customer Material (A2X) : Customer materials	Create a customer material		X
Customer Material (A2X) : Customer materials	Read a customer material under a distribution chain	X	
Customer Material (A2X) : Customer materials	Update a customer material under a distribution chain		X
Customer Material (A2X) : Customer materials	Delete a customer material under a distribution chain		X
Customer Material (A2X) : Batch requests	Send a group of requests		X
Budget Period (A2X) : Budget period	Get entities from budget period	X	
Budget Period (A2X) : Budget period	Add new entity to budget period		X
Budget Period (A2X) : Budget period	Get entity from budget period by key	X	
Budget Period (A2X) : Budget period	Update entity in budget period		X
Budget Period (A2X) : Budget period	Delete entity from budget period		X
Budget Period (A2X) : Budget period text	Get entities from related to text	X	
Budget Period (A2X) : Budget period text	Get related to budget period	X	
Budget Period (A2X) : Budget period text	Get entities from budget period text	X	
Budget Period (A2X) : Budget period text	Get entity from budget period text by key	X	
Budget Period (A2X) : Budget period text	Update entity in budget period text		X
Budget Period (A2X) : Batch requests	Send a group of requests		X
Bank - Read : Bank details	Read bank details	X	
Bank - Read : Bank details	Read bank details by key	X	
Bank - Read : Batch requests	Send a group of requests		X
Material Planning Data - Read : Material coverages	Read information on material coverages	X	
Material Planning Data - Read : Material coverages	Read information on a specific coverage situation	X	
Material Planning Data - Read : Supply and demand	Read information on the supply and demand for an mrp material	X	
Material Planning Data - Read : Master data	Read master data for mrp materials	X	
Material Planning Data - Read : Master data	Read master data for a specific mrp material	X	
Material Planning Data - Read : Batch requests	Send a group of requests		X
Activity Type - Read (A2X) : Activity type	Read all available cost center activity types	X	
Activity Type - Read (A2X) : Activity type	Read a specific cost center activity type	X	
Activity Type - Read (A2X) : Activity type text	Read all language-dependent fields for a specific cost center activity type	X	
Activity Type - Read (A2X) : Activity type text	Read cost center activity type header fields for a specific language	X	
Activity Type - Read (A2X) : Activity type text	Read all language-dependent fields for all cost center activity types	X	
Activity Type - Read (A2X) : Activity type text	Read language-dependent fields of a cost center activity type in a specific la	X	
Activity Type - Read (A2X) : Batch requests	Send a group of requests		X
Distribution Channel - Read : Distribution channel	Get entities from a distribution channel	X	
Distribution Channel - Read : Distribution channel	Get entity from a distribution channel by key	X	
Distribution Channel - Read : Distribution channel text	Get entities from related to text	X	
Distribution Channel - Read : Distribution channel text	Get related to distribution channel	X	
Distribution Channel - Read : Distribution channel text	Get entities from a distribution channel text	X	
Distribution Channel - Read : Distribution channel text	Get entity from a distribution channel text by key	X	
Responsibility Management Teams : Team member functions	Read the member function details of a team	X	
Responsibility Management Teams : Team member functions	Create the member function of a team		X
Responsibility Management Teams : Team member functions	Delete the member function of a team		X
Responsibility Management Teams : Team member functions	Invoke action unassign team member function		X
Responsibility Management Teams : Team hierarchy nodes	Read the hierarchy details of a team	X	
Responsibility Management Teams : Team hierarchy nodes	Invoke action addubnode		X
Responsibility Management Teams : Team hierarchy nodes	Invoke action deleteubnode		X
Responsibility Management Teams : Team hierarchy nodes	Invoke function get sub nodes	X	
Responsibility Management Teams : Team hierarchy nodes	Invoke function getpotentialsubnodesforassign	X	
Responsibility Management Teams : Team headers	Read the header details of a team	X	
Responsibility Management Teams : Team headers	Create header details of a team		X
Responsibility Management Teams : Team headers	Update header details of a team		X
Responsibility Management Teams : Team headers	Delete header details of a team		X
Responsibility Management Teams : Team headers	Invoke action preponeteamheaderstartdate		X
Responsibility Management Teams : Team owners	Read the owner details of a team	X	
Responsibility Management Teams : Team owners	Create the owner of a team		X
Responsibility Management Teams : Team owners	Delete the owner of a team		X
Responsibility Management Teams : Team owners	Invoke action unassign team owner		X
Responsibility Management Teams : Team members	Read the member details of a team	X	
Responsibility Management Teams : Team members	Create the member of a team		X
Responsibility Management Teams : Team members	Invoke action delete team member and functions		X
Responsibility Management Teams : Team members	Invoke action updateteammemberassignmentstartdate		X

Responsibility Management Teams : Team attributes	Read the attribute of a team	X	
Responsibility Management Teams : Team attributes	Create the attribute of a team		X
Responsibility Management Teams : Team attributes	Delete the attribute of a team		X
Responsibility Management Teams : Batch requests	Send a group of requests		X
Change Record : Change record header data	Read change record data	X	
Change Record : Change record header data	Create a change record		X
Change Record : Change record header data	Read data of a specific a change record	X	
Change Record : Change record header data	Update header attributes of a change record		X
Change Record : Func loc task list assign to chg recd	Read the functional location task list assigned to a change record	X	
Change Record : Func loc task list assign to chg recd	Assign a functional location task list to a change record		X
Change Record : Func loc task list assign to chg recd	Read all change record - functional location task list assignments in the syst	X	
Change Record : Func loc task list assign to chg recd	Assign a functional location task list to a change record		X
Change Record : Func loc task list assign to chg recd	Read a specific change record - functional location task list assignment	X	
Change Record : Func loc task list assign to chg recd	Update a functional location task list to a change record		X
Change Record : Func loc task list assign to chg recd	Remove a functional location task list from a change record		X
Change Record : Change record life cycle status	Get related to change record life cycle status	X	
Change Record : Change record life cycle status	Read all change record - lifecycle status with its lifecycle status text in the sy	X	
Change Record : Change record life cycle status	Read a specific change record - change record attribute or field	X	
Change Record : Characteristic assignments to change records	Read the characteristic assigned to a change record	X	
Change Record : Characteristic assignments to change records	Assign a characteristic to a change record		X
Change Record : Characteristic assignments to change records	Read all change record - characteristic assignments in the system	X	
Change Record : Characteristic assignments to change records	Assign a characteristic to a change record		X
Change Record : Characteristic assignments to change records	Read a specific change record - characteristic assignment	X	
Change Record : Characteristic assignments to change records	Update a characteristic to a change record		X
Change Record : Characteristic assignments to change records	Remove a characteristic from a change record		X
Change Record : Class assignments to change records	Read the class assigned to a change record	X	
Change Record : Class assignments to change records	Assign a class to a change record		X
Change Record : Class assignments to change records	Read all change record - class assignments in the system	X	
Change Record : Class assignments to change records	Assign a class to a change record		X
Change Record : Class assignments to change records	Read a specific change record - class assignment	X	
Change Record : Class assignments to change records	Update a class to a change record		X
Change Record : Class assignments to change records	Remove a class from a change record		X
Change Record : Equip task list assign to change records	Read the equipment task list assigned to a change record	X	
Change Record : Equip task list assign to change records	Assign an equipment task list to a change record		X
Change Record : Equip task list assign to change records	Read all change record - equipment task list assignments in the system	X	
Change Record : Equip task list assign to change records	Assign an equipment task list to a change record		X
Change Record : Equip task list assign to change records	Read a specific change record - equipment task list assignment	X	
Change Record : Equip task list assign to change records	Update an equipment task list to a change record		X
Change Record : Equip task list assign to change records	Remove an equipment task list from a change record		X
Change Record : Master recipe assignments to change records	Read the master recipes assigned to a change record	X	
Change Record : Master recipe assignments to change records	Assign a master recipe to a change record		X
Change Record : Master recipe assignments to change records	Read all change record - master recipe assignments in the system	X	
Change Record : Master recipe assignments to change records	Assign a master recipe to a change record		X
Change Record : Master recipe assignments to change records	Read a specific change record - master recipe assignment	X	
Change Record : Master recipe assignments to change records	Update a master recipe assignment to a change record		X
Change Record : Master recipe assignments to change records	Remove a master recipe assignment from a change record		X
Change Record : Production routing assignments to change records	Read the production routing assigned to a change record	X	
Change Record : Production routing assignments to change records	Assign a production routing to a change record		X
Change Record : Production routing assignments to change records	Read all change record - production routing assignments in the system	X	
Change Record : Production routing assignments to change records	Assign a production routing assignments to a change record		X
Change Record : Production routing assignments to change records	Read a specific change record - production routing assignment	X	
Change Record : Production routing assignments to change records	Update a production routing assignments to a change record		X
Change Record : Production routing assignments to change records	Remove a production routing assignments from a change record		X
Change Record : Standard BOM assignment to change record	Read the standard BOM assigned to a change record	X	
Change Record : Standard BOM assignment to change record	Assign a standard BOM to a change record		X
Change Record : Standard BOM assignment to change record	Read all change record - standard BOM assignments in the system	X	
Change Record : Standard BOM assignment to change record	Assign a standard BOM to a change record		X
Change Record : Standard BOM assignment to change record	Read a specific change record - standard BOM assignment	X	
Change Record : Standard BOM assignment to change record	Update a standard BOM to a change record		X
Change Record : Standard BOM assignment to change record	Remove a standard BOM from a change record		X
Change Record : Variant BOM assig to chg records	Read the variant BOM assigned to a change record	X	
Change Record : Variant BOM assig to chg records	Assign a variant BOM to a change record		X
Change Record : Variant BOM assig to chg records	Read all change record - variant BOM assignments in the system	X	
Change Record : Variant BOM assig to chg records	Assign a variant BOM to a change record		X
Change Record : Variant BOM assig to chg records	Read a specific change record - variant BOM assignment	X	
Change Record : Variant BOM assig to chg records	Update a variant BOM to a change record		X
Change Record : Variant BOM assig to chg records	Remove a variant BOM from a change record		X
Change Record : Change record user status	Get related to change record user status	X	
Change Record : Change record user status	Read all change record - user status with its user status text in the system	X	
Change Record : Change record user status	Read a specific change record - change record attribute or field	X	
Change Record : Change record epd collaboration	Read the collaboration assigned to a change record	X	
Change Record : Change record epd collaboration	Assign a collaboration to a change record		X
Change Record : Change record epd collaboration	Read all change record - collaboration assignments in the system	X	
Change Record : Change record epd collaboration	Assign a collaboration to a change record		X
Change Record : Change record epd collaboration	Read a specific change record - collaboration assignment	X	
Change Record : Change record epd collaboration	Remove a collaboration from a change record		X
Change Record : Equipment BOM assign to chg records	Read the euipment BOM assigned to a change record	X	

Change Record : Equipment BOM assign to chg records	Assign an euipment BOM to a change record		X
Change Record : Equipment BOM assign to chg records	Read all change record - euipment BOM assignments in the system	X	
Change Record : Equipment BOM assign to chg records	Assign an euipment BOM to a change record		X
Change Record : Equipment BOM assign to chg records	Read a specific change record - euipment BOM assignment	X	
Change Record : Equipment BOM assign to chg records	Update an euipment BOM to a change record		X
Change Record : Equipment BOM assign to chg records	Remove an euipment BOM from a change record		X
Change Record : Functional loc BOM assign to chg records	Read the functional location BOM assigned to a change record	X	
Change Record : Functional loc BOM assign to chg records	Assign functional location BOM to a change record		X
Change Record : Functional loc BOM assign to chg records	Read all change record - functional location BOM assignments in the system	X	
Change Record : Functional loc BOM assign to chg records	Assign a functional location BOM to a change record		X
Change Record : Functional loc BOM assign to chg records	Read a specific change record - functional location BOM assignment	X	
Change Record : Functional loc BOM assign to chg records	Update a functional location BOM to a change record		X
Change Record : Functional loc BOM assign to chg records	Remove a functional location BOM from a change record		X
Change Record : Change record ref engineering bom	Read the engineering BOM assigned to a change record	X	
Change Record : Change record ref engineering bom	Assign an engineering BOM to a change record		X
Change Record : Change record ref engineering bom	Read all change record - engineering BOM assignments in the system	X	
Change Record : Change record ref engineering bom	Assign an engineering BOM to a change record		X
Change Record : Change record ref engineering bom	Read a specific change record - engineering BOM assignment	X	
Change Record : Change record ref engineering bom	Update an engineering BOM to a change record		X
Change Record : Change record ref engineering bom	Remove an engineering BOM from a change record		X
Change Record : Maint tsk lst assign to change records	Read the maintenance task list assigned to a change record	X	
Change Record : Maint tsk lst assign to change records	Assign a maintenance task list to a change record		X
Change Record : Maint tsk lst assign to change records	Read all change record - maintenance task list assignments in the system	X	
Change Record : Maint tsk lst assign to change records	Assign a maintenance task list to a change record		X
Change Record : Maint tsk lst assign to change records	Read a specific change record - maintenance task list assignment	X	
Change Record : Maint tsk lst assign to change records	Update a maintenance task list to a change record		X
Change Record : Maint tsk lst assign to change records	Remove a maintenance task list from a change record		X
Change Record : Change record ref manufacturing bom	Read the manufacturing BOM assigned to a change record	X	
Change Record : Change record ref manufacturing bom	Assign a manufacturing BOM to a change record		X
Change Record : Change record ref manufacturing bom	Read all change record - manufacturing BOM assignments in the system	X	
Change Record : Change record ref manufacturing bom	Assign a manufacturing BOM to a change record		X
Change Record : Change record ref manufacturing bom	Read a specific change record - manufacturing BOM assignment	X	
Change Record : Change record ref manufacturing bom	Update a manufacturing BOM to a change record		X
Change Record : Change record ref manufacturing bom	Remove a manufacturing BOM from a change record		X
Change Record : Bom item assignments to change records	Read the BOM items assigned to a change record	X	
Change Record : Bom item assignments to change records	Assign a BOM item to a change record		X
Change Record : Bom item assignments to change records	Read all change record - BOM item assignments	X	
Change Record : Bom item assignments to change records	Assign a BOM item to a change record		X
Change Record : Bom item assignments to change records	Read a specific change record - BOM item assignment	X	
Change Record : Bom item assignments to change records	Update a BOM item assignment to a change record		X
Change Record : Bom item assignments to change records	Remove a BOM item assignment from a change record		X
Change Record : Bom assignments to change records	Read the bills of material assigned to a change record	X	
Change Record : Bom assignments to change records	Assign a bill of material to a change record		X
Change Record : Bom assignments to change records	Read all change record - bill of material assignments	X	
Change Record : Bom assignments to change records	Assign a bill of material to a change record		X
Change Record : Bom assignments to change records	Read a specific change record - bill of material assignment	X	
Change Record : Bom assignments to change records	Update a bill of material assignment to a change record		X
Change Record : Bom assignments to change records	Remove a bill of material assignment from a change record		X
Change Record : Document assignments to change records	Read the document info records assigned to a change record	X	
Change Record : Document assignments to change records	Assign a document info record to a change record		X
Change Record : Document assignments to change records	Read all change record - document info record assignments	X	
Change Record : Document assignments to change records	Assign a document info record to a change record		X
Change Record : Document assignments to change records	Read a specific change record - document info record assignment	X	
Change Record : Document assignments to change records	Update a document info record assignment to a change record		X
Change Record : Document assignments to change records	Remove a document info record assignment from a change record		X
Change Record : Material assignments to change records	Read the materials assigned to a change record	X	
Change Record : Material assignments to change records	Assign a material to a change record		X
Change Record : Material assignments to change records	Read all change record - material assignments	X	
Change Record : Material assignments to change records	Assign a material to a change record		X
Change Record : Material assignments to change records	Read a specific change record - material assignment	X	
Change Record : Material assignments to change records	Update a document info record assignment to a change record		X
Change Record : Material assignments to change records	Remove a material assignment from a change record		X
Change Record : Change record life cycle status text	Get related to change recd life cycle status text	X	
Change Record : Change record life cycle status text	Read all change record - lifecycle status with its lifecycle status text in the sy	X	
Change Record : Change record life cycle status text	Read a specific change record - change record attribute or field	X	
Change Record : Change record user status text	Get entities from related to text	X	
Change Record : Change record user status text	Read all change record - user status with its user status text in the system	X	
Change Record : Change record user status text	Read a specific change record - change record attribute or field	X	
Change Record : Batch requests	Send a group of requests		X
G/L Account Line Items - Read (A2X) : API g/l account line item	Get entities from gl account line item	X	
G/L Account Line Items - Read (A2X) : API g/l account line item	Get entity from gl account line item by key	X	
G/L Account Line Items - Read (A2X) : Batch requests	Send a group of requests		X
Order Bills of Material : Item category	Get entities from a BOM item category	X	
Order Bills of Material : Item category	Get entity from a BOM item category by key	X	
Order Bills of Material : Item category description	Get related to BOM item category text	X	
Order Bills of Material : Item category description	Get entities from a BOM item category text	X	
Order Bills of Material : Item category description	Get entity from a BOM item category text by key	X	

Order Bills of Material : Item	Get related to BOM item category	X	
Order Bills of Material : Item	Get entities from sales order BOM item	X	
Order Bills of Material : Item	Add new entity to sales order BOM item		X
Order Bills of Material : Item	Get entity from sales order BOM item by key	X	
Order Bills of Material : Item	Update entity in sales order BOM item		X
Order Bills of Material : Item	Delete entity from sales order BOM item		X
Order Bills of Material : Item	Invoke action delete BOM item with change number		X
Order Bills of Material : Bill of material	Get related to billofmaterial	X	
Order Bills of Material : Bill of material	Get entities from related to billofmaterialitem	X	
Order Bills of Material : Bill of material	Add new entity to related to billofmaterialitem		X
Order Bills of Material : Bill of material	Get entities from sales order bom	X	
Order Bills of Material : Bill of material	Add new entity to sales order bom		X
Order Bills of Material : Bill of material	Get entity from sales order BOM by key	X	
Order Bills of Material : Bill of material	Update entity in sales order bom		X
Order Bills of Material : Bill of material	Delete entity from sales order bom		X
Order Bills of Material : Bill of material	Invoke action deletebomhdrwithchangenumber		X
Order Bills of Material : Batch requests	Send a group of requests		X
Intelligent Product Proposal - Read : Product proposal for sales order item	Read product and quantity proposals for sales order items	X	
Intelligent Product Proposal - Read : Product proposal for sales order item	Read product and quantity proposals for sales order items	X	
Intelligent Product Proposal - Read : Batch requests	Send a group of requests		X
Purchasing Source List : Purchasing source type	Read the purchasing source list information	X	
Purchasing Source List : Purchasing source type	Create a purchasing source list		X
Purchasing Source List : Purchasing source type	Read the purchasing source list information	X	
Purchasing Source List : Purchasing source type	Update the purchasing source list		X
Purchasing Source List : Purchasing source type	Delete the purchasing source list		X
Attachments : Harmonized document management	Return a URL and token to upload an attachment to a given SAP object type or SAP object n		X
Attachments : Harmonized document management	Return a URL and token to download an attachment from a given SAP objec	X	
Attachments : Harmonized document management	Delete an attachment for a given SAP object type or SAP object node type		X
Attachments : Harmonized document management	Create an object link between an attachment and business object		X
Attachments : Harmonized document management for line items	Return a URL and token that are used to upload an attachment to a given SAP object node ty		X
Attachments : Harmonized document management for line items	Return a URL and a token that are used to download an attachment from a g	X	
Attachments : Harmonized document management for line items	Delete an attachment for a given SAP object node type		X
Attachments : Harmonized document management for line items	Create an object link between an attachment and line item of a business object		X
Attachments : Document management	Get entities from attachment content set	X	
Attachments : Document management	uploads an attachment to a business object.		X
Attachments : Document management	This operation is not supported	X	
Attachments : Document management	Delete the attachment associated with the business object		X
Attachments : Document management	Get media resource from attachment content set by key	X	
Attachments : Document management	Retrieve the metadata of the attachments associated with the business obje	X	
Attachments : Document management	Renames an attachment that has been uploaded to a business object		X
Attachments : Document management	Link attachments already stored in the content repository with a business object		X
Attachments : Document management	Uploads a URL as an attachment for a business object		X
Attachments : Document management	Invoke function authorizationcheck	X	
Attachments : Attachments for document info record	Read the attachments associated with a document info record	X	
Attachments : Attachments for document info record	Create an attachment for a document info record		X
Attachments : Attachments for document info record	Read the document info records	X	
Attachments : Attachments for document info record	Retrieve the details of a document info record	X	
Attachments : Service operations	Retrieve the number of attachments for a business object instance key	X	
Attachments : Service operations	Assign documents to business objects		X
Attachments : Harmonized document types	Read the list of document types for a given SAP object type or SAP object n	X	
Attachments : Batch requests	Send a group of requests		X
SD Document Order Reason - Read (A2X) : Description of retro billing usa	Read the descriptions of all retro-billing usage indicators	X	
SD Document Order Reason - Read (A2X) : Description of retro billing usa	Read the description of a specific retro-billing usage indicator in a specific la	X	
SD Document Order Reason - Read (A2X) : Order reason ID and self billir	Read the description of the retro-billing usage indicator for a specific order re	X	
SD Document Order Reason - Read (A2X) : Order reason ID and self billir	Read all value combinations of the order reason ID, retro-billing usage indica	X	
SD Document Order Reason - Read (A2X) : Order reason ID and self billir	Read a specific value combination of the order reason ID, retro-billing usage	X	
SD Document Order Reason - Read (A2X) : Order reason description	Read the description of a specific order reason	X	
SD Document Order Reason - Read (A2X) : Order reason description	Read the descriptions of all order reasons	X	
SD Document Order Reason - Read (A2X) : Order reason description	Read the description of a specific order reason in a specific language	X	
SD Document Order Reason - Read (A2X) : Description of self billing valu	Read the description of the self-billing value item indicator for a specific orde	X	
SD Document Order Reason - Read (A2X) : Description of self billing valu	Read the descriptions of all self-billing value item indicators	X	
SD Document Order Reason - Read (A2X) : Description of self billing valu	Read the description of a specific self-billing value item indicator in a specific	X	
SD Document Order Reason - Read (A2X) : Batch requests	Send a group of requests		X
Business Place (Synchronous) : Business place lists	Get the list of business places	X	
Business Place (Synchronous) : Business place lists	Get business place information from the list of business places	X	
Business Place (Synchronous) : Country/region information of business pl	Get a single record of business place and related country/region-specific inf	X	
Business Place (Synchronous) : Service operations	Get the display properties of the business place field	X	
Business Place (Synchronous) : Batch requests	Send a group of requests		X
Physical Inventory Documents - Read Create : Document header	Read information on physical inventory document header level	X	
Physical Inventory Documents - Read Create : Document header	Create a physical inventory document		X
Physical Inventory Documents - Read Create : Document header	Read information for a specific physical inventory document	X	
Physical Inventory Documents - Read Create : Document header	Create the material document for the differences		X
Physical Inventory Documents - Read Create : Document header	Initiates a recount for the physical inventory document		X
Physical Inventory Documents - Read Create : Document items	Read information for a specific physical inventory document header and phy	X	
Physical Inventory Documents - Read Create : Document items	Read information on physical inventory document item and header level for a	X	
Physical Inventory Documents - Read Create : Document items	Read information on physical inventory items level	X	
Physical Inventory Documents - Read Create : Document items	Read information on physical inventory document item level for a specific ph	X	

Physical Inventory Documents - Read Create : Document items	Change a specific physical inventory document item		X
Physical Inventory Documents - Read Create : Document items	Create the material document for the differences for a specific physical inventory document it		X
Physical Inventory Documents - Read Create : Document items	Initiates a recount for the specific physical inventory document		X
Physical Inventory Documents - Read Create : Document serial number	Read information on serial numbers for a specific physical inventory docume	X	
Physical Inventory Documents - Read Create : Document serial number	Read information of serial numbers on physical inventory document items le	X	
Physical Inventory Documents - Read Create : Document serial number	Read information of serial number on physical inventory document item leve	X	
Physical Inventory Documents - Read Create : Document serial number	Set a counted serial number for a specific physical inventory document item		X
Physical Inventory Documents - Read Create : Batch requests	Send a group of requests		X
Financial Planning Entry Item - Read : Company code data	Read the items of all company codes	X	
Financial Planning Entry Item - Read : Company code data	Read a company code by key	X	
Financial Planning Entry Item - Read : Financial planning entry item	Read the company code data of a specific financial planning item	X	
Financial Planning Entry Item - Read : Financial planning entry item	Read the current cost center data of a specific financial planning item	X	
Financial Planning Entry Item - Read : Financial planning entry item	Read financial planning entry items	X	
Financial Planning Entry Item - Read : Financial planning entry item	Read a financial planning entry item by key	X	
Financial Planning Entry Item - Read : Cost center data	Read the items of all cost centers	X	
Financial Planning Entry Item - Read : Cost center data	Read a cost center by key	X	
Financial Planning Entry Item - Read : Financial planning entry item fix var	Get entities from a fin plan entry item variable fix	X	
Financial Planning Entry Item - Read : Financial planning entry item fix var	Get entity from a fin plan entry item variable fix by key	X	
Financial Planning Entry Item - Read : Profit center data	Read the current profit center data of a specific financial planning item	X	
Financial Planning Entry Item - Read : Profit center data	Read the items of all profit centers	X	
Financial Planning Entry Item - Read : Profit center data	Read a profit center by key	X	
Financial Planning Entry Item - Read : General ledger account in chart of a	Read the chart of accounts data of a specific financial planning item	X	
Financial Planning Entry Item - Read : General ledger account in chart of a	Read the items of all chart of accounts	X	
Financial Planning Entry Item - Read : General ledger account in chart of a	Read a chart of account by key	X	
Golden Tax Interface Customer Type - Read Update : Customer types	Get the list of gti customer types	X	
Golden Tax Interface Customer Type - Read Update : Customer types	Get the customer type of a specific customer	X	
Golden Tax Interface Customer Type - Read Update : Service operations	Update gti customer type with customer number		X
Golden Tax Interface Customer Type - Read Update : Batch requests	Send a group of requests		X
Treasury Position Flow - Read : Treasury position flow	Get entities from a trsyposflow	X	
Treasury Position Flow - Read : Treasury position flow	Get entity from a trsyposflow by key	X	
Treasury Position Flow - Read : Batch requests	Send a group of requests		X
Sales Inquiry - Read (A2X) : Sales inquiry header	Read all sales inquiry headers	X	
Sales Inquiry - Read (A2X) : Sales inquiry header	Read a specific sales inquiry header	X	
Sales Inquiry - Read (A2X) : Sales inquiry item	Read all items of a specific sales inquiry	X	
Sales Inquiry - Read (A2X) : Sales inquiry item	Read the sales inquiry header for a specific item	X	
Sales Inquiry - Read (A2X) : Sales inquiry item	Read all sales inquiry items	X	
Sales Inquiry - Read (A2X) : Sales inquiry item	Read a specific sales inquiry item	X	
Sales Inquiry - Read (A2X) : Header partner	Read the header-level business partners of a specific sales inquiry	X	
Sales Inquiry - Read (A2X) : Header partner	Read the sales inquiry header for a specific header partner	X	
Sales Inquiry - Read (A2X) : Header partner	Read the header-level business partners of all sales inquiries	X	
Sales Inquiry - Read (A2X) : Header partner	Read a specific header-level business partner	X	
Sales Inquiry - Read (A2X) : Header pricing element	Read the header-level pricing elements of a specific sales inquiry	X	
Sales Inquiry - Read (A2X) : Header pricing element	Read the sales inquiry header for a specific header pricing element	X	
Sales Inquiry - Read (A2X) : Header pricing element	Read the header-level pricing elements of all sales inquiries	X	
Sales Inquiry - Read (A2X) : Header pricing element	Read a specific header-level pricing element	X	
Sales Inquiry - Read (A2X) : Item partner	Read the sales inquiry header for a specific item partner	X	
Sales Inquiry - Read (A2X) : Item partner	Read the item-level business partners of a specific sales inquiry item	X	
Sales Inquiry - Read (A2X) : Item partner	Read the sales inquiry item for a specific item partner	X	
Sales Inquiry - Read (A2X) : Item partner	Read the item-level business partners of all sales inquiry items	X	
Sales Inquiry - Read (A2X) : Item partner	Read a specific item-level business partner	X	
Sales Inquiry - Read (A2X) : Item pricing element	Read the sales inquiry header for a specific item pricing element	X	
Sales Inquiry - Read (A2X) : Item pricing element	Read the item-level pricing elements of a specific sales inquiry item	X	
Sales Inquiry - Read (A2X) : Item pricing element	Read the sales inquiry item for a specific item pricing element	X	
Sales Inquiry - Read (A2X) : Item pricing element	Read the item-level pricing elements of all sales inquiry items	X	
Sales Inquiry - Read (A2X) : Item pricing element	Read a specific item-level pricing element	X	
Sales Inquiry - Read (A2X) : Batch requests	Send a group of requests		X
Business User Change - Read : Iam: business user change doc	Get entities from business user changes	X	
Business User Change - Read : Iam: business user change doc	Get entity from business user changes by key	X	
Business User Change - Read : Batch requests	Send a group of requests		X

Environment Health and Safety Incident - Create Read : EHS location	Get entities from EHS location value help	X	
Environment Health and Safety Incident - Create Read : EHS location	Get entity from EHS location value help by key	X	
Environment Health and Safety Incident - Create Read : Location classifier	Get entities from related to loc classifier text	X	
Environment Health and Safety Incident - Create Read : Location classifier	Get entities from EHS loc classifier text	X	
Environment Health and Safety Incident - Create Read : Location classifier	Get entity from EHS loc classifier text by key	X	
Environment Health and Safety Incident - Create Read : Location classifier	Get entities from EHSlocclassifiervh	X	
Environment Health and Safety Incident - Create Read : Location classifier	Get entity from EHSlocclassifiervh by key	X	
Environment Health and Safety Incident - Create Read : EHS person value	Get entities from EHS person value help	X	
Environment Health and Safety Incident - Create Read : EHS person value	Get entity from EHS person value help by key	X	
Environment Health and Safety Incident - Create Read : EHS location type	Get entities from EHS location type	X	
Environment Health and Safety Incident - Create Read : EHS location type	Get entity from EHS location type by key	X	
Environment Health and Safety Incident - Create Read : Attachment	Uploads an attachment without assigning it to an incident		X
Environment Health and Safety Incident - Create Read : Incident	Get a list of documents attached to an incident	X	
Environment Health and Safety Incident - Create Read : Incident	Attaches a document to an incident		X
Environment Health and Safety Incident - Create Read : Incident	Get a list of incidents by filter criteria	X	
Environment Health and Safety Incident - Create Read : Incident	Create an incident		X
Environment Health and Safety Incident - Create Read : Incident	Get incident details by global identifier (incident uuid)	X	
Environment Health and Safety Incident - Create Read : Person	Get a list of all persons involved in an incident	X	
Environment Health and Safety Incident - Create Read : Person	Assign a person to an incident		X
Environment Health and Safety Incident - Create Read : Person	Create a person record without assigning it to an incident		X
Environment Health and Safety Incident - Create Read : Location	Get the incident location	X	
Environment Health and Safety Incident - Create Read : Location	Get a list of all locations	X	
Environment Health and Safety Incident - Create Read : Location	Get details of the incident location by global identifier (location uuid)	X	
Environment Health and Safety Incident - Create Read : Batch requests	Send a group of requests		X
Request for Quotation : Request for quotation	Get the header details of all the requests for quotations in the system	X	
Request for Quotation : Request for quotation	Create a header of a new RFQ with the details passed in the request body		X
Request for Quotation : Request for quotation	Get the header details of an RFQ	X	
Request for Quotation : Request for quotation	Update the header details of an RFQ		X
Request for Quotation : Request for quotation	Deletes an rfq.		X
Request for Quotation : Bidder	Get the bidder details of an RFQ	X	
Request for Quotation : Bidder	Add bidder to an RFQ		X
Request for Quotation : Bidder	Get all bidders from an RFQs	X	
Request for Quotation : Bidder	Add one or several bidders to an RFQ		X
Request for Quotation : Bidder	Get the bidder details of an RFQ by partner counter	X	
Request for Quotation : Bidder	Update the details of a bidder in an RFQ		X
Request for Quotation : Bidder	Delete the bidder from the RFQ		X
Request for Quotation : Item	Get the item details from an RFQ	X	
Request for Quotation : Item	Add an item to an RFQ		X
Request for Quotation : Item	Get the details of all items in all RFQs in the system	X	
Request for Quotation : Item	Add an item to an RFQ		X
Request for Quotation : Item	Gets the item details of an rfq.	X	
Request for Quotation : Item	Update the item details of in an RFQ		X
Request for Quotation : Item	Delete an item in an RFQ		X
Request for Quotation : Service operations	Completes the bidding process		X
Request for Quotation : Service operations	Cancel the bidding process		X
Request for Quotation : Service operations	Submits RFQ for approval		X
Request for Quotation : Batch requests	Send a group of requests		X
Cost Center - Read (A2X) : Cost center	Read all available cost centers	X	
Cost Center - Read (A2X) : Cost center	Read a specific cost center	X	
Cost Center - Read (A2X) : Cost center text	Read all language-dependent fields for a specific cost center	X	
Cost Center - Read (A2X) : Cost center text	Read cost center header fields for a specific language	X	
Cost Center - Read (A2X) : Cost center text	Read all language-dependent fields for all cost centers	X	

Cost Center - Read (A2X) : Cost center text	Read language-dependent fields of a cost center in a specific language	X	
Cost Center - Read (A2X) : Batch requests	Send a group of requests		X
Characteristic Data for Classification : Characteristic header data	List of characteristic header data	X	
Characteristic Data for Classification : Characteristic header data	Create a characteristic header data		X
Characteristic Data for Classification : Characteristic header data	Characteristic header data for a given key	X	
Characteristic Data for Classification : Characteristic header data	Update a characteristic header data		X
Characteristic Data for Classification : Characteristic header data	Delete a characteristic		X
Characteristic Data for Classification : Characteristic descriptions	Read the descriptions of a characteristic	X	
Characteristic Data for Classification : Characteristic descriptions	Create a description for a characteristic		X
Characteristic Data for Classification : Characteristic descriptions	List of characteristic descriptions	X	
Characteristic Data for Classification : Characteristic descriptions	Create a characteristic description		X
Characteristic Data for Classification : Characteristic descriptions	Characteristic description for a given key	X	
Characteristic Data for Classification : Characteristic descriptions	Update a characteristic description		X
Characteristic Data for Classification : Characteristic descriptions	Delete a characteristic description		X
Characteristic Data for Classification : Characteristic references	Read the references defined for a characteristic	X	
Characteristic Data for Classification : Characteristic references	Create a reference for a characteristic		X
Characteristic Data for Classification : Characteristic references	List of characteristic references	X	
Characteristic Data for Classification : Characteristic references	Create a characteristic reference		X
Characteristic Data for Classification : Characteristic references	Characteristic reference for a given key	X	
Characteristic Data for Classification : Characteristic references	Delete a characteristic reference		X
Characteristic Data for Classification : Characteristic restrictions	Read the restrictions defined for a characteristic	X	
Characteristic Data for Classification : Characteristic restrictions	Create a restriction for a characteristic		X
Characteristic Data for Classification : Characteristic restrictions	List of characteristic restrictions	X	
Characteristic Data for Classification : Characteristic restrictions	Create a characteristic restriction		X
Characteristic Data for Classification : Characteristic restrictions	Characteristic restriction for a given key	X	
Characteristic Data for Classification : Characteristic restrictions	Delete a characteristic restriction		X
Characteristic Data for Classification : Characteristic values	Read the values defined for a characteristic	X	
Characteristic Data for Classification : Characteristic values	Create a value for a characteristic		X
Characteristic Data for Classification : Characteristic values	List of characteristic values	X	
Characteristic Data for Classification : Characteristic values	Create a characteristic value		X
Characteristic Data for Classification : Characteristic values	Characteristic value for a given key	X	
Characteristic Data for Classification : Characteristic values	Update a characteristic value		X
Characteristic Data for Classification : Characteristic values	Delete a characteristic value		X
Characteristic Data for Classification : Characteristic value descriptions	Read the descriptions of a characteristic value	X	
Characteristic Data for Classification : Characteristic value descriptions	Create a description for a characteristic value		X
Characteristic Data for Classification : Characteristic value descriptions	List of characteristic value descriptions	X	
Characteristic Data for Classification : Characteristic value descriptions	Create a characteristic value description		X
Characteristic Data for Classification : Characteristic value descriptions	Characteristic value description for a given key	X	
Characteristic Data for Classification : Characteristic value descriptions	Update a characteristic value description		X
Characteristic Data for Classification : Characteristic value descriptions	Delete a characteristic value description		X
Characteristic Data for Classification : Batch requests	Send a group of requests		X
Characteristic Attribute Catalog - Read : Characteristic attribute selected s	Read all selected set of catalog type characteristic attributes	X	
Characteristic Attribute Catalog - Read : Characteristic attribute selected s	Read a specific selected set of catalog type characteristic attributes	X	
Characteristic Attribute Catalog - Read : Characteristic attribute selected s	Read all selected set codes and code groups of catalog type characteristic a	X	
Characteristic Attribute Catalog - Read : Characteristic attribute selected s	Read a specific selected set code of catalog type characteristic attributes	X	
Characteristic Attribute Catalog - Read : Characteristic attribute selected s	Read all selected set code texts of catalog type characteristic attributes	X	
Characteristic Attribute Catalog - Read : Characteristic attribute selected s	Read a specific selected set code text of catalog type characteristic attribute	X	
Characteristic Attribute Catalog - Read : Characteristic attribute selected s	Read all selected set texts of catalog type characteristic attributes	X	
Characteristic Attribute Catalog - Read : Characteristic attribute selected s	Read a specific selected set text of catalog type characteristic attributes in a	X	
Characteristic Attribute Catalog - Read : Batch requests	Send a group of requests		X
Project Demand : Demand distribution for expense	Get entities from a project demand distribution for expense	X	
Project Demand : Demand distribution for expense	Get entity from a project demand distribution for expense by key	X	
Project Demand : Demand distribution for expense	Update entity in a project demand distribution for expense		X
Project Demand : Demand distribution for expense	Delete entity from a project demand distribution for expense		X
Project Demand : Project demand	Get related to root	X	
Project Demand : Project demand	Get entities from a project demand	X	
Project Demand : Project demand	Add new entity to a project demand		X
Project Demand : Project demand	Get entity from a project demand by key	X	
Project Demand : Project demand	Update entity in a project demand		X
Project Demand : Project demand	Delete entity from a project demand		X
Project Demand : Project demand	Invoke action reset demand status to requested		X
Project Demand : Project demand	Invoke action set demand status to closed		X
Project Demand : Project demand	Invoke action set demand status to requested		X
Project Demand : Project demand	Invoke action set demand status to requested on release		X
Project Demand : Demand for expense	Get related to project demand expense	X	
Project Demand : Demand for expense	Get entities from related to project demand	X	
Project Demand : Demand for expense	Get related to expense	X	
Project Demand : Demand for expense	Get related to root	X	
Project Demand : Demand for expense	Get entities from a project demand expense	X	
Project Demand : Demand for expense	Get entity from a project demand expense by key	X	
Project Demand : Demand for expense	Update entity in a project demand expense		X
Project Demand : Resource assignment	Get related to root	X	
Project Demand : Resource assignment	Get entities from a project demand resource assignment	X	
Project Demand : Resource assignment	Get entity from a project demand resource assignment by key	X	
Project Demand : Resource assignment	Update entity in a project demand resource assignment		X
Project Demand : Resource assignment	Delete entity from a project demand resource assignment		X
Project Demand : Resource assignment distribution	Get related to root	X	

Project Demand : Resource assignment distribution	Get entities from related to assignment distribution	X	
Project Demand : Resource assignment distribution	Get related to assignment	X	
Project Demand : Resource assignment distribution	Get entities from a projdmndrsceassgmtdistr	X	
Project Demand : Resource assignment distribution	Get entity from a projdmndrsceassgmtdistr by key	X	
Project Demand : Resource assignment distribution	Update entity in a projdmndrsceassgmtdistr		X
Project Demand : Resource assignment distribution	Delete entity from a projdmndrsceassgmtdistr		X
Project Demand : Resource request distribution	Get related to root	X	
Project Demand : Resource request distribution	Get entities from a projdmndrscereq distribution	X	
Project Demand : Resource request distribution	Get entity from a projdmndrscereq distribution by key	X	
Project Demand : Resource request distribution	Update entity in a projdmndrscereq distribution		X
Project Demand : Resource request distribution	Delete entity from a projdmndrscereq distribution		X
Project Demand : Material demand	Get related to material	X	
Project Demand : Material demand	Get related to root	X	
Project Demand : Material demand	Get entities from a project demand material	X	
Project Demand : Material demand	Get entity from a project demand material by key	X	
Project Demand : Material demand	Update entity in a project demand material		X
Project Demand : Service demand	Get related to service	X	
Project Demand : Service demand	Get related to root	X	
Project Demand : Service demand	Get entities from a project demand service	X	
Project Demand : Service demand	Get entity from a project demand service by key	X	
Project Demand : Service demand	Update entity in a project demand service		X
Project Demand : Resource demand	Get related to work	X	
Project Demand : Resource demand	Get related to root	X	
Project Demand : Resource demand	Get related to work	X	
Project Demand : Resource demand	Get entities from related to resource assignment	X	
Project Demand : Resource demand	Get entities from a project demand resource	X	
Project Demand : Resource demand	Get entity from a project demand resource by key	X	
Project Demand : Resource demand	Update entity in a project demand resource		X
Project Demand : Material supply data	Get related to root	X	
Project Demand : Material supply data	Get related to material supply	X	
Project Demand : Material supply data	Get related to material	X	
Project Demand : Material supply data	Get entities from a project demand material supply	X	
Project Demand : Material supply data	Get entity from a project demand material supply by key	X	
Project Demand : Material supply data	Update entity in a project demand material supply		X
Project Demand : Resource request	Get related to root	X	
Project Demand : Resource request	Get entities from related to resource request	X	
Project Demand : Resource request	Get related to work	X	
Project Demand : Resource request	Get related to preoject demand resource request	X	
Project Demand : Resource request	Get entities from related to preoject demand resource request	X	
Project Demand : Resource request	Get entities from a project demand resource request	X	
Project Demand : Resource request	Get entity from a project demand resource request by key	X	
Project Demand : Resource request	Update entity in a project demand resource request		X
Project Demand : Resource request	Delete entity from a project demand resource request		X
Project Demand : Service supply data	Get related to root	X	
Project Demand : Service supply data	Get related to service supply	X	
Project Demand : Service supply data	Get related to service	X	
Project Demand : Service supply data	Get entities from a project demand service supply	X	
Project Demand : Service supply data	Get entity from a project demand service supply by key	X	
Project Demand : Service supply data	Update entity in a project demand service supply		X
Project Demand : Batch requests	Send a group of requests		X
Workforce Timesheet : Workforce timesheet	Read all workforce's timesheet entries information	X	
Workforce Timesheet : Workforce timesheet	Create, update, or delete workforce timesheet entry		X
Workforce Timesheet : Workforce timesheet	Read workforce timesheet entry information	X	
Workforce Timesheet : Batch requests	Send a group of requests		X

Consolidation Billing Document Type : Cnsldtn billing document type: Text	Get entities from related text	X	
Consolidation Billing Document Type : Cnsldtn billing document type: Text	Add new entity to related text		X
Consolidation Billing Document Type : Cnsldtn billing document type: Text	Get related billing document type	X	
Consolidation Billing Document Type : Cnsldtn billing document type: Text	Get entities from consolidation billing document type text	X	
Consolidation Billing Document Type : Cnsldtn billing document type: Text	Get entity from consolidation billing document type text by key	X	
Consolidation Billing Document Type : Cnsldtn billing document type: Text	Update entity in consolidation billing document type text		X
Consolidation Billing Document Type : Cnsldtn billing document type: Text	Delete entity from consolidation billing document type text		X
Consolidation Billing Document Type : Batch requests	Send a group of requests		X
Toxicological Information : Acute dermal toxicity assessment	Get entities from acutedermaltoxtyassmt	X	
Toxicological Information : Acute dermal toxicity assessment	Get entity from acutedermaltoxtyassmt by key	X	
Toxicological Information : Toxicological information	Get related pctxproperty	X	
Toxicological Information : Toxicological information	Get entities from related acutedermaltoxtyassmt	X	
Toxicological Information : Toxicological information	Get entities from toxicological property	X	
Toxicological Information : Toxicological information	Invoke action create and release version		X
Toxicological Information : Toxicological information	Get entity from toxicological property by key	X	
Toxicological Information : Acute dermal toxicity study	Get related pctxproperty	X	
Toxicological Information : Acute dermal toxicity study	Get entities from related acutedermaltoxtystudy	X	
Toxicological Information : Acute dermal toxicity study	Get entities from acute dermal toxicity study	X	
Toxicological Information : Acute dermal toxicity study	Get entity from acute dermal toxicity study by key	X	
Toxicological Information : Acute inhalation toxicity assessment	Get related pctxproperty	X	
Toxicological Information : Acute inhalation toxicity assessment	Get entities from related acute inhalation toxicity assessment	X	
Toxicological Information : Acute inhalation toxicity assessment	Get entities from acute inhalation toxicity assessment	X	
Toxicological Information : Acute inhalation toxicity assessment	Get entity from acute inhalation toxicity assessment by key	X	
Toxicological Information : Acute inhalation toxicity study	Get related pctxproperty	X	
Toxicological Information : Acute inhalation toxicity study	Get entities from related acuteinhltntoxtystudy	X	
Toxicological Information : Acute inhalation toxicity study	Get entities from acuteinhltntoxtystudy	X	
Toxicological Information : Acute inhalation toxicity study	Get entity from acuteinhltntoxtystudy by key	X	
Toxicological Information : Acute oral toxicity assessment	Get related pctxproperty	X	
Toxicological Information : Acute oral toxicity assessment	Get entities from related acuteoraltoxtyassmt	X	
Toxicological Information : Acute oral toxicity assessment	Get entities from acuteoraltoxtyassmt	X	
Toxicological Information : Acute oral toxicity assessment	Get entity from acuteoraltoxtyassmt by key	X	
Toxicological Information : Acute oral toxicity study	Get related pctxproperty	X	
Toxicological Information : Acute oral toxicity study	Get entities from related acuteoraltoxtystudy	X	
Toxicological Information : Acute oral toxicity study	Get entities from acuteoraltoxtystudy	X	
Toxicological Information : Acute oral toxicity study	Get entity from acuteoraltoxtystudy by key	X	
Toxicological Information : Aspiration toxicity assessment	Get related pctxproperty	X	

Toxicological Information : Aspiration toxicity assessment	Get entities from related aspiriationtoxtyassmt	X	
Toxicological Information : Aspiration toxicity assessment	Get entities from pctxaspiriationtoxtyassmt	X	
Toxicological Information : Aspiration toxicity assessment	Get entity from pctxaspiriationtoxtyassmt by key	X	
Toxicological Information : Carcinogenicity assessment	Get related pctxproperty	X	
Toxicological Information : Carcinogenicity assessment	Get entities from related crcngnctyassmt	X	
Toxicological Information : Carcinogenicity assessment	Get entities from pctxcrcngnctyassmt	X	
Toxicological Information : Carcinogenicity assessment	Get entity from pctxcrcngnctyassmt by key	X	
Toxicological Information : Carcinogenicity study	Get related pctxproperty	X	
Toxicological Information : Carcinogenicity study	Get entities from related crcngnctystudy	X	
Toxicological Information : Carcinogenicity study	Get entities from pctxcrcngnctystudy	X	
Toxicological Information : Carcinogenicity study	Get entity from pctxcrcngnctystudy by key	X	
Toxicological Information : Eye irritation assessment	Get related pctxproperty	X	
Toxicological Information : Eye irritation assessment	Get entities from related eye irritation assmt	X	
Toxicological Information : Eye irritation assessment	Get entities from pctxeyeirritationassmt	X	
Toxicological Information : Eye irritation assessment	Get entity from pctxeyeirritationassmt by key	X	
Toxicological Information : Eye irritation study	Get related pctxproperty	X	
Toxicological Information : Eye irritation study	Get entities from related eye irritation study	X	
Toxicological Information : Eye irritation study	Get entities from pctxeyeirritationstudy	X	
Toxicological Information : Eye irritation study	Get entity from pctxeyeirritationstudy by key	X	
Toxicological Information : Genetic toxicity - in vitro study	Get related pctxproperty	X	
Toxicological Information : Genetic toxicity - in vitro study	Get entities from related gentcvitrostudy	X	
Toxicological Information : Genetic toxicity - in vitro study	Get entities from pctxgentcvitrostudy	X	
Toxicological Information : Genetic toxicity - in vitro study	Get entity from pctxgentcvitrostudy by key	X	
Toxicological Information : Genetic toxicity - in vivo study	Get related pctxproperty	X	
Toxicological Information : Genetic toxicity - in vivo study	Get entities from related gentcvivostudy	X	
Toxicological Information : Genetic toxicity - in vivo study	Get entities from pctxgentcvivostudy	X	
Toxicological Information : Genetic toxicity - in vivo study	Get entity from pctxgentcvivostudy by key	X	
Toxicological Information : Experiences with human exposure	Get related pctxproperty	X	
Toxicological Information : Experiences with human exposure	Get entities from related human exposure	X	
Toxicological Information : Experiences with human exposure	Get entities from pctxhumanexposure	X	
Toxicological Information : Experiences with human exposure	Get entity from pctxhumanexposure by key	X	
Toxicological Information : Mutagenicity assessment	Get related pctxproperty	X	
Toxicological Information : Mutagenicity assessment	Get entities from related mutagenicity assmt	X	
Toxicological Information : Mutagenicity assessment	Get entities from pctxmtgnctyassmt	X	
Toxicological Information : Mutagenicity assessment	Get entity from pctxmtgnctyassmt by key	X	
Toxicological Information : Neurological effects	Get related pctxproperty	X	
Toxicological Information : Neurological effects	Get entities from related neurologicaleffect	X	
Toxicological Information : Neurological effects	Get entities from pctxneurologicaleffect	X	
Toxicological Information : Neurological effects	Get entity from pctxneurologicaleffect by key	X	
Toxicological Information : Other health hazards	Get related pctxproperty	X	
Toxicological Information : Other health hazards	Get entities from related other health hazard	X	
Toxicological Information : Other health hazards	Get entities from pctxotherhealthhazard	X	
Toxicological Information : Other health hazards	Get entity from pctxotherhealthhazard by key	X	
Toxicological Information : Other relevant toxicity information	Get related pctxproperty	X	
Toxicological Information : Other relevant toxicity information	Get entities from related other relevant info	X	
Toxicological Information : Other relevant toxicity information	Get entities from pctxotherrelevantinfo	X	
Toxicological Information : Other relevant toxicity information	Get entity from pctxotherrelevantinfo by key	X	
Toxicological Information : Repeated dose toxicity study	Get related pctxproperty	X	
Toxicological Information : Repeated dose toxicity study	Get entities from related reptddosetoxtystudy	X	
Toxicological Information : Repeated dose toxicity study	Get entities from pctxreptddosetoxtystudy	X	
Toxicological Information : Repeated dose toxicity study	Get entity from pctxreptddosetoxtystudy by key	X	
Toxicological Information : Respiratory sensitization assessment	Get related pctxproperty	X	
Toxicological Information : Respiratory sensitization assessment	Get entities from related respiratorysenstnassmt	X	
Toxicological Information : Respiratory sensitization assessment	Get entities from pctxrespiratorysenstnassmt	X	
Toxicological Information : Respiratory sensitization assessment	Get entity from pctxrespiratorysenstnassmt by key	X	
Toxicological Information : Reproductive toxicity - developmental assessm	Get related pctxproperty	X	
Toxicological Information : Reproductive toxicity - developmental assessm	Get entities from related rprdvdevassmt	X	
Toxicological Information : Reproductive toxicity - developmental assessm	Get entities from pctxrprdvdevassmt	X	
Toxicological Information : Reproductive toxicity - developmental assessm	Get entity from pctxrprdvdevassmt by key	X	
Toxicological Information : Reproductive toxicity - development and teratog	Get related pctxproperty	X	
Toxicological Information : Reproductive toxicity - development and teratog	Get entities from related rprdvdevstudy	X	
Toxicological Information : Reproductive toxicity - development and teratog	Get entities from pctxrprdvdevstudy	X	
Toxicological Information : Reproductive toxicity - development and teratog	Get entity from pctxrprdvdevstudy by key	X	
Toxicological Information : Reproductive toxicity fertility assessment	Get related pctxproperty	X	
Toxicological Information : Reproductive toxicity fertility assessment	Get entities from related rprdvfrtltyassmt	X	
Toxicological Information : Reproductive toxicity fertility assessment	Get entities from pctxrprdvfrtltyassmt	X	
Toxicological Information : Reproductive toxicity fertility assessment	Get entity from pctxrprdvfrtltyassmt by key	X	
Toxicological Information : Reproductive toxicity fertility study	Get related pctxproperty	X	
Toxicological Information : Reproductive toxicity fertility study	Get entities from related rprdvfrtltystudy	X	
Toxicological Information : Reproductive toxicity fertility study	Get entities from pctxrprdvfrtltystudy	X	
Toxicological Information : Reproductive toxicity fertility study	Get entity from pctxrprdvfrtltystudy by key	X	
Toxicological Information : Reproductive toxicity - lactation assessment	Get related pctxproperty	X	
Toxicological Information : Reproductive toxicity - lactation assessment	Get entities from related rprdvlactnassmt	X	
Toxicological Information : Reproductive toxicity - lactation assessment	Get entities from pctxrprdvlactnassmt	X	
Toxicological Information : Reproductive toxicity - lactation assessment	Get entity from pctxrprdvlactnassmt by key	X	
Toxicological Information : Sensitization study	Get related pctxproperty	X	
Toxicological Information : Sensitization study	Get entities from related sensitization study	X	

Toxicological Information : Sensitization study	Get entities from pctxsensitizationstudy	X	
Toxicological Information : Sensitization study	Get entity from pctxsensitizationstudy by key	X	
Toxicological Information : Skin irritation assessment	Get related pctxproperty	X	
Toxicological Information : Skin irritation assessment	Get entities from related skin irritation assmt	X	
Toxicological Information : Skin irritation assessment	Get entities from pctxskinirritationassmt	X	
Toxicological Information : Skin irritation assessment	Get entity from pctxskinirritationassmt by key	X	
Toxicological Information : Skin irritation study	Get related pctxproperty	X	
Toxicological Information : Skin irritation study	Get entities from related skin irritation study	X	
Toxicological Information : Skin irritation study	Get entities from pctxskinirritationstudy	X	
Toxicological Information : Skin irritation study	Get entity from pctxskinirritationstudy by key	X	
Toxicological Information : Skin sensitization assessment	Get related pctxproperty	X	
Toxicological Information : Skin sensitization assessment	Get entities from related skinsenstnassmt	X	
Toxicological Information : Skin sensitization assessment	Get entities from pctxskinsenstnassmt	X	
Toxicological Information : Skin sensitization assessment	Get entity from pctxskinsenstnassmt by key	X	
Toxicological Information : Specific risk assessment	Get related pctxproperty	X	
Toxicological Information : Specific risk assessment	Get entities from related specific risk assmt	X	
Toxicological Information : Specific risk assessment	Get entities from pctxspecificriskassmt	X	
Toxicological Information : Specific risk assessment	Get entity from pctxspecificriskassmt by key	X	
Toxicological Information : STOT repeated exposure assessment	Get related pctxproperty	X	
Toxicological Information : STOT repeated exposure assessment	Get entities from related stotreptdexpsrassmt	X	
Toxicological Information : STOT repeated exposure assessment	Get entities from pctxstotreptdexpsrassmt	X	
Toxicological Information : STOT repeated exposure assessment	Get entity from pctxstotreptdexpsrassmt by key	X	
Toxicological Information : STOT single exposure assessment	Get related pctxproperty	X	
Toxicological Information : STOT single exposure assessment	Get entities from related stotsingleexpsrassmt	X	
Toxicological Information : STOT single exposure assessment	Get entities from pctxstotsingleexpsrassmt	X	
Toxicological Information : STOT single exposure assessment	Get entity from pctxstotsingleexpsrassmt by key	X	
Toxicological Information : Batch requests	Send a group of requests		X
Products to Product Hierarchies Assignment - Read Create : Product univ	Get entities from produnivhiernormalnode	X	
Products to Product Hierarchies Assignment - Read Create : Product univ	Get entity from produnivhiernormalnode by key	X	
Products to Product Hierarchies Assignment - Read Create : Product univ	Get entities from related produnivhierprodbyhiernode	X	
Products to Product Hierarchies Assignment - Read Create : Product univ	Add new entity to related produnivhierprodbyhiernode		X
Products to Product Hierarchies Assignment - Read Create : Product univ	Get related produnivhiernormalnode	X	
Products to Product Hierarchies Assignment - Read Create : Product univ	Get entities from produnivhierprodbyhiernode	X	
Products to Product Hierarchies Assignment - Read Create : Product univ	Get entity from produnivhierprodbyhiernode by key	X	
Products to Product Hierarchies Assignment - Read Create : Product univ	Delete entity from produnivhierprodbyhiernode		X
Products to Product Hierarchies Assignment - Read Create : Product univ	Invoke action moveproducttoanothernode		X
Products to Product Hierarchies Assignment - Read Create : Batch reques	Send a group of requests		X
Company Substance : Company substance	Get entities from companysubstance	X

Advanced ATP Check : ATP check data definition	Get entities from rlvtproductplant	X	
Advanced ATP Check : ATP check data definition	Get entity from rlvtproductplant by key	X	
Advanced ATP Check : ATP check data definition	Invoke action checkavailabilitywithoutresvn		X
Advanced ATP Check : Batch requests	Send a group of requests		X
Communication Arrangement : Communication arrangement root	Get entities from communication arrangements	X	
Communication Arrangement : Communication arrangement root	Add new entity to communication arrangements		X
Communication Arrangement : Communication arrangement root	Get entity from communication arrangements by key	X	
Communication Arrangement : Communication arrangement root	Update entity in communication arrangements		X
Communication Arrangement : Communication arrangement root	Delete entity from communication arrangements		X
Communication Arrangement : Inbound service	Get entities from related inbound services	X	
Communication Arrangement : Inbound service	Add new entity to related inbound services		X
Communication Arrangement : Inbound service	Get related communication arrangement	X	
Communication Arrangement : Inbound service	Get entities from inbound services	X	
Communication Arrangement : Inbound service	Get entity from inbound services by key	X	
Communication Arrangement : Inbound user	Get related inbound user	X	
Communication Arrangement : Inbound user	Get related communication arrangement	X	
Communication Arrangement : Inbound user	Get entities from inbound users	X	
Communication Arrangement : Inbound user	Get entity from inbound users by key	X	
Communication Arrangement : Inbound user	Update entity in inbound users		X
Communication Arrangement : Outbound service	Get entities from related outbound services	X	
Communication Arrangement : Outbound service	Add new entity to related outbound services		X
Communication Arrangement : Outbound service	Get related communication arrangement	X	
Communication Arrangement : Outbound service	Get entities from outbound services	X	
Communication Arrangement : Outbound service	Get entity from outbound services by key	X	
Communication Arrangement : Outbound service	Update entity in outbound services		X
Communication Arrangement : Outbound user	Get related outbound user	X	
Communication Arrangement : Outbound user	Get related communication arrangement	X	
Communication Arrangement : Outbound user	Get entities from outbound users	X	
Communication Arrangement : Outbound user	Get entity from outbound users by key	X	
Communication Arrangement : Outbound user	Update entity in outbound users		X
Communication Arrangement : Root property	Get entities from related properties	X	
Communication Arrangement : Root property	Add new entity to related properties		X
Communication Arrangement : Root property	Get related communication arrangement	X	
Communication Arrangement : Root property	Get entities from properties	X	
Communication Arrangement : Root property	Get entity from properties by key	X	
Communication Arrangement : Inbound service property	Get related communication arrangement	X	
Communication Arrangement : Inbound service property	Get related inbound service	X	
Communication Arrangement : Inbound service property	Get entities from related properties	X	
Communication Arrangement : Inbound service property	Add new entity to related properties		X
Communication Arrangement : Inbound service property	Get entities from inbound service properties	X	
Communication Arrangement : Inbound service property	Get entity from inbound service properties by key	X	
Communication Arrangement : Inbound service property value	Get related communication arrangement	X	
Communication Arrangement : Inbound service property value	Get related inbound service	X	
Communication Arrangement : Inbound service property value	Get entities from related values	X	
Communication Arrangement : Inbound service property value	Add new entity to related values		X

Communication Arrangement : Inbound service property value	Get related property	X	
Communication Arrangement : Inbound service property value	Get entities from inbound service property values	X	
Communication Arrangement : Inbound service property value	Add new entity to inbound service property values		X
Communication Arrangement : Inbound service property value	Get entity from inbound service property values by key	X	
Communication Arrangement : Inbound service property value	Update entity in inbound service property values		X
Communication Arrangement : Inbound service property value	Delete entity from inbound service property values		X
Communication Arrangement : Outbound service property	Get related communication arrangement	X	
Communication Arrangement : Outbound service property	Get related outbound service	X	
Communication Arrangement : Outbound service property	Get entities from related properties	X	
Communication Arrangement : Outbound service property	Add new entity to related properties		X
Communication Arrangement : Outbound service property	Get entities from outbound service properties	X	
Communication Arrangement : Outbound service property	Get entity from outbound service properties by key	X	
Communication Arrangement : Outbound service property value	Get related communication arrangement	X	
Communication Arrangement : Outbound service property value	Get related outbound service	X	
Communication Arrangement : Outbound service property value	Get entities from related values	X	
Communication Arrangement : Outbound service property value	Add new entity to related values		X
Communication Arrangement : Outbound service property value	Get related property	X	
Communication Arrangement : Outbound service property value	Get entities from outbound service property values	X	
Communication Arrangement : Outbound service property value	Add new entity to outbound service property values		X
Communication Arrangement : Outbound service property value	Get entity from outbound service property values by key	X	
Communication Arrangement : Outbound service property value	Update entity in outbound service property values		X
Communication Arrangement : Outbound service property value	Delete entity from outbound service property values		X
Communication Arrangement : Outbound user scope	Get related communication arrangement	X	
Communication Arrangement : Outbound user scope	Get related outbound user	X	
Communication Arrangement : Outbound user scope	Get entities from related additional scopes	X	
Communication Arrangement : Outbound user scope	Add new entity to related additional scopes		X
Communication Arrangement : Outbound user scope	Get entities from outbound user auth scopes	X	
Communication Arrangement : Outbound user scope	Add new entity to outbound user auth scopes		X

Ecological Information : Toxicity to microorganisms	Get entity from ecolprprtytoxtytomicroorganism by key	X	
Ecological Information : Toxicity to soil-dwelling organisms	Get entities from related pcectxtoxtytosldgom	X	
Ecological Information : Toxicity to soil-dwelling organisms	Get related pcectxproperty	X	

Ecological Information : Toxicity to soil-dwelling organisms	Get entities from ecolprprtytoxicitytosldgom	X	
Ecological Information : Toxicity to soil-dwelling organisms	Get entity from ecolprprtytoxicitytosldgom by key	X	
Ecological Information : Toxicity to terrestrial plants	Get entities from related pcectxtoxtytotrrstrlplant	X	
Ecological Information : Toxicity to terrestrial plants	Get related pcectxproperty	X	
Ecological Information : Toxicity to terrestrial plants	Get entities from ecolprprtytoxtytotrrstrlplant	X	
Ecological Information : Toxicity to terrestrial plants	Get entity from ecolprprtytoxtytotrrstrlplant by key	X	
Ecological Information : Mobility in environment	Get related pcectxtransptbtwnenvlcpts	X	
Ecological Information : Mobility in environment	Get related pcectxproperty	X	
Ecological Information : Mobility in environment	Get entities from ecolprprtytransptbtwnenvlcpts	X	
Ecological Information : Mobility in environment	Get entity from ecolprprtytransptbtwnenvlcpts by key	X	
Ecological Information : Ecotoxicological remarks	Get related pcectxproperty	X	
Ecological Information : Ecotoxicological remarks	Get related pcectxassmttoxicity	X	
Ecological Information : Results for aboveground organisms	Get related pcectxproperty	X	
Ecological Information : Results for aboveground organisms	Get related pcectxtoxtytoabgdom	X	
Ecological Information : Results for soil-dwelling organisms	Get related pcectxproperty	X	
Ecological Information : Results for soil-dwelling organisms	Get related pcectxtoxtytosldgom	X	
Ecological Information : Batch requests	Send a group of requests		X
Safety-Related Properties : Asphyxiation hazard	Get entities from pcsftyasphyxiationhazard	X	
Safety-Related Properties : Asphyxiation hazard	Get entity from pcsftyasphyxiationhazard by key	X	
Safety-Related Properties : Safety-related property	Get related safetyrelatedprpty	X	
Safety-Related Properties : Safety-related property	Get related asphyxiation hazard	X	
Safety-Related Properties : Safety-related property	Get entities from safety related property	X	
Safety-Related Properties : Safety-related property	Invoke action validate		X
Safety-Related Properties : Safety-related property	Invoke action create and release version		X
Safety-Related Properties : Safety-related property	Get entity from safety related property by key	X	
Safety-Related Properties : Auto-ignition temperature	Get related safetyrelatedprpty	X	
Safety-Related Properties : Auto-ignition temperature	Get related auto ignition	X	
Safety-Related Properties : Auto-ignition temperature	Get entities from pcsftyautoignition	X	
Safety-Related Properties : Auto-ignition temperature	Get entity from pcsftyautoignition by key	X	
Safety-Related Properties : Burning rate	Get related safetyrelatedprpty	X	
Safety-Related Properties : Burning rate	Get related burning rate	X	
Safety-Related Properties : Burning rate	Get entities from pcsftyburningrate	X	
Safety-Related Properties : Burning rate	Get entity from pcsftyburningrate by key	X	
Safety-Related Properties : Heat of combustion	Get related safetyrelatedprpty	X	
Safety-Related Properties : Heat of combustion	Get related combustion heat	X	
Safety-Related Properties : Heat of combustion	Get entities from pcsftycombustionheat	X	
Safety-Related Properties : Heat of combustion	Get entity from pcsftycombustionheat by key	X	
Safety-Related Properties : Corrosion of metals	Get related safetyrelatedprpty	X	
Safety-Related Properties : Corrosion of metals	Get related corrosion rate	X	
Safety-Related Properties : Corrosion of metals	Get entities from pcsftycorrosionrate	X	
Safety-Related Properties : Corrosion of metals	Get entity from pcsftycorrosionrate by key	X	
Safety-Related Properties : Dust explosion class	Get related safetyrelatedprpty	X	
Safety-Related Properties : Dust explosion class	Get related dust explosion class	X	
Safety-Related Properties : Dust explosion class	Get entities from pcsftydustexplosionclass	X	
Safety-Related Properties : Dust explosion class	Get entity from pcsftydustexplosionclass by key	X	
Safety-Related Properties : Explosiveness	Get related safetyrelatedprpty	X	
Safety-Related Properties : Explosiveness	Get related explosiveness	X	
Safety-Related Properties : Explosiveness	Get entities from pcsftyexplosiveness	X	
Safety-Related Properties : Explosiveness	Get entity from pcsftyexplosiveness by key	X	
Safety-Related Properties : Fire point	Get related safetyrelatedprpty	X	
Safety-Related Properties : Fire point	Get related firepoint	X	
Safety-Related Properties : Fire point	Get entities from pcsftyfirepoint	X	
Safety-Related Properties : Fire point	Get entity from pcsftyfirepoint by key	X	
Safety-Related Properties : Flammability of gases/solids	Get related safetyrelatedprpty	X	
Safety-Related Properties : Flammability of gases/solids	Get related gassolidflammability	X	
Safety-Related Properties : Flammability of gases/solids	Get entities from pcsftygassolidflammability	X	
Safety-Related Properties : Flammability of gases/solids	Get entity from pcsftygassolidflammability by key	X	
Safety-Related Properties : Hazardous combustion products	Get related safetyrelatedprpty	X	
Safety-Related Properties : Hazardous combustion products	Get entities from related hzdscmbtnprod	X	
Safety-Related Properties : Hazardous combustion products	Get entities from pcsftyhzdscmbtnprod	X	
Safety-Related Properties : Hazardous combustion products	Get entity from pcsftyhzdscmbtnprod by key	X	
Safety-Related Properties : Flammability of liquids	Get related safetyrelatedprpty	X	
Safety-Related Properties : Flammability of liquids	Get related liquidflammability	X	
Safety-Related Properties : Flammability of liquids	Get entities from pcsftyliquidflammability	X	
Safety-Related Properties : Flammability of liquids	Get entity from pcsftyliquidflammability by key	X	
Safety-Related Properties : Lower explosion/flammability limit	Get related safetyrelatedprpty	X	
Safety-Related Properties : Lower explosion/flammability limit	Get related lowerflmltylimit	X	
Safety-Related Properties : Lower explosion/flammability limit	Get entities from pcsftylowerflmltylimit	X	
Safety-Related Properties : Lower explosion/flammability limit	Get entity from pcsftylowerflmltylimit by key	X	
Safety-Related Properties : Minimum ignition energy	Get related safetyrelatedprpty	X	
Safety-Related Properties : Minimum ignition energy	Get related minigntnengy	X	
Safety-Related Properties : Minimum ignition energy	Get entities from pcsftyminigntnengy	X	
Safety-Related Properties : Minimum ignition energy	Get entity from pcsftyminigntnengy by key	X	
Safety-Related Properties : Oxidizing	Get related safetyrelatedprpty	X	
Safety-Related Properties : Oxidizing	Get related oxidizing	X	
Safety-Related Properties : Oxidizing	Get entities from pcsftyoxidizing	X	
Safety-Related Properties : Oxidizing	Get entity from pcsftyoxidizing by key	X	

Safety-Related Properties : Peroxides	Get related safetyrelatedprpty	X	
Safety-Related Properties : Peroxides	Get related peroxides	X	
Safety-Related Properties : Peroxides	Get entities from pcsftyperoxides	X	
Safety-Related Properties : Peroxides	Get entity from pcsftyperoxides by key	X	
Safety-Related Properties : Self heating	Get related safetyrelatedprpty	X	
Safety-Related Properties : Self heating	Get related self heating	X	
Safety-Related Properties : Self heating	Get entities from pcsftyselfheating	X	
Safety-Related Properties : Self heating	Get entity from pcsftyselfheating by key	X	
Safety-Related Properties : Self ignition	Get related safetyrelatedprpty	X	
Safety-Related Properties : Self ignition	Get related self ignition	X	
Safety-Related Properties : Self ignition	Get entities from pcsftyselfignition	X	
Safety-Related Properties : Self ignition	Get entity from pcsftyselfignition by key	X	
Safety-Related Properties : Solvent separation test	Get related safetyrelatedprpty	X	
Safety-Related Properties : Solvent separation test	Get related solventsprtntest	X	
Safety-Related Properties : Solvent separation test	Get entities from pcsftysolventsprtntest	X	
Safety-Related Properties : Solvent separation test	Get entity from pcsftysolventsprtntest by key	X	
Safety-Related Properties : Thermal decomposition temperature	Get related safetyrelatedprpty	X	
Safety-Related Properties : Thermal decomposition temperature	Get related thrmldcmpstn	X	
Safety-Related Properties : Thermal decomposition temperature	Get entities from pcsftythrmldcmpstn	X	
Safety-Related Properties : Thermal decomposition temperature	Get entity from pcsftythrmldcmpstn by key	X	
Safety-Related Properties : Upper explosion/flammability limit	Get related safetyrelatedprpty	X	
Safety-Related Properties : Upper explosion/flammability limit	Get related upperflmltylimit	X	
Safety-Related Properties : Upper explosion/flammability limit	Get entities from pcsftyupperflmltylimit	X	
Safety-Related Properties : Upper explosion/flammability limit	Get entity from pcsftyupperflmltylimit by key	X	
Safety-Related Properties : Flash point	Get related flash point	X	
Safety-Related Properties : Flash point	Get related sftyproperty	X	
Safety-Related Properties : Flash point	Get entities from sftyflashpoint	X	
Safety-Related Properties : Flash point	Get entity from sftyflashpoint by key	X	
Safety-Related Properties : Batch requests	Send a group of requests		X
Safety Data Sheet Assessment : Safety data sheet (SDS) assessment	Get entities from safety data sheet assessment	X	
Safety Data Sheet Assessment : Safety data sheet (SDS) assessment	Invoke action release		X
Safety Data Sheet Assessment : Safety data sheet (SDS) assessment	Invoke action deleteinprogressversion		X
Safety Data Sheet Assessment : Safety data sheet (SDS) assessment	Invoke action create new version		X
Safety Data Sheet Assessment : Safety data sheet (SDS) assessment	Invoke action update safety data sheet document details		X
Safety Data Sheet Assessment : Safety data sheet (SDS) assessment	Get entity from safety data sheet assessment by key	X	
Safety Data Sheet Assessment : SDS assessment country/region details	Get entities from related sftydtashtassmtcntry	X	
Safety Data Sheet Assessment : SDS assessment country/region details	Get related sftydtashtassmt	X	
Safety Data Sheet Assessment : SDS assessment country/region details	Get entities from safetydatasheetassessmentcntry	X	
Safety Data Sheet Assessment : SDS assessment country/region details	Get entity from safetydatasheetassessmentcntry by key	X	
Safety Data Sheet Assessment : SDS assessment language details	Get entities from related sftydtashtassmt doc	X	
Safety Data Sheet Assessment : SDS assessment language details	Get related sftydtashtassmt	X	
Safety Data Sheet Assessment : SDS assessment language details	Get entities from safety data sheet assessment doc	X	
Safety Data Sheet Assessment : SDS assessment language details	Get entity from safety data sheet assessment doc by key	X	
Safety Data Sheet Assessment : Batch requests	Send a group of requests		X
Measurement Document : Failed measurement document reading	Get entities from failed measurement reading	X	
Measurement Document : Failed measurement document reading	Get entity from failed measurement reading by key	X	
Measurement Document : Failed measurement document reading	Invoke action repeatmsmtreadingtransfer		X
Measurement Document : Measurement documents	Get related measurement document	X	
Measurement Document : Measurement documents	Get entities from related failed measurement reading	X	
Measurement Document : Measurement documents	Get entities from measurement document	X	
Measurement Document : Measurement documents	Add new entity to measurement document		X
Measurement Document : Measurement documents	Get entity from measurement document by key	X	
Measurement Document : Measurement documents	Update entity in measurement document		X
Measurement Document : Measurement documents	Invoke action deactivatereversalindicator		X
Measurement Document : Measurement documents	Invoke action activatereversalindicator		X
Measurement Document : Measurement document text	Get related measurement document long text	X	
Measurement Document : Measurement document text	Get related measurement document	X	
Measurement Document : Measurement document text	Get entities from msmtdocumentlongtext	X	
Measurement Document : Measurement document text	Add new entity to msmtdocumentlongtext		X
Measurement Document : Measurement document text	Get entity from msmtdocumentlongtext by key	X	
Measurement Document : Measurement document text	Update entity in msmtdocumentlongtext		X
Measurement Document : Batch requests	Send a group of requests		X

Physical-Chemical Properties : Physical chemical boiling point	Get entities from phys chml boiling point	X	
Physical-Chemical Properties : Physical chemical boiling point	Get entity from phys chml boiling point by key	X	
Physical-Chemical Properties : Physical chemical property	Get related physchmlprpty	X	
Physical-Chemical Properties : Physical chemical property	Get entities from related boiling point	X	
Physical-Chemical Properties : Physical chemical property	Get entities from physical chemical property	X	
Physical-Chemical Properties : Physical chemical property	Invoke action create and release version		X
Physical-Chemical Properties : Physical chemical property	Invoke action validate		X
Physical-Chemical Properties : Physical chemical property	Get entity from physical chemical property by key	X	
Physical-Chemical Properties : Physical chemical bulk density	Get related bulk density	X	
Physical-Chemical Properties : Physical chemical bulk density	Get entities from phys chml bulk density	X	
Physical-Chemical Properties : Physical chemical bulk density	Get entity from phys chml bulk density by key	X	
Physical-Chemical Properties : Physical chemical color	Get related color	X	
Physical-Chemical Properties : Physical chemical color	Get entities from phys chml color	X	
Physical-Chemical Properties : Physical chemical color	Get entity from phys chml color by key	X	
Physical-Chemical Properties : Physical chemical density	Get related density	X	
Physical-Chemical Properties : Physical chemical density	Get entities from phys chml density	X	
Physical-Chemical Properties : Physical chemical density	Get entity from phys chml density by key	X	
Physical-Chemical Properties : Physchem property evaporation rate	Get related evaporation rate	X	
Physical-Chemical Properties : Physchem property evaporation rate	Get entities from phys chml evaporation rate	X	
Physical-Chemical Properties : Physchem property evaporation rate	Get entity from phys chml evaporation rate by key	X	
Physical-Chemical Properties : Physical chemical flow time	Get related flowtime	X	
Physical-Chemical Properties : Physical chemical flow time	Get entities from phys chml flow time	X	
Physical-Chemical Properties : Physical chemical flow time	Get entity from phys chml flow time by key	X	
Physical-Chemical Properties : Physical chemical property form	Get related form	X	
Physical-Chemical Properties : Physical chemical property form	Get entities from phys chml form	X	
Physical-Chemical Properties : Physical chemical property form	Get entity from phys chml form by key	X	
Physical-Chemical Properties : Physical chemical melting point	Get related melting point	X	
Physical-Chemical Properties : Physical chemical melting point	Get entities from phys chml melting point	X	
Physical-Chemical Properties : Physical chemical melting point	Get entity from phys chml melting point by key	X	
Physical-Chemical Properties : Physical chemical molar mass	Get related molarmass	X	
Physical-Chemical Properties : Physical chemical molar mass	Get entities from phys chml molar mass	X	
Physical-Chemical Properties : Physical chemical molar mass	Get entity from phys chml molar mass by key	X	
Physical-Chemical Properties : Physical chemical odor	Get related odor	X	
Physical-Chemical Properties : Physical chemical odor	Get entities from phys chml odor	X	
Physical-Chemical Properties : Physical chemical odor	Get entity from phys chml odor by key	X	
Physical-Chemical Properties : Physical chemical odor threshold	Get related odor threshold	X	
Physical-Chemical Properties : Physical chemical odor threshold	Get entities from phys chml odor threshold	X	
Physical-Chemical Properties : Physical chemical odor threshold	Get entity from phys chml odor threshold by key	X	
Physical-Chemical Properties : Physical chemical property particle size	Get related physchmlprpty	X	
Physical-Chemical Properties : Physical chemical property particle size	Get entities from related particle size	X	
Physical-Chemical Properties : Physical chemical property particle size	Get entities from phys chml particle size	X	
Physical-Chemical Properties : Physical chemical property particle size	Get entity from phys chml particle size by key	X	
Physical-Chemical Properties : Physchem particle size distribution	Get related physchmlprpty	X	
Physical-Chemical Properties : Physchem particle size distribution	Get entities from related particle size distr	X	
Physical-Chemical Properties : Physchem particle size distribution	Get entities from phys chml particle size distr	X	
Physical-Chemical Properties : Physchem particle size distribution	Get entity from phys chml particle size distr by key	X	
Physical-Chemical Properties : Physical chemical partition coefficient	Get related physchmlprpty	X	
Physical-Chemical Properties : Physical chemical partition coefficient	Get entities from related partitioncoefficient	X	
Physical-Chemical Properties : Physical chemical partition coefficient	Get entities from phys chml partition coefficient	X	
Physical-Chemical Properties : Physical chemical partition coefficient	Get entity from phys chml partition coefficient by key	X	
Physical-Chemical Properties : Physical chemical property PH scale	Get related phscale	X	
Physical-Chemical Properties : Physical chemical property PH scale	Get entities from physchmlphscale	X	
Physical-Chemical Properties : Physical chemical property PH scale	Get entity from physchmlphscale by key	X	
Physical-Chemical Properties : Physical chemical state of matter	Get related physicalstate	X	
Physical-Chemical Properties : Physical chemical state of matter	Get entities from physchmlphysicalstate	X	
Physical-Chemical Properties : Physical chemical state of matter	Get entity from physchmlphysicalstate by key	X	
Physical-Chemical Properties : Physical chemical relative density	Get related relative density	X	
Physical-Chemical Properties : Physical chemical relative density	Get entities from phys chml relative density	X	
Physical-Chemical Properties : Physical chemical relative density	Get entity from phys chml relative density by key	X	
Physical-Chemical Properties : Physical chemical relative vapor density	Get related relative vapor density	X	
Physical-Chemical Properties : Physical chemical relative vapor density	Get entities from phys chml relative vapor density	X	
Physical-Chemical Properties : Physical chemical relative vapor density	Get entity from phys chml relative vapor density by key	X	
Physical-Chemical Properties : Physchem property vapor pressure	Get related vapor pressure	X	
Physical-Chemical Properties : Physchem property vapor pressure	Get entities from phys chml vapor pressure	X	
Physical-Chemical Properties : Physchem property vapor pressure	Get entity from phys chml vapor pressure by key	X	
Physical-Chemical Properties : Physical chemical dynamic viscosity	Get related physchmlprpty	X	
Physical-Chemical Properties : Physical chemical dynamic viscosity	Get entities from related viscosity dynamic	X	
Physical-Chemical Properties : Physical chemical dynamic viscosity	Get entities from phys chml viscosity dynamic	X	
Physical-Chemical Properties : Physical chemical dynamic viscosity	Get entity from phys chml viscosity dynamic by key	X	
Physical-Chemical Properties : Physical chemical kinematic viscosity	Get related viscosity kinematic	X	
Physical-Chemical Properties : Physical chemical kinematic viscosity	Get entities from phys chml viscosity kinematic	X	
Physical-Chemical Properties : Physical chemical kinematic viscosity	Get entity from phys chml viscosity kinematic by key	X	
Physical-Chemical Properties : Physical chemical water solubility	Get related physchmlprpty	X	
Physical-Chemical Properties : Physical chemical water solubility	Get entities from related water solubility	X	
Physical-Chemical Properties : Physical chemical water solubility	Get entities from phys chml water solubility	X	
Physical-Chemical Properties : Physical chemical water solubility	Get entity from phys chml water solubility by key	X	
Physical-Chemical Properties : Batch requests	Send a group of requests		X

CTR Complementary Table Data Maintenance : BR accounts for exploratic	Update entity in apur_expl		X
CTR Complementary Table Data Maintenance : BR accounts for exploratic	Delete entity from apur_expl		X
CTR Complementary Table Data Maintenance : BR acquisition withholding	Get entities from aqs_impwh	X	
CTR Complementary Table Data Maintenance : BR acquisition withholding	Add new entity to aqs_impwh		X
CTR Complementary Table Data Maintenance : BR acquisition withholding	Get entity from aqs_impwh by key	X	
CTR Complementary Table Data Maintenance : BR acquisition withholding	Update entity in aqs_impwh		X
CTR Complementary Table Data Maintenance : BR acquisition withholding	Delete entity from aqs_impwh		X
CTR Complementary Table Data Maintenance : BR digital signature	Get entities from ass_digit	X	
CTR Complementary Table Data Maintenance : BR digital signature	Add new entity to ass_digit		X
CTR Complementary Table Data Maintenance : BR digital signature	Get entity from ass_digit by key	X	
CTR Complementary Table Data Maintenance : BR digital signature	Update entity in ass_digit		X
CTR Complementary Table Data Maintenance : BR digital signature	Delete entity from ass_digit		X
CTR Complementary Table Data Maintenance : BR assets abroad	Get entities from ativos_ex	X	
CTR Complementary Table Data Maintenance : BR assets abroad	Add new entity to ativos_ex		X
CTR Complementary Table Data Maintenance : BR assets abroad	Get entity from ativos_ex by key	X	
CTR Complementary Table Data Maintenance : BR assets abroad	Update entity in ativos_ex		X
CTR Complementary Table Data Maintenance : BR assets abroad	Delete entity from ativos_ex		X
CTR Complementary Table Data Maintenance : BR incentivized act generi	Get entities from ativ_ince	X	
CTR Complementary Table Data Maintenance : BR incentivized act generi	Add new entity to ativ_ince		X
CTR Complementary Table Data Maintenance : BR incentivized act generi	Get entity from ativ_ince by key	X	
CTR Complementary Table Data Maintenance : BR incentivized act generi	Update entity in ativ_ince		X
CTR Complementary Table Data Maintenance : BR incentivized act generi	Delete entity from ativ_ince		X
CTR Complementary Table Data Maintenance : BR real estate activity sol	Get entities from atv_imob	X	
CTR Complementary Table Data Maintenance : BR real estate activity sol	Add new entity to atv_imob		X
CTR Complementary Table Data Maintenance : BR real estate activity sol	Get entity from atv_imob by key	X	
CTR Complementary Table Data Maintenance : BR real estate activity sol	Update entity in atv_imob		X
CTR Complementary Table Data Maintenance : BR real estate activity sol	Delete entity from atv_imob		X
CTR Complementary Table Data Maintenance : BR auditor	Get entities from auditor	X	
CTR Complementary Table Data Maintenance : BR auditor	Add new entity to auditor		X
CTR Complementary Table Data Maintenance : BR auditor	Get entity from auditor by key	X	
CTR Complementary Table Data Maintenance : BR auditor	Update entity in auditor		X
CTR Complementary Table Data Maintenance : BR auditor	Delete entity from auditor		X
CTR Complementary Table Data Maintenance : BR balances	Get entities from balancete	X	
CTR Complementary Table Data Maintenance : BR balances	Add new entity to balancete		X
CTR Complementary Table Data Maintenance : BR balances	Get entity from balancete by key	X	
CTR Complementary Table Data Maintenance : BR balances	Update entity in balancete		X
CTR Complementary Table Data Maintenance : BR balances	Delete entity from balancete		X
CTR Complementary Table Data Maintenance : BR balance sheet	Get entities from bal_patri	X	
CTR Complementary Table Data Maintenance : BR balance sheet	Add new entity to bal_patri		X

CTR Complementary Table Data Maintenance : BR balance sheet	Get entity from bal_patri by key	X	
CTR Complementary Table Data Maintenance : BR balance sheet	Update entity in bal_patri		X
CTR Complementary Table Data Maintenance : BR balance sheet	Delete entity from bal_patri		X
CTR Complementary Table Data Maintenance : BR identification of depen	Get entities from benefdep	X	
CTR Complementary Table Data Maintenance : BR identification of depen	Add new entity to benefdep		X
CTR Complementary Table Data Maintenance : BR identification of depen	Get entity from benefdep by key	X	
CTR Complementary Table Data Maintenance : BR identification of depen	Update entity in benefdep		X
CTR Complementary Table Data Maintenance : BR identification of depen	Delete entity from benefdep		X
CTR Complementary Table Data Maintenance : BR ident corporate collect	Get entities from benefops	X	
CTR Complementary Table Data Maintenance : BR ident corporate collect	Add new entity to benefops		X
CTR Complementary Table Data Maintenance : BR ident corporate collect	Get entity from benefops by key	X	
CTR Complementary Table Data Maintenance : BR ident corporate collect	Update entity in benefops		X
CTR Complementary Table Data Maintenance : BR ident corporate collect	Delete entity from benefops		X
CTR Complementary Table Data Maintenance : BR collective health insur	Get entities from benefopsr	X	
CTR Complementary Table Data Maintenance : BR collective health insur	Add new entity to benefopsr		X
CTR Complementary Table Data Maintenance : BR collective health insur	Get entity from benefopsr by key	X	
CTR Complementary Table Data Maintenance : BR collective health insur	Update entity in benefopsr		X
CTR Complementary Table Data Maintenance : BR collective health insur	Delete entity from benefopsr		X
CTR Complementary Table Data Maintenance : BR tax benefit	Get entities from bene_fisc	X	
CTR Complementary Table Data Maintenance : BR tax benefit	Add new entity to bene_fisc		X
CTR Complementary Table Data Maintenance : BR tax benefit	Get entity from bene_fisc by key	X	
CTR Complementary Table Data Maintenance : BR tax benefit	Update entity in bene_fisc		X
CTR Complementary Table Data Maintenance : BR tax benefit	Delete entity from bene_fisc		X
CTR Complementary Table Data Maintenance : BR good incorp into fixed	Get entities from bensencar	X	
CTR Complementary Table Data Maintenance : BR good incorp into fixed	Add new entity to bensencar		X
CTR Complementary Table Data Maintenance : BR good incorp into fixed	Get entity from bensencar by key	X	
CTR Complementary Table Data Maintenance : BR good incorp into fixed	Update entity in bensencar		X
CTR Complementary Table Data Maintenance : BR good incorp into fixed	Delete entity from bensencar		X
CTR Complementary Table Data Maintenance : BR participant registration	Get entities from cad_part	X	
CTR Complementary Table Data Maintenance : BR participant registration	Add new entity to cad_part		X
CTR Complementary Table Data Maintenance : BR participant registration	Get entity from cad_part by key	X	
CTR Complementary Table Data Maintenance : BR participant registration	Update entity in cad_part		X
CTR Complementary Table Data Maintenance : BR participant registration	Delete entity from cad_part		X
CTR Complementary Table Data Maintenance : BR agglutination account	Get entities from cagl_cpl	X	
CTR Complementary Table Data Maintenance : BR agglutination account	Add new entity to cagl_cpl		X
CTR Complementary Table Data Maintenance : BR agglutination account	Get entity from cagl_cpl by key	X	
CTR Complementary Table Data Maintenance : BR agglutination account	Update entity in cagl_cpl		X
CTR Complementary Table Data Maintenance : BR agglutination account	Delete entity from cagl_cpl		X
CTR Complementary Table Data Maintenance : BR canceled fiscal docum	Get entities from canc_doc	X	
CTR Complementary Table Data Maintenance : BR canceled fiscal docum	Add new entity to canc_doc		X
CTR Complementary Table Data Maintenance : BR canceled fiscal docum	Get entity from canc_doc by key	X	
CTR Complementary Table Data Maintenance : BR canceled fiscal docum	Update entity in canc_doc		X
CTR Complementary Table Data Maintenance : BR canceled fiscal docum	Delete entity from canc_doc		X
CTR Complementary Table Data Maintenance : BR shadow table for plant	Get entities from centro	X	
CTR Complementary Table Data Maintenance : BR shadow table for plant	Add new entity to centro		X
CTR Complementary Table Data Maintenance : BR shadow table for plant	Get entity from centro by key	X	
CTR Complementary Table Data Maintenance : BR shadow table for plant	Update entity in centro		X
CTR Complementary Table Data Maintenance : BR shadow table for plant	Delete entity from centro		X
CTR Complementary Table Data Maintenance : BR cost center	Get entities from cen_custo	X	
CTR Complementary Table Data Maintenance : BR cost center	Add new entity to cen_custo		X
CTR Complementary Table Data Maintenance : BR cost center	Get entity from cen_custo by key	X	
CTR Complementary Table Data Maintenance : BR cost center	Update entity in cen_custo		X
CTR Complementary Table Data Maintenance : BR cost center	Delete entity from cen_custo		X
CTR Complementary Table Data Maintenance : BR profit center	Get entities from cen_lucro	X	
CTR Complementary Table Data Maintenance : BR profit center	Add new entity to cen_lucro		X
CTR Complementary Table Data Maintenance : BR profit center	Get entity from cen_lucro by key	X	
CTR Complementary Table Data Maintenance : BR profit center	Update entity in cen_lucro		X
CTR Complementary Table Data Maintenance : BR profit center	Delete entity from cen_lucro		X
CTR Complementary Table Data Maintenance : BR cupom fiscal eletronic	Get entities from cfe	X	
CTR Complementary Table Data Maintenance : BR cupom fiscal eletronic	Add new entity to cfe		X
CTR Complementary Table Data Maintenance : BR cupom fiscal eletronic	Get entity from cfe by key	X	
CTR Complementary Table Data Maintenance : BR cupom fiscal eletronic	Update entity in cfe		X
CTR Complementary Table Data Maintenance : BR cupom fiscal eletronic	Delete entity from cfe		X
CTR Complementary Table Data Maintenance : BR cfe ana item w ST con	Get entities from cfe_an_cm	X	
CTR Complementary Table Data Maintenance : BR cfe ana item w ST con	Add new entity to cfe_an_cm		X
CTR Complementary Table Data Maintenance : BR cfe ana item w ST con	Get entity from cfe_an_cm by key	X	
CTR Complementary Table Data Maintenance : BR cfe ana item w ST con	Update entity in cfe_an_cm		X
CTR Complementary Table Data Maintenance : BR cfe ana item w ST con	Delete entity from cfe_an_cm		X
CTR Complementary Table Data Maintenance : BR cfe analytical item w S	Get entities from cfe_an_it	X	
CTR Complementary Table Data Maintenance : BR cfe analytical item w S	Add new entity to cfe_an_it		X
CTR Complementary Table Data Maintenance : BR cfe analytical item w S	Get entity from cfe_an_it by key	X	
CTR Complementary Table Data Maintenance : BR cfe analytical item w S	Update entity in cfe_an_it		X
CTR Complementary Table Data Maintenance : BR cfe analytical item w S	Delete entity from cfe_an_it		X
CTR Complementary Table Data Maintenance : BR cfe items with ST com	Get entities from cfe_cmpl	X	
CTR Complementary Table Data Maintenance : BR cfe items with ST com	Add new entity to cfe_cmpl		X
CTR Complementary Table Data Maintenance : BR cfe items with ST com	Get entity from cfe_cmpl by key	X	
CTR Complementary Table Data Maintenance : BR cfe items with ST com	Update entity in cfe_cmpl		X

CTR Complementary Table Data Maintenance : BR cfe items with ST com	Delete entity from cfe_cmpl		X
CTR Complementary Table Data Maintenance : BR cfe SAT equipment ID	Get entities from cfe_eq_sa	X	
CTR Complementary Table Data Maintenance : BR cfe SAT equipment ID	Add new entity to cfe_eq_sa		X
CTR Complementary Table Data Maintenance : BR cfe SAT equipment ID	Get entity from cfe_eq_sa by key	X	
CTR Complementary Table Data Maintenance : BR cfe SAT equipment ID	Update entity in cfe_eq_sa		X
CTR Complementary Table Data Maintenance : BR cfe SAT equipment ID	Delete entity from cfe_eq_sa		X
CTR Complementary Table Data Maintenance : BR cfe items with ST	Get entities from cfe_it	X	
CTR Complementary Table Data Maintenance : BR cfe items with ST	Add new entity to cfe_it		X
CTR Complementary Table Data Maintenance : BR cfe items with ST	Get entity from cfe_it by key	X	
CTR Complementary Table Data Maintenance : BR cfe items with ST	Update entity in cfe_it		X
CTR Complementary Table Data Maintenance : BR cfe items with ST	Delete entity from cfe_it		X
CTR Complementary Table Data Maintenance : BR referenced cfe	Get entities from cfiscal_r	X	
CTR Complementary Table Data Maintenance : BR referenced cfe	Add new entity to cfiscal_r		X
CTR Complementary Table Data Maintenance : BR referenced cfe	Get entity from cfiscal_r by key	X	
CTR Complementary Table Data Maintenance : BR referenced cfe	Update entity in cfiscal_r		X
CTR Complementary Table Data Maintenance : BR referenced cfe	Delete entity from cfiscal_r		X
CTR Complementary Table Data Maintenance : BR referenced cupom fisc	Get entities from cf_r	X	
CTR Complementary Table Data Maintenance : BR referenced cupom fisc	Add new entity to cf_r		X
CTR Complementary Table Data Maintenance : BR referenced cupom fisc	Get entity from cf_r by key	X	
CTR Complementary Table Data Maintenance : BR referenced cupom fisc	Update entity in cf_r		X
CTR Complementary Table Data Maintenance : BR referenced cupom fisc	Delete entity from cf_r		X
CTR Complementary Table Data Maintenance : BR SPED checklist answe	Get entities from checklist	X	
CTR Complementary Table Data Maintenance : BR SPED checklist answe	Add new entity to checklist		X
CTR Complementary Table Data Maintenance : BR SPED checklist answe	Get entity from checklist by key	X	
CTR Complementary Table Data Maintenance : BR SPED checklist answe	Update entity in checklist		X
CTR Complementary Table Data Maintenance : BR SPED checklist answe	Delete entity from checklist		X
CTR Complementary Table Data Maintenance : BR asset	Get entities from ciap_atv	X	
CTR Complementary Table Data Maintenance : BR asset	Add new entity to ciap_atv		X
CTR Complementary Table Data Maintenance : BR asset	Get entity from ciap_atv by key	X	
CTR Complementary Table Data Maintenance : BR asset	Update entity in ciap_atv		X
CTR Complementary Table Data Maintenance : BR asset	Delete entity from ciap_atv		X
CTR Complementary Table Data Maintenance : BR credit factor	Get entities from ciap_cred	X	
CTR Complementary Table Data Maintenance : BR credit factor	Add new entity to ciap_cred		X
CTR Complementary Table Data Maintenance : BR credit factor	Get entity from ciap_cred by key	X	
CTR Complementary Table Data Maintenance : BR credit factor	Update entity in ciap_cred		X
CTR Complementary Table Data Maintenance : BR credit factor	Delete entity from ciap_cred		X
CTR Complementary Table Data Maintenance : BR CIAP assets and com	Get entities from ciap_mov	X	
CTR Complementary Table Data Maintenance : BR CIAP assets and com	Add new entity to ciap_mov		X
CTR Complementary Table Data Maintenance : BR CIAP assets and com	Get entity from ciap_mov by key	X	
CTR Complementary Table Data Maintenance : BR CIAP assets and com	Update entity in ciap_mov		X
CTR Complementary Table Data Maintenance : BR CIAP assets and com	Delete entity from ciap_mov		X
CTR Complementary Table Data Maintenance : BR CIAP NF and record r	Get entities from ciap_nf_i	X	
CTR Complementary Table Data Maintenance : BR CIAP NF and record r	Add new entity to ciap_nf_i		X
CTR Complementary Table Data Maintenance : BR CIAP NF and record r	Get entity from ciap_nf_i by key	X	
CTR Complementary Table Data Maintenance : BR CIAP NF and record r	Update entity in ciap_nf_i		X
CTR Complementary Table Data Maintenance : BR CIAP NF and record r	Delete entity from ciap_nf_i		X
CTR Complementary Table Data Maintenance : BR communication servic	Get entities from cnv201fat	X	
CTR Complementary Table Data Maintenance : BR communication servic	Add new entity to cnv201fat		X
CTR Complementary Table Data Maintenance : BR communication servic	Get entity from cnv201fat by key	X	
CTR Complementary Table Data Maintenance : BR communication servic	Update entity in cnv201fat		X
CTR Complementary Table Data Maintenance : BR communication servic	Delete entity from cnv201fat		X
CTR Complementary Table Data Maintenance : BR credit recharge in term	Get entities from cnv201ppg	X	
CTR Complementary Table Data Maintenance : BR credit recharge in term	Add new entity to cnv201ppg		X
CTR Complementary Table Data Maintenance : BR credit recharge in term	Get entity from cnv201ppg by key	X	
CTR Complementary Table Data Maintenance : BR credit recharge in term	Update entity in cnv201ppg		X
CTR Complementary Table Data Maintenance : BR credit recharge in term	Delete entity from cnv201ppg		X
CTR Complementary Table Data Maintenance : BR fuel movements	Get entities from combu_mov	X	
CTR Complementary Table Data Maintenance : BR fuel movements	Add new entity to combu_mov		X
CTR Complementary Table Data Maintenance : BR fuel movements	Get entity from combu_mov by key	X	
CTR Complementary Table Data Maintenance : BR fuel movements	Update entity in combu_mov		X
CTR Complementary Table Data Maintenance : BR fuel movements	Delete entity from combu_mov		X
CTR Complementary Table Data Maintenance : BR oil station pump nozzle	Get entities from com_bic_b	X	
CTR Complementary Table Data Maintenance : BR oil station pump nozzle	Add new entity to com_bic_b		X
CTR Complementary Table Data Maintenance : BR oil station pump nozzle	Get entity from com_bic_b by key	X	
CTR Complementary Table Data Maintenance : BR oil station pump nozzle	Update entity in com_bic_b		X
CTR Complementary Table Data Maintenance : BR oil station pump nozzle	Delete entity from com_bic_b		X
CTR Complementary Table Data Maintenance : BR fuel pump	Get entities from com_bomba	X	
CTR Complementary Table Data Maintenance : BR fuel pump	Add new entity to com_bomba		X
CTR Complementary Table Data Maintenance : BR fuel pump	Get entity from com_bomba by key	X	
CTR Complementary Table Data Maintenance : BR fuel pump	Update entity in com_bomba		X
CTR Complementary Table Data Maintenance : BR fuel pump	Delete entity from com_bomba		X
CTR Complementary Table Data Maintenance : BR fuel sales volume	Get entities from com_v_ven	X	
CTR Complementary Table Data Maintenance : BR fuel sales volume	Add new entity to com_v_ven		X
CTR Complementary Table Data Maintenance : BR fuel sales volume	Get entity from com_v_ven by key	X	
CTR Complementary Table Data Maintenance : BR fuel sales volume	Update entity in com_v_ven		X
CTR Complementary Table Data Maintenance : BR fuel sales volume	Delete entity from com_v_ven		X
CTR Complementary Table Data Maintenance : BR social sec on gross re	Get entities from conprebru	X	

CTR Complementary Table Data Maintenance : BR social sec on gross re	Add new entity to conprebru		X
CTR Complementary Table Data Maintenance : BR social sec on gross re	Get entity from conprebru by key	X	
CTR Complementary Table Data Maintenance : BR social sec on gross re	Update entity in conprebru		X
CTR Complementary Table Data Maintenance : BR social sec on gross re	Delete entity from conprebru		X
CTR Complementary Table Data Maintenance : BR part in corp consortiun	Get entities from conso_emp	X	
CTR Complementary Table Data Maintenance : BR part in corp consortiun	Add new entity to conso_emp		X
CTR Complementary Table Data Maintenance : BR part in corp consortiun	Get entity from conso_emp by key	X	
CTR Complementary Table Data Maintenance : BR part in corp consortiun	Update entity in conso_emp		X
CTR Complementary Table Data Maintenance : BR part in corp consortiun	Delete entity from conso_emp		X
CTR Complementary Table Data Maintenance : BR consolidated IPI value	Get entities from cons_aipi	X	
CTR Complementary Table Data Maintenance : BR consolidated IPI value	Add new entity to cons_aipi		X
CTR Complementary Table Data Maintenance : BR consolidated IPI value	Get entity from cons_aipi by key	X	
CTR Complementary Table Data Maintenance : BR consolidated IPI value	Update entity in cons_aipi		X
CTR Complementary Table Data Maintenance : BR consolidated IPI value	Delete entity from cons_aipi		X
CTR Complementary Table Data Maintenance : BR standard specific cons	Get entities from cons_espc	X	
CTR Complementary Table Data Maintenance : BR standard specific cons	Add new entity to cons_espc		X
CTR Complementary Table Data Maintenance : BR standard specific cons	Get entity from cons_espc by key	X	
CTR Complementary Table Data Maintenance : BR standard specific cons	Update entity in cons_espc		X
CTR Complementary Table Data Maintenance : BR standard specific cons	Delete entity from cons_espc		X
CTR Complementary Table Data Maintenance : BR standard specific cons	Get entities from cons_espc_v2	X	
CTR Complementary Table Data Maintenance : BR standard specific cons	Add new entity to cons_espc_v2		X
CTR Complementary Table Data Maintenance : BR standard specific cons	Get entity from cons_espc_v2 by key	X	
CTR Complementary Table Data Maintenance : BR standard specific cons	Update entity in cons_espc_v2		X
CTR Complementary Table Data Maintenance : BR standard specific cons	Delete entity from cons_espc_v2		X
CTR Complementary Table Data Maintenance : BR account codes aggluti	Get entities from conta_agl	X	
CTR Complementary Table Data Maintenance : BR account codes aggluti	Add new entity to conta_agl		X
CTR Complementary Table Data Maintenance : BR account codes aggluti	Get entity from conta_agl by key	X	
CTR Complementary Table Data Maintenance : BR account codes aggluti	Update entity in conta_agl		X
CTR Complementary Table Data Maintenance : BR account codes aggluti	Delete entity from conta_agl		X
CTR Complementary Table Data Maintenance : BR schema gross revenue	Get entities from contprvrb	X	
CTR Complementary Table Data Maintenance : BR schema gross revenue	Add new entity to contprvrb		X
CTR Complementary Table Data Maintenance : BR schema gross revenue	Get entity from contprvrb by key	X	
CTR Complementary Table Data Maintenance : BR schema gross revenue	Update entity in contprvrb		X
CTR Complementary Table Data Maintenance : BR schema gross revenue	Delete entity from contprvrb		X
CTR Complementary Table Data Maintenance : BR retained contrib at sou	Get entities from contretci	X	
CTR Complementary Table Data Maintenance : BR retained contrib at sou	Add new entity to contretci		X
CTR Complementary Table Data Maintenance : BR retained contrib at sou	Get entity from contretci by key	X	
CTR Complementary Table Data Maintenance : BR retained contrib at sou	Update entity in contretci		X
CTR Complementary Table Data Maintenance : BR retained contrib at sou	Delete entity from contretci		X
CTR Complementary Table Data Maintenance : BR source retained contril	Get entities from contretft	X	
CTR Complementary Table Data Maintenance : BR source retained contril	Add new entity to contretft		X
CTR Complementary Table Data Maintenance : BR source retained contril	Get entity from contretft by key	X	
CTR Complementary Table Data Maintenance : BR source retained contril	Update entity in contretft		X
CTR Complementary Table Data Maintenance : BR source retained contril	Delete entity from contretft		X
CTR Complementary Table Data Maintenance : BR tax payable cont rever	Get entities from contr_cod	X	
CTR Complementary Table Data Maintenance : BR tax payable cont rever	Add new entity to contr_cod		X
CTR Complementary Table Data Maintenance : BR tax payable cont rever	Get entity from contr_cod by key	X	
CTR Complementary Table Data Maintenance : BR tax payable cont rever	Update entity in contr_cod		X
CTR Complementary Table Data Maintenance : BR tax payable cont rever	Delete entity from contr_cod		X
CTR Complementary Table Data Maintenance : BR import export contracti	Get entities from contr_i_e	X	
CTR Complementary Table Data Maintenance : BR import export contracti	Add new entity to contr_i_e		X
CTR Complementary Table Data Maintenance : BR import export contracti	Get entity from contr_i_e by key	X	
CTR Complementary Table Data Maintenance : BR import export contracti	Update entity in contr_i_e		X
CTR Complementary Table Data Maintenance : BR import export contracti	Delete entity from contr_i_e		X
CTR Complementary Table Data Maintenance : BR substitute contributor	Get entities from contr_sub	X	
CTR Complementary Table Data Maintenance : BR substitute contributor	Add new entity to contr_sub		X
CTR Complementary Table Data Maintenance : BR substitute contributor	Get entity from contr_sub by key	X	
CTR Complementary Table Data Maintenance : BR substitute contributor	Update entity in contr_sub		X
CTR Complementary Table Data Maintenance : BR substitute contributor	Delete entity from contr_sub		X
CTR Complementary Table Data Maintenance : BR tax period contribution	Get entities from cont_dete	X	
CTR Complementary Table Data Maintenance : BR tax period contribution	Add new entity to cont_dete		X
CTR Complementary Table Data Maintenance : BR tax period contribution	Get entity from cont_dete by key	X	
CTR Complementary Table Data Maintenance : BR tax period contribution	Update entity in cont_dete		X
CTR Complementary Table Data Maintenance : BR tax period contribution	Delete entity from cont_dete		X
CTR Complementary Table Data Maintenance : BR tax period contrib cons	Get entities from cont_impo	X	
CTR Complementary Table Data Maintenance : BR tax period contrib cons	Add new entity to cont_impo		X
CTR Complementary Table Data Maintenance : BR tax period contrib cons	Get entity from cont_impo by key	X	
CTR Complementary Table Data Maintenance : BR tax period contrib cons	Update entity in cont_impo		X
CTR Complementary Table Data Maintenance : BR tax period contrib cons	Delete entity from cont_impo		X
CTR Complementary Table Data Maintenance : BR inventory corr and sup	Get entities from corr_apon	X	
CTR Complementary Table Data Maintenance : BR inventory corr and sup	Add new entity to corr_apon		X
CTR Complementary Table Data Maintenance : BR inventory corr and sup	Get entity from corr_apon by key	X	
CTR Complementary Table Data Maintenance : BR inventory corr and sup	Update entity in corr_apon		X
CTR Complementary Table Data Maintenance : BR inventory corr and sup	Delete entity from corr_apon		X
CTR Complementary Table Data Maintenance : BR inventory corrections	Get entities from corr_inv	X	
CTR Complementary Table Data Maintenance : BR inventory corrections	Add new entity to corr_inv		X
CTR Complementary Table Data Maintenance : BR inventory corrections	Get entity from corr_inv by key	X	

CTR Complementary Table Data Maintenance : BR inventory corrections	Update entity in corr_inv		X
CTR Complementary Table Data Maintenance : BR inventory corrections	Delete entity from corr_inv		X
CTR Complementary Table Data Maintenance : BR lading aerial complem	Get entities from cpl_co_ae	X	
CTR Complementary Table Data Maintenance : BR lading aerial complem	Add new entity to cpl_co_ae		X
CTR Complementary Table Data Maintenance : BR lading aerial complem	Get entity from cpl_co_ae by key	X	
CTR Complementary Table Data Maintenance : BR lading aerial complem	Update entity in cpl_co_ae		X
CTR Complementary Table Data Maintenance : BR lading aerial complem	Delete entity from cpl_co_ae		X
CTR Complementary Table Data Maintenance : BR lading waterway comp	Get entities from cpl_co_aq	X	
CTR Complementary Table Data Maintenance : BR lading waterway comp	Add new entity to cpl_co_aq		X
CTR Complementary Table Data Maintenance : BR lading waterway comp	Get entity from cpl_co_aq by key	X	
CTR Complementary Table Data Maintenance : BR lading waterway comp	Update entity in cpl_co_aq		X
CTR Complementary Table Data Maintenance : BR lading waterway comp	Delete entity from cpl_co_aq		X
CTR Complementary Table Data Maintenance : BR lading multimodal load	Get entities from cpl_co_mc	X	
CTR Complementary Table Data Maintenance : BR lading multimodal load	Add new entity to cpl_co_mc		X
CTR Complementary Table Data Maintenance : BR lading multimodal load	Get entity from cpl_co_mc by key	X	
CTR Complementary Table Data Maintenance : BR lading multimodal load	Update entity in cpl_co_mc		X
CTR Complementary Table Data Maintenance : BR lading multimodal load	Delete entity from cpl_co_mc		X
CTR Complementary Table Data Maintenance : BR lading highway compl	Get entities from cpl_co_ro	X	
CTR Complementary Table Data Maintenance : BR lading highway compl	Add new entity to cpl_co_ro		X
CTR Complementary Table Data Maintenance : BR lading highway compl	Get entity from cpl_co_ro by key	X	
CTR Complementary Table Data Maintenance : BR lading highway compl	Update entity in cpl_co_ro		X
CTR Complementary Table Data Maintenance : BR lading highway compl	Delete entity from cpl_co_ro		X
CTR Complementary Table Data Maintenance : BR tax credits control	Get entities from credfisc	X	
CTR Complementary Table Data Maintenance : BR tax credits control	Add new entity to credfisc		X
CTR Complementary Table Data Maintenance : BR tax credits control	Get entity from credfisc by key	X	
CTR Complementary Table Data Maintenance : BR tax credits control	Update entity in credfisc		X
CTR Complementary Table Data Maintenance : BR tax credits control	Delete entity from credfisc		X

Statistical Key Figure (A2X) : Statistical key figure	Read all available statistical key figures	X	
Statistical Key Figure (A2X) : Statistical key figure	Create a new statistical key figure		X
Statistical Key Figure (A2X) : Statistical key figure	Read a specific statistical key figure	X	
Statistical Key Figure (A2X) : Statistical key figure	Update a specific statistical key figure		X
Statistical Key Figure (A2X) : Statistical key figure	Delete a specific statistical key figure		X
Statistical Key Figure (A2X) : Statistical key figure text	Read all language-dependent fields for a specific statistical key figure	X	
Statistical Key Figure (A2X) : Statistical key figure text	Create language-dependent fields for a specific statistical key figure		X
Statistical Key Figure (A2X) : Statistical key figure text	Read statistical key figure header fields for a specific language	X	
Statistical Key Figure (A2X) : Statistical key figure text	Read all language-dependent fields for all statistical key figures	X	
Statistical Key Figure (A2X) : Statistical key figure text	Create language-dependent fields for a specific statistical key figure		X
Statistical Key Figure (A2X) : Statistical key figure text	Read language-dependent fields of a statistical key figure in a specific langu	X	
Statistical Key Figure (A2X) : Statistical key figure text	Update language-dependent fields of a statistical key figure in a specific language		X
Statistical Key Figure (A2X) : Statistical key figure text	Delete a specific translation of language-dependent fields for a statistical key figure		X
Statistical Key Figure (A2X) : Batch requests	Send a group of requests		X
Work Center : Capacity assignment	Read the capacity assignments of all work centers	X	
Work Center : Capacity assignment	Read the capacity assignment for a work center and the capacity category a	X	
Work Center : Capacity interval	Read the list of all work center capacity intervals for a work center	X	
Work Center : Capacity interval	Create a new work center capacity interval for the given workcenter		X
Work Center : Capacity interval	Read all the capacity intervals of all workcenter capacities	X	
Work Center : Capacity interval	Create a new capacity interval for a given work center capacity		X
Work Center : Capacity interval	Read the capacity interval for the given primary keys	X	
Work Center : Capacity interval	Update the capacity interval for the given primary keys		X
Work Center : Queued operations capacity	Read the list of all the queued operations for a work center	X	
Work Center : Queued operations capacity	Read work center operations	X	
Work Center : Queued operations capacity	Read a single work center operation by its key	X	
Work Center : Daily operations capacity	Read the list of all operations for the current day in a work center	X	
Work Center : Daily operations capacity	Read the current day's operations for a work center	X	
Work Center : Daily operations capacity	Read the current day's operation for a work center	X	
Work Center : Capacity assignment version 2	Read the list of all the queued operations for a work center	X	
Work Center : Capacity assignment version 2	Read the list of all operations for the current day in a work center	X	
Work Center : Capacity assignment version 2	Read the capacity assignments of all work centers	X	
Work Center : Capacity assignment version 2	Create a new capacity assignment for a work center		X
Work Center : Capacity assignment version 2	Read the capacity assignment of a work center for the given primary keys	X	
Work Center : Capacity assignment version 2	Update the capacity assignment of a work center for the given primary keys		X
Work Center : Capacity header	Read the capacity header of a work center capacity assignment for the given	X	
Work Center : Capacity header	Read the capacity headers of all work center capacity assignments	X	
Work Center : Capacity header	Read the capacity header of a given capacity id	X	
Work Center : Capacity header	Update the capacity header of a given capacity id		X
Work Center : Capacity interval version 2	Read the capacity interval for the given primary keys	X	
Work Center : Capacity interval version 2	Create a new capacity interval for a work center capacity		X
Work Center : Capacity interval version 2	Read the capacity intervals of all capacities	X	
Work Center : Capacity interval version 2	Create a new capacity interval for a work center capacity		X
Work Center : Capacity interval version 2	Read the capacity interval for the given primary keys	X	
Work Center : Capacity interval version 2	Update the capacity interval for the given primary keys		X
Work Center : Capacity description	Read all the descriptions for a given capacity id	X	
Work Center : Capacity description	Read the descriptions of all capacities	X	
Work Center : Capacity description	Read the capacity description of a given capacity ID in the given language	X	
Work Center : Capacity description	Update the capacity description for a given capacity ID in the given language		X
Work Center : Capacity shift	Read all the capacity shifts for the given primary keys	X	
Work Center : Capacity shift	Create a new capacity shift for a work center capacity interval		X
Work Center : Capacity shift	Read all the capacity shifts of all work center capacity intervals	X	
Work Center : Capacity shift	Create a new capacity shift for a work center capacity interval		X
Work Center : Capacity shift	Read capacity shift for the given primary keys	X	
Work Center : Capacity shift	Update capacity shift for the given primary keys		X
Work Center : Capacity shift version 2	Read all the capacity shifts of a capacity interval for the given primary keys	X	
Work Center : Capacity shift version 2	Create a new capacity shift for a work center capacity interval		X
Work Center : Capacity shift version 2	Read the capacity shifts of all capacity intervals	X	
Work Center : Capacity shift version 2	Create a new capacity shift for a work center capacity interval		X
Work Center : Capacity shift version 2	Read the capacity shift for the given primary keys	X	
Work Center : Capacity shift version 2	Update the capacity shift for the given primary keys		X
Work Center : Operation load distribution	Read the evaluation and load distribution of an order for a work center capa	X	
Work Center : Capacity evaluation	Read the evaluation and load distribution for a work center capacity	X	
Work Center : Cost center allocation	Read the cost center allocations of all work centers	X	
Work Center : Cost center allocation	Create a cost center allocation for a work center		X
Work Center : Cost center allocation	Read a work center's cost center allocation for the given primary keys	X	
Work Center : Cost center allocation	Update a work center's cost center allocation for the given primary keys		X
Work Center : Daily operations	Read the list of operations for current day of all work centers	X	
Work Center : Daily operations	Read the operation for current day of a work center for the given primary key	X	
Work Center : Description	Read the descriptions of all work centers	X	
Work Center : Description	Read the work center description for a given work center ID in the given lang	X	
Work Center : Description	Update the work center description for a given work center ID in the given language		X
Work Center : Queued operations	Read the list of queued operations of all work centers	X	
Work Center : Queued operations	Read the queued operation for the given primary keys	X	

Work Center : Header	Read all the assigned capacities of a given work center id	X	
Work Center : Header	Read all the assigned capacities of a given work center id	X	
Work Center : Header	Create a new capacity assignment for a work center		X
Work Center : Header	Read the scheduling relevant capacity header of a given work center id	X	
Work Center : Header	Read all the cost center allocations of a given work center id	X	
Work Center : Header	Create a cost center allocation for a work center		X
Work Center : Header	Read the list of all operations for the current day of a given work center id	X	
Work Center : Header	Read all the work center descriptions of a given work center id	X	
Work Center : Header	Read the list of all the queued operations of a given work center id	X	
Work Center : Header	Read all the headers of all work centers	X	
Work Center : Header	Create a new work center		X
Work Center : Header	Read the work center header of a given work center id	X	
Work Center : Header	Update the work center header of the given work center id		X
Work Center : Batch requests	Send a group of requests		X
Purchase Order for Clinical Trials : Purchase order inner label barcode	Get the inner label barcode entities related to an outer label barcode entity	X	
Purchase Order for Clinical Trials : Subcontracting components	Get the component details of all the subcontracting items, in all the pos in th	X	
Purchase Order for Clinical Trials : Subcontracting components	Add a subcontracting component line to an item in a purchase order		X
Purchase Order for Clinical Trials : Subcontracting components	Get the component details of a particular item in a purchase order	X	
Purchase Order for Clinical Trials : Subcontracting components	Update the subcontracting component details of a particular schedule line of an item in a purc		X
Purchase Order for Clinical Trials : Subcontracting components	Delete the subcontracting component details of a schedule line of an item in a purchase orde		X
Purchase Order for Clinical Trials : Purchase order	Get the header details of all the purchase orders in the system	X	
Purchase Order for Clinical Trials : Purchase order	Create a new purchase order		X
Purchase Order for Clinical Trials : Purchase order	Get the header details of a purchase order	X	
Purchase Order for Clinical Trials : Purchase order	Update the header details of a purchase order		X
Purchase Order for Clinical Trials : Purchase order	Delete all items of a purchase order that has been posted		X
Purchase Order for Clinical Trials : Item	Get the outer label barcode entities related to a purchase order item	X	
Purchase Order for Clinical Trials : Item	Get the item details of all the items in a purchase order	X	
Purchase Order for Clinical Trials : Item	Add an item to a purchase order		X
Purchase Order for Clinical Trials : Item	Get the header details of an item in a purchase order	X	
Purchase Order for Clinical Trials : Item	Get the item details of all the items, in all the purchase orders in the system	X	
Purchase Order for Clinical Trials : Item	Add an item to a purchase order		X
Purchase Order for Clinical Trials : Item	Get the item details of an item in a purchase order	X	
Purchase Order for Clinical Trials : Item	Update the item details of an item in a purchase order		X
Purchase Order for Clinical Trials : Item	Delete an item in a purchase order		X
Purchase Order for Clinical Trials : Header notes	Get all the header notes or texts of a purchase order	X	
Purchase Order for Clinical Trials : Header notes	Get the header texts or notes of all the purchase orders in the system	X	
Purchase Order for Clinical Trials : Header notes	Add new text or note to a purchase order		X
Purchase Order for Clinical Trials : Header notes	Get the header texts or notes of a purchase order	X	
Purchase Order for Clinical Trials : Header notes	Updates the header text or note of a particular text type in a purchase order.		X
Purchase Order for Clinical Trials : Header notes	Delete the header text or note of a particular text type in a purchase order		X
Purchase Order for Clinical Trials : Account assignment	Get the account assignment details of all the accounting lines of an item in a	X	
Purchase Order for Clinical Trials : Account assignment	Add the account assignment details to an item in a purchase order		X
Purchase Order for Clinical Trials : Account assignment	Get the account assignment details of all the accounting lines of all the items	X	
Purchase Order for Clinical Trials : Account assignment	Add a new accounting line to an item in a purchase order		X
Purchase Order for Clinical Trials : Account assignment	Get the account assignment details of a particular accounting line of an item	X	
Purchase Order for Clinical Trials : Account assignment	Update the account assignment details of a particular accounting line of an item in a purchase		X
Purchase Order for Clinical Trials : Account assignment	Delete an accounting line of an item in a purchase order		X
Purchase Order for Clinical Trials : Item notes	Get all the item notes of an item in a purchase order	X	
Purchase Order for Clinical Trials : Item notes	Add or Create a note or text to an item in a purchase order		X
Purchase Order for Clinical Trials : Item notes	Get the item texts/notes of all the items, in all the purchase orders in the sys	X	
Purchase Order for Clinical Trials : Item notes	Add new text or note to a purchase order item		X
Purchase Order for Clinical Trials : Item notes	Get the item texts/notes of a particular note type in a purchase order item	X	
Purchase Order for Clinical Trials : Item notes	Update the item text or note of a particular text type in a purchase order item		X
Purchase Order for Clinical Trials : Item notes	Delete the item text or note of a particular text type in a purchase order item		X
Purchase Order for Clinical Trials : Pricing element	Get the pricing details of all the conditions of an item in a purchase order	X	
Purchase Order for Clinical Trials : Pricing element	Add the pricing condition details to an item in a purchase order		X
Purchase Order for Clinical Trials : Pricing element	Get the pricing details of all the condition lines of all the items, in all the pos	X	
Purchase Order for Clinical Trials : Pricing element	Add a new condition line to an item in a purchase order		X
Purchase Order for Clinical Trials : Pricing element	Get the pricing details of a particular condition line of an item in a purchase o	X	
Purchase Order for Clinical Trials : Pricing element	Update the pricing details of a particular condition line of an item in a purchase order		X
Purchase Order for Clinical Trials : Pricing element	Delete the pricing details of a particular condition line of an item in a purchase order		X
Purchase Order for Clinical Trials : Schedule lines	Get all the subcontracting component details of a schedule line of an item in	X	
Purchase Order for Clinical Trials : Schedule lines	Add the subcontracting component details to a schedule line of an item in a purchase order		X
Purchase Order for Clinical Trials : Schedule lines	Get all the schedule lines of an item in a purchase order	X	
Purchase Order for Clinical Trials : Schedule lines	Add the schedule line details to an item in a purchase order		X
Purchase Order for Clinical Trials : Schedule lines	Get the schedule line details of all the items, in all the purchase orders in the	X	
Purchase Order for Clinical Trials : Schedule lines	Add a new schedule line to an item in a purchase order		X
Purchase Order for Clinical Trials : Schedule lines	Get the schedule line details of an item in a purchase order	X	
Purchase Order for Clinical Trials : Schedule lines	Update the schedule line details of a particular schedule line of an item in a purchase order		X
Purchase Order for Clinical Trials : Schedule lines	Delete the schedule line of an item in a purchase order		X
Purchase Order for Clinical Trials : Purchase order medication numbers	Get the header data of a purchase order item including the medication numb	X	
Purchase Order for Clinical Trials : Purchase order item label barcode	Get the label barcode entities related to a purchase order item	X	
Purchase Order for Clinical Trials : Batch requests	Send a group of requests		X

Sales Order (A2X) : Header pricing element	Create a header pricing element for a sales order		X
Sales Order (A2X) : Header pricing element	Read the header pricing element for a sales order	X	
Sales Order (A2X) : Header pricing element	Update a header pricing element for a sales order		X
Sales Order (A2X) : Header pricing element	Delete a header pricing element for a sales order		X
Sales Order (A2X) : Header related object	Read the related objects of a sales order header	X	
Sales Order (A2X) : Header related object	Create a related object for a sales order header		X
Sales Order (A2X) : Header related object	Read the sales order header for a related object	X	
Sales Order (A2X) : Header related object	Read related objects from the headers of all sales orders	X	
Sales Order (A2X) : Header related object	Create a related object for a sales order header		X

Sales Order (A2X) : Header related object	Read a related object from the header of a specific sales order	X	
Sales Order (A2X) : Header related object	Delete a related object from a sales order header		X
Sales Order (A2X) : Header subsequent process flow	Get entities from related to subsequentprocflowdoc	X	
Sales Order (A2X) : Header subsequent process flow	Read the sales order header data for a subsequent document of a sales ord	X	
Sales Order (A2X) : Header subsequent process flow	Read the subsequent documents of all sales orders	X	
Sales Order (A2X) : Header subsequent process flow	Read a subsequent document of a sales order	X	
Sales Order (A2X) : Header text	Read the header texts of a sales order	X	
Sales Order (A2X) : Header text	Create a header text for a sales order		X
Sales Order (A2X) : Header text	Read the sales order header for a header text	X	
Sales Order (A2X) : Header text	Read the header texts of all sales orders	X	
Sales Order (A2X) : Header text	Create a header text for a sales order		X
Sales Order (A2X) : Header text	Read a header text from a sales order	X	
Sales Order (A2X) : Header text	Update a header text for a sales order		X
Sales Order (A2X) : Header text	Delete a header text from a sales order		X
Sales Order (A2X) : Header billing plan item	Read the sales order header for a billing plan item of a sales order	X	
Sales Order (A2X) : Header billing plan item	Read the billing plan items of a sales order billing plan	X	
Sales Order (A2X) : Header billing plan item	Create a billing plan item for a sales order billing plan		X
Sales Order (A2X) : Header billing plan item	Read the billing plan of a billing plan item of a sales order header	X	
Sales Order (A2X) : Header billing plan item	Read the billing plan items of all sales orders	X	
Sales Order (A2X) : Header billing plan item	Create a billing plan item of a sales order		X
Sales Order (A2X) : Header billing plan item	Read a billing plan item of a sales order	X	
Sales Order (A2X) : Header billing plan item	Update a billing plan item of a sales order		X
Sales Order (A2X) : Header billing plan item	Delete a billing plan item of a sales order		X
Sales Order (A2X) : Header partner address	Read the sales order for a header partner address	X	
Sales Order (A2X) : Header partner address	Read the address of a sales order header partner	X	
Sales Order (A2X) : Header partner address	Read the sales order header partner for a header partner address	X	
Sales Order (A2X) : Header partner address	Read all addresses for header partners of sales orders	X	
Sales Order (A2X) : Header partner address	Read the address of a header partner of a sales order	X	
Sales Order (A2X) : Header partner address	Update the address of a header partner of a sales order		X
Sales Order (A2X) : Item billing plan	Read the sales order header for an item billing plan	X	
Sales Order (A2X) : Item billing plan	Read the billing plan of a sales order item	X	
Sales Order (A2X) : Item billing plan	Read the sales order item for an item billing plan	X	
Sales Order (A2X) : Item billing plan	Read the billing plans of all sales order items	X	
Sales Order (A2X) : Item billing plan	Read the billing plan of a sales order item	X	
Sales Order (A2X) : Item billing plan	Update the billing plan of a sales order item		X
Sales Order (A2X) : Item partner	Read the sales order header of a partner function of a sales order item	X	
Sales Order (A2X) : Item partner	Read the item partners of a specific sales order item	X	
Sales Order (A2X) : Item partner	Create an item partner for a specific sales order item		X
Sales Order (A2X) : Item partner	Read the sales order item for a partner function of a sales order item	X	
Sales Order (A2X) : Item partner	Read the item partners for all sales orders	X	
Sales Order (A2X) : Item partner	Create a partner for a sales order item with a specific partner function		X
Sales Order (A2X) : Item partner	Read an item partner of an item with a specific partner function in a specific	X	
Sales Order (A2X) : Item partner	Update a partner of a sales order item with a specific partner function		X
Sales Order (A2X) : Item partner	Delete a partner of a specific sales order item with a specific partner function		X
Sales Order (A2X) : Item preceding process flow	Read the sales order header data of a preceding item of a sales order	X	
Sales Order (A2X) : Item preceding process flow	Get entities from related to precedingprocflowdocitem	X	
Sales Order (A2X) : Item preceding process flow	Read the sales order item data for a preceding item of a sales order	X	
Sales Order (A2X) : Item preceding process flow	Read the preceding items of all sales orders items	X	
Sales Order (A2X) : Item preceding process flow	Read a preceding item for a sales order item	X	
Sales Order (A2X) : Item pricing element	Read the sales order header for a pricing element	X	
Sales Order (A2X) : Item pricing element	Read the pricing element of a sales order item	X	
Sales Order (A2X) : Item pricing element	Create a pricing element for a specific sales order item		X
Sales Order (A2X) : Item pricing element	Read the sales order item for a pricing element	X	
Sales Order (A2X) : Item pricing element	Read the item pricing elements of all sales orders	X	
Sales Order (A2X) : Item pricing element	Create an item pricing element		X
Sales Order (A2X) : Item pricing element	Read the pricing element of a item with specific pricing details	X	
Sales Order (A2X) : Item pricing element	Update an item pricing element		X
Sales Order (A2X) : Item pricing element	Delete an item pricing element		X
Sales Order (A2X) : Item related object	Read the sales order header for a related object of a sales order item	X	
Sales Order (A2X) : Item related object	Read the related object of a sales order item	X	
Sales Order (A2X) : Item related object	Create a related object for a specific sales order item		X
Sales Order (A2X) : Item related object	Read the sales order item for a related object	X	
Sales Order (A2X) : Item related object	Read related objects from the items of all sales orders	X	
Sales Order (A2X) : Item related object	Create a related object for a sales order item		X
Sales Order (A2X) : Item related object	Read a related object from a sales order item	X	
Sales Order (A2X) : Item related object	Delete a related object from a sales order item		X
Sales Order (A2X) : Item schedule line	Read the schedule lines of a sales order item	X	
Sales Order (A2X) : Item schedule line	Create schedule lines for a sales order item		X
Sales Order (A2X) : Item schedule line	Read the schedule lines of all sales orders	X	
Sales Order (A2X) : Item schedule line	Create a schedule line		X
Sales Order (A2X) : Item schedule line	Read a schedule line	X	
Sales Order (A2X) : Item schedule line	Update a schedule line		X
Sales Order (A2X) : Item schedule line	Delete a schedule line		X
Sales Order (A2X) : Item subsequent process flow	Read the sales order header data for a subsequent item of a sales order	X	
Sales Order (A2X) : Item subsequent process flow	Get entities from related to subsequentprocflowdocitem	X	
Sales Order (A2X) : Item subsequent process flow	Read the sales order item data for a subsequent item of a sales order	X	
Sales Order (A2X) : Item subsequent process flow	Read the subsequent items of all sales orders items	X	

Sales Order (A2X) : Item subsequent process flow	Read a subsequent item for a sales order item	X	
Sales Order (A2X) : Item text	Read the sales order header for a text of a sales order item	X	
Sales Order (A2X) : Item text	Read the text of a sales order item	X	
Sales Order (A2X) : Item text	Create a text for a specific sales order item		X
Sales Order (A2X) : Item text	Read the sales order item for an item text	X	
Sales Order (A2X) : Item text	Read item texts of all sales orders	X	
Sales Order (A2X) : Item text	Create an item text		X
Sales Order (A2X) : Item text	Read an item text	X	
Sales Order (A2X) : Item text	Update an item text		X
Sales Order (A2X) : Item text	Delete an item text		X
Sales Order (A2X) : Item value added service	Read the value-added service data for a sales order item	X	
Sales Order (A2X) : Item value added service	Create one or more value-added services for a sales order item		X
Sales Order (A2X) : Item value added service	Read the value-added service data of all sales orders	X	
Sales Order (A2X) : Item value added service	Create one or more value-added services for a specific sales order item		X
Sales Order (A2X) : Item value added service	Read a specific line of a value-added service	X	
Sales Order (A2X) : Item value added service	Update a specific value-added service		X
Sales Order (A2X) : Item value added service	Delete a specific value-added service		X
Sales Order (A2X) : Item billing plan item	Read the sales order header for an item billing plan item	X	
Sales Order (A2X) : Item billing plan item	Read the sales order item for a billing plan item of this sales order item	X	
Sales Order (A2X) : Item billing plan item	Read the billing plan items of a sales order item billing plan	X	
Sales Order (A2X) : Item billing plan item	Create a billing plan item for a sales order item billing plan		X
Sales Order (A2X) : Item billing plan item	Read the item billing plan for an item billing plan item	X	
Sales Order (A2X) : Item billing plan item	Read the billing plan items of all sales order items	X	
Sales Order (A2X) : Item billing plan item	Create a billing plan item for a sales order item		X
Sales Order (A2X) : Item billing plan item	Read a billing plan item of a sales order item	X	
Sales Order (A2X) : Item billing plan item	Update a billing plan item of a sales order item		X
Sales Order (A2X) : Item billing plan item	Delete a billing plan item of a sales order item		X
Sales Order (A2X) : Item partner address	Get related to salesorder	X	
Sales Order (A2X) : Item partner address	Read the sales order item for an item partner address	X	
Sales Order (A2X) : Item partner address	Read the item address of a sales order item partner	X	
Sales Order (A2X) : Item partner address	Read the sales order item partner for an item partner address	X	
Sales Order (A2X) : Item partner address	Read all addresses for item partners of sales orders	X	
Sales Order (A2X) : Item partner address	Read the address of an item partner of a sales order	X	
Sales Order (A2X) : Item partner address	Update the address of an item partner of a sales order		X
Sales Order (A2X) : Service operations	Invoke action rejectapprovalrequest		X
Sales Order (A2X) : Service operations	Invoke action releaseapprovalrequest		X
Sales Order (A2X) : Batch requests	Send a group of requests		X
Inspection Lot : Inspection characteristics	Read inspection characteristics	X	
Inspection Lot : Inspection characteristics	Read a specific inspection characteristic	X	
Inspection Lot : Single inspection results	Read single inspection results for an inspection characteristic	X	
Inspection Lot : Single inspection results	Create a single inspection result for an inspection characteristic		X
Inspection Lot : Single inspection results	Read single inspection result values	X	
Inspection Lot : Single inspection results	Not supported		X
Inspection Lot : Single inspection results	Read a specific single inspection result value	X	
Inspection Lot : Single inspection results	Update a specific single inspection result value		X
Inspection Lot : Summarized inspection results for inspection point	Read a summarized inspection result for an inspection characteristic of an ir	X	
Inspection Lot : Summarized inspection results for inspection point	Create a summarized inspection result for an inspection characteristic of an inspection point		X
Inspection Lot : Summarized inspection results for inspection point	Read summarized inspection results recorded for inspection points	X	
Inspection Lot : Summarized inspection results for inspection point	Not supported		X
Inspection Lot : Summarized inspection results for inspection point	Read a specific summarized inspection result recorded for an inspection poi	X	
Inspection Lot : Summarized inspection results for inspection point	Update a specific summarized inspection result recorded for an inspection point		X
Inspection Lot : Inspection lot data	Read inspection lots with data at header level	X	
Inspection Lot : Inspection lot data	Create an inspection lot		X
Inspection Lot : Inspection lot data	Read the header data of a specific inspection lot	X	
Inspection Lot : Inspection lot data	Update the header data of a specific inspection lot		X
Inspection Lot : Inspection lot statuses	Read status information for an inspection lot	X	
Inspection Lot : Inspection lot statuses	Read inspection lot status information	X	
Inspection Lot : Inspection lot statuses	Read inspection lot status information by its key	X	
Inspection Lot : Inspection operations	Read inspection operations	X	
Inspection Lot : Inspection operations	Read a specific inspection operation	X	
Inspection Lot : Summarized inspection results	Read summarized inspection results	X	
Inspection Lot : Summarized inspection results	Create a summarized inspection result		X
Inspection Lot : Summarized inspection results	Read a specific summarized inspection result for an inspection characteristic	X	
Inspection Lot : Summarized inspection results	Update a specific summarized inspection result for an inspection characteristic		X
Inspection Lot : Inspection points	Read inspection points	X	
Inspection Lot : Inspection points	Create an inspection point and related inspection point characteristics		X
Inspection Lot : Inspection points	Read a specific inspection point	X	
Inspection Lot : Inspection points	Update a specific inspection point		X
Inspection Lot : Inspection points	Triggers the automatic valuation of an inspection point		X
Inspection Lot : Stock postings	Read stock postings for inspection lots in the form of material document iten	X	
Inspection Lot : Stock postings	Create a stock posting for an inspection lot in the form of a material document item		X
Inspection Lot : Stock postings	Read a specific stock posting for an inspection lot	X	
Inspection Lot : Serial numbers for stock posting	Read a specific stock posting with serial numbers posted for an inspection lo	X	
Inspection Lot : Serial numbers for stock posting	Read information on serial numbers for stock postings for inspection lots	X	
Inspection Lot : Serial numbers for stock posting	Read information on a specific serial number for a stock posting for an inspe	X	
Inspection Lot : Serial numbers of inspection lot	Read serial numbers for inspection lots	X	
Inspection Lot : Serial numbers of inspection lot	Read a specific serial number for an inspection lot	X	

Inspection Lot : Usage decisions	Read usage decisions made for inspection lots	X	
Inspection Lot : Usage decisions	Create a usage decision		X
Inspection Lot : Usage decisions	Read a specific usage decision for an inspection lot	X	
Inspection Lot : Usage decisions	Update a specific usage decision for an inspection lot		X
Inspection Lot : Inspection characteristics of inspection points	Read inspection characteristics of inspection points	X	
Inspection Lot : Inspection characteristics of inspection points	Read a specific inspection characteristic of an inspection point	X	
Inspection Lot : Batch requests	Send a group of requests		X
Consolidation Unit : Consolidation unit by time	Get entities from consolidation unit by time	X	
Consolidation Unit : Consolidation unit by time	Get entity from consolidation unit by time by key	X	
Consolidation Unit : Consolidation unit by time	Update entity in consolidation unit byt ime		X
Consolidation Unit : Consolidation unit	Get related to consolidation unit	X	
Consolidation Unit : Consolidation unit	Get entities from related to consolidation unit by time	X	
Consolidation Unit : Consolidation unit	Get entities from consolidation unit	X	
Consolidation Unit : Consolidation unit	Add new entity to consolidation unit		X
Consolidation Unit : Consolidation unit	Get entity from consolidation unit by key	X	
Consolidation Unit : Consolidation unit	Update entity in consolidation unit		X
Consolidation Unit : Consolidation unit	Delete entity from consolidation unit		X
Consolidation Unit : Consolidation unit by time and version	Get related to consolidation unit	X	
Consolidation Unit : Consolidation unit by time and version	Get entities from related to consolidation unit by time version	X	
Consolidation Unit : Consolidation unit by time and version	Get entities from consolidation unit by time version	X	
Consolidation Unit : Consolidation unit by time and version	Get entity from consolidation unit by time version by key	X	
Consolidation Unit : Consolidation unit by time and version	Update entity in consolidation unit by time version		X
Consolidation Unit : Consolidation unit text	Get related to consolidation unit	X	
Consolidation Unit : Consolidation unit text	Get entities from related to text	X	
Consolidation Unit : Consolidation unit text	Get entities from consolidation unit text	X	
Consolidation Unit : Consolidation unit text	Get entity from consolidation unit text by key	X	
Consolidation Unit : Consolidation unit text	Update entity in consolidation unit text		X
Consolidation Unit : Consolidation unit text	Delete entity from consolidation unit text		X
Consolidation Unit : Batch requests	Send a group of requests		X
Service Request (A2X) : Service request	Read the header information of all service requests in the system	X	
Service Request (A2X) : Service request	Create a service request		X
Service Request (A2X) : Service request	Read the header information of a service request by the key	X	
Service Request (A2X) : Service request	Update the header information of a service request		X
Service Request (A2X) : Service request defect	Read the service defect assigned to a service request	X	
Service Request (A2X) : Service request defect	Create the service defect for a service request		X
Service Request (A2X) : Service request defect	Read the service defects of all the service requests	X	
Service Request (A2X) : Service request defect	Create the service defects of a service request		X
Service Request (A2X) : Service request defect	Read the service defects of a service request by the key	X	
Service Request (A2X) : Service request defect	Update the service defects of a service request		X
Service Request (A2X) : Service request defect	Delete the service defects of a service request		X
Service Request (A2X) : Service request order	Read the service order related to a service request	X	
Service Request (A2X) : Service request order	Read the service orders of all the service requests	X	
Service Request (A2X) : Service request order	Read the service orders of a service request by the key	X	
Service Request (A2X) : Person responsible for service request	Read the person responsible assigned to a service request	X	
Service Request (A2X) : Person responsible for service request	Create the person responsible for a service request		X
Service Request (A2X) : Person responsible for service request	Read the persons responsible of all the service requests	X	
Service Request (A2X) : Person responsible for service request	Create the person responsible for a service request		X
Service Request (A2X) : Person responsible for service request	Read the person responsible of a service request by the key	X	
Service Request (A2X) : Person responsible for service request	Update the person responsible of a service request		X
Service Request (A2X) : Person responsible for service request	Delete the person responsible of a service request		X
Service Request (A2X) : Service request reason	Read the reasons of a service request	X	
Service Request (A2X) : Service request reason	Read the reasons of all the service requests	X	
Service Request (A2X) : Service request reason	Create the reasons for a service request		X
Service Request (A2X) : Service request reason	Read the reasons of a service request by the key	X	
Service Request (A2X) : Service request reason	Update the reasons of a service request		X
Service Request (A2X) : Service request reason	Delete the reasons of a service request		X
Service Request (A2X) : Reference object of service request	Read the reference object information of a service request	X	
Service Request (A2X) : Reference object of service request	Create a service request reference object		X
Service Request (A2X) : Reference object of service request	Read the reference objects of all the service requests	X	
Service Request (A2X) : Reference object of service request	Create a reference object for a service request		X
Service Request (A2X) : Reference object of service request	Read the service request reference object by the key	X	
Service Request (A2X) : Reference object of service request	Delete the reference object of a service request		X
Service Request (A2X) : Service request text	Read the texts of a service request	X	
Service Request (A2X) : Service request text	Create the texts for a service request		X
Service Request (A2X) : Service request text	Read the texts of all the service requests	X	
Service Request (A2X) : Service request text	Create the texts for a service request		X
Service Request (A2X) : Service request text	Read the texts of a service request by the key	X	
Service Request (A2X) : Service request text	Update the texts of a service request		X
Service Request (A2X) : Service request text	Delete the texts of a service request		X
Service Request (A2X) : Batch requests	Send a group of requests		X
Bills of Material Comparison : Comparison result	Get entities from comparisonresultset	X	
Bills of Material Comparison : Comparison result	Get entity from comparisonresultset by key	X	
Bills of Material Comparison : Comparison result	Invoke function bomcomparison	X	
Bills of Material Comparison : Batch requests	Send a group of requests		X
Condition Record for Pricing in Sales : Condition supplements	Read all condition supplements in the system	X	
Condition Record for Pricing in Sales : Condition supplements	Create one or more condition supplements		X
Condition Record for Pricing in Sales : Condition supplements	Read a specific condition supplement	X	

Condition Record for Pricing in Sales : Condition supplements	Update a specific condition supplement		X
Condition Record for Pricing in Sales : Condition supplements	Delete a specific condition supplement		X
Condition Record for Pricing in Sales : Condition record validity	Read validity of the condition record for a specific condition supplement	X	
Condition Record for Pricing in Sales : Condition record validity	Read the condition supplements for a specific condition record validity perio	X	
Condition Record for Pricing in Sales : Condition record validity	Create one or more condition supplements for a specific condition record validity period		X
Condition Record for Pricing in Sales : Condition record validity	Read validity of all condition records in the system	X	
Condition Record for Pricing in Sales : Condition record validity	Read the validity of a specific condition record	X	
Condition Record for Pricing in Sales : Condition record validity	Update the validity period of a specific condition record		X
Condition Record for Pricing in Sales : Pricing scales	Read the pricing scales of a specific condition supplement	X	
Condition Record for Pricing in Sales : Pricing scales	Create one or more pricing scales for a specific condition supplement		X
Condition Record for Pricing in Sales : Pricing scales	Read the condition supplement for a specific condition supplement pricing s	X	
Condition Record for Pricing in Sales : Pricing scales	Read all pricing scales in the system	X	
Condition Record for Pricing in Sales : Pricing scales	Create one or more pricing scales		X
Condition Record for Pricing in Sales : Pricing scales	Read a specific pricing scale	X	
Condition Record for Pricing in Sales : Pricing scales	Update a specific pricing scale		X
Condition Record for Pricing in Sales : Pricing scales	Delete a specific pricing scale		X
Condition Record for Pricing in Sales : Condition supplement descriptions	Read the pricing supplement texts of a specific condition supplement	X	
Condition Record for Pricing in Sales : Condition supplement descriptions	Create one or more pricing supplement texts for a specific condition supplement		X
Condition Record for Pricing in Sales : Condition supplement descriptions	Read the condition record for a specific pricing supplement text	X	
Condition Record for Pricing in Sales : Condition supplement descriptions	Read all pricing supplement texts in the system	X	
Condition Record for Pricing in Sales : Condition supplement descriptions	Create one or more pricing supplement texts		X
Condition Record for Pricing in Sales : Condition supplement descriptions	Read a specific pricing supplement text	X	
Condition Record for Pricing in Sales : Condition supplement descriptions	Update a specific pricing supplement text		X
Condition Record for Pricing in Sales : Condition supplement descriptions	Delete a specific pricing supplement text		X
Condition Record for Pricing in Sales : Condition records	Read the condition record for a specific condition supplement	X	
Condition Record for Pricing in Sales : Condition records	Read the condition supplements of a specific condition record	X	
Condition Record for Pricing in Sales : Condition records	Create one or more condition supplements for a specific condition record		X
Condition Record for Pricing in Sales : Condition records	Read the condition record for a specific condition record validity period	X	
Condition Record for Pricing in Sales : Condition records	Read the validity of a specific condition record	X	
Condition Record for Pricing in Sales : Condition records	Read the condition record for a specific pricing scale	X	
Condition Record for Pricing in Sales : Condition records	Read the pricing scales of a specific condition record	X	
Condition Record for Pricing in Sales : Condition records	Create one or more pricing scales for a specific condition record		X
Condition Record for Pricing in Sales : Condition records	Read all condition records in the system	X	
Condition Record for Pricing in Sales : Condition records	Create one or more condition records		X
Condition Record for Pricing in Sales : Condition records	Read a specific condition record	X	
Condition Record for Pricing in Sales : Condition records	Update a specific condition record		X
Condition Record for Pricing in Sales : Condition records	Delete a specific condition record		X
Condition Record for Pricing in Sales : Condition record descriptions	Read the pricing record texts of a specific condition record	X	
Condition Record for Pricing in Sales : Condition record descriptions	Create one or more pricing record texts for a specific condition record		X
Condition Record for Pricing in Sales : Condition record descriptions	Read the condition record for a specific pricing record text	X	
Condition Record for Pricing in Sales : Condition record descriptions	Read all pricing record texts in the system	X	
Condition Record for Pricing in Sales : Condition record descriptions	Create one or more pricing record texts		X
Condition Record for Pricing in Sales : Condition record descriptions	Read a specific pricing record text	X	
Condition Record for Pricing in Sales : Condition record descriptions	Update a specific pricing record text		X
Condition Record for Pricing in Sales : Condition record descriptions	Delete a specific pricing record text		X
Condition Record for Pricing in Sales : Batch requests	Send a group of requests		X
Document Info Record : Bill of material object links	Read the object links between the BOM and document info record objects	X	
Document Info Record : Bill of material object links	Retrieve the BOM object links for a document info record	X	
Document Info Record : Document info record	Retrieve the BOM object links for a document info record	X	
Document Info Record : Document info record	Retrieve the BOM objects associated with a document info record	X	
Document Info Record : Document info record	Read the document info records	X	
Document Info Record : Document info record	Create a document info record		X
Document Info Record : Document info record	Retrieve the details of a document info record by key	X	
Document Info Record : Document info record	Update the details of a document info record		X
Document Info Record : Document info record	Invoke action changestatus		X
Document Info Record : Change record object links	Retrieve the change record object links for a document info record	X	
Document Info Record : Change record object links	Retrieve the change record objects associated with a document info record	X	
Document Info Record : Change record object links	Read the object links between the change record and document info record	X	
Document Info Record : Change record object links	Retrieve the change record object links for a document info record	X	
Document Info Record : Product object links	Retrieve the product object links for the document info record	X	
Document Info Record : Product object links	Retrieve the product object links associated with a document info record	X	
Document Info Record : Product object links	Create an object link between a product and a document info record		X
Document Info Record : Product object links	Read the object links between the product and document info record objects	X	
Document Info Record : Product object links	Create an object link between a product and a document info record		X
Document Info Record : Product object links	Retrieve the product object links for a document info record	X	
Document Info Record : Product object links	Delete the object link between a product and document info record		X
Document Info Record : Classification characteristics	Retrieve the characteristics associated with a document info record	X	
Document Info Record : Classification characteristics	Retrieve the list of characteristics	X	
Document Info Record : Classification characteristics	Retrieve the characteristics maintained for a document info record	X

Maintenance Notification : Maintenance notification item cause	Get related to item	X	
Maintenance Notification : Maintenance notification item cause	Get entities from maintnotificationitemcause	X	
Maintenance Notification : Maintenance notification item cause	Add new entity to maintnotificationitemcause		X
Maintenance Notification : Maintenance notification item cause	Get entity from maintnotificationitemcause by key	X	
Maintenance Notification : Maintenance notification item cause	Update entity in maintnotificationitemcause		X
Maintenance Notification : Batch requests	Send a group of requests		X
Business Events Queue - Read : Business event data	Get entities from c behqueuedata	X	
Business Events Queue - Read : Business event data	Get entity from c behqueuedata by key	X	
Business Events Queue - Read : SAP object types	Get entities from related to busobjects	X	
Business Events Queue - Read : SAP object types	Get entities from I busobjects	X	
Business Events Queue - Read : SAP object types	Get entity from I busobjects by key	X	
Business Events Queue - Read : SAP object type keys	Get related to keys	X	
Business Events Queue - Read : SAP object type keys	Get entities from I businessobjectkeys	X	
Business Events Queue - Read : SAP object type keys	Get entity from I businessobjectkeys by key	X	
Business Events Queue - Read : Batch requests	Send a group of requests		X
Vehicle Management System for Vehicle Location - Read : Vehicle locatior	Get entities from a vmsvehiclelocation	X	
Vehicle Management System for Vehicle Location - Read : Vehicle locatior	Get entity from a vmsvehiclelocation by key	X	
Vehicle Management System for Vehicle Location - Read : Vehicle locatior	Get entities from a vmsvehiclelocationtext	X	
Vehicle Management System for Vehicle Location - Read : Vehicle locatior	Get entity from a vmsvehiclelocationtext by key	X	
Vehicle Management System for Vehicle Location - Read : Batch requests	Send a group of requests		X
Change number alternative date	Read all alternative dates that have been defined for change masters	X	
Change number alternative date	Create new alternative dates for change masters		X
Change number alternative date	Read one alternative date defined for a specific change master	X	
Change number alternative date	Update one alternative date defined for a specific change master		X
Change number alternative date	Delete one alternative date defined for a specific change master		X
Change number characteristic assignments	Read all characteristics assigned to change masters	X	
Change number characteristic assignments	Read the data of one characteristic assigned to a specific change master	X	
Change number characteristic values	Read the valuation a specific change master by one characteristic	X	
Change number characteristic values	Read the characteristic values of all change masters	X	
Change number characteristic values	Read the characteristic values of a specific change master	X	
Change number class assignments	Read all class assignments of change masters	X	
Change number class assignments	Read one class assignment of a specific change master	X	
Change number class and characteristic assignments	Read the valuation of a change master based on class and characteristic	X	
Change number class and characteristic assignments	Read all characteristic assignments of a change master through a class	X	
Change number class and characteristic assignments	Read all characteristic assignments of change masters by classes	X	
Change number class and characteristic assignments	Read one characteristic assignment by one class of one change master	X	
Change number object type assignment	Read object type assignment of change masters	X	
Change number object type assignment	Create object type assignments for change masters		X
Change number object type assignment	Read one object type assignment of one change master	X	
Change number object type assignment	Update the object type assignment of one change master		X
Change number object type assignment	Delete an object type assignment of one change master		X
Change number	Read all alternative dates that have been defined for a specific change mast	X	
Change number	Create an alternative date and assigns it to a specific change master		X
Change number	Read all characteristics assigned to a specific change master	X	
Change number	Read all class assignments for one change master	X	
Change number	Read the object type assignments of one change master	X	
Change number	Create a new object type assignment for one change master		X
Change number	Read change master header data	X	
Change number	Create new change masters		X
Change number	Read the header data of one change master	X	
Change number	Update the header data of one change master		X
Change number	Delete a specific change master		X
Change number	Shifts the validity date of one change master		X
Change number object management records	Read all object management records for a change master	X	
Change number object management records	Read the object management records of all change masters	X	
Change number object management records	Read a specific object management record of a change master	X	
Change number object management records	Update a specific object management record of a change master		X
Change number object management records	Delete a specific object management record from a change master		X
Change number object management records	Assigns alternative dates to object management records		X
Change number object management records	Unassigns alternative dates to object management records		X
Change number object management records - dir	Read the object management records for document info records of a change	X	
Change number object management records - dir	Create a new object management record for a dir for one change master		X
Change number object management records - dir	Read object management records for dirs of all change masters	X	
Change number object management records - dir	Create new change master object management records for document info records		X
Change number object management records - dir	Read one change master's object management record for document info rec	X	
Change number object management records - dir	Update one change master's object management record for document info records		X
Change number object management records - dir	Delete an object management record for a dir from a specific change master		X
Change number object management records - dir	Assigns alternative dates to object management records for dirs of a specific change master		X
Change number object management records - dir	Unassigns alternative dates from object management records for dirs of a specific change ma		X
Change number object management records - material	Read the object management records for materials of a change master	X	
Change number object management records - material	Create a new object management record for a material for one change master		X

Change number object management records - material	Read object management records for materials of all change masters	X	
Change number object management records - material	Create new change master object management records for materials		X
Change number object management records - material	Read one change master's object management record for materials	X	
Change number object management records - material	Update one change master's object management record for materials		X
Change number object management records - material	Delete an object management record for a material from a specific change master		X
Change number object management records - material	Assigns alternative dates to object management records for materials of a specific change ma		X
Change number object management records - material	Unassigns alternative dates from object management records for materials of a specific chan		X
Change number object management records - material bom	Read the object management records for material boms of a change master	X	
Change number object management records - material bom	Create a new object management record for a material BOM for one change master		X
Change number object management records - material bom	Read object management records for material boms of all change masters	X	
Change number object management records - material bom	Create new change master object management records for material boms		X
Change number object management records - material bom	Read one change master's object management record for material boms	X	
Change number object management records - material bom	Update one change master's object management record for material boms		X
Change number object management records - material bom	Delete an object management record for a material BOM from a specific change master		X
Change number object management records - material bom	Assigns alternative dates to object management records for material boms of a specific chan		X
Change number object management records - material bom	Unassigns alternative dates from object management records for material boms of a specific		X
Change Master : Batch requests	Send a group of requests		X
Business Events Subscription : Maintain subscriptions	Read subscription information for business events	X	
Business Events Subscription : Maintain subscriptions	Create business event subscriptions		X
Business Events Subscription : Maintain subscriptions	Read business event subscription information	X	
Business Events Subscription : Maintain subscriptions	Update business events subscription status		X
Business Events Subscription : Read subscriptions	Read business event subscription information	X	
Business Events Subscription : Read subscriptions	Read business event subscription information	X

Lead (A2X) : Person responsible for lead	Read the person responsible of a lead by the key	X	
Lead (A2X) : Person responsible for lead	Update the person responsible of a lead		X
Lead (A2X) : Person responsible for lead	Delete the person responsible of a lead		X
Lead (A2X) : Lead text	Read the texts of a lead	X	
Lead (A2X) : Lead text	Create texts for a lead		X
Lead (A2X) : Lead text	Read the texts of all the leads	X	
Lead (A2X) : Lead text	Create the texts for a lead		X
Lead (A2X) : Lead text	Read the texts of a lead by the key	X	
Lead (A2X) : Lead text	Update the texts of a lead		X
Lead (A2X) : Lead text	Delete the texts of a lead		X
Lead (A2X) : Batch requests	Send a group of requests		X
Journal Entry (Cost Controlling) - Read Create : Cost reassignment heade	Get entities from a costrevenuereassignment	X	
Journal Entry (Cost Controlling) - Read Create : Cost reassignment heade	Add new entity to a costrevenuereassignment		X
Journal Entry (Cost Controlling) - Read Create : Cost reassignment heade	Get entity from a costrevenuereassignment by key	X	

Journal Entry (Cost Controlling) - Read Create : Cost reassignment heade	Invoke action reverse		X
Journal Entry (Cost Controlling) - Read Create : Cost reassignment items	Get entities from related to item	X	
Journal Entry (Cost Controlling) - Read Create : Cost reassignment items	Get related to header	X	
Journal Entry (Cost Controlling) - Read Create : Cost reassignment items	Get entities from a costrevenuereassignmentitem	X	
Journal Entry (Cost Controlling) - Read Create : Cost reassignment items	Get entity from a costrevenuereassignmentitem by key	X	
Journal Entry (Cost Controlling) - Read Create : Cost reassignment receiv	Get related to receiverprofitabilitysegment	X	
Journal Entry (Cost Controlling) - Read Create : Cost reassignment receiv	Get related to item	X	
Journal Entry (Cost Controlling) - Read Create : Cost reassignment receiv	Get entities from a costrevnrcvrprftbltysegment	X	
Journal Entry (Cost Controlling) - Read Create : Cost reassignment receiv	Get entity from a costrevnrcvrprftbltysegment by key	X	
Journal Entry (Cost Controlling) - Read Create : Cost reassignment sende	Get related to senderprofitabilitysegment	X	
Journal Entry (Cost Controlling) - Read Create : Cost reassignment sende	Get related to item	X	
Journal Entry (Cost Controlling) - Read Create : Cost reassignment sende	Get entities from a costrevnsndrprftbltysegment	X	
Journal Entry (Cost Controlling) - Read Create : Cost reassignment sende	Get entity from a costrevnsndrprftbltysegment by key	X	
Journal Entry (Cost Controlling) - Read Create : Batch requests	Send a group of requests		X
Business Partner : Study information	Create/Update clinical trial related details of a business partner		X
Business Partner : Business partner	Retrieve clinical trial-related information of a specific business partner	X	
Business Partner : Business partner	Update clinical trial related details for a specific business partner		X
Inbound delivery document flows	Read inbound delivery document flows by key	X	
Inbound delivery document flows	Update inbound delivery document flows		X
Inbound delivery headers	Read inbound delivery headers	X	
Inbound delivery headers	Create inbound deliveries with reference to preceding document		X
Inbound delivery headers	Read inbound delivery headers	X	
Inbound delivery headers	Update inbound delivery headers		X
Inbound delivery headers	Delete inbound deliveries		X
Inbound delivery headers	Invoke action assignhandlingunittodelivery		X
Inbound delivery headers	Confirms putaway quantity of inbound delivery items		X
Inbound delivery headers	Post goods receipt for inbound delivery		X
Inbound delivery headers	Takes over delivery quantity as putaway quantity for all inbound delivery items		X
Inbound delivery headers	Reverses goods receipt for inbound delivery		X
Inbound delivery headers	Delete all handling units from inbound delivery		X
Inbound Delivery (A2X) : Handling unit headers	Get entities from related to handlingunitheaderdelivery	X	
Inbound Delivery (A2X) : Handling unit headers	Add new entity to related to handlingunitheaderdelivery		X
Inbound Delivery (A2X) : Handling unit headers	Get related to deliveryheader	X	
Inbound Delivery (A2X) : Handling unit headers	Add new entity to a hndlgunithdrforinbdeliv		X
Inbound delivery texts	Read texts of specific inbound delivery header	X	
Inbound delivery items	Read document flows of specific inbound delivery item	X	
Inbound delivery items	Read items of specific inbound delivery header	X	
Inbound delivery items	Read inbound delivery items	X	
Inbound delivery items	Read inbound delivery items	X	
Inbound delivery items	Update inbound delivery items		X
Inbound delivery items	Delete inbound delivery items		X
Inbound delivery items	Confirms putaway quantity of inbound delivery item		X
Inbound delivery items	Takes over delivery quantity as putaway quantity for specified inbound delivery item		X
Inbound delivery items	Create an additional batch split item for an inbound delivery item		X
Inbound delivery items	Add serial number to inbound delivery item		X
Inbound delivery items	Delete all serial numbers from inbound delivery item		X
Inbound delivery items	Delete serial number from inbound delivery item		X
Inbound delivery items	Sets putaway quantity in base unit of measure for delivery item		X
Inbound delivery items	Sets putaway quantity and delivery quantity for inbound delivery item		X
Inbound delivery items	Sets putaway quantity and delivery quantity for inbound delivery item		X
Inbound delivery partners	Read partners of specific inbound delivery header	X	
Inbound delivery value added services	Read value added services of specific inbound delivery item	X	
Inbound Delivery (A2X) : Handling unit items	Get entities from related to handlingunititemdelivery	X	
Inbound Delivery (A2X) : Handling unit items	Add new entity to related to handlingunititemdelivery		X
Inbound Delivery (A2X) : Handling unit items	Get entities from related to handlingunititemdelivery	X	
Inbound Delivery (A2X) : Handling unit items	Add new entity to related to handlingunititemdelivery		X
Inbound Delivery (A2X) : Handling unit items	Add new entity to a hndlgunititemforinbdeliv		X
Inbound delivery maintenance item object list headers	Read maintenance item object lists of specific inbound delivery item	X	
Inbound delivery item texts	Read texts of specific inbound delivery item	X	
Inbound delivery partner addresses	Read addresses of specific inbound delivery partner	X	
Inbound delivery maintenance item object lists	Read maintenance item objects of specific inbound delivery maintenance ite	X	
Inbound Delivery (A2X) : Batch requests	Send a group of requests		X
Line Item of Treasury Posting Journal Entry - Read : Treasury posting jour	Get entities from a trsypostgjrnlentritm	X	
Line Item of Treasury Posting Journal Entry - Read : Treasury posting jour	Get entity from a trsypostgjrnlentritm by key	X	
Line Item of Treasury Posting Journal Entry - Read : Batch requests	Send a group of requests		X
Credit Memo Request - Simulate (A2X) : Credit memo request simulation	Simulates the creation of a credit memo request		X
Credit Memo Request - Simulate (A2X) : Batch requests	Send a group of requests		X
Maintenance Order Operation Confirmation : Maintenance order confirmat	Get entities from maintorderconfirmation	X	
Maintenance Order Operation Confirmation : Maintenance order confirmat	Add new entity to maintorderconfirmation		X
Maintenance Order Operation Confirmation : Maintenance order confirmat	Get entity from maintorderconfirmation by key	X	
Maintenance Order Operation Confirmation : Maintenance order confirmat	Invoke action cancelmaintorderconfirmation		X
Maintenance Order Operation Confirmation : Maintenance order confirmat	Get related to longtext	X	
Maintenance Order Operation Confirmation : Maintenance order confirmat	Get related to maintorderconfirmation	X	
Maintenance Order Operation Confirmation : Maintenance order confirmat	Get entities from longtext	X	
Maintenance Order Operation Confirmation : Maintenance order confirmat	Get entity from longtext by key	X	
Maintenance Order Operation Confirmation : Batch requests	Send a group of requests		X

Product Specification Composition Configuration - Read : Batch requests	Send a group of requests		X
Country/Region - Read : A_country	Read the items of all countries/regions	X	
Country/Region - Read : A_country	Read a country/region by key	X	
Country/Region - Read : A_countrytext	Read the texts of a specific country/region	X	
Country/Region - Read : A_countrytext	Read the country/region related to the text item	X	
Country/Region - Read : A_countrytext	Read the texts of all country/region items	X	
Country/Region - Read : A_countrytext	Read the texts of a country/region for a specific language and country/regior	X	
Defect Category - Read : Defect categories	Read all defect categories	X	
Defect Category - Read : Defect categories	Read a specific defect category	X	

Defect Category - Read : Defect category texts	Read defect categories with text associations	X	
Defect Category - Read : Defect category texts	Read a set of defect category texts	X	
Defect Category - Read : Defect category texts	Read the text of a defect category in a specific language	X	
Defect Category - Read : Batch requests	Send a group of requests		X
Sales Order - Simulate (A2X) : Value added service for so simulation	Get entities from related to valueaddedservice	X	
Sales Order - Simulate (A2X) : Value added service for so simulation	Add new entity to related to valueaddedservice		X
Sales Order - Simulate (A2X) : Value added service for so simulation	Get entities from a slsordsimlnvaladdedsrvc	X	
Sales Order - Simulate (A2X) : Value added service for so simulation	Add new entity to a slsordsimlnvaladdedsrvc		X
Sales Order - Simulate (A2X) : Value added service for so simulation	Get entity from a slsordsimlnvaladdedsrvc by key	X	
Sales Order - Simulate (A2X) : Value added service for so simulation	Update entity in a slsordsimlnvaladdedsrvc		X
Sales Order - Simulate (A2X) : Value added service for so simulation	Delete entity from a slsordsimlnvaladdedsrvc		X
Sales Order - Simulate (A2X) : Sales order simulation	Simulates the creation of a sales order		X
Sales Order - Simulate (A2X) : Batch requests	Send a group of requests		X
Customer Return (A2X) : Returns order header	Read all Return order headers	X	
Customer Return (A2X) : Returns order header	Create one or more Return order headers		X
Customer Return (A2X) : Returns order header	Read the header of a specific Return order	X	
Customer Return (A2X) : Returns order header	Update the header of a specific Return order		X
Customer Return (A2X) : Returns order header	Delete a specific Return order		X
Customer Return (A2X) : Customer return overview status	Reads the customer return overview statuses of a specific returns order.	X	
Customer Return (A2X) : Customer return overview status	Read all customer return overview statuses	X	
Customer Return (A2X) : Customer return overview status	Read the specific customer return overview statuses	X	
Customer Return (A2X) : Returns order item	Read all items of a specific Return order	X	
Customer Return (A2X) : Returns order item	Create one or more items for a specific Return order		X
Customer Return (A2X) : Returns order item	Read the Return order header for a specific item	X	
Customer Return (A2X) : Returns order item	Read all Return order items	X	
Customer Return (A2X) : Returns order item	Create one or more Return order items		X
Customer Return (A2X) : Returns order item	Read a specific Return order item	X	
Customer Return (A2X) : Returns order item	Update a specific Return order item		X
Customer Return (A2X) : Returns order item	Delete a specific Return order item		X
Customer Return (A2X) : Header partner	Read the header-level business partners of a specific Return order	X	
Customer Return (A2X) : Header partner	Read the Return order header for a specific header-level business partner	X	
Customer Return (A2X) : Header partner	Read all header-level business partners	X	
Customer Return (A2X) : Header partner	Read a specific header-level business partner	X	
Customer Return (A2X) : Header partner	Update a specific header-level business partner		X
Customer Return (A2X) : Header partner	Delete a specific header-level business partner		X
Customer Return (A2X) : Header pricing element	Read the header-level pricing elements of a specific Return order	X	
Customer Return (A2X) : Header pricing element	Read the Return order header for a specific header-level pricing element	X	
Customer Return (A2X) : Header pricing element	Read all header-level pricing elements	X	
Customer Return (A2X) : Header pricing element	Read a specific header-level pricing element	X	
Customer Return (A2X) : Header pricing element	Update a specific header-level pricing element		X
Customer Return (A2X) : Header pricing element	Delete a specific header-level pricing element		X
Customer Return (A2X) : Header related object	Reads the related objects from a returns order header.	X	
Customer Return (A2X) : Header related object	Creates related objects for a returns order header.		X
Customer Return (A2X) : Header related object	Read the Return order header for a specific related object	X	
Customer Return (A2X) : Header related object	Read the related objects from the headers of all Return orders	X	
Customer Return (A2X) : Header related object	Create a specific related object for a Return order header		X
Customer Return (A2X) : Header related object	Read a specific related object from a Return order header	X	
Customer Return (A2X) : Header related object	Delete a specific related object from a Return order header		X
Customer Return (A2X) : Header text	Read the header-level texts of a specific Return order	X	
Customer Return (A2X) : Header text	Read the Return order header for a specific piece of header-level text	X	
Customer Return (A2X) : Header text	Read all header-level texts	X	
Customer Return (A2X) : Header text	Read a specific piece of header-level text	X	
Customer Return (A2X) : Header text	Update a specific piece of header-level text		X
Customer Return (A2X) : Header text	Delete a specific piece of header-level text		X
Customer Return (A2X) : Item partner	Read the Return order header for a specific item-level business partner	X	
Customer Return (A2X) : Item partner	Read the item-level business partners of a specific item	X	
Customer Return (A2X) : Item partner	Read the Return order item for a specific item-level business partner	X	
Customer Return (A2X) : Item partner	Read all item-level business partners	X	
Customer Return (A2X) : Item partner	Read a specific item-level business partner	X	
Customer Return (A2X) : Item partner	Update a specific item-level business partner		X
Customer Return (A2X) : Item partner	Delete a specific item-level business partner		X
Customer Return (A2X) : Item pricing element	Read the Return order header for a specific item-level pricing element	X	
Customer Return (A2X) : Item pricing element	Read the item-level pricing elements of a specific item	X	
Customer Return (A2X) : Item pricing element	Read the Return order item for a specific item-level pricing element	X	
Customer Return (A2X) : Item pricing element	Read all item-level pricing elements	X	
Customer Return (A2X) : Item pricing element	Read a specific item-level pricing element	X	
Customer Return (A2X) : Item pricing element	Update a specific item-level pricing element		X
Customer Return (A2X) : Item pricing element	Delete a specific item-level pricing element		X
Customer Return (A2X) : Return process step	Read the Return order header for a specific advanced Return process step	X	
Customer Return (A2X) : Return process step	Read the advanced Return process steps of a specific item	X	
Customer Return (A2X) : Return process step	Read the Return order item for a specific advanced Return process step	X	
Customer Return (A2X) : Return process step	Read all advanced Return process steps	X	
Customer Return (A2X) : Return process step	Read a specific advanced Return process step	X	
Customer Return (A2X) : Item related object	Read the Return order header for a specific item-level related object	X	
Customer Return (A2X) : Item related object	Reads the related objects of a specific returns order item.	X	
Customer Return (A2X) : Item related object	Create related objects for a specific Return order item		X
Customer Return (A2X) : Item related object	Read the Return order item for a specific related object	X	

Customer Return (A2X) : Item related object	Read the related objects of all Return order items	X	
Customer Return (A2X) : Item related object	Create a specific related object for a specific Return order item		X
Customer Return (A2X) : Item related object	Read a specific related object of a specific Return order item	X	
Customer Return (A2X) : Item related object	Delete a specific related object from a specific Return order item		X
Customer Return (A2X) : Schedule line	Read the Return order header for a specific schedule line	X	
Customer Return (A2X) : Schedule line	Read the schedule lines of a specific item	X	
Customer Return (A2X) : Schedule line	Read the Return order item for a specific schedule line	X	
Customer Return (A2X) : Schedule line	Read all schedule lines	X	
Customer Return (A2X) : Schedule line	Read a specific schedule line	X	
Customer Return (A2X) : Serial number	Read the serial numbers of a specific item	X	
Customer Return (A2X) : Serial number	Read all serial numbers	X	
Customer Return (A2X) : Serial number	Read a specific serial number	X	
Customer Return (A2X) : Item text	Read the Return order header for a specific piece of item-level text	X	
Customer Return (A2X) : Item text	Read the item-level texts of a specific item	X	
Customer Return (A2X) : Item text	Read the Return order item for a specific piece of item-level text	X	
Customer Return (A2X) : Item text	Read all item-level texts	X	
Customer Return (A2X) : Item text	Read a specific piece of item-level text	X	
Customer Return (A2X) : Item text	Updates a specific piece of item-level text.		X
Customer Return (A2X) : Item text	Deletes a specific piece of item-level text.		X
Customer Return (A2X) : Item value added service	Read the value-added service data of a specific Return order item	X	
Customer Return (A2X) : Item value added service	Create one or more value-added services for a specific Return order item		X
Customer Return (A2X) : Item value added service	Read the value-added service data of all Return order items	X	
Customer Return (A2X) : Item value added service	Create one or more value-added services for a specific Return order item		X
Customer Return (A2X) : Item value added service	Read a specific line of a value-added service	X	
Customer Return (A2X) : Item value added service	Update a specific value-added service of a Return order item		X
Customer Return (A2X) : Item value added service	Delete a specific value-added service of a Return order item		X
Customer Return (A2X) : Service operations	Rejects a specific Return order		X
Customer Return (A2X) : Service operations	Approves a specific Return order		X
Customer Return (A2X) : Batch requests	Send a group of requests		X
Payment Advice (A2X) : Payment advice	Read all available payment advices	X	
Payment Advice (A2X) : Payment advice	Create a new payment advice		X
Payment Advice (A2X) : Payment advice	Read a specific payment advice	X	
Payment Advice (A2X) : Payment advice	Update a specific payment advice		X
Payment Advice (A2X) : Payment advice	Delete a specific payment advice		X
Payment Advice (A2X) : Payment advice line item	Read all item fields for a specific payment advice header	X	
Payment Advice (A2X) : Payment advice line item	Create items for a specific payment advice header		X
Payment Advice (A2X) : Payment advice line item	Read all item fields for all payment advice headers	X	
Payment Advice (A2X) : Payment advice line item	Create items for a specific payment advice header		X
Payment Advice (A2X) : Payment advice line item	Read all fields of a specific payment advice item	X	
Payment Advice (A2X) : Payment advice line item	Update items for a specific payment advice header		X
Payment Advice (A2X) : Payment advice line item	Delete a specific payment advice item		X
Payment Advice (A2X) : Batch requests	Send a group of requests		X
Customer Return - Simulate (A2X) : Returns order simulation	Simulates the creation of a Return order		X
Customer Return - Simulate (A2X) : Batch requests	Send a group of requests		X
Quota Arrangement : Quota arrangement	Get the header details of all the quota arrangements in the system	X	
Quota Arrangement : Quota arrangement	Create a quota arrangement header		X
Quota Arrangement : Quota arrangement	Get the header details of a quota arrangement	X	
Quota Arrangement : Quota arrangement	Update the header details of a quota arrangement		X
Quota Arrangement : Quota arrangement	Delete the header of a quota arrangement		X
Quota Arrangement : Item	Get the item details of all the items in a quota arrangement	X	
Quota Arrangement : Item	Add an item to a quota arrangement		X
Quota Arrangement : Item	Get the header details of an item in a quota arrangement	X	
Quota Arrangement : Item	Get the item details of all the items, in all the quota arrangements in the syst	X	
Quota Arrangement : Item	Add an item to a quota arrangement		X
Quota Arrangement : Item	Get the item details of an item in a quota arrangement	X	
Quota Arrangement : Item	Update the item details of an item in a quota arrangement		X
Quota Arrangement : Item	Delete an item in a quota arrangement		X
Quota Arrangement : Batch requests	Send a group of requests		X

Product Master (A2X) : Storage location data	Return storage location data	X	
Product Master (A2X) : Storage location data	Create storage location data		X

Product Master (A2X) : Storage location data	Return storage location data by product number, plant and storage location	X	
Product Master (A2X) : Storage location data	Update storage location data		X
Product Master (A2X) : Sales text	Return sales text	X	
Product Master (A2X) : Sales text	Create sales text		X
Product Master (A2X) : Sales text	Return sales text	X	
Product Master (A2X) : Sales text	Create sales text		X
Product Master (A2X) : Sales text	Return sales text by product number, sales organization, distribution channe	X	
Product Master (A2X) : Sales text	Update sales text		X
Product Master (A2X) : Sales text	Delete sales text		X
Product Master (A2X) : Gtin data	Return gtin data	X	
Product Master (A2X) : Gtin data	Create gtin data		X
Product Master (A2X) : Gtin data	Return gtin data	X	
Product Master (A2X) : Gtin data	Create gtin data		X
Product Master (A2X) : Gtin data	Return gtin data by product number, alternative unit and consecutive numbe	X	
Product Master (A2X) : Gtin data	Update gtin data		X
Product Master (A2X) : Gtin data	Delete gtin data		X
Product Master (A2X) : Valuation account data	Return valuation account data	X	
Product Master (A2X) : Valuation account data	Return valuation account data	X	
Product Master (A2X) : Valuation account data	Create valuation account data		X
Product Master (A2X) : Valuation account data	Return valuation account data by product number, valuation area and valuat	X	
Product Master (A2X) : Valuation account data	Update valuation account data		X
Product Master (A2X) : Valuation costing data	Return costing data	X	
Product Master (A2X) : Valuation costing data	Return costing data	X	
Product Master (A2X) : Valuation costing data	Create costing data		X
Product Master (A2X) : Valuation costing data	Return costing data by product number, valuation area and valuation type	X	
Product Master (A2X) : Valuation costing data	Update costing data		X
Product Master (A2X) : Batch requests	Send a group of requests		X
Service Entry Sheet : Service entry sheet	Read the header data from all service entry sheets	X	
Service Entry Sheet : Service entry sheet	Create a service entry sheet		X
Service Entry Sheet : Service entry sheet	Read a specified service entry sheet	X	
Service Entry Sheet : Service entry sheet	Update a specified service entry sheet		X
Service Entry Sheet : Item	Read the items from a specified service entry sheet	X	
Service Entry Sheet : Item	Read all service entry sheet items	X	
Service Entry Sheet : Item	Read a specified service entry sheet item	X	
Service Entry Sheet : Item	Update a specified service entry sheet item		X
Service Entry Sheet : Account assignment	Read the account assignment(s) from a specified service entry sheet item	X	
Service Entry Sheet : Account assignment	Read all account assignments of service entry sheets	X	
Service Entry Sheet : Account assignment	Read a specified account assignment	X	
Service Entry Sheet : Account assignment	Update a specified account assignment		X
Service Entry Sheet : Service operations	Submits a service entry sheet for approval		X
Service Entry Sheet : Service operations	Revokes the approval of a service entry sheet		X
Service Entry Sheet : Service operations	Withdraws a service entry sheet from the approval process		X
Service Entry Sheet : Batch requests	Send a group of requests		X
Batch Master Record : Batches	Get entities from batch	X	
Batch Master Record : Batches	Add new entity to batch		X
Batch Master Record : Batches	Get entity from batch by key	X	
Batch Master Record : Batches	Update entity in batch		X
Batch Master Record : Batch characteristics	Get entities from related to batchcharc	X	
Batch Master Record : Batch characteristics	Get related to batch	X	
Batch Master Record : Batch characteristics	Get entities from batchcharc	X	
Batch Master Record : Batch characteristics	Get entity from batchcharc by key	X	
Batch Master Record : Batch class assignments	Get related to batchclass	X	
Batch Master Record : Batch class assignments	Get related to batch	X	
Batch Master Record : Batch class assignments	Get entities from batchclass	X	
Batch Master Record : Batch class assignments	Add new entity to batchclass		X
Batch Master Record : Batch class assignments	Get entity from batchclass by key	X	
Batch Master Record : Batch class assignments	Delete entity from batchclass		X
Batch Master Record : Plant-specific batch information	Get entities from related to batchplant	X	
Batch Master Record : Plant-specific batch information	Get related to batch	X	
Batch Master Record : Plant-specific batch information	Get entities from batchplant	X	
Batch Master Record : Plant-specific batch information	Get entity from batchplant by key	X	
Batch Master Record : Plant-specific batch information	Update entity in batchplant		X
Batch Master Record : Batch texts	Get entities from related to batchtext	X	
Batch Master Record : Batch texts	Get related to batch	X	
Batch Master Record : Batch texts	Get entities from batchtext	X	
Batch Master Record : Batch texts	Get entity from batchtext by key	X	
Batch Master Record : Batch texts	Update entity in batchtext		X
Batch Master Record : Batch texts	Delete entity from batchtext		X
Batch Master Record : Batch characteristics valuation	Get entities from related to batchcharcvalue	X	
Batch Master Record : Batch characteristics valuation	Add new entity to related to batchcharcvalue		X
Batch Master Record : Batch characteristics valuation	Get related to batchcharc	X	
Batch Master Record : Batch characteristics valuation	Get entities from batchcharcvalue	X	
Batch Master Record : Batch characteristics valuation	Add new entity to batchcharcvalue		X
Batch Master Record : Batch characteristics valuation	Get entity from batchcharcvalue by key	X	
Batch Master Record : Batch characteristics valuation	Update entity in batchcharcvalue		X
Batch Master Record : Batch characteristics valuation	Delete entity from batchcharcvalue		X
Batch Master Record : Batch requests	Send a group of requests		X

Fund Hierarchy : Fund hierarchy node text	Get entities from related to fundhierarchy node text	X	
Fund Hierarchy : Fund hierarchy node text	Get entities from fundhierarchy node text	X	
Fund Hierarchy : Fund hierarchy node text	Get entity from fundhierarchy node text by key	X	
Fund Hierarchy : Batch requests	Send a group of requests		X
Process Order Confirmation : Process order confirmation	Read information on the header data of process order confirmations	X	
Process Order Confirmation : Process order confirmation	Create a new process order confirmation		X
Process Order Confirmation : Process order confirmation	Read information on the header data of a single process order confirmation	X	
Process Order Confirmation : Process order confirmation	Cancel a process order confirmation		X
Process Order Confirmation for Clinical Trials : Material movements for co	Read the header data of a process order confirmation together with the corr	X	
Process Order Confirmation for Clinical Trials : Material movements for co	This operation is not supported		X
Process Order Confirmation for Clinical Trials : Material movements for co	Read the material document for goods movements	X	
Process Order Confirmation for Clinical Trials : Material movements for co	Read information on a single material document for goods movements	X	
Process Order Confirmation for Clinical Trials : Batch characteristics for m	Read the material document for goods movements together with the corresp	X	
Process Order Confirmation for Clinical Trials : Batch characteristics for m	This operation is not supported		X
Process Order Confirmation for Clinical Trials : Batch characteristics for m	Read the batch characteristics in material documents for goods movements	X	
Process Order Confirmation for Clinical Trials : Batch characteristics for m	Read information on a single batch characteristic in a material document for	X	
Process Order Confirmation for Clinical Trials : Service operations	Fetches proposal data for quantities, work activities, dates and times, and pe	X	
Process Order Confirmation for Clinical Trials : Service operations	Fetches proposal data for goods movements of a confirmation	X	
Process Order Confirmation for Clinical Trials : Batch requests	Send a group of requests		X
Kanban containers	Read kanban containers	X	
Kanban containers	Read a single kanban container by its key	X	
Kanban containers	Sets the status of a kanban container		X
Kanban containers	Sets the locking status of a kanban container		X
Kanban containers	Withdraws a given quantity from a kanban container		X
Kanban container detailed quantities	Read the batch quantities for a kanban container	X	
Kanban container detailed quantities	Read batch quantities of kanban containers	X	
Kanban container detailed quantities	Read the batch quantity for a single kanban container and batch combinatio	X	
Kanban deliveries	Read the delivery information of a kanban container	X	
Kanban deliveries	Read the kanban container of a delivery information	X	
Kanban deliveries	Read delivery information related to kanban containers	X	
Kanban deliveries	Read the delivery information for a single kanban container by the container	X	
Kanban control cycles	Read the kanban control cycle of a kanban container	X	
Kanban control cycles	Read the kanban containers of a kanban control cycle	X	
Kanban control cycles	Read the kanban control cycle of a delivery information	X	
Kanban control cycles	Read kanban control cycles	X	
Kanban control cycles	Create a kanban control cycle		X
Kanban control cycles	Read a single kanban control cycle by its key	X	
Kanban control cycles	Update a single kanban control cycle		X
Kanban control cycles	Delete an existing kanban control cycle		X
Kanban control cycles	Sets the life cycle status of a kanban control cycle		X
Kanban control cycles	Add a kanban container to an event-driven kanban control cycle		X
Kanban control cycles	Withdraws a quantity from a control cycle		X
Kanban container delivery addresses	Read the kanban control cycle of a kanban container delivery address	X	
Kanban container delivery addresses	Read kanban container delivery addresses	X	
Kanban container delivery addresses	Read a single kanban container delivery address by its key	X	
Kanban Control Cycle : Batch requests	Send a group of requests		X

Maintenance Plan : Maintenance cycles of strategy plan	Get entities from maintenance planstrategycycle	X	
Maintenance Plan : Maintenance cycles of strategy plan	Get entity from maintenance planstrategycycle by key	X	
Maintenance Plan : Maintenance plan classification class characteristics v	Get related to maintplanclass	X	
Maintenance Plan : Maintenance plan classification class characteristics v	Get entities from maintplanclfncharvalue	X	
Maintenance Plan : Maintenance plan classification class characteristics v	Get entity from maintplanclfncharvalue by key	X	
Maintenance Plan : Maintenance plan classification class characteristics	Get entities from related to characteristic	X	
Maintenance Plan : Maintenance plan classification class characteristics	Get related to maintplanclass	X	
Maintenance Plan : Maintenance plan classification class characteristics	Get related to characteristic	X	
Maintenance Plan : Maintenance plan classification class characteristics	Get entities from related to value	X	
Maintenance Plan : Maintenance plan classification class characteristics	Get entities from maintenance plan classchar	X	
Maintenance Plan : Maintenance plan classification class characteristics	Get entity from maintenance plan classchar by key	X	
Maintenance Plan : Batch requests	Send a group of requests		X
Purchasing Info Record : Purchasing info record	Read the general information of a purchasing info record in the system	X	
Purchasing Info Record : Purchasing info record	Create a purchasing info record		X
Purchasing Info Record : Purchasing info record	Read the general information of a purchasing info record	X	
Purchasing Info Record : Purchasing info record	Update the general information of a purchasing info record		X
Purchasing Info Record : Purchasing info record purch. org. data	Read the purchasing data of a purchasing info record	X	
Purchasing Info Record : Purchasing info record purch. org. data	Create the purchasing data of a purchasing info record		X
Purchasing Info Record : Purchasing info record purch. org. data	Read the purchasing information of a purchasing info record	X	
Purchasing Info Record : Purchasing info record purch. org. data	Read the purchasing data of a purchasing info record in the system	X	
Purchasing Info Record : Purchasing info record purch. org. data	Create a purchasing info record in the system		X
Purchasing Info Record : Purchasing info record purch. org. data	Read the purchasing information of a purchasing info record in the system	X	
Purchasing Info Record : Purchasing info record purch. org. data	Update the purchasing information of a purchasing info record		X
Purchasing Info Record : Pricing condition validity	Read the general information of a purchasing info record	X	
Purchasing Info Record : Pricing condition validity	Read the pricing condition validity details of a purchasing info record	X	
Purchasing Info Record : Pricing condition validity	Create the pricing condition validity details of a purchasing info record		X
Purchasing Info Record : Pricing condition validity	Read the purchasing information of a purchasing info record	X	
Purchasing Info Record : Pricing condition validity	Read the pricing condition validity details of a purchasing info record	X	
Purchasing Info Record : Pricing condition validity	Create the pricing condition validity of a purchasing info record		X
Purchasing Info Record : Pricing condition validity	Read the pricing condition validity details of a purchasing info record in the s	X	
Purchasing Info Record : Pricing condition validity	Update the pricing condition validity details of a purchasing info record		X
Purchasing Info Record : Purchase info record po text	Read the purchasing po text of a purchasing info record with respect to a pu	X	
Purchasing Info Record : Purchase info record po text	Create the purchasing po text of a purchasing info record with respect to a purchasing organi		X
Purchasing Info Record : Purchase info record po text	Read the purchasing po text of all the purchasing info records in the system	X	
Purchasing Info Record : Purchase info record po text	Create the purchasing po text of a purchasing info record		X
Purchasing Info Record : Purchase info record po text	Read the purchasing po text of a purchasing info record	X	
Purchasing Info Record : Purchase info record po text	Update the purchasing po text of a purchasing info record		X
Purchasing Info Record : Purchase info record po text	Delete the purchasing po text of a purchasing info record		X
Purchasing Info Record : Pricing conditions	Read the pricing condition validity details of a purchasing info record	X	
Purchasing Info Record : Pricing conditions	Create the pricing conditions of a purchasing info record		X
Purchasing Info Record : Pricing conditions	Read the pricing condition validity details of a purchasing info record in the s	X	
Purchasing Info Record : Pricing conditions	Read the pricing conditions of a purchasing record	X	
Purchasing Info Record : Pricing conditions	Read the pricing conditions of a purchasing record	X	
Purchasing Info Record : Pricing conditions	Update the pricing conditions of a purchasing info record		X
Purchasing Info Record : Pricing condition scales	Read the pricing condition scales details with respect to the specified conditi	X	
Purchasing Info Record : Pricing condition scales	Create the pricing condition scales details with respect to the specified condition record in the		X
Purchasing Info Record : Pricing condition scales	Read the pricing condition scales details of all condition records in the syste	X	
Purchasing Info Record : Pricing condition scales	Create the pricing condition scales details of a condition record in the system		X

Purchasing Info Record : Pricing condition scales	Read the pricing condition scales details of a condition record in the system	X	
Purchasing Info Record : Pricing condition scales	Update the pricing condition scales details of a condition record in the system		X
Purchasing Info Record : Pricing condition scales	Delete the pricing condition scales details of a condition record in the system		X
Purchasing Info Record : Supplementary pricing conditions	Read the supplementary pricing conditions of a purchasing info record	X	
Purchasing Info Record : Supplementary pricing conditions	Create the supplementary pricing conditions of a purchasing info record		X
Purchasing Info Record : Supplementary pricing conditions	Read the supplementary pricing conditions of a purchasing info record	X	
Purchasing Info Record : Supplementary pricing conditions	Create the supplementary pricing conditions of a purchasing info record		X
Purchasing Info Record : Supplementary pricing conditions	Read the supplementary pricing conditions of a purchasing info record	X	
Purchasing Info Record : Supplementary pricing conditions	Read the pricing condition scales details with respect to the specified supple	X	
Purchasing Info Record : Supplementary pricing conditions	Create the pricing condition scales details with respect to the specified supplementary conditi		X
Purchasing Info Record : Supplementary pricing conditions	Read the supplementary pricing conditions of a purchasing info record	X	
Purchasing Info Record : Supplementary pricing conditions	Create the supplementary pricing conditions of a purchasing info record		X
Purchasing Info Record : Supplementary pricing conditions	Read the supplementary pricing conditions of a purchasing info record	X	
Purchasing Info Record : Supplementary pricing conditions	Update the supplementary pricing conditions of a purchasing info record		X
Purchasing Info Record : Supplementary pricing conditions	Delete the supplementary pricing conditions of a purchasing info record		X
Season Process Maintenance : API view for season master	Get the basic data for a specific season year and season in the system	X	
Season Process Maintenance : API view for season master	Create a season in the system		X
Season Process Maintenance : API view for season master	Get the basic data of a season	X	
Season Process Maintenance : API view for season master	Update a specific season in the system		X
Season Process Maintenance : API view for season master	Delete a specific season in the system		X
Season Process Maintenance : API view for season product assignment	Get the product information of a season	X	
Season Process Maintenance : API view for season product assignment	Add new entity to related to seasonproduct		X
Season Process Maintenance : API view for season product assignment	Get the product information for a specific season in the system	X	
Season Process Maintenance : API view for season product assignment	Create all the product information for a specific season in the system		X
Season Process Maintenance : API view for season product assignment	Get the product information of a season	X	
Season Process Maintenance : API view for season product assignment	Update the product information for a specific season in the system		X
Season Process Maintenance : API view for season product assignment	Delete all the product information for a specific season in the system		X
Season Process Maintenance : API view for season pp periods	Get the production periods assigned to a season	X	
Season Process Maintenance : API view for season pp periods	Add new entity to related to seasonproductionperiod		X
Season Process Maintenance : API view for season pp periods	Get the production periods assigned to a specific season in the system	X	
Season Process Maintenance : API view for season pp periods	Create the production periods assigned to a season in the system		X
Season Process Maintenance : API view for season pp periods	Get the production periods assigned to a season	X	
Season Process Maintenance : API view for season pp periods	Update the production periods assigned to a season in the system		X
Season Process Maintenance : API view for season pp periods	Delete the production periods assigned to a specific season in the system		X
Season Process Maintenance : API view for season mm periods	Get the purchase periods assigned to a season	X	
Season Process Maintenance : API view for season mm periods	Add new entity to related to seasonpurchaseperiod		X
Season Process Maintenance : API view for season mm periods	Get the purchase periods assigned to a specific season in the system	X	
Season Process Maintenance : API view for season mm periods	Create the purchase periods assigned to a season in the system		X
Season Process Maintenance : API view for season mm periods	Get the purchase periods assigned to a season	X	
Season Process Maintenance : API view for season mm periods	Update the purchase periods assigned to a season in the system		X
Season Process Maintenance : API view for season mm periods	Delete the purchase periods assigned to a specific season in the system		X
Season Process Maintenance : API view for season sd periods	Get the sales periods assigned to a season	X	
Season Process Maintenance : API view for season sd periods	Add new entity to related to seasonsalesperiod		X
Season Process Maintenance : API view for season sd periods	Get the sales periods assigned to a specific season in the system	X	
Season Process Maintenance : API view for season sd periods	Create the sales periods assigned to a season in the system		X
Season Process Maintenance : API view for season sd periods	Get the sales periods assigned to a season	X	
Season Process Maintenance : API view for season sd periods	Update the sales periods assigned to a season in the system		X
Season Process Maintenance : API view for season sd periods	Delete the sales periods assigned to a specific season in the system		X
Season Process Maintenance : API view for season texts	Get the text data of a season	X	
Season Process Maintenance : API view for season texts	Add new entity to related to seasontext		X
Season Process Maintenance : API view for season texts	Get the text data for a specific season year and season in the system	X	
Season Process Maintenance : API view for season texts	Create the season text in the system		X
Season Process Maintenance : API view for season texts	Get the text data of a season	X	
Season Process Maintenance : API view for season texts	Update a specific season text in the system		X
Season Process Maintenance : API view for season texts	Delete a specific season text in the system		X
Season Process Maintenance : Batch requests	Send a group of requests		X
Debit Memo Request - Simulate (A2X) : Debit memo request simulation	Simulates the creation of a debit memo request		X
Debit Memo Request - Simulate (A2X) : Batch requests	Send a group of requests		X
Company Code - Read : Company code	Read the items of all company codes	X	
Company Code - Read : Company code	Read a company code by key	X	
Nota Fiscal - Create Update : Brazil nota fiscal additional info	Read the additional info data of all notas fiscais and lists their fields with emp	X	
Nota Fiscal - Create Update : Brazil nota fiscal additional info	Read a specific additional info of a nota fiscal and lists its fields with empty v	X	
Nota Fiscal - Create Update : Brazil nota fiscal additional info	Update a specific additional info data of a nota fiscal		X
Nota Fiscal - Create Update : Brazil nf import document additions	Read the import document additions data of all the nota fiscal items and lists	X	
Nota Fiscal - Create Update : Brazil nf import document additions	Read a specific import document additions of a nota fiscal item and lists its f	X	
Nota Fiscal - Create Update : Brazil nf import document additions	Update a specific import document additions data of a nota fiscal item		X
Nota Fiscal - Create Update : Brazil nota fiscal	Read the header data of all notas fiscais and lists their fields with empty valu	X	
Nota Fiscal - Create Update : Brazil nota fiscal	Create or Update a nota fiscal		X
Nota Fiscal - Create Update : Brazil nota fiscal	Read a specific header of a nota fiscal and lists its fields with empty values	X	
Nota Fiscal - Create Update : Brazil nota fiscal	Update a specific header data of a nota fiscal		X
Nota Fiscal - Create Update : Brazil nota fiscal document reference	Read the document reference data of all notas fiscais and lists their fields wi	X	
Nota Fiscal - Create Update : Brazil nota fiscal document reference	Read a specific document reference of a nota fiscal and lists its fields with e	X	
Nota Fiscal - Create Update : Brazil nota fiscal document reference	Update a specific document reference data of a nota fiscal		X
Nota Fiscal - Create Update : Brazil nota fiscal payment	Read the payment data of all notas fiscais and lists their fields with empty va	X	
Nota Fiscal - Create Update : Brazil nota fiscal payment	Read a specific payment of a nota fiscal and lists its fields with empty values	X	
Nota Fiscal - Create Update : Brazil nota fiscal payment	Update a specific payment data of a nota fiscal		X
Nota Fiscal - Create Update : Brazil nota fiscal pharmaceutical item	Read the pharmaceutical item data of all the nota fiscal items and lists their	X	

Nota Fiscal - Create Update : Brazil nota fiscal pharmaceutical item	Read a specific pharmaceutical item of a nota fiscal item and lists its fields w	X	
Nota Fiscal - Create Update : Brazil nota fiscal pharmaceutical item	Update a specific pharmaceutical item data of a nota fiscal item		X
Nota Fiscal - Create Update : Brazil nota fiscal traceability	Read the traceability data of all the nota fiscal items and lists their fields with	X	
Nota Fiscal - Create Update : Brazil nota fiscal traceability	Read a specific traceability of a nota fiscal item and lists its fields with empty	X	
Nota Fiscal - Create Update : Brazil nota fiscal traceability	Update a specific traceability data of a nota fiscal item		X
Nota Fiscal - Create Update : Br export declaration data for nf	Read the export declaration data of all notas fiscais and lists their fields with	X	
Nota Fiscal - Create Update : Br export declaration data for nf	Read a specific export declaration of a nota fiscal and lists its fields with emp	X	
Nota Fiscal - Create Update : Br export declaration data for nf	Update a specific export declaration data of a nota fiscal		X
Nota Fiscal - Create Update : Brazil nota fiscal export document	Read the export document data of all the nota fiscal items and lists their fielc	X	
Nota Fiscal - Create Update : Brazil nota fiscal export document	Read a specific export document of a nota fiscal item and lists its fields with	X	
Nota Fiscal - Create Update : Brazil nota fiscal export document	Update a specific export document data of a nota fiscal item		X
Nota Fiscal - Create Update : Brazil nota fiscal fuel data	Read the fuel data of all the nota fiscal items and lists their fields with empty	X	
Nota Fiscal - Create Update : Brazil nota fiscal fuel data	Read a specific fuel of a nota fiscal item and lists its fields with empty values	X	
Nota Fiscal - Create Update : Brazil nota fiscal fuel data	Update a specific fuel data of a nota fiscal item		X
Nota Fiscal - Create Update : Brazil nota fiscal fuel origin indicator	Read the fuel origin indicator data of all the nota fiscal items and lists their fi	X	
Nota Fiscal - Create Update : Brazil nota fiscal fuel origin indicator	Read a specific fuel origin indicator of a nota fiscal item and lists its fields wi	X	
Nota Fiscal - Create Update : Brazil nota fiscal fuel origin indicator	Update a specific fuel origin indicator data of a nota fiscal item		X
Nota Fiscal - Create Update : Brazil nota fiscal header text	Read the header text data of all notas fiscais and lists their fields with empty	X	
Nota Fiscal - Create Update : Brazil nota fiscal header text	Read a specific header text of a nota fiscal and lists its fields with empty valu	X	
Nota Fiscal - Create Update : Brazil nota fiscal header text	Update a specific header text data of a nota fiscal		X
Nota Fiscal - Create Update : Brazil nota fiscal import document	Read the import document data of all notas fiscais and lists their fields with e	X	
Nota Fiscal - Create Update : Brazil nota fiscal import document	Read a specific import document of a nota fiscal and lists its fields with empt	X	
Nota Fiscal - Create Update : Brazil nota fiscal import document	Update a specific import document data of a nota fiscal		X
Nota Fiscal - Create Update : Brazil nota fiscal item	Read the item data of all notas fiscais and lists their fields with empty values	X	
Nota Fiscal - Create Update : Brazil nota fiscal item	Read a specific item of a nota fiscal and lists its fields with empty values	X	
Nota Fiscal - Create Update : Brazil nota fiscal item	Update a specific item data of a nota fiscal		X
Nota Fiscal - Create Update : Brazil nota fiscal item additional info	Read the item additional info data of all the nota fiscal items and lists their fie	X	
Nota Fiscal - Create Update : Brazil nota fiscal item additional info	Read a specific item additional info of a nota fiscal item and lists its fields wit	X	
Nota Fiscal - Create Update : Brazil nota fiscal item additional info	Update a specific item additional info data of a nota fiscal item		X
Nota Fiscal - Create Update : Brazil nota fiscal nve code	Read the nve code data of all the nota fiscal items and lists their fields with e	X	
Nota Fiscal - Create Update : Brazil nota fiscal nve code	Read a specific nve code of a nota fiscal item and lists its fields with empty v	X	
Nota Fiscal - Create Update : Brazil nota fiscal nve code	Update a specific nve code data of a nota fiscal item		X
Nota Fiscal - Create Update : Brazil nota fiscal item text	Read the item text data of all the nota fiscal items and lists their fields with e	X	
Nota Fiscal - Create Update : Brazil nota fiscal item text	Read a specific item text of a nota fiscal item and lists its fields with empty va	X	
Nota Fiscal - Create Update : Brazil nota fiscal item text	Update a specific item text data of a nota fiscal item		X
Nota Fiscal - Create Update : Brazil nota fiscal partner	Read the partner data of all notas fiscais and lists their fields with empty valu	X	
Nota Fiscal - Create Update : Brazil nota fiscal partner	Read a specific partner of a nota fiscal and lists its fields with empty values	X	
Nota Fiscal - Create Update : Brazil nota fiscal partner	Update a specific partner data of a nota fiscal		X
Nota Fiscal - Create Update : Brazil nota fiscal referenced process	Read the referenced process data of all notas fiscais and lists their fields wit	X	
Nota Fiscal - Create Update : Brazil nota fiscal referenced process	Read a specific referenced process of a nota fiscal and lists its fields with en	X	
Nota Fiscal - Create Update : Brazil nota fiscal referenced process	Update a specific referenced process data of a nota fiscal		X
Nota Fiscal - Create Update : Brazil nota fiscal sugarcane deductible	Read the sugarcane deductible data of all notas fiscais and lists their fields v	X	
Nota Fiscal - Create Update : Brazil nota fiscal sugarcane deductible	Read a specific sugarcane deductible of a nota fiscal and lists its fields with	X	
Nota Fiscal - Create Update : Brazil nota fiscal sugarcane deductible	Update a specific sugarcane deductible data of a nota fiscal		X
Nota Fiscal - Create Update : Brazil nota fiscal sugarcane supply data	Read the sugarcane supply data of all notas fiscais and lists their fields with	X	
Nota Fiscal - Create Update : Brazil nota fiscal sugarcane supply data	Read a specific sugarcane supply of a nota fiscal and lists its fields with emp	X	
Nota Fiscal - Create Update : Brazil nota fiscal sugarcane supply data	Update a specific sugarcane supply data of a nota fiscal		X
Nota Fiscal - Create Update : Brazil nota fiscal tax	Read the tax data of all the nota fiscal items and lists their fields with empty	X	
Nota Fiscal - Create Update : Brazil nota fiscal tax	Read a specific tax of a nota fiscal item and lists its fields with empty values	X	
Nota Fiscal - Create Update : Brazil nota fiscal tax	Update a specific tax data of a nota fiscal item		X
Nota Fiscal - Create Update : Brazil nota fiscal trade note	Read the trade note data of all notas fiscais and lists their fields with empty v	X	
Nota Fiscal - Create Update : Brazil nota fiscal trade note	Read a specific trade note of a nota fiscal and lists its fields with empty value	X	
Nota Fiscal - Create Update : Brazil nota fiscal trade note	Update a specific trade note data of a nota fiscal		X
Nota Fiscal - Create Update : Brazil nota fiscal trailer	Read the trailer information data of all notas fiscais and lists their fields with	X	
Nota Fiscal - Create Update : Brazil nota fiscal trailer	Read a specific trailer information of a nota fiscal and lists its fields with emp	X	
Nota Fiscal - Create Update : Brazil nota fiscal trailer	Update a specific trailer information data of a nota fiscal		X
Nota Fiscal - Create Update : Brazil nota fiscal transported volume	Read the transported volume data of all notas fiscais and lists their fields wit	X	
Nota Fiscal - Create Update : Brazil nota fiscal transported volume	Read a specific transported volume of a nota fiscal and lists its fields with en	X	
Nota Fiscal - Create Update : Brazil nota fiscal transported volume	Update a specific transported volume data of a nota fiscal		X
Nota Fiscal - Create Update : Brazil nota fiscal vehicle	Read the vehicle information data of all the nota fiscal items and lists their fie	X	
Nota Fiscal - Create Update : Brazil nota fiscal vehicle	Read a specific vehicle information of a nota fiscal item and lists its fields wit	X	
Nota Fiscal - Create Update : Brazil nota fiscal vehicle	Update a specific vehicle information data of a nota fiscal item		X
Nota Fiscal - Create Update : Brazil nota fiscal one time partner	Read the one time partner data of all notas fiscais and lists their fields with e	X	
Nota Fiscal - Create Update : Brazil nota fiscal one time partner	Read a specific one time partner of a nota fiscal and lists its fields with empt	X	
Nota Fiscal - Create Update : Brazil nota fiscal one time partner	Update a specific one time partner data of a nota fiscal		X
Nota Fiscal - Create Update : Brazil nota fiscal technical responsible	Read the technical responsible information data of all notas fiscais and lists	X	
Nota Fiscal - Create Update : Brazil nota fiscal technical responsible	Read a specific technical responsible information of a nota fiscal and lists its	X	
Nota Fiscal - Create Update : Brazil nota fiscal technical responsible	Update a specific technical responsible information data of a nota fiscal		X
Nota Fiscal - Create Update : Batch requests	Send a group of requests		X
Production Order (Version 2) : Production order serial numbers	Read the data of production order serial numbers	X	
Production Order (Version 2) : Production order serial numbers	Read the data of a single serial number	X	
Production Order (Version 2) : Production order serial numbers	Delete a serial number from a production order item		X
Production Order (Version 2) : Production order components	Read the data of production order components without follow-up materials	X	
Production Order (Version 2) : Production order components	Read the data of a single component	X	
Production Order (Version 2) : Production order components extended	Read the data of all production order components	X	
Production Order (Version 2) : Production order components extended	Read the data of a single component	X	
Production Order (Version 2) : Production order components extended	Update component data of a production order		X

Production Order (Version 2) : Production order components using rap bo	Read the data of all production order components	X	
Production Order (Version 2) : Production order components using rap bo	Read the data of a single component	X	
Production Order (Version 2) : Production order components using rap bo	Update component data of a production order		X
Production Order (Version 2) : Production order components using rap bo	Delete component data of a production order		X
Production Order (Version 2) : Production order items	Read the data of the production order item including the associated serial nu	X	
Production Order (Version 2) : Production order items	Read the data of production order items	X	
Production Order (Version 2) : Production order items	Read the data of a single item	X	
Production Order (Version 2) : Production order operations	Read the operations of production orders	X	
Production Order (Version 2) : Production order operations	Read information on a single operation	X	
Production Order (Version 2) : Production order operations	Update operation data of a production order		X
Production Order (Version 2) : Production order operations	Schedules order operations		X
Production Order (Version 2) : Production order status	Read the status of production orders	X	
Production Order (Version 2) : Production order status	Read the status of a single production order	X	
Production Order (Version 2) : Production order	Read the header data of a production order including the components withou	X	
Production Order (Version 2) : Production order	Read the header data of a production order including all components	X	
Production Order (Version 2) : Production order	Read the header data of a production order including all components	X	
Production Order (Version 2) : Production order	Read the header data of a production order including the items	X	
Production Order (Version 2) : Production order	Read the header data of a production order including the operations	X	
Production Order (Version 2) : Production order	Read the header data of a production order including the status	X	
Production Order (Version 2) : Production order	Read information on the header data of production orders	X	
Production Order (Version 2) : Production order	Create a new production order		X
Production Order (Version 2) : Production order	Read information on the header data of a single production order	X	
Production Order (Version 2) : Production order	Update header data of a production order		X
Production Order (Version 2) : Production order	Releases a production order		X
Production Order (Version 2) : Production order	Releases an operation of a production order		X
Production Order (Version 2) : Production order	Technically completes a production order		X
Production Order (Version 2) : Production order	Closes a production order		X
Production Order (Version 2) : Production order	Sets the deletion flag for a production order		X
Production Order (Version 2) : Production order	Sets the deletion indicator for a production order		X
Production Order (Version 2) : Production order	Discards a production order		X
Production Order (Version 2) : Production order	Converts a planned order into a production order		X
Production Order (Version 2) : Production order	Sets the delivery completed indicator for a production order		X
Production Order (Version 2) : Production order	Sets the status releasedbymes for a production order		X
Production Order (Version 2) : Production resources tools	Read the header data of a production order including the production resourc	X	
Production Order (Version 2) : Production resources tools	Read the production resources/tools (prts) of production orders	X	
Production Order (Version 2) : Production resources tools	Read the information on a single production resource/tool (prt) for an operati	X	
Production Order (Version 2) : Batch requests	Send a group of requests		X
Supply Assignment : Unassignment	Update supply assignments for existing requirement documents		X
Supply Assignment : Create assignments	Create supply assignments for existing requirement documents		X
Supply Assignment : Read assignments	Read all the existing supply assignments	X	
Supply Assignment : Read assignments	Add new entity to a supplyassignment		X
Supply Assignment : Read assignments	Read the supply assignment for a specific requirement document	X	
Supply Assignment : Batch requests	Send a group of requests		X
Alignment - Purchase Requisition to Purchase Order : Item	Read all purchase requisition item details including the associated purchase	X	
Alignment - Purchase Requisition to Purchase Order : Item	Aligns or nullifies alignment of an account assigned purchase requisition item to with an existi		X
Alignment - Purchase Requisition to Purchase Order : Item	Read specific purchase requisition item details including the associated purc	X	
Alignment - Purchase Requisition to Purchase Order : Batch requests	Send a group of requests		X
Multichannel Foundation for Utilities : Accountaddresses	Add new entity to accountaddresses		X

Multichannel Foundation for Utilities : Contractaccounts	Get the invoices associated with a contract account	X	
Multichannel Foundation for Utilities : Contractaccounts	Get entities from contractaccounts	X	
Multichannel Foundation for Utilities : Contractaccounts	Get entity from contractaccounts by key	X	
Multichannel Foundation for Utilities : Contractaccounts	Update entity in contractaccounts		X
Multichannel Foundation for Utilities : Invoice pdfs	Get the invoice pdf associated with an invoice	X	
Multichannel Foundation for Utilities : Meter reading reasons	Get the meter reading reason associated with future meter readings	X	
Multichannel Foundation for Utilities : Devices	Get the device associated with future meter readings	X	
Multichannel Foundation for Utilities : Devices	Get the contract associated with a device	X	
Multichannel Foundation for Utilities : Devices	Get entities from devices	X	
Multichannel Foundation for Utilities : Devices	Get entity from devices by key	X	
Multichannel Foundation for Utilities : Meter reading categories	Get the meter reading category associated with future meter readings	X	
Multichannel Foundation for Utilities : Meter reading results	Get the meter reading reasons associated with meter reading results	X	
Multichannel Foundation for Utilities : Meter reading results	Get the meter reading reason associated with meter reading results	X	
Multichannel Foundation for Utilities : Meter reading results	Get the device associated with meter reading results	X	
Multichannel Foundation for Utilities : Meter reading results	Post the meter reading results associated with a device	X	
Multichannel Foundation for Utilities : Meter reading results	Add new entity to related meterreadingresults		X
Multichannel Foundation for Utilities : Meter reading results	Get the meter reading category associated with meter reading results	X	
Multichannel Foundation for Utilities : Meter reading results	Get entities from meterreadingresults	X	
Multichannel Foundation for Utilities : Meter reading results	Post meter reading results		X
Multichannel Foundation for Utilities : Meter reading results	Get entity from meterreadingresults by key	X	
Multichannel Foundation for Utilities : Meter reading results	Get entities from related dependentmeterreadingresults	X	
Multichannel Foundation for Utilities : Meter reading results	Post the dependent meter reading results associated with meter reading results		X
Multichannel Foundation for Utilities : Meter reading statuses	Get the meter reading status associated with meter reading results	X	
Multichannel Foundation for Utilities : Meter reading notes	Get the meter reading note associated with meter reading results	X	
Multichannel Foundation for Utilities : Premises	Get premises	X	
Multichannel Foundation for Utilities : Premises	Get premises	X	
Multichannel Foundation for Utilities : Premises	Get the premises by an address	X	
Multichannel Foundation for Utilities : Premises	Get the premises for an account	X	
Multichannel Foundation for Utilities : Installations	Get the installations associated with a premise	X	
Multichannel Foundation for Utilities : Installations	Get entities from installations	X	
Multichannel Foundation for Utilities : Installations	Get entity from installations by key	X	
Multichannel Foundation for Utilities : Premise types	Get the premise type associated with a premise	X	
Multichannel Foundation for Utilities : Premise types	Get entities from premisetypes	X	
Multichannel Foundation for Utilities : Premise types	Get entity from premisetypes by key	X	
Multichannel Foundation for Utilities : Divisions	Get the division associated with a device	X	
Multichannel Foundation for Utilities : Divisions	Get the division associated with an installation	X	
Multichannel Foundation for Utilities : Divisions	Get the division associated with a product	X	
Multichannel Foundation for Utilities : Outages	Get the premise associated with an outage	X	
Multichannel Foundation for Utilities : Outages	Get outages	X	
Multichannel Foundation for Utilities : Outages	Post outages		X
Multichannel Foundation for Utilities : Outages	Get an outage	X	
Multichannel Foundation for Utilities : Contactadditionalinfos	Get the contact additional info associated with an outage	X	
Multichannel Foundation for Utilities : Contactadditionalinfos	Get entities from contactadditionalinfos	X	
Multichannel Foundation for Utilities : Contactadditionalinfos	Get entity from contactadditionalinfos by key	X	
Multichannel Foundation for Utilities : Attachments	Get the attachments associated with an outage	X	
Multichannel Foundation for Utilities : Attachments	Add new media resource to related attachments		X
Multichannel Foundation for Utilities : Attachments	Get entities from attachments	X	

Multichannel Foundation for Utilities : Attachments	Add new media resource to attachments		X
Multichannel Foundation for Utilities : Attachments	Get entity from attachments by key	X	
Multichannel Foundation for Utilities : Attachments	Get media resource from attachments by key	X	
Multichannel Foundation for Utilities : Contactpriorities	Get the contact priority associated with an outage	X	
Multichannel Foundation for Utilities : Contactpriorities	Get entities from contactpriorities	X	
Multichannel Foundation for Utilities : Contactpriorities	Get entity from contactpriorities by key	X	
Multichannel Foundation for Utilities : Contacttypes	Get the contact type associated with an outage	X	
Multichannel Foundation for Utilities : Contacttypes	Get entities from contacttypes	X	
Multichannel Foundation for Utilities : Contacttypes	Get entity from contacttypes by key	X	
Multichannel Foundation for Utilities : Registers to read	Get the meter reading reason associated with a register to read	X	
Multichannel Foundation for Utilities : Registers to read	Get the device associated with a register to read	X	
Multichannel Foundation for Utilities : Registers to read	Get the registers to read associated with a device	X	
Multichannel Foundation for Utilities : Registers to read	Get the interval registers to read associated with a device	X	
Multichannel Foundation for Utilities : Registers to read	Get the meter reading category associated with a register to read	X	
Multichannel Foundation for Utilities : Register types	Get the register type associated with a register to read	X	
Multichannel Foundation for Utilities : Profile values	Get the profile values associated with a device	X	
Multichannel Foundation for Utilities : Profile values	Get the profile values associated with a register to read	X	
Multichannel Foundation for Utilities : Profile values	Get the current billing period	X	
Multichannel Foundation for Utilities : Profile values files	Get the profile values files associated with a device	X	
Multichannel Foundation for Utilities : Profile values files	Get the profile values files associated with a register to read	X	
Multichannel Foundation for Utilities : Profile headers	Get the profile headers associated with a register to read	X	
Multichannel Foundation for Utilities : Profile headers	Get the profile values associated with a profile header	X	
Multichannel Foundation for Utilities : Service providers	Get entities from serviceproviders	X	
Multichannel Foundation for Utilities : Service providers	Get entity from serviceproviders by key	X	
Multichannel Foundation for Utilities : Servicenotifications	Get the attachments associated with a service notification	X	
Multichannel Foundation for Utilities : Servicenotifications	Add new media resource to related attachments		X
Multichannel Foundation for Utilities : Servicenotifications	Get entities from servicenotifications	X	
Multichannel Foundation for Utilities : Servicenotifications	Add new entity to servicenotifications		X
Multichannel Foundation for Utilities : Servicenotifications	Get entity from servicenotifications by key	X	
Multichannel Foundation for Utilities : Servicenotificationtypes	Get related servicenotificationtype	X	
Multichannel Foundation for Utilities : Serviceorders	Get related serviceorder	X	
Multichannel Foundation for Utilities : Serviceorders	Get related servicenotification	X	
Multichannel Foundation for Utilities : Serviceorders	Get entities from serviceorders	X	
Multichannel Foundation for Utilities : Serviceorders	Get entity from serviceorders by key	X	
Multichannel Foundation for Utilities : Service priorities	Get the service priority associated with a service notification	X	
Multichannel Foundation for Utilities : Service priorities	Get the service priority associated with a service order	X	
Multichannel Foundation for Utilities : Serviceordertypes	Get related serviceordertype	X	
Multichannel Foundation for Utilities : Contracts	Get the active payment plan associated with a contract	X	
Multichannel Foundation for Utilities : Contracts	Get the contract account associated with a contract	X	
Multichannel Foundation for Utilities : Contracts	Get the contracts associated with a contract account	X	
Multichannel Foundation for Utilities : Contracts	Get the contract associated with a device	X	
Multichannel Foundation for Utilities : Contracts	Get the devices associated with a contract	X	
Multichannel Foundation for Utilities : Contracts	Get the meter reading results associated with a contract	X	
Multichannel Foundation for Utilities : Contracts	Post the meter reading results associated with a contract		X
Multichannel Foundation for Utilities : Contracts	Get the premise associated with a contract	X	
Multichannel Foundation for Utilities : Contracts	Get the division associated with a contract	X	
Multichannel Foundation for Utilities : Contracts	Get the profile values associated with a contract	X	
Multichannel Foundation for Utilities : Contracts	Get the profile values files associated with a contract	X	
Multichannel Foundation for Utilities : Interactionrecords	Get the interaction record associated with an attachment	X	
Multichannel Foundation for Utilities : Interactionrecords	Get the attachment sets associated with an interaction record	X	
Multichannel Foundation for Utilities : Interactionrecords	Add new media resource to related attachmentset		X
Multichannel Foundation for Utilities : Budget billing plans	Get the budget billing cycle associated with a budget billing plan	X	
Multichannel Foundation for Utilities : Budget billing plans	Get the active budget billing plan associated with a contract	X	
Multichannel Foundation for Utilities : Budget billing plans	Get entities from budgetbillingplans	X	
Multichannel Foundation for Utilities : Budget billing plans	Get entity from budgetbillingplans by key	X	
Multichannel Foundation for Utilities : Budget billing plans	Update a budget billing plan		X
Multichannel Foundation for Utilities : Contract consumption values	Get the meter reading category associated with contract consumption values	X	
Multichannel Foundation for Utilities : Contract consumption values	Get entities from related contractconsumptionvalues	X	
Multichannel Foundation for Utilities : Consumption period types	Get the consumption period type associated with contract consumption valu	X	
Multichannel Foundation for Utilities : Profile types	Get the profile type associated with profile values	X	
Multichannel Foundation for Utilities : Profile types	Get the profile type associated with a profile header	X	
Multichannel Foundation for Utilities : Profile value types	Get the profile value type associated with a profile value	X	
Multichannel Foundation for Utilities : Contractalldevices	Get the all the devices associated with a contract	X	
Multichannel Foundation for Utilities : Parked documents	Get the move-in installations associated with a parked document	X	
Multichannel Foundation for Utilities : Parked document installations	Get the move-out installations associated with a parked document	X	
Multichannel Foundation for Utilities : Salescontracts	Get the sales contacts associated with a contract account	X	
Multichannel Foundation for Utilities : Salescontracts	Create a sales contract		X
Multichannel Foundation for Utilities : Salescontracts	Get the contract associated with a sales contract	X	
Multichannel Foundation for Utilities : Salescontracts	Create a sales contract		X
Multichannel Foundation for Utilities : Salescontracts	Post a sales contract end		X
Multichannel Foundation for Utilities : Configurableorders	Get the configurable order associated with a sales contract	X	
Multichannel Foundation for Utilities : Channels	Get the channel associated with an interaction record	X	
Multichannel Foundation for Utilities : Channels	Get entities from related interactionrecordset	X	
Multichannel Foundation for Utilities : Documentstatuses	Get the document status associated with an interaction record	X	
Multichannel Foundation for Utilities : Documentstatuses	Get related interactionrecord	X	
Multichannel Foundation for Utilities : Accounts	Get entities from related accountaddresses	X	
Multichannel Foundation for Utilities : Accounts	Add new entity to related accountaddresses		X

Multichannel Foundation for Utilities : Accounts	Get related standardaccountaddress	X	
Multichannel Foundation for Utilities : Accounts	Get entities from related accountaddressindependentemails	X	
Multichannel Foundation for Utilities : Accounts	Add new entity to related accountaddressindependentemails		X
Multichannel Foundation for Utilities : Accounts	Get entities from related paymentdocuments	X	
Multichannel Foundation for Utilities : Accounts	Add new entity to related paymentdocuments		X
Multichannel Foundation for Utilities : Accounts	Get entities from related accountrelationships	X	
Multichannel Foundation for Utilities : Accounts	Get the invoices associated with an account	X	
Multichannel Foundation for Utilities : Accounts	Get entities from related contractaccounts	X	
Multichannel Foundation for Utilities : Accounts	Get related alternativepayer	X	
Multichannel Foundation for Utilities : Accounts	Get related alternativepayee	X	
Multichannel Foundation for Utilities : Accounts	Get related billtoaccount	X	
Multichannel Foundation for Utilities : Accounts	Get the outages associated with an account	X	
Multichannel Foundation for Utilities : Accounts	Post an outage associated with an account		X
Multichannel Foundation for Utilities : Accounts	Get entities from related servicenotifications	X	
Multichannel Foundation for Utilities : Accounts	Add new entity to related servicenotifications		X
Multichannel Foundation for Utilities : Accounts	Get entities from related serviceorders	X	
Multichannel Foundation for Utilities : Accounts	Get the account associated with an interaction record	X	
Multichannel Foundation for Utilities : Accounts	Get entities from related interactionrecords	X	
Multichannel Foundation for Utilities : Accounts	Update entity in accounts		X
Multichannel Foundation for Utilities : Accounts	Invoke function getaccounts	X	
Multichannel Foundation for Utilities : Accounts	Invoke function getagentusergroup	X	
Multichannel Foundation for Utilities : Interactionrecordcategories	Get the interaction record category associated with an interaction record	X	
Multichannel Foundation for Utilities : Interactionrecordcategories	Get the interaction record category 01 associated with an interaction record	X	
Multichannel Foundation for Utilities : Interactionrecordcategories	Get the interaction record associated with an interaction record category	X	
Multichannel Foundation for Utilities : Interactionrecordcategories	Get the interaction record 01 associated with an interaction record category	X	
Multichannel Foundation for Utilities : Interactionrecordcategories	Get entities from related interaction record category 01	X	
Multichannel Foundation for Utilities : Interactionrecordreasons	Get the interaction record reason associated with an interaction record	X	
Multichannel Foundation for Utilities : Interactionrecordreasons	Get the interaction record associated with an interaction record reason	X	
Multichannel Foundation for Utilities : Bankaccounts	Get related outgoingbankaccount	X	
Multichannel Foundation for Utilities : Bankaccounts	Get related incoming alternative payer bank account	X	
Multichannel Foundation for Utilities : Bankaccounts	Get related outgoing alternative payee bank account	X	
Multichannel Foundation for Utilities : Bankaccounts	Get related incoming bank account	X	
Multichannel Foundation for Utilities : Bankaccounts	Get entities from related bank accounts	X	
Multichannel Foundation for Utilities : Bankaccounts	Add new entity to related bank accounts		X
Multichannel Foundation for Utilities : Bankaccounts	Add new entity to bankaccounts		X
Multichannel Foundation for Utilities : Bankaccounts	Update entity in bankaccounts		X
Multichannel Foundation for Utilities : Bankaccounts	Delete a bank account		X
Multichannel Foundation for Utilities : Banks	Get related bank	X	
Multichannel Foundation for Utilities : Contactactions	Get entities from contactactions	X	
Multichannel Foundation for Utilities : Contactactions	Get entity from contactactions by key	X	
Multichannel Foundation for Utilities : Contactclasses	Get related contactclass	X	
Multichannel Foundation for Utilities : Contactclasses	Get entities from contactclasses	X	
Multichannel Foundation for Utilities : Contactclasses	Get entity from contactclasses by key	X	
Multichannel Foundation for Utilities : Accounttitles	Get related accounttitle	X	
Multichannel Foundation for Utilities : Accounttypes	Get related accounttype	X	
Multichannel Foundation for Utilities : Accounttypes	Get related accounttype	X	
Multichannel Foundation for Utilities : Accounttypes	Get entities from accounttypes	X	
Multichannel Foundation for Utilities : Accounttypes	Get entity from accounttypes by key	X	
Multichannel Foundation for Utilities : Account address independent mobil	Get entities from related account address independent mobile phones	X	
Multichannel Foundation for Utilities : Account address independent mobil	Add new entity to related account address independent mobile phones		X
Multichannel Foundation for Utilities : Account address independent mobil	Add new entity to account address independent mobile phones		X
Multichannel Foundation for Utilities : Account address independent mobil	Update entity in account address independent mobile phones		X
Multichannel Foundation for Utilities : Account address independent mobil	Delete entity from account address independent mobile phones		X
Multichannel Foundation for Utilities : Accountbalances	Get related accountbalance	X	
Multichannel Foundation for Utilities : Paymentcards	Get related incomingpaymentcard	X	
Multichannel Foundation for Utilities : Paymentcards	Get related outgoingpaymentcard	X	
Multichannel Foundation for Utilities : Paymentcards	Get related incomingalternativepayerpaymentcard	X	
Multichannel Foundation for Utilities : Paymentcards	Get related outgoingalternativepayeepaymentcard	X	
Multichannel Foundation for Utilities : Paymentcards	Get entities from related paymentcards	X	
Multichannel Foundation for Utilities : Paymentcards	Add new entity to related paymentcards		X
Multichannel Foundation for Utilities : Paymentcards	Get entities from paymentcards	X	
Multichannel Foundation for Utilities : Paymentcards	Create a payment card		X
Multichannel Foundation for Utilities : Paymentcards	Get entity from paymentcards by key	X	
Multichannel Foundation for Utilities : Paymentcards	Update a payment card		X
Multichannel Foundation for Utilities : Paymentcards	Delete a payment card		X
Multichannel Foundation for Utilities : Correspondences	Get entities from related correspondences	X	
Multichannel Foundation for Utilities : Correspondences	Get entities from correspondences	X	
Multichannel Foundation for Utilities : Correspondences	Get entity from correspondences by key	X	
Multichannel Foundation for Utilities : Correspondences	Get media resource from correspondences by key	X	
Multichannel Foundation for Utilities : Communicationpreferences	Get related accountaddress	X	
Multichannel Foundation for Utilities : Communicationpreferences	Get entities from related communicationpreferences	X	
Multichannel Foundation for Utilities : Communicationpreferences	Add new entity to related communicationpreferences		X
Multichannel Foundation for Utilities : Communicationpreferences	Get entities from related communicationpreferences	X	
Multichannel Foundation for Utilities : Communicationpreferences	Add new entity to related communicationpreferences		X
Multichannel Foundation for Utilities : Communicationpreferences	Add new entity to communicationpreferences		X
Multichannel Foundation for Utilities : Communicationpreferences	Add new entity to related dependentaccountcommpreferences		X
Multichannel Foundation for Utilities : Communicationpreferences	Add new entity to related dependentcontractaccountcommpreferences		X

Multichannel Foundation for Utilities : Accountcontacts	Get related contactpriority	X	
Multichannel Foundation for Utilities : Accountcontacts	Get entities from related accountcontacts	X	
Multichannel Foundation for Utilities : Accountcontacts	Add new entity to related accountcontacts		X
Multichannel Foundation for Utilities : Accountcontacts	Get related contactaction	X	
Multichannel Foundation for Utilities : Accountcontacts	Get related contactclass	X	
Multichannel Foundation for Utilities : Accountcontacts	Get entities from accountcontacts	X	
Multichannel Foundation for Utilities : Accountcontacts	Add new entity to accountcontacts		X
Multichannel Foundation for Utilities : Accountcontacts	Get entity from accountcontacts by key	X	
Multichannel Foundation for Utilities : Accountcontacts	Invoke action requestchange		X
Multichannel Foundation for Utilities : Accountalerts	Get entities from related account alerts	X	
Multichannel Foundation for Utilities : Accountaddressindependentphones	Get entities from related account address independent phones	X	
Multichannel Foundation for Utilities : Accountaddressindependentphones	Add new entity to related account address independent phones		X
Multichannel Foundation for Utilities : Accountaddressindependentphones	Add new entity to account address independent phones		X
Multichannel Foundation for Utilities : Accountaddressindependentphones	Update entity in related account address independent phones		X
Multichannel Foundation for Utilities : Accountaddressindependentphones	Delete entity from account address independent phones		X
Multichannel Foundation for Utilities : Accountaddressindependentfaxes	Get entities from related account address independent phones	X	
Multichannel Foundation for Utilities : Accountaddressindependentfaxes	Add new entity to related account address independent phones		X
Multichannel Foundation for Utilities : Accountaddressindependentfaxes	Add new entity to account address independent faxes		X
Multichannel Foundation for Utilities : Accountaddressindependentfaxes	Update entity in account address independent faxes		X
Multichannel Foundation for Utilities : Accountaddressindependentfaxes	Delete entity from account address independent faxes		X
Multichannel Foundation for Utilities : Accountsexes	Get related accountsex	X	
Multichannel Foundation for Utilities : Paymentcardtypes	Get related payment card type	X	
Multichannel Foundation for Utilities : Paymentcardtypes	Get entities from payment card types	X	
Multichannel Foundation for Utilities : Paymentcardtypes	Get entity from payment card types by key	X	
Multichannel Foundation for Utilities : Communicationmethods	Get related communicationmethod	X	
Multichannel Foundation for Utilities : Communicationmethods	Invoke function getallowedcommunicationmethods	X	
Multichannel Foundation for Utilities : Communicationcategories	Get related communicationcategory	X	
Multichannel Foundation for Utilities : Contractaccountbalances	Get related contractaccountbalance	X	
Multichannel Foundation for Utilities : Correspondencetypes	Get related correspondencetypes	X	
Multichannel Foundation for Utilities : Correspondencetypes	Get entities from correspondencetypes	X	
Multichannel Foundation for Utilities : Correspondencetypes	Get entity from correspondencetypes by key	X	
Multichannel Foundation for Utilities : Addresstypes	Get related addresstype	X	
Multichannel Foundation for Utilities : Batch requests	Send a group of requests		X
Master Recipe : Header	Get entities from masterrecipeheader	X	
Master Recipe : Header	Add new entity to masterrecipeheader		X
Master Recipe : Header	Get entity from masterrecipeheader by key	X	
Master Recipe : Header	Update entity in masterrecipeheader		X
Master Recipe : Material assignment	Get entities from related to matlassgmt	X	
Master Recipe : Material assignment	Get entities from masterrecipematlassgmt	X	
Master Recipe : Material assignment	Get entity from masterrecipematlassgmt by key	X	
Master Recipe : Operation	Get entities from related to operation	X	
Master Recipe : Operation	Add new entity to related to operation		X
Master Recipe : Operation	Get entities from masterrecipeoperation	X	
Master Recipe : Operation	Add new entity to masterrecipeoperation		X
Master Recipe : Operation	Get entity from masterrecipeoperation by key	X	
Master Recipe : Operation	Update entity in masterrecipeoperation		X
Master Recipe : Inspection characteristics assignment	Get entities from related to inspcharcsassgmt	X	
Master Recipe : Inspection characteristics assignment	Get entities from masterrecipeinspcharcsassgmt	X	
Master Recipe : Inspection characteristics assignment	Get entity from masterrecipeinspcharcsassgmt by key	X	
Master Recipe : Operation component allocation	Get entities from related to opcompalloc	X	
Master Recipe : Operation component allocation	Get entities from masterrecipeopcompalloc	X	
Master Recipe : Operation component allocation	Get entity from masterrecipeopcompalloc by key	X	
Master Recipe : Operation secondary resource	Get entities from related to opsecdryrsce	X	
Master Recipe : Operation secondary resource	Add new entity to related to opsecdryrsce		X
Master Recipe : Operation secondary resource	Get entities from masterrecipeopsecdryrsce	X	
Master Recipe : Operation secondary resource	Add new entity to masterrecipeopsecdryrsce		X
Master Recipe : Operation secondary resource	Get entity from masterrecipeopsecdryrsce by key	X	
Master Recipe : Operation secondary resource	Update entity in masterrecipeopsecdryrsce		X
Master Recipe : Phase	Get entities from related to phase	X	
Master Recipe : Phase	Add new entity to related to phase		X
Master Recipe : Phase	Get entities from related to inspcharcsassgmt	X	
Master Recipe : Phase	Get entities from masterrecipephase	X	
Master Recipe : Phase	Add new entity to masterrecipephase		X
Master Recipe : Phase	Get entity from masterrecipephase by key	X	
Master Recipe : Phase	Update entity in masterrecipephase		X
Master Recipe : Phase component allocation	Get entities from related to phase component allocation	X	
Master Recipe : Phase component allocation	Add new entity to related to phase component allocation		X
Master Recipe : Phase component allocation	Get entities from master recipe phase component allocation	X	
Master Recipe : Phase component allocation	Add new entity to master recipe phase component allocation		X
Master Recipe : Phase component allocation	Get entity from master recipe phase component allocation by key	X	
Master Recipe : Phase component allocation	Update entity in master recipe phase component allocation		X
Master Recipe : Phase relationship	Get entities from related to phase relationship	X	
Master Recipe : Phase relationship	Add new entity to related to phase relationship		X
Master Recipe : Phase relationship	Get entities from master recipe phase relationship	X	
Master Recipe : Phase relationship	Add new entity to master recipe phase relationship		X
Master Recipe : Phase relationship	Get entity from master recipe phase relationship by key	X	
Master Recipe : Phase relationship	Update entity in master recipe phase relationship		X

Master Recipe : Phase secondary resource	Get entities from related to phsesecdryrsce	X	
Master Recipe : Phase secondary resource	Add new entity to related to phsesecdryrsce		X
Master Recipe : Phase secondary resource	Get entities from masterrecipephsesecdryrsce	X	
Master Recipe : Phase secondary resource	Add new entity to masterrecipephsesecdryrsce		X
Master Recipe : Phase secondary resource	Get entity from masterrecipephsesecdryrsce by key	X	
Master Recipe : Phase secondary resource	Update entity in masterrecipephsesecdryrsce		X
Master Recipe : Batch requests	Send a group of requests		X
Nutrient Statement - Read : Nutrient statement code	Get entities from nutrientstatement	X	
Nutrient Statement - Read : Nutrient statement code	Get entity from nutrientstatement by key	X	
Nutrient Statement - Read : Nutrient statement code text	Get entities from related to nutrientstatementtext	X	
Nutrient Statement - Read : Nutrient statement code text	Get related to nutrientstatement	X	
Nutrient Statement - Read : Nutrient statement code text	Get entities from nutrientstatementtext	X	
Nutrient Statement - Read : Nutrient statement code text	Get entity from nutrientstatementtext by key	X	
Nutrient Statement - Read : Batch requests	Send a group of requests		X
Product Group - Read : Product group	Get entities from a productgroup	X	
Product Group - Read : Product group	Get entity from a productgroup by key	X	
Product Group - Read : Product group text	Get entities from related to text	X	
Product Group - Read : Product group text	Get related to materialgroup	X	
Product Group - Read : Product group text	Get entities from a productgrouptext	X	
Product Group - Read : Product group text	Get entity from a productgrouptext by key	X

Master Inspection Characteristic - Read : Master inspection characteristics	Read a specific master inspection characteristic	X	
Master Inspection Characteristic - Read : Master inspection characteristic	Read master inspection characteristics with text associations	X	

Master Inspection Characteristic - Read : Master inspection characteristic	Read master inspection characteristic texts with associations to master insp	X	
Master Inspection Characteristic - Read : Master inspection characteristic	Read all master inspection characteristic texts	X	
Master Inspection Characteristic - Read : Master inspection characteristic	Read the text of a master inspection characteristic in a specific language	X	
Master Inspection Characteristic - Read : Batch requests	Send a group of requests		X
Incoming VAT Invoice : China input tax invoice	Get the list of china input tax invoices	X	
Incoming VAT Invoice : China input tax invoice	Create a china input tax invoice		X
Incoming VAT Invoice : China input tax invoice	Get a single china input tax invoice with a uuid	X	
Incoming VAT Invoice : China input tax invoice	Update a china input tax invoice		X
Incoming VAT Invoice : China input tax invoice binding record	Get a single record of china input tax invoice and related binding information	X	
Incoming VAT Invoice : China input tax invoice binding record	Create a binding record for a given china input tax invoice		X
Incoming VAT Invoice : China input tax invoice binding record	Get a single record of invoice related to a specified binding document	X	
Incoming VAT Invoice : China input tax invoice binding record	Get the list of china input tax invoice binding documents	X	
Incoming VAT Invoice : China input tax invoice binding record	Create a single binding record of china input tax invoice		X
Incoming VAT Invoice : China input tax invoice binding record	Get a single china input tax invoice binding document with a binding and bin	X	
Incoming VAT Invoice : China input tax invoice item	Get a single record of china input tax invoice and related item information	X	
Incoming VAT Invoice : China input tax invoice item	Create an item record for a given china input tax invoice		X
Incoming VAT Invoice : China input tax invoice item	Get a single record of invoice related to a specified china input tax invoice w	X	
Incoming VAT Invoice : China input tax invoice item	Get the list of china input tax invoice items	X	
Incoming VAT Invoice : China input tax invoice item	Create a china input tax invoice item		X
Incoming VAT Invoice : China input tax invoice item	Get a single china input tax invoice item with an invoice and item uuid	X	
Incoming VAT Invoice : Service operations	Receives a china input tax invoice	X	
Incoming VAT Invoice : Service operations	Signs off a china input tax invoice		X
Incoming VAT Invoice : Service operations	Declares a china input tax invoice		X
Incoming VAT Invoice : Batch requests	Send a group of requests		X
Sales Contract (A2X) : Sales contract header	Read all sales contract headers	X	
Sales Contract (A2X) : Sales contract header	Create a sales contract		X
Sales Contract (A2X) : Sales contract header	Read the header of a specific sales contract	X	
Sales Contract (A2X) : Sales contract header	Update the header of a specific sales contract		X
Sales Contract (A2X) : Sales contract header	Delete a specific sales contract		X
Sales Contract (A2X) : Sales contract item	Read items of a specific sales contract	X	
Sales Contract (A2X) : Sales contract item	Create one or more items for a specific sales contract		X
Sales Contract (A2X) : Sales contract item	Read the sales contract header for a specific sales contract item	X	
Sales Contract (A2X) : Sales contract item	Read all sales contract items	X	
Sales Contract (A2X) : Sales contract item	Create one or more sales contract items for a specific sales contract		X
Sales Contract (A2X) : Sales contract item	Read a specific sales contract item	X	
Sales Contract (A2X) : Sales contract item	Update a specific sales contract item		X
Sales Contract (A2X) : Sales contract item	Delete a specific sales contract item		X
Sales Contract (A2X) : Header partner	Read the header-level partners of a specific sales contract	X	
Sales Contract (A2X) : Header partner	Create the header partners of a specific sales contract		X
Sales Contract (A2X) : Header partner	Read the sales contract header for a specific header partner	X	
Sales Contract (A2X) : Header partner	Read all header-level partners	X	
Sales Contract (A2X) : Header partner	Create the header partners of a specific sales contract and with a specific partner function		X
Sales Contract (A2X) : Header partner	Read a specific header-level partner	X	
Sales Contract (A2X) : Header partner	Update a specific header-level partner		X
Sales Contract (A2X) : Header partner	Delete a specific header-level partner		X
Sales Contract (A2X) : Header pricing element	Read the header-level pricing elements of a specific sales contract	X	
Sales Contract (A2X) : Header pricing element	Read the sales contract header for a specific header pricing element	X	
Sales Contract (A2X) : Header pricing element	Read all header-level pricing elements	X	
Sales Contract (A2X) : Header pricing element	Read a specific header-level pricing element	X	
Sales Contract (A2X) : Header pricing element	Update a specific header-level pricing element		X
Sales Contract (A2X) : Header pricing element	Delete a specific header-level pricing element		X
Sales Contract (A2X) : Header text	Read the header-level texts of a specific sales contract	X	
Sales Contract (A2X) : Header text	Read the sales contract header for a specific header text	X	
Sales Contract (A2X) : Header text	Read all header-level texts	X	
Sales Contract (A2X) : Header text	Read a specific header-level text	X	
Sales Contract (A2X) : Header text	Update a specific header-level text		X
Sales Contract (A2X) : Header text	Delete a specific header-level text		X
Sales Contract (A2X) : Item partner	Read the sales contract header for a specific item partner	X	
Sales Contract (A2X) : Item partner	Read the item-level partner of a specific sales contract item	X	
Sales Contract (A2X) : Item partner	Read the sales contract item for a specific item partner	X	
Sales Contract (A2X) : Item partner	Read all item-level partners	X	
Sales Contract (A2X) : Item partner	Read a specific item-level partner	X	
Sales Contract (A2X) : Item partner	Update a specific item-level partner		X
Sales Contract (A2X) : Item partner	Delete a specific item-level partner		X
Sales Contract (A2X) : Item pricing element	Read the sales contract header for a specific item pricing element	X	
Sales Contract (A2X) : Item pricing element	Read the item-level pricing element of a specific sales contract item	X	
Sales Contract (A2X) : Item pricing element	Read the sales contract item for a specific item pricing element	X	
Sales Contract (A2X) : Item pricing element	Read all item-level pricing elements	X	
Sales Contract (A2X) : Item pricing element	Read a specific item-level pricing element	X	
Sales Contract (A2X) : Item pricing element	Update a specific item-level partner		X
Sales Contract (A2X) : Item pricing element	Update a specific item-level pricing element		X
Sales Contract (A2X) : Item text	Read the sales contract header for a specific item text	X	
Sales Contract (A2X) : Item text	Read the item-level text of a specific sales contract item	X	
Sales Contract (A2X) : Item text	Read the sales contract item for a specific item text	X	
Sales Contract (A2X) : Item text	Read all item-level texts	X	
Sales Contract (A2X) : Item text	Read a specific item-level text	X	
Sales Contract (A2X) : Item text	Update a specific item-level text		X

Sales Contract (A2X) : Item text	Delete a specific item-level text		X
Sales Contract (A2X) : Item value added service	Read all value-added service data for a specific sales contract item	X	
Sales Contract (A2X) : Item value added service	Create one or more value-added services for a specific sales contract item		X
Sales Contract (A2X) : Item value added service	Read all value-added services at item level	X	
Sales Contract (A2X) : Item value added service	Create one or more value-added services for a specific sales contract item		X
Sales Contract (A2X) : Item value added service	Read a specific element of the value-added service at item level	X	
Sales Contract (A2X) : Item value added service	Update a specific value-added service		X
Sales Contract (A2X) : Item value added service	Delete a specific value-added service		X
Sales Contract (A2X) : Service operations	Approves a specific sales contract		X
Sales Contract (A2X) : Service operations	Rejects a specific sales contract		X
Sales Contract (A2X) : Batch requests	Send a group of requests		X
Segment - Read : Segment	Read the items of all segments	X	
Segment - Read : Segment	Read a segment by key	X	
Segment - Read : Segment text	Read the texts of a specific segment	X	
Segment - Read : Segment text	Read the segment related to the text item	X	
Segment - Read : Segment text	Read the texts of all segments	X	
Segment - Read : Segment text	Read the texts of a segment for a specific language and segment id	X	
Funds Management Functional Area : Funds management functional area	Get entities from fundsmgmtfunctionalarea	X	
Funds Management Functional Area : Funds management functional area	Get entity from fundsmgmtfunctionalarea by key	X	
Funds Management Functional Area : Funds management functional area	Get entities from related to text	X	
Funds Management Functional Area : Funds management functional area	Get related to fundsmgmtfunctionalarea	X	
Funds Management Functional Area : Funds management functional area	Get entities from fundsmgmtfunctionalareatext	X	
Funds Management Functional Area : Funds management functional area	Get entity from fundsmgmtfunctionalareatext by key	X	
Funds Management Functional Area : Batch requests	Send a group of requests		X
Supplier Invoice : Withholding tax data	Read withholding tax data of supplier invoice	X	
Supplier Invoice : Withholding tax data	Read withholding tax data of supplier invoice by key data	X	
Supplier Invoice : Account assignment data	Read account assignment data of supplier invoice item	X	
Supplier Invoice : Account assignment data	Read account assignment data of supplier invoice item by key data	X	
Supplier Invoice : Item with purchase order reference	Read the item data with purchase order reference including the account ass	X	
Supplier Invoice : Item with purchase order reference	Read supplier invoice item data with purchase order reference	X	
Supplier Invoice : Item with purchase order reference	Read supplier invoice item data with purchase order reference by key data	X	
Supplier Invoice : SI entered delivery notes	Read entered delivery note data for supplier invoice	X	
Supplier Invoice : SI entered delivery notes	Read entered delivery note data for supplier invoice by key data	X	
Supplier Invoice : SI entered purchasing documents	Read entered purchasing document data for supplier invoice	X	
Supplier Invoice : SI entered purchasing documents	Read entered purchasing document data for supplier invoice by key data	X	
Supplier Invoice : SI entered service entry sheets (lean)	Read entered service entry sheet (lean) data for supplier invoice	X	
Supplier Invoice : SI entered service entry sheets (lean)	Read entered service entry sheet (lean) data for supplier invoice by key data	X	
Supplier Invoice : Additional data	Read additional data for supplier invoice	X	
Supplier Invoice : Additional data	Read additional data for supplier invoice by key data	X	
Supplier Invoice : Header data	Read the supplier invoice data including the withholding tax data	X	
Supplier Invoice : Header data	Read the supplier invoice data and the item data with purchase order refere	X	
Supplier Invoice : Header data	Read the supplier invoice data including the entered delivery note data	X	
Supplier Invoice : Header data	Read the supplier invoice data including the entered purchasing document d	X	
Supplier Invoice : Header data	Read the supplier invoice data including the entered service entry sheet (lea	X	
Supplier Invoice : Header data	Read the supplier invoice data including the additional data	X	
Supplier Invoice : Header data	Read supplier invoice data	X	
Supplier Invoice : Header data	Create a supplier invoice		X
Supplier Invoice : Header data	Read supplier invoice data by key data	X	
Supplier Invoice : Header data	Delete supplier invoice that has not been posted		X
Supplier Invoice : Item for asset posting	Read the supplier invoice data and the item data for posting to asset	X	
Supplier Invoice : Item for asset posting	Read supplier invoice item data for posting to asset	X	
Supplier Invoice : Item for asset posting	Read supplier invoice item data for posting to asset by key data	X	
Supplier Invoice : Item for material posting	Read the supplier invoice data and the item data for posting to material	X	
Supplier Invoice : Item for material posting	Read supplier invoice item data for posting to material	X	
Supplier Invoice : Item for material posting	Read supplier invoice item data for posting to material by key data	X	
Supplier Invoice : Item for g/l account posting	Read the supplier invoice data and the item data for posting to G/L account	X	
Supplier Invoice : Item for g/l account posting	Read supplier invoice item data for posting to G/L account	X	
Supplier Invoice : Item for g/l account posting	Read supplier invoice item data for posting to G/L account by key data	X	
Supplier Invoice : Tax data	Read the supplier invoice data including the tax data	X	
Supplier Invoice : Tax data	Read tax data for supplier invoice	X	
Supplier Invoice : Tax data	Read tax data for supplier invoice by key data	X	
Supplier Invoice : Service operations	Invoke action post		X
Supplier Invoice : Service operations	Releases a supplier invoice	X	
Supplier Invoice : Service operations	Reverses a supplier invoice and Return the reversal number	X	
Supplier Invoice : Batch requests	Send a group of requests		X
Credit Memo Request (A2X) : Item subsequent process flow	Read the subsequent documents of all credit memo requests	X	
Credit Memo Request (A2X) : Item subsequent process flow	Read a subsequent document of a credit memo request	X	
Credit Memo Request (A2X) : Credit memo request header	Read the credit memo request header data for a subsequent item of a credit	X	
Credit Memo Request (A2X) : Credit memo request header	Read all credit memo request headers	X	
Credit Memo Request (A2X) : Credit memo request header	Create a credit memo request		X
Credit Memo Request (A2X) : Credit memo request header	Read the header of a specific credit memo request	X	
Credit Memo Request (A2X) : Credit memo request header	Update a specific credit memo request		X
Credit Memo Request (A2X) : Credit memo request header	Delete a specific credit memo request		X
Credit Memo Request (A2X) : Credit memo request item	Read the credit memo request item data for a subsequent item of a credit m	X	
Credit Memo Request (A2X) : Credit memo request item	Read the subsequent items of specified credit memo request items	X	
Credit Memo Request (A2X) : Credit memo request item	Read all items of a specific credit memo request	X	
Credit Memo Request (A2X) : Credit memo request item	Create a credit memo request item for a specific credit memo request		X

Credit Memo Request (A2X) : Credit memo request item	Read the credit memo request header for a specific item	X	
Credit Memo Request (A2X) : Credit memo request item	Read all credit memo request items	X	
Credit Memo Request (A2X) : Credit memo request item	Create a credit memo request item		X
Credit Memo Request (A2X) : Credit memo request item	Read all items of a specific credit memo request	X	
Credit Memo Request (A2X) : Credit memo request item	Update a specific credit memo request item		X
Credit Memo Request (A2X) : Credit memo request item	Delete a specific credit memo request item		X
Credit Memo Request (A2X) : Item partner	Read the credit memo request header for a specific partner function of a cre	X	
Credit Memo Request (A2X) : Item partner	Read the credit memo request item for a specific partner function of a credit	X	
Credit Memo Request (A2X) : Item partner	Read the item partners of a specific credit memo request item	X	
Credit Memo Request (A2X) : Item partner	Read the item partners for all credit memo requests	X	
Credit Memo Request (A2X) : Item partner	Read the item partners of a specific credit memo request item	X	
Credit Memo Request (A2X) : Item partner	Update the item partners of a specific item and with a specific partner function in a specific cr		X
Credit Memo Request (A2X) : Item partner	Delete the item partners of a specific item and with a specific partner function in a specific cre		X
Credit Memo Request (A2X) : Item pricing element	Read the credit memo request header for a specific pricing element	X	
Credit Memo Request (A2X) : Item pricing element	Read the credit memo request item for a specific pricing element	X	
Credit Memo Request (A2X) : Item pricing element	Read the pricing element of a specific credit memo request item	X	
Credit Memo Request (A2X) : Item pricing element	Read the item pricing elements of all credit memo requests	X	
Credit Memo Request (A2X) : Item pricing element	Read the pricing element of a specific credit memo request item	X	
Credit Memo Request (A2X) : Item pricing element	Update an item pricing element		X
Credit Memo Request (A2X) : Item pricing element	Delete an item pricing element		X
Credit Memo Request (A2X) : Item text	Read the credit memo request header for a specific text of a credit memo re	X	
Credit Memo Request (A2X) : Item text	Read the credit memo request item for a specific item text	X	
Credit Memo Request (A2X) : Item text	Read the text of a specific credit memo request item	X	
Credit Memo Request (A2X) : Item text	Read item texts of all credit memo requests	X	
Credit Memo Request (A2X) : Item text	Read a specific item text	X	
Credit Memo Request (A2X) : Item text	Update a specific item text		X
Credit Memo Request (A2X) : Item text	Delete a specific item text		X
Credit Memo Request (A2X) : Header partner	Read the credit memo request header for a specific header partner	X	
Credit Memo Request (A2X) : Header partner	Read the header partners of a specific credit memo request	X	
Credit Memo Request (A2X) : Header partner	Read the header partners of all credit memo requests	X	
Credit Memo Request (A2X) : Header partner	Read the header partners of a specific credit memo request	X	
Credit Memo Request (A2X) : Header partner	Update the header partners of a specific credit memo request and with a specific partner func		X
Credit Memo Request (A2X) : Header partner	Delete the header partners of a specific credit memo request and with a specific partner funct		X
Credit Memo Request (A2X) : Header pricing element	Read the credit memo request header for a specific pricing element	X	
Credit Memo Request (A2X) : Header pricing element	Read the header pricing element of a specific credit memo request	X	
Credit Memo Request (A2X) : Header pricing element	Read the header pricing elements of all credit memo requests	X	
Credit Memo Request (A2X) : Header pricing element	Read the header pricing element of a specific credit memo request	X	
Credit Memo Request (A2X) : Header pricing element	Update a header pricing element for a specific credit memo request		X
Credit Memo Request (A2X) : Header pricing element	Delete a header pricing element for a specific credit memo request		X
Credit Memo Request (A2X) : Header subsequent process flow	Read the credit memo request header data for a subsequent document of a	X	
Credit Memo Request (A2X) : Header subsequent process flow	Read the subsequent documents of specified credit memo requests	X	
Credit Memo Request (A2X) : Header subsequent process flow	Read the subsequent documents of all credit memo requests	X	
Credit Memo Request (A2X) : Header subsequent process flow	Read a subsequent document of a credit memo request	X	
Credit Memo Request (A2X) : Header text	Read the credit memo request header for a specific header text	X	
Credit Memo Request (A2X) : Header text	Read the header texts of a specific credit memo request	X	
Credit Memo Request (A2X) : Header text	Read the header texts of all credit memo requests	X	
Credit Memo Request (A2X) : Header text	Read a specific header text for a specific credit memo request	X	
Credit Memo Request (A2X) : Header text	Update a specific header text for a specific credit memo request		X
Credit Memo Request (A2X) : Header text	Delete a specific header text for a specific sales order		X
Credit Memo Request (A2X) : Item value added service	Read the value-added service data for a specific credit memo request item	X	
Credit Memo Request (A2X) : Item value added service	Create one or more value-added services for a specific credit memo request item		X
Credit Memo Request (A2X) : Item value added service	Read the value-added services data of all credit memo request items	X	
Credit Memo Request (A2X) : Item value added service	Create one or more value-added services for a specific credit memo request item		X
Credit Memo Request (A2X) : Item value added service	Read a specific value-added service line	X	
Credit Memo Request (A2X) : Item value added service	Update a specific value-added service of a credit memo request item		X
Credit Memo Request (A2X) : Item value added service	Delete a specific value-added service of a credit memo request item		X
Credit Memo Request (A2X) : Business area	Get entities from I businessareastdvh	X	
Credit Memo Request (A2X) : Business area	Get entity from I businessareastdvh by key	X	
Credit Memo Request (A2X) : Company code	Get entities from I companycodestdvh	X	
Credit Memo Request (A2X) : Company code	Get entity from I companycodestdvh by key	X

Product Specification : Prod spec nutrient composition header	Get entities from related to prodspecnutrientcmpstnhdr	X	
Product Specification : Prod spec nutrient composition header	Add new entity to related to prodspecnutrientcmpstnhdr		X
Product Specification : Prod spec nutrient composition header	Get entities from related to prodspecnutrientcmpstn	X	
Product Specification : Prod spec nutrient composition header	Get entities from prodspecnutrientcmpstnhdr	X	
Product Specification : Prod spec nutrient composition header	Add new entity to prodspecnutrientcmpstnhdr		X

Product Specification : Prod spec nutrient composition header	Get entity from prodspecnutrientcmpstnhdr by key	X	
Product Specification : Prod spec nutrient composition header	Delete entity from prodspecnutrientcmpstnhdr		X
Product Specification : Prod spec nutrient composition header	Invoke action createntrntcompchangestate		X
Product Specification : Product specification property header	Get entities from related to productspecification	X	
Product Specification : Product specification property header	Add new entity to related to productspecification		X
Product Specification : Product specification property header	Get entities from related to prodspecpropertyheader	X	
Product Specification : Product specification property header	Add new entity to related to prodspecpropertyheader		X
Product Specification : Product specification property header	Get entities from prodspecpropertyheader	X	
Product Specification : Product specification property header	Add new entity to prodspecpropertyheader		X
Product Specification : Product specification property header	Get entity from prodspecpropertyheader by key	X	
Product Specification : Product specification property header	Delete entity from prodspecpropertyheader		X
Product Specification : Product specification property header	Invoke action createpropertychangestate		X
Product Specification : Prod. spec. property character value	Get entities from related to productspecification	X	
Product Specification : Prod. spec. property character value	Add new entity to related to productspecification		X
Product Specification : Prod. spec. property character value	Get entities from related to prodspecprptycharactervalue	X	
Product Specification : Prod. spec. property character value	Get related to prodspecpropertyheader	X	
Product Specification : Prod. spec. property character value	Get entities from prodspecprptycharactervalue	X	
Product Specification : Prod. spec. property character value	Get entity from prodspecprptycharactervalue by key	X	
Product Specification : Prod. spec. property character value	Delete entity from prodspecprptycharactervalue		X
Product Specification : Prod. spec. property numeric value	Get entities from related to productspecification	X	
Product Specification : Prod. spec. property numeric value	Add new entity to related to productspecification		X
Product Specification : Prod. spec. property numeric value	Get entities from related to prodspecprptynumericvalue	X	
Product Specification : Prod. spec. property numeric value	Get related to prodspecpropertyheader	X	
Product Specification : Prod. spec. property numeric value	Get entities from prodspecprptynumericvalue	X	
Product Specification : Prod. spec. property numeric value	Get entity from prodspecprptynumericvalue by key	X	
Product Specification : Prod. spec. property numeric value	Delete entity from prodspecprptynumericvalue		X
Product Specification : Prod spec qualitative composition header	Get entities from related to productspecification	X	
Product Specification : Prod spec qualitative composition header	Add new entity to related to productspecification		X
Product Specification : Prod spec qualitative composition header	Get entities from related to prodspecqltatvcmpstnheader	X	
Product Specification : Prod spec qualitative composition header	Add new entity to related to prodspecqltatvcmpstnheader		X
Product Specification : Prod spec qualitative composition header	Get entities from prodspecqltatvcmpstnheader	X	
Product Specification : Prod spec qualitative composition header	Add new entity to prodspecqltatvcmpstnheader		X
Product Specification : Prod spec qualitative composition header	Get entity from prodspecqltatvcmpstnheader by key	X	
Product Specification : Prod spec qualitative composition header	Delete entity from prodspecqltatvcmpstnheader		X
Product Specification : Prod spec qualitative composition header	Invoke action createqltatvcompchangestate		X
Product Specification : Prod spec qualitative composition	Get entities from related to productspecification	X	
Product Specification : Prod spec qualitative composition	Add new entity to related to productspecification		X
Product Specification : Prod spec qualitative composition	Get entities from related to prodspecqualitativecmpstn	X	
Product Specification : Prod spec qualitative composition	Get entities from related to prodspecqltatvcmpstnheader	X	
Product Specification : Prod spec qualitative composition	Add new entity to related to prodspecqltatvcmpstnheader		X
Product Specification : Prod spec qualitative composition	Get entities from prodspecqualitativecmpstn	X	
Product Specification : Prod spec qualitative composition	Get entity from prodspecqualitativecmpstn by key	X	
Product Specification : Prod spec qualitative composition	Update entity in prodspecqualitativecmpstn		X
Product Specification : Prod spec qualitative composition	Delete entity from prodspecqualitativecmpstn		X
Product Specification : Prod spec quantitative cmpstn header	Get entities from related to productspecification	X	
Product Specification : Prod spec quantitative cmpstn header	Add new entity to related to productspecification		X
Product Specification : Prod spec quantitative cmpstn header	Get entities from related to prodspecqtytvcmpstnheader	X	
Product Specification : Prod spec quantitative cmpstn header	Add new entity to related to prodspecqtytvcmpstnheader		X
Product Specification : Prod spec quantitative cmpstn header	Get entities from prodspecqtytvcmpstnheader	X	
Product Specification : Prod spec quantitative cmpstn header	Add new entity to prodspecqtytvcmpstnheader		X
Product Specification : Prod spec quantitative cmpstn header	Get entity from prodspecqtytvcmpstnheader by key	X	
Product Specification : Prod spec quantitative cmpstn header	Delete entity from prodspecqtytvcmpstnheader		X
Product Specification : Prod spec quantitative cmpstn header	Invoke action createqtytvcompchangestate		X
Product Specification : Prod spec quantitative composition	Get entities from related to productspecification	X	
Product Specification : Prod spec quantitative composition	Add new entity to related to productspecification		X
Product Specification : Prod spec quantitative composition	Get entities from related to prodspecquantitativecmpstn	X	
Product Specification : Prod spec quantitative composition	Get entities from related to prodspecqtytvcmpstnheader	X	
Product Specification : Prod spec quantitative composition	Add new entity to related to prodspecqtytvcmpstnheader		X
Product Specification : Prod spec quantitative composition	Get entities from prodspecquantitativecmpstn	X	
Product Specification : Prod spec quantitative composition	Get entity from prodspecquantitativecmpstn by key	X	
Product Specification : Prod spec quantitative composition	Update entity in prodspecquantitativecmpstn		X
Product Specification : Prod spec quantitative composition	Delete entity from prodspecquantitativecmpstn		X
Product Specification : Prod specification standard composition	Get entities from related to productspecification	X	
Product Specification : Prod specification standard composition	Add new entity to related to productspecification		X
Product Specification : Prod specification standard composition	Get entities from prodspecstdcmpstn	X	
Product Specification : Prod specification standard composition	Get entity from prodspecstdcmpstn by key	X	
Product Specification : Prod specification standard composition	Update entity in prodspecstdcmpstn		X
Product Specification : Prod specification standard composition	Delete entity from prodspecstdcmpstn		X
Product Specification : Prod spec standard composition header	Get entities from related to productspecification	X	
Product Specification : Prod spec standard composition header	Add new entity to related to productspecification		X
Product Specification : Prod spec standard composition header	Get entities from related to prodspecstdcmpstnheader	X	
Product Specification : Prod spec standard composition header	Add new entity to related to prodspecstdcmpstnheader		X
Product Specification : Prod spec standard composition header	Get entities from related to prodspecstdcmpstnheader	X	
Product Specification : Prod spec standard composition header	Add new entity to related to prodspecstdcmpstnheader		X
Product Specification : Prod spec standard composition header	Get entities from related to prodspecstdcmpstn	X	
Product Specification : Prod spec standard composition header	Get entities from prodspecstdcmpstnheader	X	
Product Specification : Prod spec standard composition header	Add new entity to prodspecstdcmpstnheader		X

Product Specification : Prod spec standard composition header	Get entity from prodspecstdcmpstnheader by key	X	
Product Specification : Prod spec standard composition header	Delete entity from prodspecstdcmpstnheader		X
Product Specification : Prod spec standard composition header	Invoke action Createtdcompchangestate		X
Product Specification : Batch requests	Send a group of requests		X
Class Data for Classification : Class characteristics	List of characteristics assigned to classes	X	
Class Data for Classification : Class characteristics	Create a class characteristic assignment		X
Class Data for Classification : Class characteristics	Read class characteristic assignment for a given key	X	
Class Data for Classification : Class characteristics	Update a class characteristic assignment		X
Class Data for Classification : Class characteristics	Delete a class characteristic assignment		X
Class Data for Classification : Class header data	Get related to class	X	
Class Data for Classification : Class header data	Read the characteristics of a class	X	
Class Data for Classification : Class header data	Create a characteristic assignment for a class		X
Class Data for Classification : Class header data	List of class header data	X	
Class Data for Classification : Class header data	Create a class header data		X
Class Data for Classification : Class header data	Class header data for a given key	X	
Class Data for Classification : Class header data	Update a class header data		X
Class Data for Classification : Class header data	Delete a class		X
Class Data for Classification : Class descriptions	Get related to class	X	
Class Data for Classification : Class descriptions	Read the descriptions of a class	X	
Class Data for Classification : Class descriptions	Create a description for a class		X
Class Data for Classification : Class descriptions	List of class descriptions	X	
Class Data for Classification : Class descriptions	Create a class description		X
Class Data for Classification : Class descriptions	Class description for a given key	X	
Class Data for Classification : Class descriptions	Update a class description		X
Class Data for Classification : Class keywords	Read the keywords of a class	X	
Class Data for Classification : Class keywords	Create a keyword for a class		X
Class Data for Classification : Class keywords	Get related to class	X	
Class Data for Classification : Class keywords	List of keywords defined for classes	X	
Class Data for Classification : Class keywords	Create a class keyword		X
Class Data for Classification : Class keywords	Read a class keyword for a given key	X	
Class Data for Classification : Class keywords	Update a class keyword		X
Class Data for Classification : Class keywords	Delete a class keyword		X
Class Data for Classification : Class texts	Read the texts of a class	X	
Class Data for Classification : Class texts	Create a text for a class		X
Class Data for Classification : Class texts	Get related to class	X	
Class Data for Classification : Class texts	List of texts defined for classes	X	
Class Data for Classification : Class texts	Create a class text		X
Class Data for Classification : Class texts	Read a class text for a given key	X	
Class Data for Classification : Class texts	Update a class text		X
Class Data for Classification : Class texts	Delete a class text		X
Class Data for Classification : Batch requests	Send a group of requests		X
Payment Item - Read Update : Payment header	Read payment header information	X	
Payment Item - Read Update : Payment header	Read payment header information of a specific key	X	
Payment Item - Read Update : Payment items	Read payment items of a single payment header	X	
Payment Item - Read Update : Payment items	Read payment items information	X	
Payment Item - Read Update : Payment items	Read information of a single payment item	X	
Payment Item - Read Update : Payment items	Update item approval status and custom field data		X
Payment Item - Read Update : Batch requests	Send a group of requests		X
Sales District - Read : Sales district	Get entities from a salesdistrict	X	
Sales District - Read : Sales district	Get entity from a salesdistrict by key	X	
Sales District - Read : Sales district text	Get entities from related to text	X	
Sales District - Read : Sales district text	Get related to salesdistrict	X	
Sales District - Read : Sales district text	Get entities from a salesdistricttext	X	
Sales District - Read : Sales district text	Get entity from a salesdistricttext by key	X	
Customer returns delivery document flows	Read customer Return delivery document flows by key	X	
Customer returns delivery document flows	Update customer Return delivery document flows		X
Customer returns delivery headers	Read customer Return delivery headers	X	
Customer returns delivery headers	Create customer Return deliveries with reference to preceding document		X
Customer returns delivery headers	Read customer Return delivery headers	X	
Customer returns delivery headers	Update customer Return delivery headers		X
Customer returns delivery headers	Delete customer Return deliveries		X
Customer returns delivery headers	Reverses goods receipt for customer Return delivery		X
Customer returns delivery headers	Post goods receipt for customer Return delivery		X
Customer returns delivery headers	Confirms putaway quantity of customer Return delivery items		X
Customer returns delivery headers	Confirms putaway quantity of customer Return delivery item		X
Customer returns delivery headers	Takes over delivery quantity as putaway quantity for all customer Return delivery items		X
Customer returns delivery headers	Takes over delivery quantity as putaway quantity for specified customer Return delivery item		X
Customer returns delivery headers	Sets putaway quantity in base unit of measure for delivery item		X
Customer returns delivery headers	Sets putaway quantity and delivery quantity for customer Return delivery item		X
Customer returns delivery headers	Sets putaway quantity and delivery quantity for customer Return delivery item		X
Customer returns delivery items	Read document flows of specific customer Return delivery item	X	
Customer returns delivery items	Read items of specific customer Return delivery header	X	
Customer returns delivery items	Read customer Return delivery items	X	
Customer returns delivery items	Read customer Return delivery items	X	
Customer returns delivery items	Update customer Return delivery items		X
Customer returns delivery items	Delete customer Return delivery items		X
Customer returns delivery items	Create an additional batch split item for an customer Return delivery item		X

Customer returns delivery partners	Read partners of specific customer Return delivery header	X	
Customer returns dlvry maintenance item object list headers	Read maintenance item object lists of specific customer Return delivery item	X	
Customer returns delivery partner addresses	Read addresses of specific customer Return delivery partner	X	
Customer returns delivery maintenance item object lists	Read maintenance item objects of specific customer Return delivery mainter	X	
Customer Returns Delivery (A2X) : Batch requests	Send a group of requests		X
Financial Planning Data - Write : Financialplandata	Add new entity to financialplandata		X
Financial Planning Data - Write : Financial planning entry item	Get entities from related to finplanningentryitemtp	X	
Funded Program Hierarchy : Funded program hierarchy	Get entities from fundedprogramhierarchy	X	
Funded Program Hierarchy : Funded program hierarchy	Get entity from fundedprogramhierarchy by key	X	
Funded Program Hierarchy : Funded program hierarchy node	Get entities from related to fundedprogramhierarchy node	X	
Funded Program Hierarchy : Funded program hierarchy node	Get related to fundedprogramhierarchy	X	
Funded Program Hierarchy : Funded program hierarchy node	Get entities from fundedprogramhierarchy node	X	
Funded Program Hierarchy : Funded program hierarchy node	Get entity from fundedprogramhierarchy node by key	X	
Funded Program Hierarchy : Funded program hierarchy text	Get entities from related to fundedprogramhierarchytext	X	
Funded Program Hierarchy : Funded program hierarchy text	Get entities from fundedprogramhierarchytext	X	
Funded Program Hierarchy : Funded program hierarchy text	Get entity from fundedprogramhierarchytext by key	X	
Funded Program Hierarchy : Funded program hierarchy node text	Get entities from fundedprogramhierarchy node text	X	
Funded Program Hierarchy : Funded program hierarchy node text	Get entity from fundedprogramhierarchy node text by key	X	
Funded Program Hierarchy : Batch requests	Send a group of requests		X
Central Purchase Contract : Central purchase contract	Get the header details of the central purchase contracts and central purchas	X	
Central Purchase Contract : Central purchase contract	Create a new central purchase contract or central purchase contract hierarchy		X
Central Purchase Contract : Central purchase contract	Get the header details of a central purchase contract or central purchase co	X	
Central Purchase Contract : Item	Get the item details of all the items	X	
Central Purchase Contract : Item	Get the details of the central purchase contract (hierarchy) to which a specifi	X	
Central Purchase Contract : Item	Get the details of all the items in the system	X	
Central Purchase Contract : Item	Get the item details of an item	X	
Central Purchase Contract : Header distribution	Get the details of a specific header distribution line	X	
Central Purchase Contract : Header distribution	Gets the details of a specific header distribution line	X	
Central Purchase Contract : Header distribution	Get the details of all the header distribution lines in the system	X	
Central Purchase Contract : Header distribution	Get the details of a specific header distribution line	X	
Central Purchase Contract : Distribution message	Get the details of a specific distribution message	X	
Central Purchase Contract : Distribution message	Get the details of all the messages related to the distribution	X	
Central Purchase Contract : Distribution message	Get the details of a specific distribution message	X	
Central Purchase Contract : Header condition validity	Gets the condition validity details of a specific contract	X	
Central Purchase Contract : Header condition validity	Gets the central purchase contract details of a specific condition validity	X	
Central Purchase Contract : Header condition validity	Get the details of the validities of all the contract in the system	X	
Central Purchase Contract : Header condition validity	Get the detail of a specific validity maintained for a specific contract	X	
Central Purchase Contract : Header notes	Get the header notes of a specific central purchase contract or central purch	X	
Central Purchase Contract : Header notes	Get all the header notes in the system	X	
Central Purchase Contract : Header notes	Get the header notes of a specific central purchase contract or central purch	X	
Central Purchase Contract : Version history	Get the details of a specific version	X	
Central Purchase Contract : Version history	Get the details of the items of a specific version	X	
Central Purchase Contract : Version history	Get the details of a specific version	X	
Central Purchase Contract : Version history	Get the details of a specific version	X	
Central Purchase Contract : Distributed outline agreement	Get details of all distributed outline agreements of a central purchase contra	X	
Central Purchase Contract : Distributed outline agreement	Get details of the central purchase contract to which a specific distributed ou	X	
Central Purchase Contract : Distributed outline agreement	Get the distributed outline agreement details of all the central purchase cont	X	
Central Purchase Contract : Distributed outline agreement	Get the outline agreements details of a distributed outline agreement	X	
Central Purchase Contract : Legal transaction	Get the details of the legal transactions	X	
Central Purchase Contract : Legal transaction	Get the details of all the legal transactions in the system	X	
Central Purchase Contract : Legal transaction	Get the details of a specific legal transaction	X	
Central Purchase Contract : Subordinate central contract	Get the details of all the subordinate central contracts in the central purchas	X	
Central Purchase Contract : Subordinate central contract	Get the details of all the subordinate central contracts in the system	X	
Central Purchase Contract : Subordinate central contract	Get the header details of a subordinate central contract	X	
Central Purchase Contract : Distributed payment terms	Get the payment term details of a specific distributed outline agreement	X	
Central Purchase Contract : Distributed payment terms	Get payment term details of all distributed outline agreements of all central p	X	
Central Purchase Contract : Distributed payment terms	Get the payment term details of a distributed outline agreement	X	
Central Purchase Contract : Item distribution	Get the details of the central purchase contract (hierarchy) to which a specifi	X	
Central Purchase Contract : Item distribution	Gets the details of a specific distribution line of an item	X	
Central Purchase Contract : Item distribution	Get the details of the central purchase contract (hierarchy) item to which the	X	
Central Purchase Contract : Item distribution	Get the details of all the distribution lines of all the items in the system	X	
Central Purchase Contract : Item distribution	Get the details of a specific distribution line of an item	X	
Central Purchase Contract : Item commodity quantity	Get the details of commodity weights of an item in a central purchase contra	X	
Central Purchase Contract : Item commodity quantity	Gets the details of the commodity weights of all the items in all the central pu	X	
Central Purchase Contract : Item commodity quantity	Get the detail of a specific commodity weight maintained for a specific item i	X	
Central Purchase Contract : Item condition validity	Gets the central purchase contract details of a specific condition validity	X	
Central Purchase Contract : Item condition validity	Gets the condition validity details of a specific item	X	
Central Purchase Contract : Item condition validity	Gets the central purchase contract item details of a specific condition validity	X	
Central Purchase Contract : Item condition validity	Get the details of the validities of all the items in the system	X	
Central Purchase Contract : Item condition validity	Get the detail of a specific validity maintained for a specific item	X	
Central Purchase Contract : Item notes	Get the item notes of a specific central purchase contract or central purchas	X	
Central Purchase Contract : Item notes	Get all the item notes in the system	X	
Central Purchase Contract : Item notes	Get the item notes of a specific central purchase contract or central purchas	X	
Central Purchase Contract : Header condition amount	Get the central purchase contract details of a specific condition type	X	
Central Purchase Contract : Header condition amount	Gets the condition validity details of of a specific condition type	X	
Central Purchase Contract : Header condition amount	Get the details of the condition amounts of a specific validity of a specific co	X	
Central Purchase Contract : Header condition amount	Get the details of the condition amounts of all the validities of all the contract	X	

Central Purchase Contract : Header condition amount	Get the detail of a specific condition amount maintained for a specific validity	X	
Central Purchase Contract : Header condition scales	Get the central purchase contract details of a specific condition scale	X	
Central Purchase Contract : Header condition scales	Get the details of the condition scales of a specific condition amount of a spe	X	
Central Purchase Contract : Header condition scales	Get the details of the condition amount of a specific condition scale of a spe	X	
Central Purchase Contract : Header condition scales	Get the details of the condition scales of all the condition amounts of all the	X	
Central Purchase Contract : Header condition scales	Get the detail of a specific condition amount maintained for a specific validity	X	
Central Purchase Contract : Header partner	Get the details of the partners	X	
Central Purchase Contract : Header partner	Get the details of all the header partners in the system	X	
Central Purchase Contract : Header partner	Get the details of a specific header partner	X	
Central Purchase Contract : Item partner	Get the details of the partners in an item	X	
Central Purchase Contract : Item partner	Get the details of all the item partners of all the items in the system	X	
Central Purchase Contract : Item partner	Get the details of a specific partner of an item	X	
Central Purchase Contract : Item condition amount	Get the central purchase contract details of a specific condition type	X	
Central Purchase Contract : Item condition amount	Gets the condition validity details of of a specific condition type	X	
Central Purchase Contract : Item condition amount	Get the details of the condition amounts of a specific validity of a specific ite	X	
Central Purchase Contract : Item condition amount	Get the details of the condition amounts of all the validities of all the items in	X	
Central Purchase Contract : Item condition amount	Get the detail of a specific condition amount maintained for a specific validity	X	
Central Purchase Contract : Item condition scales	Get the central purchase contract details of a specific condition scale	X	
Central Purchase Contract : Item condition scales	Get the details of the condition scales of a specific condition amount of a spe	X	
Central Purchase Contract : Item condition scales	Get the details of the condition amount of a specific condition scale of a spe	X	
Central Purchase Contract : Item condition scales	Get the details of the condition scales of all the condition amounts of all the	X	
Central Purchase Contract : Item condition scales	Get the detail of a specific condition amount maintained for a specific validity	X	
Central Purchase Contract : Service operations	Withdraws a central purchase contract or central purchase contract hierarchy from approval		X
Central Purchase Contract : Service operations	Assigns a legal transaction to a central purchase contract or central purchase contract hierarc		X
Central Purchase Contract : Service operations	Unassigns a legal transaction from a central purchase contract or central purchase contract h		X
Central Purchase Contract : Service operations	Cancel and releases a central purchase contract or central purchase contract hierarchy		X
Central Purchase Contract : Batch requests	Send a group of requests		X
Service Order Template : Service order template	Read header information of all service order templates in the system	X	
Service Order Template : Service order template	Create a service order template		X
Service Order Template : Service order template	Read header information of a service order template by key	X	
Service Order Template : Service order template	Update header information of a service order template		X
Service Order Template : Service order template appointment	Read all appointment details within a service order template	X	
Service Order Template : Service order template appointment	Create appointments within a service order template		X
Service Order Template : Service order template appointment	Read appointment details of a service order template	X	
Service Order Template : Service order template appointment	Create appointments for a service order template		X
Service Order Template : Service order template appointment	Read appointment details within the service order template by key	X	
Service Order Template : Service order template appointment	Update appointments for a service order template		X
Service Order Template : Service order template duration	Read all duration details within a service order template	X	
Service Order Template : Service order template duration	Create a duration within a service order template		X
Service Order Template : Service order template duration	Read the duration details of a service order template	X	
Service Order Template : Service order template duration	Create the duration for a service order template		X
Service Order Template : Service order template duration	Read duration details within the service order template by key	X	
Service Order Template : Service order template duration	Update the duration of a service order template		X
Service Order Template : Service order template items	Read all the item information	X	
Service Order Template : Service order template items	Create a service order template item		X
Service Order Template : Service order template items	Read service order template details of the service item	X	
Service Order Template : Service order template items	Read all items of a service order template	X	
Service Order Template : Service order template items	Create an item for a service order template		X
Service Order Template : Service order template items	Read all items of a service order template by key	X	
Service Order Template : Service order template items	Update service order template item		X
Service Order Template : Service order template items	Delete a service order template item		X
Service Order Template : Service order template partner	Read the partner within a service order template by key	X	
Service Order Template : Service order template partner	Create a partner within a service order template		X
Service Order Template : Service order template partner	Read partners with a service order template	X	
Service Order Template : Service order template partner	Create a partner for a service order template		X
Service Order Template : Service order template partner	Read partners within the service order template by key	X	
Service Order Template : Service order template partner	Update partner for a service order template		X
Service Order Template : Service order template partner	Delete a partner for a service order template		X
Service Order Template : Person responsible	Read employee responsible of a service order template	X	
Service Order Template : Person responsible	Create a new employee within a service order template		X
Service Order Template : Person responsible	Read employee responsible of a service order template	X	
Service Order Template : Person responsible	Create a new employee within a service order template		X
Service Order Template : Person responsible	Read employee responsible of a service order template by key	X	
Service Order Template : Person responsible	Update employee responsible		X
Service Order Template : Person responsible	Delete employee responsible of a service order template by key		X
Service Order Template : Reference object	Read the reference objects	X	
Service Order Template : Reference object	Create reference objects for a service order template		X
Service Order Template : Reference object	Read the reference objects	X	
Service Order Template : Reference object	Create reference objects for a service order template		X
Service Order Template : Reference object	Read reference objects	X	
Service Order Template : Reference object	Delete reference objects		X
Service Order Template : Service order template user status	Read the user status within a service order template by key	X	
Service Order Template : Service order template user status	Create a user status within a service order template		X
Service Order Template : Service order template user status	Read the service order template active user status	X	
Service Order Template : Service order template user status	Update the service order template with a new user status		X
Service Order Template : Service order template user status	Read the user status within service order template by key	X	
Service Order Template : Service order template user status	Delete user status within a service order template		X

Service Order Template : Service order template text	Read the texts of a service order template	X	
Service Order Template : Service order template text	Create the texts for a service order template		X
Service Order Template : Service order template text	Read texts of a service order template	X	
Service Order Template : Service order template text	Create texts for a service order template		X
Service Order Template : Service order template text	Read texts of a service order template by key	X	
Service Order Template : Service order template text	Update long text		X
Service Order Template : Service order template text	Delete the texts		X
Service Order Template : Service order template item appointment	Read the appointment within a service order template item by key	X	
Service Order Template : Service order template item appointment	Create an appointment for a service order template item		X
Service Order Template : Service order template item appointment	Read appointment details of a service order template item	X	
Service Order Template : Service order template item appointment	Create an appointment for a service order template item		X
Service Order Template : Service order template item appointment	Read appointment details within the service order template item by key	X	
Service Order Template : Service order template item appointment	Update the appointment for a service order template item		X
Service Order Template : Service order template item duration	Read the duration within a service order template item by key	X	
Service Order Template : Service order template item duration	Create a duration for a service order template item		X
Service Order Template : Service order template item duration	Read the duration details of a service order template item	X	
Service Order Template : Service order template item duration	Create a duration for a service order template item		X
Service Order Template : Service order template item duration	Read duration details within the service order template item by key	X	
Service Order Template : Service order template item duration	Update the duration of a service order template item		X
Service Order Template : Service order template item partner	Read the partner within a service order template item by key	X	
Service Order Template : Service order template item partner	Create a partner for a service order template item		X
Service Order Template : Service order template item partner	Read partners of a service order template item	X	
Service Order Template : Service order template item partner	Create a partner for a service order template item		X
Service Order Template : Service order template item partner	Read partners within the service order template item by key	X	
Service Order Template : Service order template item partner	Update partner for a service order template item		X
Service Order Template : Service order template item partner	Delete the partner for a service order template item		X
Service Order Template : Item reference object	Read the reference objects	X	
Service Order Template : Item reference object	Create reference objects for a service order template item		X
Service Order Template : Item reference object	Read the reference objects	X	
Service Order Template : Item reference object	Create reference objects for a service order template item		X
Service Order Template : Item reference object	Read reference objects	X	
Service Order Template : Item reference object	Delete reference objects		X
Service Order Template : Service order template item user status	Read the user status within a service order template item by key	X	
Service Order Template : Service order template item user status	Create user status for a service order template item		X
Service Order Template : Service order template item user status	Read the service order template item active user status	X	
Service Order Template : Service order template item user status	Update the service order template item with a new user status		X
Service Order Template : Service order template item user status	Read the user status within service order template item by key	X	
Service Order Template : Service order template item user status	Delete user status within a service order template item		X
Service Order Template : Item text	Read texts of a service order template item	X	
Service Order Template : Item text	Create texts for a service order template item		X
Service Order Template : Item text	Read texts of a service order template item	X	
Service Order Template : Item text	Create texts for a service order template item		X
Service Order Template : Item text	Read texts of a service order template item by key	X	
Service Order Template : Item text	Update the long text		X
Service Order Template : Item text	Delete the texts		X
Service Order Template : Partner address of service order template item	Read the addresses of all business partners within a service order template	X	
Service Order Template : Partner address of service order template item	Read the addresses of all business partners within a service order template	X	
Service Order Template : Partner address of service order template item	Read the address of a business partner by key within a service order templa	X	
Service Order Template : Partner address of service order template item	Update the addresses for business partners of a service order template item		X
Service Order Template : Partner address of service order template	Read the addresses of all business partners within a service order template	X	
Service Order Template : Partner address of service order template	Read the addresses of all business partners within a service order template	X	
Service Order Template : Partner address of service order template	Read the address of a business partner by key within a service order templa	X	
Service Order Template : Partner address of service order template	Update the addresses for business partners of a service order template		X
Service Order Template : Batch requests	Send a group of requests		X
Business Situation Type - Read : Schema for data context definition	Get entity from situationcontextdefschema by key	X	
Business Situation Type - Read : Schema for data context definition text	Get entities from related to situationcontextdeftext	X	
Business Situation Type - Read : Schema for data context definition text	Get entity from situationcontextdeftext by key	X	
Standard Work Formula Parameter Group - Read : Standard work formula	Get entities from standardworkfmlaparamgroup	X	
Standard Work Formula Parameter Group - Read : Standard work formula	Get entity from standardworkfmlaparamgroup by key	X	
Standard Work Formula Parameter Group - Read : Standard work formula	Get entities from related to standardworkformulaparam1text	X	
Standard Work Formula Parameter Group - Read : Standard work formula	Get entities from related to standardworkformulaparam2text	X	
Standard Work Formula Parameter Group - Read : Standard work formula	Get entities from related to standardworkformulaparam3text	X	
Standard Work Formula Parameter Group - Read : Standard work formula	Get entities from related to standardworkformulaparam4text	X	
Standard Work Formula Parameter Group - Read : Standard work formula	Get entities from related to standardworkformulaparam5text	X	
Standard Work Formula Parameter Group - Read : Standard work formula	Get entities from related to standardworkformulaparam6text	X	
Standard Work Formula Parameter Group - Read : Standard work formula	Get entities from standardworkformulaparamtext	X	
Standard Work Formula Parameter Group - Read : Standard work formula	Get entity from standardworkformulaparamtext by key	X	
Standard Work Formula Parameter Group - Read : Standard work formula	Get entities from related to stdwrkfmlaparamgrptxt	X	
Standard Work Formula Parameter Group - Read : Standard work formula	Get entities from standardworkfmlaparamgrptext	X	
Standard Work Formula Parameter Group - Read : Standard work formula	Get entity from standardworkfmlaparamgrptext by key	X	
Standard Work Formula Parameter Group - Read : Batch requests	Send a group of requests		X
Functional Location : Characteristic values	Get entities from value	X	
Functional Location : Characteristic values	Add new entity to value		X
Functional Location : Characteristic values	Get entity from value by key	X	
Functional Location : Characteristic values	Update entity in value		X
Functional Location : Functional location	Get related to functionallocation	X	
Functional Location : Functional location	Get entities from functionallocation	X	

Functional Location : Functional location	Add new entity to functionallocation		X
Functional Location : Functional location	Get entity from functionallocation by key	X	
Functional Location : Functional location	Update entity in functionallocation		X
Functional Location : Functional location	Invoke action dismantlefunctionallocation		X

Functional Location : Functional location	Invoke action setfuncnllocationtoinactive		X
Functional Location : Class characteristics	Get related to characteristic	X	
Functional Location : Class characteristics	Get entities from related to value	X	
Functional Location : Class characteristics	Add new entity to related to value		X
Functional Location : Class characteristics	Get related to functionallocation	X	
Functional Location : Class characteristics	Get entities from characteristic	X	
Functional Location : Class characteristics	Get entity from characteristic by key	X	
Functional Location : Functional location class	Get related to functionallocation	X	
Functional Location : Functional location class	Get entities from related to classification	X	
Functional Location : Functional location class	Add new entity to related to classification		X
Functional Location : Functional location class	Get entities from related to characteristic	X	
Functional Location : Functional location class	Get related to class	X	
Functional Location : Functional location class	Get entities from functionallocationclass	X	
Functional Location : Functional location class	Add new entity to functionallocationclass		X
Functional Location : Functional location class	Get entity from functionallocationclass by key	X	
Functional Location : Functional location class	Update entity in functionallocationclass		X
Functional Location : Functional location class	Delete entity from functionallocationclass		X
Functional Location : Functional location warranty	Get related to functionallocation	X	
Functional Location : Functional location warranty	Get entities from related to warranty	X	
Functional Location : Functional location warranty	Add new entity to related to warranty		X
Functional Location : Functional location warranty	Get entities from functionallocationwarranty	X	
Functional Location : Functional location warranty	Add new entity to functionallocationwarranty		X
Functional Location : Functional location warranty	Get entity from functionallocationwarranty by key	X	
Functional Location : Functional location warranty	Update entity in functionallocationwarranty		X
Functional Location : Linear asset management data	Get related to linearassetmanagementdata	X	
Functional Location : Functional location text	Get related to longtext	X	
Functional Location : Functional location text	Get related to functionallocation	X	
Functional Location : Functional location text	Get entities from functionallocationlongtext	X	
Functional Location : Functional location text	Add new entity to functionallocationlongtext		X
Functional Location : Functional location text	Get entity from functionallocationlongtext by key	X	
Functional Location : Functional location text	Update entity in functionallocationlongtext		X
Functional Location : Functional location partner	Get entities from related to partner	X	
Functional Location : Functional location partner	Add new entity to related to partner		X
Functional Location : Functional location partner	Get related to functionallocation	X	
Functional Location : Functional location partner	Get entities from functionallocationpartner	X	
Functional Location : Functional location partner	Add new entity to functionallocationpartner		X
Functional Location : Functional location partner	Get entity from functionallocationpartner by key	X	
Functional Location : Functional location partner	Update entity in functionallocationpartner		X
Functional Location : Batch requests	Send a group of requests		X
Funds Management Budget Structure (A2X) : Budget structure	Get entities from a fndsmgmtbudGettructure	X	
Funds Management Budget Structure (A2X) : Budget structure	Get entity from a fndsmgmtbudGettructure by key	X	
Funds Management Budget Structure (A2X) : Batch requests	Send a group of requests		X
Material Price - Update : Service operations	Invoke action inventorypricechange		X
Material Price - Update : Batch requests	Send a group of requests		X
Commitment Carry Forward Lot (A2X) : Commitment carryforward lot item	Get entities from cmtmtcarryforwardlotitem	X	
Commitment Carry Forward Lot (A2X) : Commitment carryforward lot item	Get entity from cmtmtcarryforwardlotitem by key	X	
Commitment Carry Forward Lot (A2X) : Batch requests	Send a group of requests		X
Condition Type for Pricing in Purchasing - Read : Condition type text	Read descriptions of all condition types in the system	X	
Condition Type for Pricing in Purchasing - Read : Condition type text	Read a specific condition type description	X	
Condition Type for Pricing in Purchasing - Read : Condition types	Read the condition type for a specific condition type description	X	
Condition Type for Pricing in Purchasing - Read : Condition types	Read the description of a specific condition type	X	
Condition Type for Pricing in Purchasing - Read : Condition types	Read all condition types in the system	X	
Condition Type for Pricing in Purchasing - Read : Condition types	Read a specific condition type	X	
Condition Type for Pricing in Purchasing - Read : Batch requests	Send a group of requests		X
Customer and Supplier Industry - Read : Customer and supplier industry	Read the items of all supplier industries	X	
Customer and Supplier Industry - Read : Customer and supplier industry	Read a customer and supplier industry by key	X	
Customer and Supplier Industry - Read : Customer and supplier industry te	Read the texts of a specific customer and supplier industry	X	
Customer and Supplier Industry - Read : Customer and supplier industry te	Read the customer and supplier industry related to the text item	X	
Customer and Supplier Industry - Read : Customer and supplier industry te	Read the texts of all customer and supplier industries	X	
Customer and Supplier Industry - Read : Customer and supplier industry te	Read the texts of a customer and supplier industry for a specific language a	X	
Credit Management Master Data Integration : Credit account collaterals	Get entities from crdtmacctcollateral	X	
Credit Management Master Data Integration : Credit account collaterals	Get entity from crdtmacctcollateral by key	X	
Credit Management Master Data Integration : Credit account collaterals	Update entity in crdtmacctcollateral		X
Credit Management Master Data Integration : Credit account collaterals	Delete entity from crdtmacctcollateral		X
Credit Management Master Data Integration : Business partners	Get related to crdtmbusinesspartnertp	X	
Credit Management Master Data Integration : Business partners	Get entities from creditmgmtbusinesspartner	X	
Credit Management Master Data Integration : Business partners	Add new entity to creditmgmtbusinesspartner		X
Credit Management Master Data Integration : Business partners	Get entity from creditmgmtbusinesspartner by key	X	

Credit Management Master Data Integration : Business partners	Update entity in creditmgmtbusinesspartner		X
Credit Management Master Data Integration : Credit accounts	Get related to creditmgmtaccounttp	X	
Credit Management Master Data Integration : Credit accounts	Get entities from related to crdtmacctcollateraltp	X	
Credit Management Master Data Integration : Credit accounts	Get entities from related to creditmgmtaccounttp	X	
Credit Management Master Data Integration : Credit accounts	Get related to crdtmbusinesspartnertp	X	
Credit Management Master Data Integration : Credit accounts	Get entities from creditmanagementaccount	X	
Credit Management Master Data Integration : Credit accounts	Get entity from creditmanagementaccount by key	X	
Credit Management Master Data Integration : Credit accounts	Update entity in creditmanagementaccount		X
Credit Management Master Data Integration : Credit accounts	Delete entity from creditmanagementaccount		X
Credit Management Master Data Integration : Credit account credit insurar	Get related to crdtmbusinesspartnertp	X	
Credit Management Master Data Integration : Credit account credit insurar	Get related to creditmgmtaccounttp	X	
Credit Management Master Data Integration : Credit account credit insurar	Get entities from related to crdtmacctcrdtinsurancetp	X	
Credit Management Master Data Integration : Credit account credit insurar	Get entities from crdtmacctcrdtinsurance	X	
Credit Management Master Data Integration : Credit account credit insurar	Get entity from crdtmacctcrdtinsurance by key	X	
Credit Management Master Data Integration : Credit account credit insurar	Update entity in crdtmacctcrdtinsurance		X
Credit Management Master Data Integration : Credit account credit insurar	Delete entity from crdtmacctcrdtinsurance		X
Credit Management Master Data Integration : Business partner collaterals	Get entities from related to crdtmbpcollateraltp	X	
Credit Management Master Data Integration : Business partner collaterals	Get related to crdtmbusinesspartnertp	X	
Credit Management Master Data Integration : Business partner collaterals	Get entities from crdtmgmtbpcollateral	X	
Credit Management Master Data Integration : Business partner collaterals	Get entity from crdtmgmtbpcollateral by key	X	
Credit Management Master Data Integration : Business partner collaterals	Update entity in crdtmgmtbpcollateral		X
Credit Management Master Data Integration : Business partner collaterals	Delete entity from crdtmgmtbpcollateral		X
Credit Management Master Data Integration : Business partner credit insu	Get entities from related to crdtmbpcreditinsurancetp	X	
Credit Management Master Data Integration : Business partner credit insu	Get related to crdtmbusinesspartnertp	X	
Credit Management Master Data Integration : Business partner credit insu	Get entities from crdtmgmtbpcreditinsurance	X	
Credit Management Master Data Integration : Business partner credit insu	Get entity from crdtmgmtbpcreditinsurance by key	X	
Credit Management Master Data Integration : Business partner credit insu	Update entity in crdtmgmtbpcreditinsurance		X
Credit Management Master Data Integration : Business partner credit insu	Delete entity from crdtmgmtbpcreditinsurance		X
Credit Management Master Data Integration : Business partner negative e	Get entities from related to crdtmbpnegativeeventtp	X	
Credit Management Master Data Integration : Business partner negative e	Get related to crdtmbusinesspartnertp	X	
Credit Management Master Data Integration : Business partner negative e	Get entities from crdtmgmtbpnegativeevent	X	
Credit Management Master Data Integration : Business partner negative e	Get entity from crdtmgmtbpnegativeevent by key	X	
Credit Management Master Data Integration : Business partner negative e	Update entity in crdtmgmtbpnegativeevent		X
Credit Management Master Data Integration : Business partner negative e	Delete entity from crdtmgmtbpnegativeevent		X
Credit Management Master Data Integration : Batch requests	Send a group of requests		X
Process Order Confirmation for Clinical Trials : Pp barcode	Get entities from related to procordconfppbarcode	X	
Process Order Confirmation for Clinical Trials : Process order confirmation	Read the header data of a process order confirmation including the cfg barc	X	
Process Order Confirmation for Clinical Trials : Medication number	Read the header data of a process order confirmation including the medicati	X	
Process Order Confirmation for Clinical Trials : Confirmation component m	Read the header data of a process order confirmation including the compon	X	
Legal Document Access Levels - Read : Legal document access levels	Get entities from a lglcntntmaccesslvl	X	
Legal Document Access Levels - Read : Legal document access levels	Get entity from a lglcntntmaccesslvl by key	X	
Legal Document Access Levels - Read : Access level text	Get entities from related to accesslevletext	X	
Legal Document Access Levels - Read : Access level text	Get entities from a lglcntntmaccesslvltext	X	
Legal Document Access Levels - Read : Access level text	Get entity from a lglcntntmaccesslvltext by key	X	
Legal Document Access Levels - Read : Batch requests	Send a group of requests		X
Condition Type for Pricing in Sales - Read : Condition type text	Read descriptions of all condition types in the system	X	
Condition Type for Pricing in Sales - Read : Condition type text	Read a specific condition type description	X	
Condition Type for Pricing in Sales - Read : Condition types	Read the condition type for a specific condition type description	X	
Condition Type for Pricing in Sales - Read : Condition types	Read the description of a specific condition type	X	
Condition Type for Pricing in Sales - Read : Condition types	Read all condition types in the system	X	
Condition Type for Pricing in Sales - Read : Condition types	Read a specific condition type	X	
Condition Type for Pricing in Sales - Read : Condition function descriptions	Read descriptions of all condition functions in the system	X	
Condition Type for Pricing in Sales - Read : Condition function descriptions	Read a specific condition function description	X	
Condition Type for Pricing in Sales - Read : Batch requests	Send a group of requests		X
Personnel Settlement Document - Read : Personnel compensation elemer	Get entities from personnel compensation element cost assignment	X	
Personnel Settlement Document - Read : Personnel compensation elemer	Get entity from personnel compensation element cost assignment by key	X	
Personnel Settlement Document - Read : Personnel compensation elemer	Get related to personnel compensation element	X	
Personnel Settlement Document - Read : Personnel compensation elemer	Get entities from related to personnel compensation element cost assignme	X	
Personnel Settlement Document - Read : Personnel compensation elemer	Get entities from personnel compensation element	X	
Personnel Settlement Document - Read : Personnel compensation elemer	Get entity from personnel compensation element cost assignment by key	X	
Personnel Settlement Document - Read : Batch requests	Send a group of requests		X
Master Data for Group Reporting - Read : All master data	Read a set of entries from all master data	X	
Master Data for Group Reporting - Read : All master data	Read an entry by key from all master data	X	
Master Data for Group Reporting - Read : All master data attribute	Read associated entries of all master data attribute	X	
Master Data for Group Reporting - Read : All master data attribute	Read associated entries of all master data	X	
Master Data for Group Reporting - Read : All master data attribute	Read a set of entries from all master data attribute	X	
Master Data for Group Reporting - Read : All master data attribute	Read an entry by key from all master data attribute	X	
Master Data for Group Reporting - Read : All master data text	Read associated entries of all master data text	X	
Master Data for Group Reporting - Read : All master data text	Read associated entries of all master data	X	
Master Data for Group Reporting - Read : All master data text	Read a set of entries from all master data text	X	
Master Data for Group Reporting - Read : All master data text	Read an entry by key from all master data text	X	
Master Data for Group Reporting - Read : All master data attribute text	Read associated entries of all master data	X	
Master Data for Group Reporting - Read : All master data attribute text	Read associated entries of all master data attribute	X	
Master Data for Group Reporting - Read : All master data attribute text	Read associated entries of all master data attribute text	X	
Master Data for Group Reporting - Read : All master data attribute text	Read a set of entries from all master data attribute text	X	
Master Data for Group Reporting - Read : All master data attribute text	Read an entry by key from all master data attribute text	X	
Master Data for Group Reporting - Read : Unit of measure	Read a set of entries from unit of measure	X	

Master Data for Group Reporting - Read : Unit of measure	Read an entry by key from unit of measure	X	
Master Data for Group Reporting - Read : Unit of measure text	Read associated entries of unit of measure text	X	
Master Data for Group Reporting - Read : Unit of measure text	Read associated entries of unit of measure	X	
Master Data for Group Reporting - Read : Unit of measure text	Read a set of entries from unit of measure text	X	
Master Data for Group Reporting - Read : Unit of measure text	Read an entry by key from unit of measure text	X	
Master Data for Group Reporting - Read : Combined billing type	Read a set of entries from combined billing type	X	
Master Data for Group Reporting - Read : Combined billing type	Read an entry by key from combined billing type	X	
Master Data for Group Reporting - Read : Combined billing type text	Read associated entries of combined billing type text	X	
Master Data for Group Reporting - Read : Combined billing type text	Read associated entries of combined billing type	X	
Master Data for Group Reporting - Read : Combined billing type text	Read a set of entries from combined billing type text	X	
Master Data for Group Reporting - Read : Combined billing type text	Read an entry by key from combined billing type text	X	
Master Data for Group Reporting - Read : Combined bill to party	Read a set of entries from combined bill to party	X	
Master Data for Group Reporting - Read : Combined bill to party	Read an entry by key from combined bill to party	X	
Master Data for Group Reporting - Read : Combined bill to party text	Read associated entries of combined bill to party text	X	
Master Data for Group Reporting - Read : Combined bill to party text	Read associated entries of combined bill to party	X	
Master Data for Group Reporting - Read : Combined bill to party text	Read a set of entries from combined bill to party text	X	
Master Data for Group Reporting - Read : Combined bill to party text	Read an entry by key from combined bill to party text	X	
Master Data for Group Reporting - Read : Consolidation breakdown categ	Read a set of entries from breakdown category	X	
Master Data for Group Reporting - Read : Consolidation breakdown categ	Read an entry by key from breakdown category	X	
Master Data for Group Reporting - Read : Breakdown category text	Read associated entries of breakdown category text	X	
Master Data for Group Reporting - Read : Breakdown category text	Read associated entries of breakdown category	X	
Master Data for Group Reporting - Read : Breakdown category text	Read a set of entries from breakdown category text	X	
Master Data for Group Reporting - Read : Breakdown category text	Read an entry by key from breakdown category text	X	
Master Data for Group Reporting - Read : Breakdown by subassignment	Read associated entries of breakdown by subassignment	X	
Master Data for Group Reporting - Read : Breakdown by subassignment	Read a set of entries from breakdown by subassignment	X	
Master Data for Group Reporting - Read : Breakdown by subassignment	Read an entry by key from breakdown by subassignment	X	
Master Data for Group Reporting - Read : Consolidation breakdown type	Read a set of entries from breakdown type	X	
Master Data for Group Reporting - Read : Consolidation breakdown type	Read an entry by key from breakdown type	X	
Master Data for Group Reporting - Read : Consolidation breakdown type t	Read associated entries of breakdown type text	X	
Master Data for Group Reporting - Read : Consolidation breakdown type t	Read associated entries of breakdown type	X	
Master Data for Group Reporting - Read : Consolidation breakdown type t	Read a set of entries from breakdown type text	X	
Master Data for Group Reporting - Read : Consolidation breakdown type t	Read an entry by key from breakdown type text	X	
Master Data for Group Reporting - Read : Combined business area	Read a set of entries from combined business area	X	
Master Data for Group Reporting - Read : Combined business area	Read an entry by key from combined business area	X	
Master Data for Group Reporting - Read : Combined business area - hiera	Read associated entries of combined business area hierarchy	X	
Master Data for Group Reporting - Read : Combined business area - hiera	Read associated entries of combined business area	X	
Master Data for Group Reporting - Read : Combined business area - hiera	Read a set of entries from combined business area hierarchy	X	
Master Data for Group Reporting - Read : Combined business area - hiera	Read an entry by key from combined business area hierarchy	X	
Master Data for Group Reporting - Read : Combined business area text	Read associated entries of combined business area text	X	
Master Data for Group Reporting - Read : Combined business area text	Read associated entries of combined business area	X	
Master Data for Group Reporting - Read : Combined business area text	Read a set of entries from combined business area text	X	
Master Data for Group Reporting - Read : Combined business area text	Read an entry by key from combined business area text	X	
Master Data for Group Reporting - Read : Combined business area hierno	Read associated entries of combined business area hierarchy text	X	
Master Data for Group Reporting - Read : Combined business area hierno	Read a set of entries from combined business area hierarchy text	X	
Master Data for Group Reporting - Read : Combined business area hierno	Read an entry by key from combined business area hierarchy text	X	
Master Data for Group Reporting - Read : Consolidation chart of accounts	Read a set of entries from consolidation chart of accounts	X	
Master Data for Group Reporting - Read : Consolidation chart of accounts	Read an entry by key from consolidation chart of accounts	X	
Master Data for Group Reporting - Read : Consolidation chart of accounts	Read associated entries of consolidation chart of accounts text	X	
Master Data for Group Reporting - Read : Consolidation chart of accounts	Read associated entries of consolidation chart of accounts	X	
Master Data for Group Reporting - Read : Consolidation chart of accounts	Read a set of entries from consolidation chart of accounts text	X	
Master Data for Group Reporting - Read : Consolidation chart of accounts	Read an entry by key from consolidation chart of accounts text	X	
Master Data for Group Reporting - Read : Combined controlling area	Read a set of entries from combined controlling area	X	
Master Data for Group Reporting - Read : Combined controlling area	Read an entry by key from combined controlling area	X	
Master Data for Group Reporting - Read : Combined controlling area text	Read associated entries of combined controlling area text	X	
Master Data for Group Reporting - Read : Combined controlling area text	Read associated entries of combined controlling area	X	
Master Data for Group Reporting - Read : Combined controlling area text	Read a set of entries from combined controlling area text	X	
Master Data for Group Reporting - Read : Combined controlling area text	Read an entry by key from combined controlling area text	X	
Master Data for Group Reporting - Read : Combined cost center	Read a set of entries from combined cost center	X	
Master Data for Group Reporting - Read : Combined cost center	Read an entry by key from combined cost center	X	
Master Data for Group Reporting - Read : Combined cost center hierarchy	Read associated entries of combined cost center hierarchy	X	
Master Data for Group Reporting - Read : Combined cost center hierarchy	Read associated entries of combined cost center	X	
Master Data for Group Reporting - Read : Combined cost center hierarchy	Read a set of entries from combined cost center hierarchy	X	
Master Data for Group Reporting - Read : Combined cost center hierarchy	Read an entry by key from combined cost center hierarchy	X	
Master Data for Group Reporting - Read : Combined cost center text	Read associated entries of combined cost center text	X	
Master Data for Group Reporting - Read : Combined cost center text	Read associated entries of combined cost center	X	
Master Data for Group Reporting - Read : Combined cost center text	Read a set of entries from combined cost center text	X	
Master Data for Group Reporting - Read : Combined cost center text	Read an entry by key from combined cost center text	X	
Master Data for Group Reporting - Read : Combined cost center hierarchy	Read associated entries of combined cost center hierarchy text	X	
Master Data for Group Reporting - Read : Combined cost center hierarchy	Read a set of entries from combined cost center hierarchy text	X	
Master Data for Group Reporting - Read : Combined cost center hierarchy	Read an entry by key from combined cost center hierarchy text	X	
Master Data for Group Reporting - Read : Combined country/region	Read a set of entries from combined customer or supplier country/region	X	
Master Data for Group Reporting - Read : Combined country/region	Read an entry by key from combined customer or supplier country/region	X	
Master Data for Group Reporting - Read : Combined country/region hierar	Read associated entries of combined customer or supplier country/region hi	X	
Master Data for Group Reporting - Read : Combined country/region hierar	Read associated entries of combined customer or supplier country/region	X	
Master Data for Group Reporting - Read : Combined country/region hierar	Read a set of entries from combined customer or supplier country/region hie	X	
Master Data for Group Reporting - Read : Combined country/region hierar	Read an entry by key from combined customer or supplier country/region hi	X	
Master Data for Group Reporting - Read : Combined country/region text	Read associated entries of combined customer or supplier country/region te	X	

Master Data for Group Reporting - Read : Combined country/region text	Read associated entries of combined customer or supplier country/region	X	
Master Data for Group Reporting - Read : Combined country/region text	Read a set of entries from combined customer or supplier country/region tex	X	
Master Data for Group Reporting - Read : Combined country/region text	Read an entry by key from combined customer or supplier country/region te	X	
Master Data for Group Reporting - Read : Combined country/region hierar	Read associated entries of combined customer or supplier ctryreg hier txt	X	
Master Data for Group Reporting - Read : Combined country/region hierar	Read a set of entries from combined customer or supplier ctryreg hier txt	X	
Master Data for Group Reporting - Read : Combined country/region hierar	Read an entry by key from combined customer or supplier ctryreg hier txt	X	
Master Data for Group Reporting - Read : Combined customer	Read a set of entries from combined customer	X	
Master Data for Group Reporting - Read : Combined customer	Read an entry by key from combined customer	X	
Master Data for Group Reporting - Read : Combined customer hierarchy	Read associated entries of combined customer hierarchy	X	
Master Data for Group Reporting - Read : Combined customer hierarchy	Read associated entries of combined customer	X	
Master Data for Group Reporting - Read : Combined customer hierarchy	Read a set of entries from combined customer hierarchy	X	
Master Data for Group Reporting - Read : Combined customer hierarchy	Read an entry by key from combined customer hierarchy	X	
Master Data for Group Reporting - Read : Combined customer text	Read associated entries of combined customer text	X	
Master Data for Group Reporting - Read : Combined customer text	Read associated entries of combined customer	X	
Master Data for Group Reporting - Read : Combined customer text	Read a set of entries from combined customer text	X	
Master Data for Group Reporting - Read : Combined customer text	Read an entry by key from combined customer text	X	
Master Data for Group Reporting - Read : Combined customer group	Read a set of entries from combined customer group	X	
Master Data for Group Reporting - Read : Combined customer group	Read an entry by key from combined customer group	X	
Master Data for Group Reporting - Read : Combined customer group hiera	Read associated entries of combined customer group hierarchy	X	
Master Data for Group Reporting - Read : Combined customer group hiera	Read associated entries of combined customer group	X	
Master Data for Group Reporting - Read : Combined customer group hiera	Read a set of entries from combined customer group hierarchy	X	
Master Data for Group Reporting - Read : Combined customer group hiera	Read an entry by key from combined customer group hierarchy	X	
Master Data for Group Reporting - Read : Combined customer group text	Read associated entries of combined customer group text	X	
Master Data for Group Reporting - Read : Combined customer group text	Read associated entries of combined customer group	X	
Master Data for Group Reporting - Read : Combined customer group text	Read a set of entries from combined customer group text	X	
Master Data for Group Reporting - Read : Combined customer group text	Read an entry by key from combined customer group text	X	
Master Data for Group Reporting - Read : Combined customer group hiera	Read associated entries of combined customer group hierarchy text	X	
Master Data for Group Reporting - Read : Combined customer group hiera	Read a set of entries from combined customer group hierarchy text	X	
Master Data for Group Reporting - Read : Combined customer group hiera	Read an entry by key from combined customer group hierarchy text	X	
Master Data for Group Reporting - Read : Combined customer hierarchy te	Read associated entries of combined customer hierarchy text	X	
Master Data for Group Reporting - Read : Combined customer hierarchy te	Read a set of entries from combined customer hierarchy text	X	
Master Data for Group Reporting - Read : Combined customer hierarchy te	Read an entry by key from combined customer hierarchy text	X	
Master Data for Group Reporting - Read : Combined distribution channel	Read a set of entries from combined distribution channel	X	
Master Data for Group Reporting - Read : Combined distribution channel	Read an entry by key from combined distribution channel	X	
Master Data for Group Reporting - Read : Combined distribution channel t	Read associated entries of combined distribution channel text	X	
Master Data for Group Reporting - Read : Combined distribution channel t	Read associated entries of combined distribution channel	X	
Master Data for Group Reporting - Read : Combined distribution channel t	Read a set of entries from combined distribution channel text	X	
Master Data for Group Reporting - Read : Combined distribution channel t	Read an entry by key from combined distribution channel text	X	
Master Data for Group Reporting - Read : Combined division	Read a set of entries from combined division	X	
Master Data for Group Reporting - Read : Combined division	Read an entry by key from combined division	X

Master Data for Group Reporting - Read : Combined fin transaction type h	Read associated entries of combined financial transaction type hierarchy tex	X	
Master Data for Group Reporting - Read : Combined fin transaction type h	Read a set of entries from combined financial transaction type hierarchy text	X	
Master Data for Group Reporting - Read : Combined fin transaction type h	Read an entry by key from combined financial transaction type hierarchy tex	X	
Master Data for Group Reporting - Read : Financial statement item	Read a set of entries from financial statement item - deprecated	X	
Master Data for Group Reporting - Read : Financial statement item	Read an entry by key from financial statement item - deprecated	X	
Master Data for Group Reporting - Read : Financial statement item - hier n	Read associated entries of financial statement item hierarchy node - deprec	X	
Master Data for Group Reporting - Read : Financial statement item - hier n	Read associated entries of financial statement item - deprecated	X	

Master Data for Group Reporting - Read : Financial statement item - hier n	Read a set of entries from financial statement item hierarchy node - depreca	X	
Master Data for Group Reporting - Read : Financial statement item - hier n	Read an entry by key from financial statement item hierarchy node - depreca	X	
Master Data for Group Reporting - Read : Financial statement item text	Read associated entries of financial statement item text - deprecated	X	
Master Data for Group Reporting - Read : Financial statement item text	Read associated entries of financial statement item - deprecated	X	
Master Data for Group Reporting - Read : Financial statement item text	Read a set of entries from financial statement item text - deprecated	X	
Master Data for Group Reporting - Read : Financial statement item text	Read an entry by key from financial statement item text - deprecated	X	
Master Data for Group Reporting - Read : Financial statement item attribut	Read a set of entries from financial statement item by time and version	X	
Master Data for Group Reporting - Read : Financial statement item attribut	Read an entry by key from financial statement item by time and version	X	
Master Data for Group Reporting - Read : Financial statement item versior	Read associated entries of financial statement item version 2	X	
Master Data for Group Reporting - Read : Financial statement item versior	Read associated entries of financial statement item by time and version	X	
Master Data for Group Reporting - Read : Financial statement item versior	Read a set of entries from financial statement item version 2	X	
Master Data for Group Reporting - Read : Financial statement item versior	Read an entry by key from financial statement item version 2	X	
Master Data for Group Reporting - Read : Financial statement item hier no	Read associated entries of financial statement item hierarchy node text - dep	X	
Master Data for Group Reporting - Read : Financial statement item hier no	Read associated entries of financial statement item hierarchy node - deprec	X	
Master Data for Group Reporting - Read : Financial statement item hier no	Read a set of entries from financial statement item hierarchy node text - dep	X	
Master Data for Group Reporting - Read : Financial statement item hier no	Read an entry by key from financial statement item hierarchy node text - dep	X	
Master Data for Group Reporting - Read : Financial statement item hier no	Read a set of entries from financial statement item hierarchy node text versi	X	
Master Data for Group Reporting - Read : Financial statement item hier no	Read an entry by key from financial statement item hierarchy node text versi	X	
Master Data for Group Reporting - Read : Financial statement item v2 - hie	Read associated entries of financial statement item version 2	X	
Master Data for Group Reporting - Read : Financial statement item v2 - hie	Read associated entries of financial statement item hierarchy node version 2	X	
Master Data for Group Reporting - Read : Financial statement item v2 - hie	Read associated entries of financial statement item hierarchy node version 2	X	
Master Data for Group Reporting - Read : Financial statement item v2 - hie	Read associated entries of financial statement item hierarchy node text vers	X	
Master Data for Group Reporting - Read : Financial statement item v2 - hie	Read a set of entries from financial statement item hierarchy node version 2	X	
Master Data for Group Reporting - Read : Financial statement item v2 - hie	Read an entry by key from financial statement item hierarchy node version 2	X	
Master Data for Group Reporting - Read : Selection attribute	Read a set of entries from selection attribute	X	
Master Data for Group Reporting - Read : Selection attribute	Read an entry by key from selection attribute	X	
Master Data for Group Reporting - Read : Selection attribute text	Read associated entries of selection attribute text	X	
Master Data for Group Reporting - Read : Selection attribute text	Read associated entries of selection attribute	X	
Master Data for Group Reporting - Read : Selection attribute text	Read a set of entries from selection attribute text	X	
Master Data for Group Reporting - Read : Selection attribute text	Read an entry by key from selection attribute text	X	
Master Data for Group Reporting - Read : Selection attribute value	Read associated entries of selection attribute value	X	
Master Data for Group Reporting - Read : Selection attribute value	Read a set of entries from selection attribute value	X	
Master Data for Group Reporting - Read : Selection attribute value	Read an entry by key from selection attribute value	X	
Master Data for Group Reporting - Read : Selection attribute value text	Read associated entries of selection attribute value text	X	
Master Data for Group Reporting - Read : Selection attribute value text	Read associated entries of selection attribute value	X	
Master Data for Group Reporting - Read : Selection attribute value text	Read a set of entries from selection attribute value text	X	
Master Data for Group Reporting - Read : Selection attribute value text	Read an entry by key from selection attribute value text	X	
Master Data for Group Reporting - Read : Target attribute	Read a set of entries from target attribute	X	
Master Data for Group Reporting - Read : Target attribute	Read an entry by key from target attribute	X	
Master Data for Group Reporting - Read : Target attribute text	Read associated entries of target attribute text	X	
Master Data for Group Reporting - Read : Target attribute text	Read associated entries of target attribute	X	
Master Data for Group Reporting - Read : Target attribute text	Read a set of entries from target attribute text	X	
Master Data for Group Reporting - Read : Target attribute text	Read an entry by key from target attribute text	X	
Master Data for Group Reporting - Read : Target attribute value	Read a set of entries from target attribute value	X	
Master Data for Group Reporting - Read : Target attribute value	Read an entry by key from target attribute value	X	
Master Data for Group Reporting - Read : Target attribute value text	Read associated entries of target attribute value text	X	
Master Data for Group Reporting - Read : Target attribute value text	Read associated entries of target attribute value	X	
Master Data for Group Reporting - Read : Target attribute value text	Read a set of entries from target attribute value text	X	
Master Data for Group Reporting - Read : Target attribute value text	Read an entry by key from target attribute value text	X	
Master Data for Group Reporting - Read : Financial statement item type	Read a set of entries from financial statement item type	X	
Master Data for Group Reporting - Read : Financial statement item type	Read an entry by key from financial statement item type	X	
Master Data for Group Reporting - Read : Financial statement item type te	Read associated entries of financial statement item type text	X	
Master Data for Group Reporting - Read : Financial statement item type te	Read associated entries of financial statement item type	X	
Master Data for Group Reporting - Read : Financial statement item type te	Read a set of entries from financial statement item type text	X	
Master Data for Group Reporting - Read : Financial statement item type te	Read an entry by key from financial statement item type text	X	
Master Data for Group Reporting - Read : Financial statement item v2 text	Read associated entries of financial statement item version 2	X	
Master Data for Group Reporting - Read : Financial statement item v2 text	Read associated entries of financial statement item text version 2	X	
Master Data for Group Reporting - Read : Financial statement item v2 text	Read a set of entries from financial statement item text version 2	X	
Master Data for Group Reporting - Read : Financial statement item v2 text	Read an entry by key from financial statement item text version 2	X	
Master Data for Group Reporting - Read : Combined functional area hierar	Read a set of entries from combined functional area hierarchy text	X	
Master Data for Group Reporting - Read : Combined functional area hierar	Read an entry by key from combined functional area hierarchy text	X	
Master Data for Group Reporting - Read : Combined functional area	Read a set of entries from combined functional area	X	
Master Data for Group Reporting - Read : Combined functional area	Read an entry by key from combined functional area	X	
Master Data for Group Reporting - Read : Combined functional area hierar	Read associated entries of combined functional area hierarchy text	X	
Master Data for Group Reporting - Read : Combined functional area hierar	Read associated entries of combined functional area hierarchy	X	
Master Data for Group Reporting - Read : Combined functional area hierar	Read associated entries of combined functional area	X	
Master Data for Group Reporting - Read : Combined functional area hierar	Read a set of entries from combined functional area hierarchy	X	
Master Data for Group Reporting - Read : Combined functional area hierar	Read an entry by key from combined functional area hierarchy	X	
Master Data for Group Reporting - Read : Combined functional area text	Read associated entries of combined functional area text	X	
Master Data for Group Reporting - Read : Combined functional area text	Read associated entries of combined functional area	X	
Master Data for Group Reporting - Read : Combined functional area text	Read a set of entries from combined functional area text	X	
Master Data for Group Reporting - Read : Combined functional area text	Read an entry by key from combined functional area text	X	
Master Data for Group Reporting - Read : Consolidation greenhouse gas c	Read a set of entries from greenhouse gas category	X	
Master Data for Group Reporting - Read : Consolidation greenhouse gas c	Read an entry by key from greenhouse gas category	X	
Master Data for Group Reporting - Read : Consolidation ghg category text	Read associated entries of greenhouse gas category text	X	
Master Data for Group Reporting - Read : Consolidation ghg category text	Read associated entries of greenhouse gas category	X	
Master Data for Group Reporting - Read : Consolidation ghg category text	Read a set of entries from greenhouse gas category text	X	

Master Data for Group Reporting - Read : Consolidation ghg category text	Read an entry by key from greenhouse gas category text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg data quality charac	Read a set of entries from greenhouse gas data quality characteristic	X	
Master Data for Group Reporting - Read : Cnsldtn ghg data quality charac	Read an entry by key from greenhouse gas data quality characteristic	X	
Master Data for Group Reporting - Read : Cnsldtn ghg data quality charc t	Read associated entries of greenhouse gas data quality characteristic text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg data quality charc t	Read associated entries of greenhouse gas data quality characteristic	X	
Master Data for Group Reporting - Read : Cnsldtn ghg data quality charc t	Read a set of entries from greenhouse gas data quality characteristic text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg data quality charc t	Read an entry by key from greenhouse gas data quality characteristic text	X	
Master Data for Group Reporting - Read : Consolidation greenhouse gas e	Read a set of entries from greenhouse gas energy mix	X	
Master Data for Group Reporting - Read : Consolidation greenhouse gas e	Read an entry by key from greenhouse gas energy mix	X	
Master Data for Group Reporting - Read : Cnsldtn greenhouse gas energy	Read associated entries of greenhouse gas energy mix text	X	
Master Data for Group Reporting - Read : Cnsldtn greenhouse gas energy	Read associated entries of greenhouse gas energy mix	X	
Master Data for Group Reporting - Read : Cnsldtn greenhouse gas energy	Read a set of entries from greenhouse gas energy mix text	X	
Master Data for Group Reporting - Read : Cnsldtn greenhouse gas energy	Read an entry by key from greenhouse gas energy mix text	X	
Master Data for Group Reporting - Read : Consolidation ghg energy sourc	Read a set of entries from greenhouse gas energy sourcing type	X	
Master Data for Group Reporting - Read : Consolidation ghg energy sourc	Read an entry by key from greenhouse gas energy sourcing type	X	
Master Data for Group Reporting - Read : Cnsldtn ghg energy sourcing typ	Read associated entries of greenhouse gas energy sourcing type text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg energy sourcing typ	Read associated entries of greenhouse gas energy sourcing type	X	
Master Data for Group Reporting - Read : Cnsldtn ghg energy sourcing typ	Read a set of entries from greenhouse gas energy sourcing type text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg energy sourcing typ	Read an entry by key from greenhouse gas energy sourcing type text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg energy classificatio	Read a set of entries from greenhouse gas energy classification text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg energy classificatio	Read an entry by key from greenhouse gas energy classification text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg energy classificatio	Read associated entries of greenhouse gas energy classification	X	
Master Data for Group Reporting - Read : Cnsldtn ghg energy classificatio	Read associated entries of greenhouse gas energy classification text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg energy classificatio	Read a set of entries from greenhouse gas energy classification	X	
Master Data for Group Reporting - Read : Cnsldtn ghg energy classificatio	Read an entry by key from greenhouse gas energy classification	X	
Master Data for Group Reporting - Read : Consolidation greenhouse gas s	Read a set of entries from greenhouse gas scope	X	
Master Data for Group Reporting - Read : Consolidation greenhouse gas s	Read an entry by key from greenhouse gas scope	X	
Master Data for Group Reporting - Read : Consolidation ghg scope text	Read associated entries of greenhouse gas scope text	X	
Master Data for Group Reporting - Read : Consolidation ghg scope text	Read associated entries of greenhouse gas scope	X	
Master Data for Group Reporting - Read : Consolidation ghg scope text	Read a set of entries from greenhouse gas scope text	X	
Master Data for Group Reporting - Read : Consolidation ghg scope text	Read an entry by key from greenhouse gas scope text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg scope 2 calculation	Read a set of entries from greenhouse gas scope 2 calculation method	X	
Master Data for Group Reporting - Read : Cnsldtn ghg scope 2 calculation	Read an entry by key from greenhouse gas scope 2 calculation method	X	
Master Data for Group Reporting - Read : Cnsldtn ghg scope 2 calc metho	Read associated entries of greenhouse gas scope 2 calculation method text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg scope 2 calc metho	Read associated entries of greenhouse gas scope 2 calculation method	X	
Master Data for Group Reporting - Read : Cnsldtn ghg scope 2 calc metho	Read a set of entries from greenhouse gas scope 2 calculation method text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg scope 2 calc metho	Read an entry by key from greenhouse gas scope 2 calculation method text	X	
Master Data for Group Reporting - Read : Cnsldtn ghg scp 2 cntrctl instr te	Read a set of entries from greenhouse gas scope 2 contractual instrument t	X	
Master Data for Group Reporting - Read : Cnsldtn ghg scp 2 cntrctl instr te	Read an entry by key from greenhouse gas scope 2 contractual instrument t	X	
Master Data for Group Reporting - Read : Cnsldtn ghg scp 2 contractual in	Read associated entries of greenhouse gas scope 2 contractual instrument	X	
Master Data for Group Reporting - Read : Cnsldtn ghg scp 2 contractual in	Read associated entries of greenhouse gas scope 2 contractual instrument t	X	
Master Data for Group Reporting - Read : Cnsldtn ghg scp 2 contractual in	Read a set of entries from greenhouse gas scope 2 contractual instrument	X	
Master Data for Group Reporting - Read : Cnsldtn ghg scp 2 contractual in	Read an entry by key from greenhouse gas scope 2 contractual instrument	X	
Master Data for Group Reporting - Read : Combined g/l account	Read a set of entries from combined G/L account	X	
Master Data for Group Reporting - Read : Combined g/l account	Read an entry by key from combined G/L account	X	
Master Data for Group Reporting - Read : Combined g/l account - hier nod	Read associated entries of combined G/L account hierarchy	X	
Master Data for Group Reporting - Read : Combined g/l account - hier nod	Read associated entries of combined G/L account	X	
Master Data for Group Reporting - Read : Combined g/l account - hier nod	Read a set of entries from combined G/L account hierarchy	X	
Master Data for Group Reporting - Read : Combined g/l account - hier nod	Read an entry by key from combined G/L account hierarchy	X	
Master Data for Group Reporting - Read : Combined g/l account text	Read associated entries of combined G/L account text	X	
Master Data for Group Reporting - Read : Combined g/l account text	Read associated entries of combined G/L account	X	
Master Data for Group Reporting - Read : Combined g/l account text	Read a set of entries from combined G/L account text	X	
Master Data for Group Reporting - Read : Combined g/l account text	Read an entry by key from combined G/L account text	X	
Master Data for Group Reporting - Read : Combined g/l account hier node	Read associated entries of combined G/L account hierarchy text	X	
Master Data for Group Reporting - Read : Combined g/l account hier node	Read a set of entries from combined G/L account hierarchy text	X	
Master Data for Group Reporting - Read : Combined g/l account hier node	Read an entry by key from combined G/L account hierarchy text	X	
Master Data for Group Reporting - Read : Combined g/l chart of accounts	Read a set of entries from combined G/L chart of accounts	X	
Master Data for Group Reporting - Read : Combined g/l chart of accounts	Read an entry by key from combined G/L chart of accounts	X	
Master Data for Group Reporting - Read : Combined g/l chart of accounts	Read associated entries of combined G/L chart of accounts text	X	
Master Data for Group Reporting - Read : Combined g/l chart of accounts	Read associated entries of combined G/L account	X

Master Data for Group Reporting - Read : Combined partner segment	Read a set of entries from combined partner segment	X	
Master Data for Group Reporting - Read : Combined partner segment	Read an entry by key from combined partner segment	X	
Master Data for Group Reporting - Read : Combined partner segment - hie	Read associated entries of combined partner segment hierarchy	X	
Master Data for Group Reporting - Read : Combined partner segment - hie	Read associated entries of combined partner segment	X	
Master Data for Group Reporting - Read : Combined partner segment - hie	Read a set of entries from combined partner segment hierarchy	X	
Master Data for Group Reporting - Read : Combined partner segment - hie	Read an entry by key from combined partner segment hierarchy	X	
Master Data for Group Reporting - Read : Combined partner segment text	Read associated entries of combined partner segment text	X	
Master Data for Group Reporting - Read : Combined partner segment text	Read associated entries of combined partner segment	X	
Master Data for Group Reporting - Read : Combined partner segment text	Read a set of entries from combined partner segment text	X	
Master Data for Group Reporting - Read : Combined partner segment text	Read an entry by key from combined partner segment text	X	
Master Data for Group Reporting - Read : Combined partner segment hier	Read associated entries of combined partner segment hierarchy text	X	
Master Data for Group Reporting - Read : Combined partner segment hier	Read a set of entries from combined partner segment hierarchy text	X	
Master Data for Group Reporting - Read : Combined partner segment hier	Read an entry by key from combined partner segment hierarchy text	X	
Master Data for Group Reporting - Read : Partner consolidation unit	Read a set of entries from partner consolidation unit	X	
Master Data for Group Reporting - Read : Partner consolidation unit	Read an entry by key from partner consolidation unit	X	
Master Data for Group Reporting - Read : Partner consolidation unit hierar	Read associated entries of partner consolidation unit hierarchy	X	
Master Data for Group Reporting - Read : Partner consolidation unit hierar	Read associated entries of partner consolidation unit	X	
Master Data for Group Reporting - Read : Partner consolidation unit hierar	Read a set of entries from partner consolidation unit hierarchy	X	
Master Data for Group Reporting - Read : Partner consolidation unit hierar	Read an entry by key from partner consolidation unit hierarchy	X	
Master Data for Group Reporting - Read : Partner consolidation unit text	Read associated entries of partner consolidation unit text	X	
Master Data for Group Reporting - Read : Partner consolidation unit text	Read associated entries of partner consolidation unit	X	
Master Data for Group Reporting - Read : Partner consolidation unit text	Read a set of entries from partner consolidation unit text	X	
Master Data for Group Reporting - Read : Partner consolidation unit text	Read an entry by key from partner consolidation unit text	X	
Master Data for Group Reporting - Read : Partner consolidation unit hierar	Read associated entries of partner consolidation unit hierarchy text	X	
Master Data for Group Reporting - Read : Partner consolidation unit hierar	Read a set of entries from partner consolidation unit hierarchy text	X	
Master Data for Group Reporting - Read : Partner consolidation unit hierar	Read an entry by key from partner consolidation unit hierarchy text	X	
Master Data for Group Reporting - Read : Combined plant	Read a set of entries from combined plant	X	
Master Data for Group Reporting - Read : Combined plant	Read an entry by key from combined plant	X	
Master Data for Group Reporting - Read : Combined plant text	Read associated entries of combined plant text	X	
Master Data for Group Reporting - Read : Combined plant text	Read associated entries of combined plant	X	
Master Data for Group Reporting - Read : Combined plant text	Read a set of entries from combined plant text	X	
Master Data for Group Reporting - Read : Combined plant text	Read an entry by key from combined plant text	X	
Master Data for Group Reporting - Read : Posting level	Read a set of entries from posting level	X	
Master Data for Group Reporting - Read : Posting level	Read an entry by key from posting level	X	

Master Data for Group Reporting - Read : Posting level - hierarchynode	Read associated entries of posting level hierarchy	X	
Master Data for Group Reporting - Read : Posting level - hierarchynode	Read associated entries of posting level	X	
Master Data for Group Reporting - Read : Posting level - hierarchynode	Read a set of entries from posting level hierarchy	X	
Master Data for Group Reporting - Read : Posting level - hierarchynode	Read an entry by key from posting level hierarchy	X	
Master Data for Group Reporting - Read : Posting level text	Read associated entries of posting level text	X	
Master Data for Group Reporting - Read : Posting level text	Read associated entries of posting level	X	
Master Data for Group Reporting - Read : Posting level text	Read a set of entries from posting level text	X	
Master Data for Group Reporting - Read : Posting level text	Read an entry by key from posting level text	X	
Master Data for Group Reporting - Read : Posting level hierarchynode text	Read associated entries of posting level hierarchy text	X	
Master Data for Group Reporting - Read : Posting level hierarchynode text	Read associated entries of posting level hierarchy	X	
Master Data for Group Reporting - Read : Posting level hierarchynode text	Read a set of entries from posting level hierarchy text	X	
Master Data for Group Reporting - Read : Posting level hierarchynode text	Read an entry by key from posting level hierarchy text	X	
Master Data for Group Reporting - Read : Combined profit center for elimi	Read a set of entries from combined profit center for elimination	X	
Master Data for Group Reporting - Read : Combined profit center for elimi	Read an entry by key from combined profit center for elimination	X	
Master Data for Group Reporting - Read : Combined profit center for elim	Read associated entries of combined profit center for elimination hierarchy	X	
Master Data for Group Reporting - Read : Combined profit center for elim	Read associated entries of combined profit center for elimination	X	
Master Data for Group Reporting - Read : Combined profit center for elim	Read a set of entries from combined profit center for elimination hierarchy	X	
Master Data for Group Reporting - Read : Combined profit center for elim	Read an entry by key from combined profit center for elimination hierarchy	X	
Master Data for Group Reporting - Read : Combined profit center for elim	Read associated entries of combined profit center for elimination text	X	
Master Data for Group Reporting - Read : Combined profit center for elim	Read associated entries of combined profit center for elimination	X	
Master Data for Group Reporting - Read : Combined profit center for elim	Read a set of entries from combined profit center for elimination text	X	
Master Data for Group Reporting - Read : Combined profit center for elim	Read an entry by key from combined profit center for elimination text	X	
Master Data for Group Reporting - Read : Cmbnd profit center for elim hie	Read associated entries of combined profit center for elimination hierarchy t	X	
Master Data for Group Reporting - Read : Cmbnd profit center for elim hie	Read a set of entries from combined profit center for elimination hierarchy te	X	
Master Data for Group Reporting - Read : Cmbnd profit center for elim hie	Read an entry by key from combined profit center for elimination hierarchy te	X	
Master Data for Group Reporting - Read : Combined product sold	Read a set of entries from combined product sold	X	
Master Data for Group Reporting - Read : Combined product sold	Read an entry by key from combined product sold	X	
Master Data for Group Reporting - Read : Combined product sold hierarch	Read associated entries of combined product sold hierarchy	X	
Master Data for Group Reporting - Read : Combined product sold hierarch	Read associated entries of combined product sold	X	
Master Data for Group Reporting - Read : Combined product sold hierarch	Read a set of entries from combined product sold hierarchy	X	
Master Data for Group Reporting - Read : Combined product sold hierarch	Read an entry by key from combined product sold hierarchy	X	
Master Data for Group Reporting - Read : Combined product sold text	Read associated entries of combined product sold text	X	
Master Data for Group Reporting - Read : Combined product sold text	Read associated entries of combined product sold	X	
Master Data for Group Reporting - Read : Combined product sold text	Read a set of entries from combined product sold text	X	
Master Data for Group Reporting - Read : Combined product sold text	Read an entry by key from combined product sold text	X	
Master Data for Group Reporting - Read : Combined product sold group	Read a set of entries from combined product sold group	X	
Master Data for Group Reporting - Read : Combined product sold group	Read an entry by key from combined product sold group	X	
Master Data for Group Reporting - Read : Combined product sold group te	Read associated entries of combined product sold group text	X	
Master Data for Group Reporting - Read : Combined product sold group te	Read associated entries of combined product sold group	X	
Master Data for Group Reporting - Read : Combined product sold group te	Read a set of entries from combined product sold group text	X	
Master Data for Group Reporting - Read : Combined product sold group te	Read an entry by key from combined product sold group text	X	
Master Data for Group Reporting - Read : Combined product sold hiernod	Read associated entries of combined product sold hierarchy text	X	
Master Data for Group Reporting - Read : Combined product sold hiernod	Read a set of entries from combined product sold hierarchy text	X	
Master Data for Group Reporting - Read : Combined product sold hiernod	Read an entry by key from combined product sold hierarchy text	X	
Master Data for Group Reporting - Read : Combined profit center	Read a set of entries from combined profit center	X	
Master Data for Group Reporting - Read : Combined profit center	Read an entry by key from combined profit center	X	
Master Data for Group Reporting - Read : Combined profit center - hierarc	Read associated entries of combined profit center hierarchy	X	
Master Data for Group Reporting - Read : Combined profit center - hierarc	Read associated entries of combined profit center	X	
Master Data for Group Reporting - Read : Combined profit center - hierarc	Read a set of entries from combined profit center hierarchy	X	
Master Data for Group Reporting - Read : Combined profit center - hierarc	Read an entry by key from combined profit center hierarchy	X	
Master Data for Group Reporting - Read : Combined profit center text	Read associated entries of combined profit center text	X	
Master Data for Group Reporting - Read : Combined profit center text	Read associated entries of combined profit center	X	
Master Data for Group Reporting - Read : Combined profit center text	Read a set of entries from combined profit center text	X	
Master Data for Group Reporting - Read : Combined profit center text	Read an entry by key from combined profit center text	X	
Master Data for Group Reporting - Read : Combined profit center hierarch	Read associated entries of combined profit center hierarchy text	X	
Master Data for Group Reporting - Read : Combined profit center hierarch	Read a set of entries from combined profit center hierarchy text	X	
Master Data for Group Reporting - Read : Combined profit center hierarch	Read an entry by key from combined profit center hierarchy text	X	
Master Data for Group Reporting - Read : Combined project	Read a set of entries from combined project	X	
Master Data for Group Reporting - Read : Combined project	Read an entry by key from combined project	X	
Master Data for Group Reporting - Read : Combined project hierarchy	Read associated entries of combined project hierarchy	X	
Master Data for Group Reporting - Read : Combined project hierarchy	Read associated entries of combined project	X	
Master Data for Group Reporting - Read : Combined project hierarchy	Read a set of entries from combined project hierarchy	X	
Master Data for Group Reporting - Read : Combined project hierarchy	Read an entry by key from combined project hierarchy	X	
Master Data for Group Reporting - Read : Combined project text	Read associated entries of combined project text	X	
Master Data for Group Reporting - Read : Combined project text	Read associated entries of combined project	X	
Master Data for Group Reporting - Read : Combined project text	Read a set of entries from combined project text	X	
Master Data for Group Reporting - Read : Combined project text	Read an entry by key from combined project text	X	
Master Data for Group Reporting - Read : Combined project hierarchy text	Read associated entries of combined project hierarchy text	X	
Master Data for Group Reporting - Read : Combined project hierarchy text	Read a set of entries from combined project hierarchy text	X	
Master Data for Group Reporting - Read : Combined project hierarchy text	Read an entry by key from combined project hierarchy text	X	
Master Data for Group Reporting - Read : Reporting item	Read a set of entries from reporting item	X	
Master Data for Group Reporting - Read : Reporting item	Read an entry by key from reporting item	X	
Master Data for Group Reporting - Read : Reporting item hierarchy	Read associated entries of reporting item hierarchy	X	
Master Data for Group Reporting - Read : Reporting item hierarchy	Read associated entries of reporting item	X	
Master Data for Group Reporting - Read : Reporting item hierarchy	Read a set of entries from reporting item hierarchy	X	
Master Data for Group Reporting - Read : Reporting item hierarchy	Read an entry by key from reporting item hierarchy	X	
Master Data for Group Reporting - Read : Reporting item text	Read associated entries of reporting item text	X	

Master Data for Group Reporting - Read : Reporting item text	Read associated entries of reporting item	X	
Master Data for Group Reporting - Read : Reporting item text	Read a set of entries from reporting item text	X	
Master Data for Group Reporting - Read : Reporting item text	Read an entry by key from reporting item text	X	
Master Data for Group Reporting - Read : Reporting item hierarchynode te	Read associated entries of reporting item hierarchy text	X	
Master Data for Group Reporting - Read : Reporting item hierarchynode te	Read associated entries of reporting item hierarchy	X	
Master Data for Group Reporting - Read : Reporting item hierarchynode te	Read a set of entries from reporting item hierarchy text	X	
Master Data for Group Reporting - Read : Reporting item hierarchynode te	Read an entry by key from reporting item hierarchy text	X	
Master Data for Group Reporting - Read : Combined sales district	Read a set of entries from combined sales district	X	
Master Data for Group Reporting - Read : Combined sales district	Read an entry by key from combined sales district	X	
Master Data for Group Reporting - Read : Combined sales district text	Read associated entries of combined sales district text	X	
Master Data for Group Reporting - Read : Combined sales district text	Read associated entries of combined sales district	X	
Master Data for Group Reporting - Read : Combined sales district text	Read a set of entries from combined sales district text	X	
Master Data for Group Reporting - Read : Combined sales district text	Read an entry by key from combined sales district text	X	
Master Data for Group Reporting - Read : Combined sales organization	Read a set of entries from combined sales organization	X	
Master Data for Group Reporting - Read : Combined sales organization	Read an entry by key from combined sales organization	X	
Master Data for Group Reporting - Read : Combined sales organization hi	Read associated entries of combined sales organization hierarchy	X	
Master Data for Group Reporting - Read : Combined sales organization hi	Read associated entries of combined sales organization	X	
Master Data for Group Reporting - Read : Combined sales organization hi	Read a set of entries from combined sales organization hierarchy	X	
Master Data for Group Reporting - Read : Combined sales organization hi	Read an entry by key from combined sales organization hierarchy	X	
Master Data for Group Reporting - Read : Combined sales organization te	Read associated entries of combined sales organization text	X	
Master Data for Group Reporting - Read : Combined sales organization te	Read associated entries of combined sales organization	X	
Master Data for Group Reporting - Read : Combined sales organization te	Read a set of entries from combined sales organization text	X	
Master Data for Group Reporting - Read : Combined sales organization te	Read an entry by key from combined sales organization text	X	
Master Data for Group Reporting - Read : Combined sales org hiernode te	Read associated entries of combined sales organization hierarchy text	X	
Master Data for Group Reporting - Read : Combined sales org hiernode te	Read a set of entries from combined sales organization hierarchy text	X	
Master Data for Group Reporting - Read : Combined sales org hiernode te	Read an entry by key from combined sales organization hierarchy text	X	
Master Data for Group Reporting - Read : Combined segment	Read a set of entries from combined segment	X	
Master Data for Group Reporting - Read : Combined segment	Read an entry by key from combined segment	X	
Master Data for Group Reporting - Read : Combined segment - hierarchyn	Read associated entries of combined segment hierarchy	X	
Master Data for Group Reporting - Read : Combined segment - hierarchyn	Read associated entries of combined segment	X	
Master Data for Group Reporting - Read : Combined segment - hierarchyn	Read a set of entries from combined segment hierarchy	X	
Master Data for Group Reporting - Read : Combined segment - hierarchyn	Read an entry by key from combined segment hierarchy	X	
Master Data for Group Reporting - Read : Combined segment text	Read associated entries of combined segment text	X	
Master Data for Group Reporting - Read : Combined segment text	Read associated entries of combined segment	X	
Master Data for Group Reporting - Read : Combined segment text	Read a set of entries from combined segment text	X	
Master Data for Group Reporting - Read : Combined segment text	Read an entry by key from combined segment text	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read a set of entries from combined segment for elimination	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read an entry by key from combined segment for elimination	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read associated entries of combined segment for elimination text	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read associated entries of combined segment for elimination	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read a set of entries from combined segment for elimination text	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read an entry by key from combined segment for elimination text	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read associated entries of combined segment for elimination hierarchy	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read associated entries of combined segment for elimination	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read a set of entries from combined segment for elimination hierarchy	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read an entry by key from combined segment for elimination hierarchy	X	
Master Data for Group Reporting - Read : Combined segment hierarchy te	Read associated entries of combined segment hierarchy text	X	
Master Data for Group Reporting - Read : Combined segment hierarchy te	Read a set of entries from combined segment hierarchy text	X	
Master Data for Group Reporting - Read : Combined segment hierarchy te	Read an entry by key from combined segment hierarchy text	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read associated entries of combined segment for elimination hierarchy text	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read a set of entries from combined segment for elimination hierarchy text	X	
Master Data for Group Reporting - Read : Combined segment for eliminati	Read an entry by key from combined segment for elimination hierarchy text	X	
Master Data for Group Reporting - Read : Combined ship to party	Read a set of entries from combined ship to party	X	
Master Data for Group Reporting - Read : Combined ship to party	Read an entry by key from combined ship to party	X	
Master Data for Group Reporting - Read : Combined ship to party text	Read associated entries of combined ship to party text	X	
Master Data for Group Reporting - Read : Combined ship to party text	Read associated entries of combined ship to party	X	
Master Data for Group Reporting - Read : Combined ship to party text	Read a set of entries from combined ship to party text	X	
Master Data for Group Reporting - Read : Combined ship to party text	Read an entry by key from combined ship to party text	X	
Master Data for Group Reporting - Read : Subassignment	Read a set of entries from subassignment	X	
Master Data for Group Reporting - Read : Subassignment	Read an entry by key from subassignment	X	
Master Data for Group Reporting - Read : Subassignment text	Read associated entries of subassignment text	X	
Master Data for Group Reporting - Read : Subassignment text	Read associated entries of subassignment	X	
Master Data for Group Reporting - Read : Subassignment text	Read a set of entries from subassignment text	X	
Master Data for Group Reporting - Read : Subassignment text	Read an entry by key from subassignment text	X	
Master Data for Group Reporting - Read : Subitem	Read a set of entries from subitem	X	
Master Data for Group Reporting - Read : Subitem	Read an entry by key from subitem	X	
Master Data for Group Reporting - Read : Subitem hierarchy	Read associated entries of subitem hierarchy	X	
Master Data for Group Reporting - Read : Subitem hierarchy	Read associated entries of subitem	X	
Master Data for Group Reporting - Read : Subitem hierarchy	Read a set of entries from subitem hierarchy	X	
Master Data for Group Reporting - Read : Subitem hierarchy	Read an entry by key from subitem hierarchy	X	
Master Data for Group Reporting - Read : Subitem text	Read associated entries of subitem text	X	
Master Data for Group Reporting - Read : Subitem text	Read associated entries of subitem	X	
Master Data for Group Reporting - Read : Subitem text	Read a set of entries from subitem text	X	
Master Data for Group Reporting - Read : Subitem text	Read an entry by key from subitem text	X	
Master Data for Group Reporting - Read : Subitem category	Read a set of entries from subitem category	X	
Master Data for Group Reporting - Read : Subitem category	Read an entry by key from subitem category	X	
Master Data for Group Reporting - Read : Subitem category text	Read associated entries of subitem category text	X	

Master Data for Group Reporting - Read : Subitem category text	Read associated entries of subitem category	X	
Master Data for Group Reporting - Read : Subitem category text	Read a set of entries from subitem category text	X	
Master Data for Group Reporting - Read : Subitem category text	Read an entry by key from subitem category text	X	
Master Data for Group Reporting - Read : Subitem hierarchy text	Read associated entries of subitem hierarchy text	X	
Master Data for Group Reporting - Read : Subitem hierarchy text	Read associated entries of subitem hierarchy	X	
Master Data for Group Reporting - Read : Subitem hierarchy text	Read a set of entries from subitem hierarchy text	X	
Master Data for Group Reporting - Read : Subitem hierarchy text	Read an entry by key from subitem hierarchy text	X	
Master Data for Group Reporting - Read : Combined supplier	Read a set of entries from combined supplier	X	
Master Data for Group Reporting - Read : Combined supplier	Read an entry by key from combined supplier	X	
Master Data for Group Reporting - Read : Combined supplier hierarchy	Read associated entries of combined supplier hierarchy	X	
Master Data for Group Reporting - Read : Combined supplier hierarchy	Read associated entries of combined supplier	X	
Master Data for Group Reporting - Read : Combined supplier hierarchy	Read a set of entries from combined supplier hierarchy	X	
Master Data for Group Reporting - Read : Combined supplier hierarchy	Read an entry by key from combined supplier hierarchy	X	
Master Data for Group Reporting - Read : Combined supplier text	Read associated entries of combined supplier text	X	
Master Data for Group Reporting - Read : Combined supplier text	Read associated entries of combined supplier	X	
Master Data for Group Reporting - Read : Combined supplier text	Read a set of entries from combined supplier text	X	
Master Data for Group Reporting - Read : Combined supplier text	Read an entry by key from combined supplier text	X	
Master Data for Group Reporting - Read : Combined supplier hierarchy te	Read associated entries of combined supplier hierarchy text	X	
Master Data for Group Reporting - Read : Combined supplier hierarchy te	Read a set of entries from combined supplier hierarchy text	X	
Master Data for Group Reporting - Read : Combined supplier hierarchy te	Read an entry by key from combined supplier hierarchy text	X	
Master Data for Group Reporting - Read : Cnsldtn sustainability mode of tr	Read a set of entries from sustainability mode of transport	X	
Master Data for Group Reporting - Read : Cnsldtn sustainability mode of tr	Read an entry by key from sustainability mode of transport	X	
Master Data for Group Reporting - Read : Cnsldtn sust mode of transport t	Read associated entries of sustainability mode of transport text	X	
Master Data for Group Reporting - Read : Cnsldtn sust mode of transport t	Read associated entries of sustainability mode of transport	X	
Master Data for Group Reporting - Read : Cnsldtn sust mode of transport t	Read a set of entries from sustainability mode of transport text	X	
Master Data for Group Reporting - Read : Cnsldtn sust mode of transport t	Read an entry by key from sustainability mode of transport text	X	
Master Data for Group Reporting - Read : Transaction currency	Read a set of entries from transaction currency	X	
Master Data for Group Reporting - Read : Transaction currency	Read an entry by key from transaction currency	X	
Master Data for Group Reporting - Read : Transaction currency text	Read associated entries of transaction currency text	X	
Master Data for Group Reporting - Read : Transaction currency text	Read associated entries of transaction currency	X	
Master Data for Group Reporting - Read : Transaction currency text	Read a set of entries from transaction currency text	X	
Master Data for Group Reporting - Read : Transaction currency text	Read an entry by key from transaction currency text	X	
Master Data for Group Reporting - Read : Consolidation unit	Read a set of entries from consolidation unit	X	
Master Data for Group Reporting - Read : Consolidation unit	Read an entry by key from consolidation unit	X	
Master Data for Group Reporting - Read : Consolidation unit hierarchy	Read associated entries of consolidation unit hierarchy	X	
Master Data for Group Reporting - Read : Consolidation unit hierarchy	Read associated entries of consolidation unit	X	
Master Data for Group Reporting - Read : Consolidation unit hierarchy	Read a set of entries from consolidation unit hierarchy	X	
Master Data for Group Reporting - Read : Consolidation unit hierarchy	Read an entry by key from consolidation unit hierarchy	X	
Master Data for Group Reporting - Read : Consolidation unit text	Read associated entries of consolidation unit text	X	
Master Data for Group Reporting - Read : Consolidation unit text	Read associated entries of consolidation unit	X	
Master Data for Group Reporting - Read : Consolidation unit text	Read a set of entries from consolidation unit text	X	
Master Data for Group Reporting - Read : Consolidation unit text	Read an entry by key from consolidation unit text	X	
Master Data for Group Reporting - Read : Consolidation unit for eliminatio	Read a set of entries from consolidation unit for elimination	X	
Master Data for Group Reporting - Read : Consolidation unit for eliminatio	Read an entry by key from consolidation unit for elimination	X	
Master Data for Group Reporting - Read : Consolidation unit for eliminatio	Read associated entries of consolidation unit text for elimination	X	
Master Data for Group Reporting - Read : Consolidation unit for eliminatio	Read associated entries of consolidation unit for elimination	X	
Master Data for Group Reporting - Read : Consolidation unit for eliminatio	Read a set of entries from consolidation unit text for elimination	X	
Master Data for Group Reporting - Read : Consolidation unit for eliminatio	Read an entry by key from consolidation unit text for elimination	X	
Master Data for Group Reporting - Read : Consolidation unit for eliminatio	Read associated entries of consolidation unit for elimination hierarchy	X	
Master Data for Group Reporting - Read : Consolidation unit for eliminatio	Read associated entries of consolidation unit for elimination	X	
Master Data for Group Reporting - Read : Consolidation unit for eliminatio	Read a set of entries from consolidation unit for elimination hierarchy	X	
Master Data for Group Reporting - Read : Consolidation unit for eliminatio	Read an entry by key from consolidation unit for elimination hierarchy	X	
Master Data for Group Reporting - Read : Consolidation unit hierarchy tex	Read associated entries of consolidation unit hierarchy text	X

Condition Record for Pricing in Purchasing : Condition records	Create one or more condition records		X
Condition Record for Pricing in Purchasing : Condition records	Read a specific condition record	X	
Condition Record for Pricing in Purchasing : Condition records	Update a specific condition record		X
Condition Record for Pricing in Purchasing : Condition records	Delete a specific condition record		X
Condition Record for Pricing in Purchasing : Pricing scales	Read the pricing scales of a specific condition supplement	X	
Condition Record for Pricing in Purchasing : Pricing scales	Create one or more pricing scales for a specific condition supplement		X
Condition Record for Pricing in Purchasing : Pricing scales	Read the condition supplement for a specific condition supplement pricing s	X	
Condition Record for Pricing in Purchasing : Pricing scales	Read the condition record for a specific pricing scale	X	
Condition Record for Pricing in Purchasing : Pricing scales	Read the pricing scales of a specific condition record	X	
Condition Record for Pricing in Purchasing : Pricing scales	Create one or more pricing scales for a specific condition record		X
Condition Record for Pricing in Purchasing : Pricing scales	Read all pricing scales in the system	X	
Condition Record for Pricing in Purchasing : Pricing scales	Create one or more pricing scales		X
Condition Record for Pricing in Purchasing : Pricing scales	Read a specific pricing scale	X	
Condition Record for Pricing in Purchasing : Pricing scales	Update a specific pricing scale		X
Condition Record for Pricing in Purchasing : Pricing scales	Delete a specific pricing scale		X
Condition Record for Pricing in Purchasing : Batch requests	Send a group of requests		X
Customer Material (A2X) : Customer materials	Read all customer materials	X	
Customer Material (A2X) : Customer materials	Create a customer material		X
Customer Material (A2X) : Customer materials	Read a customer material under a distribution chain	X	
Customer Material (A2X) : Customer materials	Update a customer material under a distribution chain		X
Customer Material (A2X) : Customer materials	Delete a customer material under a distribution chain		X
Customer Material (A2X) : Batch requests	Send a group of requests		X
Appointment Activity (A2X) : Appointment activity	Read the header information of all appointment activities in the system	X	
Appointment Activity (A2X) : Appointment activity	Create an appointment activity		X
Appointment Activity (A2X) : Appointment activity	Read the header information of an appointment activity by the key	X	
Appointment Activity (A2X) : Appointment activity	Update the header information of an appointment activity		X

Appointment Activity (A2X) : Attendee for appointment activity	Read attendees of an appointment activity	X	
Appointment Activity (A2X) : Attendee for appointment activity	Create an attendee for an appointment activity		X
Appointment Activity (A2X) : Attendee for appointment activity	Read all the attendees of all appointment activities	X	
Appointment Activity (A2X) : Attendee for appointment activity	Create an attendee for an appointment activity		X
Appointment Activity (A2X) : Attendee for appointment activity	Read the attendee by the key	X	
Appointment Activity (A2X) : Attendee for appointment activity	Update the attendee of an appointment activity		X
Appointment Activity (A2X) : Attendee for appointment activity	Delete an attendee of an appointment activity		X
Appointment Activity (A2X) : Person responsible for appointment activity	Read the person responsible assigned to an appointment activity	X	
Appointment Activity (A2X) : Person responsible for appointment activity	Create the person responsible for an appointment activity		X
Appointment Activity (A2X) : Person responsible for appointment activity	Read the persons responsible of all the appointment activities	X	
Appointment Activity (A2X) : Person responsible for appointment activity	Create the person responsible for an appointment activity		X
Appointment Activity (A2X) : Person responsible for appointment activity	Read the person responsible of an appointment activity by the key	X	
Appointment Activity (A2X) : Person responsible for appointment activity	Update the person responsible of an appointment activity		X
Appointment Activity (A2X) : Person responsible for appointment activity	Delete the person responsible of an appointment activity		X
Appointment Activity (A2X) : Appointment activity text	Read the texts of an appointment activity	X	
Appointment Activity (A2X) : Appointment activity text	Create the texts for an appointment activity		X
Appointment Activity (A2X) : Appointment activity text	Read the texts of all the appointment activities	X	
Appointment Activity (A2X) : Appointment activity text	Create the texts for an appointment activity		X
Appointment Activity (A2X) : Appointment activity text	Read the texts of an appointment activity by the key	X	
Appointment Activity (A2X) : Appointment activity text	Update the texts of an appointment activity		X
Appointment Activity (A2X) : Appointment activity text	Delete the texts of an appointment activity		X
Appointment Activity (A2X) : Batch requests	Send a group of requests		X
Bank - Read : Bank details	Read bank details	X	
Bank - Read : Bank details	Read bank details by key	X	
Bank - Read : Batch requests	Send a group of requests		X
Material Planning Data - Read : Material coverages	Read information on material coverages	X	
Material Planning Data - Read : Material coverages	Read information on a specific coverage situation	X	
Material Planning Data - Read : Supply and demand	Read information on the supply and demand for an mrp material	X	
Material Planning Data - Read : Master data	Read master data for mrp materials	X	
Material Planning Data - Read : Master data	Read master data for a specific mrp material	X	
Material Planning Data - Read : Batch requests	Send a group of requests		X
Planned Independent Requirement : Planned independent requirement	Read planned independent requirements	X	
Planned Independent Requirement : Planned independent requirement	Create a planned independent requirement		X
Planned Independent Requirement : Planned independent requirement	Read a planned independent requirement header by its key	X	
Planned Independent Requirement : Planned independent requirement	Update a planned independent requirement		X
Planned Independent Requirement : Planned independent requirement ite	Read items of a planned independent requirement	X	
Planned Independent Requirement : Planned independent requirement ite	Add items to a planned independent requirement		X
Planned Independent Requirement : Planned independent requirement ite	Read header info of planned independent requirement items	X	
Planned Independent Requirement : Planned independent requirement ite	Read planned independent requirement items	X	
Planned Independent Requirement : Planned independent requirement ite	Create a planned independent requirement item		X
Planned Independent Requirement : Planned independent requirement ite	Read a single planned independent requirement items by its key	X	
Planned Independent Requirement : Planned independent requirement ite	Update a planned independent requirement item		X
Planned Independent Requirement : Batch requests	Send a group of requests		X
Activity Type - Read (A2X) : Activity type	Read all available cost center activity types	X	
Activity Type - Read (A2X) : Activity type	Read a specific cost center activity type	X	
Activity Type - Read (A2X) : Activity type text	Read all language-dependent fields for a specific cost center activity type	X	
Activity Type - Read (A2X) : Activity type text	Read cost center activity type header fields for a specific language	X	
Activity Type - Read (A2X) : Activity type text	Read all language-dependent fields for all cost center activity types	X	
Activity Type - Read (A2X) : Activity type text	Read language-dependent fields of a cost center activity type in a specific la	X	
Activity Type - Read (A2X) : Batch requests	Send a group of requests		X
Distribution Channel - Read : Distribution channel	Get entities from a distributionchannel	X	
Distribution Channel - Read : Distribution channel	Get entity from a distributionchannel by key	X	
Distribution Channel - Read : Distribution channel text	Get entities from related to text	X	
Distribution Channel - Read : Distribution channel text	Get related to distributionchannel	X	
Distribution Channel - Read : Distribution channel text	Get entities from a distributionchanneltext	X	
Distribution Channel - Read : Distribution channel text	Get entity from a distributionchanneltext by key	X	
Responsibility Management Teams : Team member functions	Read the member function details of a team	X	
Responsibility Management Teams : Team member functions	Create the member function of a team		X
Responsibility Management Teams : Team member functions	Delete the member function of a team		X
Responsibility Management Teams : Team member functions	Delete all the specified member function entries of a team member		X
Responsibility Management Teams : Team hierarchy nodes	Read the hierarchy details of a team	X	
Responsibility Management Teams : Team hierarchy nodes	Create a hierarchy of parent and child teams based on the specified effective date		X
Responsibility Management Teams : Team hierarchy nodes	Delete a hierarchy by unassigning a specified child team from the parent team		X
Responsibility Management Teams : Team hierarchy nodes	Get all the child team based on a specified parent node	X	
Responsibility Management Teams : Team hierarchy nodes	Get a collection of potential team hierarchy nodes that can be assigned to a	X	
Responsibility Management Teams : Team headers	Read the header details of a team	X	
Responsibility Management Teams : Team headers	Create header details of a team		X
Responsibility Management Teams : Team headers	Update header details of a team		X
Responsibility Management Teams : Team headers	Delete header details of a team		X
Responsibility Management Teams : Team headers	Prepones the team header start date		X
Responsibility Management Teams : Team owners	Read the owner details of a team	X	
Responsibility Management Teams : Team owners	Create the owner of a team		X
Responsibility Management Teams : Team owners	Delete the owner of a team		X
Responsibility Management Teams : Team owners	Delete all entries of a specified owner to the given team		X
Responsibility Management Teams : Team members	Read the member details of a team	X	
Responsibility Management Teams : Team members	Create the member of a team		X
Responsibility Management Teams : Team members	Delete the team member and member function of a team		X

Responsibility Management Teams : Team members	Update the team member function start date		X
Responsibility Management Teams : Team attributes	Read the attribute of a team	X	
Responsibility Management Teams : Team attributes	Create the attribute of a team		X
Responsibility Management Teams : Team attributes	Delete the attribute of a team		X
Responsibility Management Teams : Batch requests	Send a group of requests		X
Task Activity (A2X) : Customer management task activity	Read the header information of all task activities in the system	X	
Task Activity (A2X) : Customer management task activity	Create a task activity		X
Task Activity (A2X) : Customer management task activity	Read the header information of a task activity by the key	X	
Task Activity (A2X) : Customer management task activity	Update the header information of a task activity		X
Task Activity (A2X) : Person responsible for task activity	Read the person responsible assigned to a task activity	X	
Task Activity (A2X) : Person responsible for task activity	Create the person responsible for a task activity		X
Task Activity (A2X) : Person responsible for task activity	Read the persons responsible of all the task activities	X	
Task Activity (A2X) : Person responsible for task activity	Create the person responsible for a task activity		X
Task Activity (A2X) : Person responsible for task activity	Read the person responsible of a task activity by the key	X	
Task Activity (A2X) : Person responsible for task activity	Update the person responsible of a task activity		X
Task Activity (A2X) : Person responsible for task activity	Delete the person responsible of a task activity		X
Task Activity (A2X) : Customer management task text	Read the texts of a task activity	X	
Task Activity (A2X) : Customer management task text	Create the texts for a task activity		X
Task Activity (A2X) : Customer management task text	Read the texts of all the task activities	X	
Task Activity (A2X) : Customer management task text	Create the texts for a task activity		X
Task Activity (A2X) : Customer management task text	Read the texts of a task activity by the key	X	
Task Activity (A2X) : Customer management task text	Update the texts of a task activity		X
Task Activity (A2X) : Customer management task text	Delete the texts of a task activity		X
Task Activity (A2X) : Batch requests	Send a group of requests		X
Change Record : Change record header data	Read change record data	X	
Change Record : Change record header data	Create a change record		X
Change Record : Change record header data	Read data of a specific a change record	X	
Change Record : Change record header data	Update header attributes of a change record		X
Change Record : Change record header data	Invoke action updateuserstatus		X
Change Record : Change record description	Read the change records descriptions	X	
Change Record : Change record description	Assigns a description to a change record		X
Change Record : Change record description	Read all change record descriptions	X	
Change Record : Change record description	Assigns a description to a change record		X
Change Record : Change record description	Read all change record descriptions	X	
Change Record : Change record description	Update a description in a change record		X
Change Record : Change record description	Removes a description from a change record		X
Change Record : Func loc task list assign to chg recd	Read the functional location task list assigned to a change record	X	
Change Record : Func loc task list assign to chg recd	Assigns a functional location task list to a change record		X
Change Record : Func loc task list assign to chg recd	Read all change record - functional location task list assignments in the syst	X	
Change Record : Func loc task list assign to chg recd	Assigns a functional location task list to a change record		X
Change Record : Func loc task list assign to chg recd	Read a specific change record - functional location task list assignment	X	
Change Record : Func loc task list assign to chg recd	Update a functional location task list to a change record		X
Change Record : Func loc task list assign to chg recd	Removes a functional location task list from a change record		X
Change Record : Change record lifecycle status	Get related to changerecordlifecyclestatus	X	
Change Record : Change record lifecycle status	Read all change record - lifecycle status with its lifecycle status text in the sy	X	
Change Record : Change record lifecycle status	Read a specific change record - change record attribute or field	X	
Change Record : Rate rtg task list assign to chg recd	Read the rate routing task list assigned to a change record	X	
Change Record : Rate rtg task list assign to chg recd	Assigns a rate routing task list to a change record		X
Change Record : Rate rtg task list assign to chg recd	Read all change record - rate routing task list assignments in the system	X	
Change Record : Rate rtg task list assign to chg recd	Assigns a rate routing task list to a change record		X
Change Record : Rate rtg task list assign to chg recd	Read a specific change record - rate routing task list assignment	X	
Change Record : Rate rtg task list assign to chg recd	Update a rate routing task list to a change record		X
Change Record : Rate rtg task list assign to chg recd	Removes a rate routing task list from a change record		X
Change Record : Characteristic assignments to change records	Read the characteristic assigned to a change record	X	
Change Record : Characteristic assignments to change records	Assigns a characteristic to a change record		X
Change Record : Characteristic assignments to change records	Read all change record - characteristic assignments in the system	X	
Change Record : Characteristic assignments to change records	Assigns a characteristic to a change record		X
Change Record : Characteristic assignments to change records	Read a specific change record - characteristic assignment	X	
Change Record : Characteristic assignments to change records	Update a characteristic to a change record		X
Change Record : Characteristic assignments to change records	Removes a characteristic from a change record		X
Change Record : Class assignments to change records	Read the class assigned to a change record	X	
Change Record : Class assignments to change records	Assigns a class to a change record		X
Change Record : Class assignments to change records	Read all change record - class assignments in the system	X	
Change Record : Class assignments to change records	Assigns a class to a change record		X
Change Record : Class assignments to change records	Read a specific change record - class assignment	X	
Change Record : Class assignments to change records	Update a class to a change record		X
Change Record : Class assignments to change records	Removes a class from a change record		X
Change Record : Equip task list assign to change records	Read the equipment task list assigned to a change record	X	
Change Record : Equip task list assign to change records	Assigns an equipment task list to a change record		X
Change Record : Equip task list assign to change records	Read all change record - equipment task list assignments in the system	X	
Change Record : Equip task list assign to change records	Assigns an equipment task list to a change record		X
Change Record : Equip task list assign to change records	Read a specific change record - equipment task list assignment	X	
Change Record : Equip task list assign to change records	Update an equipment task list to a change record		X
Change Record : Equip task list assign to change records	Removes an equipment task list from a change record		X
Change Record : Inspection plan assignments to change records	Read the inspection plans assigned to a change record	X	
Change Record : Inspection plan assignments to change records	Assigns an inspection plan to a change record		X
Change Record : Inspection plan assignments to change records	Read all change record - inspection plan assignments in the system	X	

Change Record : Inspection plan assignments to change records	Assigns an inspection plan to a change record		X
Change Record : Inspection plan assignments to change records	Read a specific change record - inspection plan assignment	X	
Change Record : Inspection plan assignments to change records	Update an inspection plan assignment to a change record		X
Change Record : Inspection plan assignments to change records	Removes an inspection plan assignment from a change record		X
Change Record : Label set assignments to change records	Read the label sets assigned to a change record	X	
Change Record : Label set assignments to change records	Assigns a label set to a change record		X
Change Record : Label set assignments to change records	Read all change record - label set assignments in the system	X	
Change Record : Label set assignments to change records	Assigns a label set to a change record		X
Change Record : Label set assignments to change records	Read a specific change record - label set assignment	X	
Change Record : Label set assignments to change records	Update a label set assignment to a change record		X
Change Record : Label set assignments to change records	Removes a label set assignment from a change record		X
Change Record : Master recipe assignments to change records	Read the master recipes assigned to a change record	X	
Change Record : Master recipe assignments to change records	Assigns a master recipe to a change record		X
Change Record : Master recipe assignments to change records	Read all change record - master recipe assignments in the system	X	
Change Record : Master recipe assignments to change records	Assigns a master recipe to a change record		X
Change Record : Master recipe assignments to change records	Read a specific change record - master recipe assignment	X	
Change Record : Master recipe assignments to change records	Update a master recipe assignment to a change record		X
Change Record : Master recipe assignments to change records	Removes a master recipe assignment from a change record		X
Change Record : Ref op set task list assign to chg recd	Read the reference operation set task list assigned to a change record	X	
Change Record : Ref op set task list assign to chg recd	Assigns a reference operation set task list to a change record		X
Change Record : Ref op set task list assign to chg recd	Read all change record - reference operation set task list assignments in the	X	
Change Record : Ref op set task list assign to chg recd	Assigns a reference operation set task list to a change record		X
Change Record : Ref op set task list assign to chg recd	Read a specific change record - reference operation set task list assignment	X	
Change Record : Ref op set task list assign to chg recd	Update a reference operation set task list to a change record		X
Change Record : Ref op set task list assign to chg recd	Removes a reference operation set task list from a change record		X
Change Record : Production routing assignments to change records	Read the production routing assigned to a change record	X	
Change Record : Production routing assignments to change records	Assigns a production routing to a change record		X
Change Record : Production routing assignments to change records	Read all change record - production routing assignments in the system	X	
Change Record : Production routing assignments to change records	Assigns a production routing assignments to a change record		X
Change Record : Production routing assignments to change records	Read a specific change record - production routing assignment	X	
Change Record : Production routing assignments to change records	Update a production routing assignments to a change record		X
Change Record : Production routing assignments to change records	Removes a production routing assignments from a change record		X
Change Record : Recipe assignments to change records	Read the recipes assigned to a change record	X	
Change Record : Recipe assignments to change records	Assigns a recipe to a change record		X
Change Record : Recipe assignments to change records	Read all change record - recipe assignments in the system	X	
Change Record : Recipe assignments to change records	Assigns a recipe to a change record		X
Change Record : Recipe assignments to change records	Read a specific change record - recipe assignment	X	
Change Record : Recipe assignments to change records	Update a recipe assignment to a change record		X
Change Record : Recipe assignments to change records	Removes a recipe assignment from a change record		X
Change Record : Specification assignments to change records	Read the specifications assigned to a change record	X	
Change Record : Specification assignments to change records	Assigns a specification to a change record		X
Change Record : Specification assignments to change records	Read all change record - specification assignments in the system	X	
Change Record : Specification assignments to change records	Assigns a specification to a change record		X
Change Record : Specification assignments to change records	Read a specific change record - specification assignment	X	
Change Record : Specification assignments to change records	Update a specification assignment to a change record		X
Change Record : Specification assignments to change records	Removes a specification assignment from a change record		X
Change Record : Standard bom assignment to change record	Read the standard BOM assigned to a change record	X	
Change Record : Standard bom assignment to change record	Assigns a standard BOM to a change record		X
Change Record : Standard bom assignment to change record	Read all change record - standard BOM assignments in the system	X	
Change Record : Standard bom assignment to change record	Assigns a standard BOM to a change record		X
Change Record : Standard bom assignment to change record	Read a specific change record - standard BOM assignment	X	
Change Record : Standard bom assignment to change record	Update a standard BOM to a change record		X
Change Record : Standard bom assignment to change record	Removes a standard BOM from a change record		X
Change Record : Shop floor routing template assignments to change reco	Read the shop floor routing templates assigned to a change record	X	
Change Record : Shop floor routing template assignments to change reco	Assigns a shop floor routing template to a change record		X
Change Record : Shop floor routing template assignments to change reco	Read all change record - shop floor routing template assignments in the sys	X	
Change Record : Shop floor routing template assignments to change reco	Assigns a shop floor routing template to a change record		X
Change Record : Shop floor routing template assignments to change reco	Read a specific change record - shop floor routing template assignment	X	
Change Record : Shop floor routing template assignments to change reco	Update a shop floor routing template assignment to a change record		X
Change Record : Shop floor routing template assignments to change reco	Removes a shop floor routing template assignment from a change record		X
Change Record : Variant bom assig to chg records	Read the variant BOM assigned to a change record	X	
Change Record : Variant bom assig to chg records	Assigns a variant BOM to a change record		X
Change Record : Variant bom assig to chg records	Read all change record - variant BOM assignments in the system	X	
Change Record : Variant bom assig to chg records	Assigns a variant BOM to a change record		X
Change Record : Variant bom assig to chg records	Read a specific change record - variant BOM assignment	X	
Change Record : Variant bom assig to chg records	Update a variant BOM to a change record		X
Change Record : Variant bom assig to chg records	Removes a variant BOM from a change record		X
Change Record : Related change record linkage	Read the related change records assigned to a change record	X	
Change Record : Related change record linkage	Assigns a related change record to a change record		X
Change Record : Related change record linkage	Read all change record - related change record assignments	X	
Change Record : Related change record linkage	Assigns a related change record to a change record		X
Change Record : Related change record linkage	Read a specific change record - related change record assignment	X	
Change Record : Related change record linkage	Update a related change record assignment to a change record		X
Change Record : Related change record linkage	Removes a related change record assignment from a change record		X
Change Record : Change record user status	Get related to changerecorduserstatus	X	
Change Record : Change record user status	Read all change record - user status with its user status text in the system	X	
Change Record : Change record user status	Read a specific change record - change record attribute or field	X	

Change Record : Change record EPD collaboration	Read the collaboration assigned to a change record	X	
Change Record : Change record EPD collaboration	Assigns a collaboration to a change record		X
Change Record : Change record EPD collaboration	Read all change record - collaboration assignments in the system	X	
Change Record : Change record EPD collaboration	Assigns a collaboration to a change record		X
Change Record : Change record EPD collaboration	Read a specific change record - collaboration assignment	X	
Change Record : Change record EPD collaboration	Removes a collaboration from a change record		X
Change Record : Equipment BOM assign to change records	Read the euipment BOM assigned to a change record	X	
Change Record : Equipment BOM assign to change records	Assigns an euipment BOM to a change record		X
Change Record : Equipment BOM assign to change records	Read all change record - euipment BOM assignments in the system	X	
Change Record : Equipment BOM assign to change records	Assigns an euipment BOM to a change record		X
Change Record : Equipment BOM assign to change records	Read a specific change record - euipment BOM assignment	X	
Change Record : Equipment BOM assign to change records	Update an euipment BOM to a change record		X
Change Record : Equipment BOM assign to change records	Removes an euipment BOM from a change record		X
Change Record : Functional location BOM assign to change records	Read the functional location BOM assigned to a change record	X	
Change Record : Functional location BOM assign to change records	Assigns functional location BOM to a change record		X
Change Record : Functional location BOM assign to change records	Read all change record - functional location BOM assignments in the system	X	
Change Record : Functional location BOM assign to change records	Assigns a functional location BOM to a change record		X
Change Record : Functional location BOM assign to change records	Read a specific change record - functional location BOM assignment	X	
Change Record : Functional location BOM assign to change records	Update a functional location BOM to a change record		X
Change Record : Functional location BOM assign to change records	Removes a functional location BOM from a change record		X
Change Record : Cut planning profile task list to change record	Read the cut planning profile task list assigned to a change record	X	
Change Record : Cut planning profile task list to change record	Assigns a cut planning profile task list to a change record		X
Change Record : Cut planning profile task list to change record	Read all change record - cut planning profile task list assignments in the sys	X	
Change Record : Cut planning profile task list to change record	Assigns a cut planning profile task list to a change record		X
Change Record : Cut planning profile task list to change record	Read a specific change record - cut planning profile task list assignment	X	
Change Record : Cut planning profile task list to change record	Update a cut planning profile task list to a change record		X
Change Record : Cut planning profile task list to change record	Removes a cut planning profile task list from a change record		X
Change Record : Change record ref engineering bom	Read the engineering BOM assigned to a change record	X	
Change Record : Change record ref engineering bom	Assigns an engineering BOM to a change record		X
Change Record : Change record ref engineering bom	Read all change record - engineering BOM assignments in the system	X	
Change Record : Change record ref engineering bom	Assigns an engineering BOM to a change record		X
Change Record : Change record ref engineering bom	Read a specific change record - engineering BOM assignment	X	
Change Record : Change record ref engineering bom	Update an engineering BOM to a change record		X
Change Record : Change record ref engineering bom	Removes an engineering BOM from a change record		X
Change Record : Maint task list assign to change records	Read the maintenance task list assigned to a change record	X	
Change Record : Maint task list assign to change records	Assigns a maintenance task list to a change record		X
Change Record : Maint task list assign to change records	Read all change record - maintenance task list assignments in the system	X	
Change Record : Maint task list assign to change records	Assigns a maintenance task list to a change record		X
Change Record : Maint task list assign to change records	Read a specific change record - maintenance task list assignment	X	
Change Record : Maint task list assign to change records	Update a maintenance task list to a change record		X
Change Record : Maint task list assign to change records	Removes a maintenance task list from a change record		X
Change Record : Change record ref manufacturing BOM	Read the manufacturing BOM assigned to a change record	X	
Change Record : Change record ref manufacturing BOM	Assigns a manufacturing BOM to a change record		X
Change Record : Change record ref manufacturing BOM	Read all change record - manufacturing BOM assignments in the system	X	
Change Record : Change record ref manufacturing BOM	Assigns a manufacturing BOM to a change record		X
Change Record : Change record ref manufacturing BOM	Read a specific change record - manufacturing BOM assignment	X	
Change Record : Change record ref manufacturing BOM	Update a manufacturing BOM to a change record		X
Change Record : Change record ref manufacturing BOM	Removes a manufacturing BOM from a change record		X
Change Record : Change record ref planning scope	Read the planning scope assigned to a change record	X	
Change Record : Change record ref planning scope	Assigns a planning scope to a change record		X
Change Record : Change record ref planning scope	Read all change record - planning scope assignments in the system	X	
Change Record : Change record ref planning scope	Assigns a planning scope to a change record		X
Change Record : Change record ref planning scope	Read a specific change record - planning scope assignment	X	
Change Record : Change record ref planning scope	Update a planning scope to a change record		X
Change Record : Change record ref planning scope	Removes a planning scope from a change record		X
Change Record : Reference rate routing task list assign to change record	Read the reference rate routing task list assigned to a change record	X	
Change Record : Reference rate routing task list assign to change record	Assigns a reference rate routing task list to a change record		X
Change Record : Reference rate routing task list assign to change record	Read all change record - reference rate routing task list assignments in the s	X	
Change Record : Reference rate routing task list assign to change record	Assigns a reference rate routing task list to a change record		X
Change Record : Reference rate routing task list assign to change record	Read a specific change record - reference rate routing task list assignment	X	
Change Record : Reference rate routing task list assign to change record	Update a reference rate routing task list to a change record		X
Change Record : Reference rate routing task list assign to change record	Removes a reference rate routing task list from a change record		X
Change Record : WBS BOM assign to change records	Read the WBS element BOM assigned to a change record	X	
Change Record : WBS BOM assign to change records	Assigns a WBS element BOM to a change record		X
Change Record : WBS BOM assign to change records	Read all change record - WBS element BOM assignments in the system	X	
Change Record : WBS BOM assign to change records	Assigns a WBS BOM to a change record		X
Change Record : WBS BOM assign to change records	Read a specific change record - WBS element BOM assignment	X	
Change Record : WBS BOM assign to change records	Update a WBS BOM to a change record		X
Change Record : WBS BOM assign to change records	Removes a WBS BOM from a change record		X
Change Record : BOM item assignments to change records	Read the BOM items assigned to a change record	X	
Change Record : BOM item assignments to change records	Assigns a BOM item to a change record		X
Change Record : BOM item assignments to change records	Read all change record - BOM item assignments	X	
Change Record : BOM item assignments to change records	Assigns a BOM item to a change record		X
Change Record : BOM item assignments to change records	Read a specific change record - BOM item assignment	X	
Change Record : BOM item assignments to change records	Update a BOM item assignment to a change record		X
Change Record : BOM item assignments to change records	Removes a BOM item assignment from a change record		X
Change Record : BOM assignments to change records	Read the bills of material assigned to a change record	X	

Change Record : BOM assignments to change records	Assigns a bill of material to a change record		X
Change Record : BOM assignments to change records	Read all change record - bill of material assignments	X	
Change Record : BOM assignments to change records	Assigns a bill of material to a change record		X
Change Record : BOM assignments to change records	Read a specific change record - bill of material assignment	X	
Change Record : BOM assignments to change records	Update a bill of material assignment to a change record		X
Change Record : BOM assignments to change records	Removes a bill of material assignment from a change record		X
Change Record : Document assignments to change records	Read the document info records assigned to a change record	X	
Change Record : Document assignments to change records	Assigns a document info record to a change record		X
Change Record : Document assignments to change records	Read all change record - document info record assignments	X	
Change Record : Document assignments to change records	Assigns a document info record to a change record		X
Change Record : Document assignments to change records	Read a specific change record - document info record assignment	X	
Change Record : Document assignments to change records	Update a document info record assignment to a change record		X
Change Record : Document assignments to change records	Removes a document info record assignment from a change record		X
Change Record : Material assignments to change records	Read the materials assigned to a change record	X	
Change Record : Material assignments to change records	Assigns a material to a change record		X
Change Record : Material assignments to change records	Read all change record - material assignments	X	
Change Record : Material assignments to change records	Assigns a material to a change record		X
Change Record : Material assignments to change records	Read a specific change record - material assignment	X	
Change Record : Material assignments to change records	Update a document info record assignment to a change record		X
Change Record : Material assignments to change records	Removes a material assignment from a change record		X
Change Record : Product structure variant assignments to change records	Read the product structure variants assigned to a change record	X	
Change Record : Product structure variant assignments to change records	Assigns a product structure variant to a change record		X
Change Record : Product structure variant assignments to change records	Read all change record - product structure variant assignments in the syster	X	
Change Record : Product structure variant assignments to change records	Assigns a product structure variant to a change record		X
Change Record : Product structure variant assignments to change records	Read a specific change record - product structure variant assignment	X	
Change Record : Product structure variant assignments to change records	Update a product structure variant assignment to a change record		X
Change Record : Product structure variant assignments to change records	Removes a product structure variant assignment from a change record		X
Change Record : Change record lifecycle status text	Get related to changerecdlifecyclestatustext	X	
Change Record : Change record lifecycle status text	Read all change record - lifecycle status with its lifecycle status text in the sy	X	
Change Record : Change record lifecycle status text	Read a specific change record - change record attribute or field	X	
Change Record : Change record user status text	Get entities from related to text	X	
Change Record : Change record user status text	Read all change record - user status with its user status text in the system	X	
Change Record : Change record user status text	Read a specific change record - change record attribute or field	X	
Change Record : Batch requests	Send a group of requests		X
External Events - Read Create (A2X) : External events	Get entities from a bhvrlinsgtsexternalevent	X

Budget Period Hierarchy : Budget period hierarchy node text	Get entity from budgetperiodhierarchy node text by key	X	
Budget Period Hierarchy : Batch requests	Send a group of requests		X
Solution Quotation (A2X) : Price element of billing request line	Get entities from a bsqitmblgreqitmprcelm	X	
Solution Quotation (A2X) : Price element of billing request line	Get entity from a bsqitmblgreqitmprcelm by key	X	
Solution Quotation (A2X) : Solution quotation header	Get related to businesssolutionquotation	X	
Solution Quotation (A2X) : Solution quotation header	Retrieve all solution quotations	X	
Solution Quotation (A2X) : Solution quotation header	Create a solution quotation		X
Solution Quotation (A2X) : Solution quotation header	Retrieve the header data of a specific solution quotation	X	
Solution Quotation (A2X) : Solution quotation header	Update the header of a specific solution quotation		X
Solution Quotation (A2X) : Subscription related item	Get related to bussolnqtansubscrpnitem	X	
Solution Quotation (A2X) : Subscription related item	Retrieve all subscription related items for a specific solution quotation	X	
Solution Quotation (A2X) : Subscription related item	Create one or more subscription related items for a specific solution quotation		X
Solution Quotation (A2X) : Subscription related item	Retrieve the solution quotation header for a specific subscription related iten	X	
Solution Quotation (A2X) : Subscription related item	Retrieve all subscription related items	X	
Solution Quotation (A2X) : Subscription related item	Create one or more subscription related items for a specific solution quotation		X
Solution Quotation (A2X) : Subscription related item	Retrieve a specific subscription related item	X	
Solution Quotation (A2X) : Subscription related item	Update a specific subscription related item		X
Solution Quotation (A2X) : Subscription related item	Delete a specific subscription related item		X
Solution Quotation (A2X) : Item technical resource with slot	Get related to businesssolutionquotation	X	
Solution Quotation (A2X) : Item technical resource with slot	Retrieve technical resource data for a specific subscription related item	X	
Solution Quotation (A2X) : Item technical resource with slot	Add new entity to related to technicalresourcewithslot		X
Solution Quotation (A2X) : Item technical resource with slot	Retrieve all technical resource data with slot	X	
Solution Quotation (A2X) : Item technical resource with slot	Create technical resource data for a specific subscription related item		X
Solution Quotation (A2X) : Item technical resource with slot	Retrieve a specific technical resource	X	
Solution Quotation (A2X) : Item technical resource with slot	Update technical resource data for a specific subscription item		X
Solution Quotation (A2X) : Item technical resource with slot	Delete technical resource data for a specific subscription item		X
Solution Quotation (A2X) : Variant config structure node charc	Get entities from a bsqitmvarcnfndecharc	X	
Solution Quotation (A2X) : Variant config structure node charc	Get entity from a bsqitmvarcnfndecharc by key	X	
Solution Quotation (A2X) : Solution quotation bundle item	Get entities from related to bundleitem	X	
Solution Quotation (A2X) : Solution quotation bundle item	Add new entity to related to bundleitem		X
Solution Quotation (A2X) : Solution quotation bundle item	Get related to businesssolutionquotation	X	
Solution Quotation (A2X) : Solution quotation bundle item	Retrieve all mixed bundle items	X	
Solution Quotation (A2X) : Solution quotation bundle item	Create one or more mixed bundle items for a specific solution quotation		X
Solution Quotation (A2X) : Solution quotation bundle item	Retrieve a specific mixed bundle item	X	
Solution Quotation (A2X) : Solution quotation bundle item	Update a specific mixed bundle item		X
Solution Quotation (A2X) : Solution quotation bundle item	Delete a specific mixed bundle item		X
Solution Quotation (A2X) : Expense item	Retrieve all expense items for a specific solution quotation	X	
Solution Quotation (A2X) : Expense item	Create one or more expense items for a specific solution quotation		X
Solution Quotation (A2X) : Expense item	Retrieve the solution quotation header for a specific expense item	X	
Solution Quotation (A2X) : Expense item	Retrieve all expense items	X	
Solution Quotation (A2X) : Expense item	Create one or more expense items for a specific solution quotation		X
Solution Quotation (A2X) : Expense item	Retrieve a specific expense item	X	
Solution Quotation (A2X) : Expense item	Update a specific expense item		X
Solution Quotation (A2X) : Expense item	Delete a specific expense item		X
Solution Quotation (A2X) : Solution quotation qualification header details	Get entities from related to qualification	X	
Solution Quotation (A2X) : Solution quotation qualification header details	Add new entity to related to qualification		X
Solution Quotation (A2X) : Solution quotation qualification header details	Get related to businesssolutionquotation	X	
Solution Quotation (A2X) : Solution quotation qualification header details	Get entities from a bussolnqtanqualification	X	
Solution Quotation (A2X) : Solution quotation qualification header details	Add new entity to a bussolnqtanqualification		X
Solution Quotation (A2X) : Solution quotation qualification header details	Get entity from a bussolnqtanqualification by key	X	
Solution Quotation (A2X) : Solution quotation qualification header details	Update entity in a bussolnqtanqualification		X
Solution Quotation (A2X) : Solution quotation qualification header details	Delete entity from a bussolnqtanqualification		X
Solution Quotation (A2X) : Sales item	Retrieve all sales items for a specific solution quotation	X	
Solution Quotation (A2X) : Sales item	Create one or more sales items for a specific solution quotation		X
Solution Quotation (A2X) : Sales item	Retrieve the follow-up sales order item for a specific sales item	X	
Solution Quotation (A2X) : Sales item	Retrieve all sales items	X	
Solution Quotation (A2X) : Sales item	Create one or more sales items for a specific solution quotation		X
Solution Quotation (A2X) : Sales item	Retrieve a specific sales item	X	
Solution Quotation (A2X) : Sales item	Update a specific sales item		X

Solution Quotation (A2X) : Sales item	Delete a specific sales item		X
Solution Quotation (A2X) : Follow-up sales order	Retrieve follow-up sales orders for a specific solution quotation	X	
Solution Quotation (A2X) : Follow-up sales order	Retrieve the solution quotation header for a specific follow-up sales order	X	
Solution Quotation (A2X) : Follow-up sales order	Retrieve all follow-up sales orders	X	
Solution Quotation (A2X) : Follow-up sales order	Retrieve a specific follow-up sales order	X	
Solution Quotation (A2X) : Follow-up service contract	Retrieve follow-up service contracts for a specific solution quotation	X	
Solution Quotation (A2X) : Follow-up service contract	Retrieve the solution quotation header for a specific follow-up service contra	X	
Solution Quotation (A2X) : Follow-up service contract	Retrieve all follow-up service contracts	X	
Solution Quotation (A2X) : Follow-up service contract	Retrieve a specific follow-up service contract	X	
Solution Quotation (A2X) : Service contract item	Retrieve all service contract items for a specific solution quotation	X	
Solution Quotation (A2X) : Service contract item	Create one or more service contract items for a specific solution quotation		X
Solution Quotation (A2X) : Service contract item	Retrieve the solution quotation header for a specific service contract item	X	
Solution Quotation (A2X) : Service contract item	Retrieve all service contract items	X	
Solution Quotation (A2X) : Service contract item	Create one or more expense items for a specific solution quotation		X
Solution Quotation (A2X) : Service contract item	Retrieve a specific service contract item	X	
Solution Quotation (A2X) : Service contract item	Update a specific service contract item		X
Solution Quotation (A2X) : Service contract item	Delete a specific service contract item		X
Solution Quotation (A2X) : Service item	Retrieve all service items for a specific solution quotation	X	
Solution Quotation (A2X) : Service item	Create one or more service items for a specific solution quotation		X
Solution Quotation (A2X) : Service item	Retrieve the solution quotation header for a specific service item	X	
Solution Quotation (A2X) : Service item	Retrieve all service items	X	
Solution Quotation (A2X) : Service item	Create one or more service items for a specific solution quotation		X
Solution Quotation (A2X) : Service item	Retrieve a specific service item	X	
Solution Quotation (A2X) : Service item	Update a specific service item		X
Solution Quotation (A2X) : Service item	Delete a specific service item		X
Solution Quotation (A2X) : Follow-up service order	Retrieve follow-up service orders for a specific solution quotation	X	
Solution Quotation (A2X) : Follow-up service order	Retrieve the solution quotation header for a specific follow-up service order	X	
Solution Quotation (A2X) : Follow-up service order	Retrieve all follow-up service orders	X	
Solution Quotation (A2X) : Follow-up service order	Retrieve a specific follow-up service order	X	
Solution Quotation (A2X) : Service part item	Retrieve all service part items for a specific solution quotation	X	
Solution Quotation (A2X) : Service part item	Create one or more service part items for a specific solution quotation		X
Solution Quotation (A2X) : Service part item	Retrieve the solution quotation header for a specific service part item	X	
Solution Quotation (A2X) : Service part item	Retrieve all service part items	X	
Solution Quotation (A2X) : Service part item	Create one or more service part items for a specific solution quotation		X
Solution Quotation (A2X) : Service part item	Retrieve a specific service part item	X	
Solution Quotation (A2X) : Service part item	Update a specific service part item		X
Solution Quotation (A2X) : Service part item	Delete a specific service part item		X
Solution Quotation (A2X) : Follow-up subscription contract	Retrieve follow-up subscription contracts for a specific solution quotation	X	
Solution Quotation (A2X) : Follow-up subscription contract	Retrieve the solution quotation header for a specific follow-up subscription c	X	
Solution Quotation (A2X) : Follow-up subscription contract	Retrieve all follow-up subscription contracts	X	
Solution Quotation (A2X) : Follow-up subscription contract	Retrieve a specific follow-up subscription contract	X	
Solution Quotation (A2X) : Solution quotation header text	Retrieve all header texts for a specific solution quotation	X	
Solution Quotation (A2X) : Solution quotation header text	Create header text for a specific solution quotation		X
Solution Quotation (A2X) : Solution quotation header text	Retrieve the solution quotation header for a specific header text	X	
Solution Quotation (A2X) : Solution quotation header text	Retrieve all header texts	X	
Solution Quotation (A2X) : Solution quotation header text	Create one or more header texts for a specific solution quotation		X
Solution Quotation (A2X) : Solution quotation header text	Retrieve a specific header text	X	
Solution Quotation (A2X) : Solution quotation header text	Update a specific header text		X
Solution Quotation (A2X) : Solution quotation header text	Delete a specific header text		X
Solution Quotation (A2X) : Follow-up subscription contract item	Retrieve the solution quotation header for a specific follow-up subscription c	X	
Solution Quotation (A2X) : Follow-up subscription contract item	Retrieve the follow-up subscription contract item for a specific subscription r	X	
Solution Quotation (A2X) : Follow-up subscription contract item	Retrieve all follow-up subscription related items	X	
Solution Quotation (A2X) : Follow-up subscription contract item	Retrieve a specific follow-up subscription related item	X	
Solution Quotation (A2X) : Item object list	Retrieve the solution quotation header for a specific object list of a specific s	X	
Solution Quotation (A2X) : Item object list	Retrieve the object list for a specific service contract item	X	
Solution Quotation (A2X) : Item object list	Create object list for a specific service contract item		X
Solution Quotation (A2X) : Item object list	Retrieve all object list data	X	
Solution Quotation (A2X) : Item object list	Create object list for a specific service contract item		X
Solution Quotation (A2X) : Item object list	Retrieve a specific object list	X	
Solution Quotation (A2X) : Item object list	Update object list data for a specific service contract item		X
Solution Quotation (A2X) : Item object list	Delete object list data for a specific service contract item		X
Solution Quotation (A2X) : Solution quotation item configuration	Retrieve product configurations for a subscription related item	X	
Solution Quotation (A2X) : Solution quotation item configuration	Post operation is not supported for this entity		X
Solution Quotation (A2X) : Solution quotation item configuration	Get entities from related to configurations	X	
Solution Quotation (A2X) : Solution quotation item configuration	Add new entity to related to configurations		X
Solution Quotation (A2X) : Solution quotation item configuration	Retrieve product configurations for a sales item	X	
Solution Quotation (A2X) : Solution quotation item configuration	Post operation is not supported for this entity		X
Solution Quotation (A2X) : Solution quotation item configuration	Retrieve product configurations for a service contract item	X	
Solution Quotation (A2X) : Solution quotation item configuration	Post operation is not supported for this entity		X
Solution Quotation (A2X) : Solution quotation item configuration	Get entities from related to configurations	X	
Solution Quotation (A2X) : Solution quotation item configuration	Add new entity to related to configurations		X
Solution Quotation (A2X) : Solution quotation item configuration	Get entities from related to configurations	X	
Solution Quotation (A2X) : Solution quotation item configuration	Add new entity to related to configurations		X
Solution Quotation (A2X) : Solution quotation item configuration	Retrieve product configurations for a subscription related item, sales item, or	X	
Solution Quotation (A2X) : Solution quotation item configuration	Post operation is not supported for this entity		X
Solution Quotation (A2X) : Solution quotation item configuration	Retrieve product configurations for a subscription related item, sales item, or	X	
Solution Quotation (A2X) : Item price element	Retrieve the solution quotation header for a specific item price element	X	

Solution Quotation (A2X) : Item price element	Retrieve the price element for a specific subscription related item	X	
Solution Quotation (A2X) : Item price element	Create price element data for a specific subscription related item		X
Solution Quotation (A2X) : Item price element	Get entities from related to priceelement	X	
Solution Quotation (A2X) : Item price element	Add new entity to related to priceelement		X
Solution Quotation (A2X) : Item price element	Retrieve the price element for a specific expense item	X	
Solution Quotation (A2X) : Item price element	Create price element data for a specific expense item		X
Solution Quotation (A2X) : Item price element	Retrieve the price element for a specific sales item	X	
Solution Quotation (A2X) : Item price element	Create price element data for a specific sales item		X
Solution Quotation (A2X) : Item price element	Retrieve the price element for a specific service contract item	X	
Solution Quotation (A2X) : Item price element	Create price element data for a specific service contract item		X
Solution Quotation (A2X) : Item price element	Retrieve the price element for a specific service item	X	
Solution Quotation (A2X) : Item price element	Create price element data for a specific service item		X
Solution Quotation (A2X) : Item price element	Retrieve the price element for a specific service part item	X	
Solution Quotation (A2X) : Item price element	Create price element data for a specific service part item		X
Solution Quotation (A2X) : Item price element	Retrieve all item-level price element data	X	
Solution Quotation (A2X) : Item price element	Create price element data for a specific item		X
Solution Quotation (A2X) : Item price element	Retrieve specific price element data for a specific item	X	
Solution Quotation (A2X) : Item price element	Update specific price element data for a specific item		X
Solution Quotation (A2X) : Item price element	Delete specific price element data for a specific item		X
Solution Quotation (A2X) : Item reference object	Retrieve the solution quotation header for a specific item reference object	X	
Solution Quotation (A2X) : Item reference object	Get entities from related to referenceobject	X	
Solution Quotation (A2X) : Item reference object	Add new entity to related to referenceobject		X
Solution Quotation (A2X) : Item reference object	Retrieve the reference objects for a specific expense item	X	
Solution Quotation (A2X) : Item reference object	Create reference objects for a specific expense item		X
Solution Quotation (A2X) : Item reference object	Retrieve the reference objects for a specific service item	X	
Solution Quotation (A2X) : Item reference object	Create reference objects for a specific service item		X
Solution Quotation (A2X) : Item reference object	Retrieve the reference objects for a specific service part item	X	
Solution Quotation (A2X) : Item reference object	Create reference objects for a specific service part item		X
Solution Quotation (A2X) : Item reference object	Retrieve reference object data for all service items, expense items, and serv	X	
Solution Quotation (A2X) : Item reference object	Create reference objects for a specific service item, expense item, or service part item		X
Solution Quotation (A2X) : Item reference object	Retrieve specific reference object data	X	
Solution Quotation (A2X) : Item reference object	Update specific reference object data for a specific service item, expense item, or service par		X
Solution Quotation (A2X) : Item reference object	Delete specific reference object data for a specific service item, expense item, or service part		X
Solution Quotation (A2X) : Item text	Retrieve the solution quotation header for a specific item text	X	
Solution Quotation (A2X) : Item text	Retrieve the texts for a specific subscription related item	X	
Solution Quotation (A2X) : Item text	Create texts for a specific subscription related item		X
Solution Quotation (A2X) : Item text	Get entities from related to text	X	
Solution Quotation (A2X) : Item text	Add new entity to related to text		X
Solution Quotation (A2X) : Item text	Retrieve the texts for a specific expense item	X	
Solution Quotation (A2X) : Item text	Create texts for a specific expense item		X
Solution Quotation (A2X) : Item text	Retrieve the texts for a specific sales item	X	
Solution Quotation (A2X) : Item text	Create texts for a specific sales item		X
Solution Quotation (A2X) : Item text	Retrieve the texts for a specific service contract item	X	
Solution Quotation (A2X) : Item text	Create texts for a specific service contract item		X
Solution Quotation (A2X) : Item text	Retrieve the texts for a specific service item	X	
Solution Quotation (A2X) : Item text	Create texts for a specific service item		X
Solution Quotation (A2X) : Item text	Retrieve the texts for a specific service part item	X	
Solution Quotation (A2X) : Item text	Create texts for a specific service part item		X
Solution Quotation (A2X) : Item text	Retrieve all item-level texts	X	
Solution Quotation (A2X) : Item text	Create one or more item-level texts for a specific item		X
Solution Quotation (A2X) : Item text	Retrieve a specific item-level text	X	
Solution Quotation (A2X) : Item text	Update a specific item-level text		X
Solution Quotation (A2X) : Item text	Delete a specific item-level text		X
Solution Quotation (A2X) : Follow-up service order item	Retrieve the solution quotation header for a specific follow-up service order i	X	
Solution Quotation (A2X) : Follow-up service order item	Retrieve the follow-up service order item for a specific expense item	X	
Solution Quotation (A2X) : Follow-up service order item	Retrieve the follow-up service order item for a specific sales item	X	
Solution Quotation (A2X) : Follow-up service order item	Retrieve the follow-up service order item for a specific service item	X	
Solution Quotation (A2X) : Follow-up service order item	Retrieve the follow-up service order item for a specific service part item	X	
Solution Quotation (A2X) : Follow-up service order item	Retrieve all follow-up service order items	X	
Solution Quotation (A2X) : Follow-up service order item	Retrieve a specific follow-up service order item	X	
Solution Quotation (A2X) : Convergent charging date parameters	Retrieve convergent charging date parameters for a subscription related iten	X	
Solution Quotation (A2X) : Convergent charging date parameters	Create convergent charging date parameters for a subscription item		X
Solution Quotation (A2X) : Convergent charging date parameters	Retrieve convergent charging date parameters for a subscription item	X	
Solution Quotation (A2X) : Convergent charging date parameters	Create convergent charging date parameters for a subscription item		X
Solution Quotation (A2X) : Convergent charging date parameters	Retrieve convergent charging date parameters for a subscription item using	X	
Solution Quotation (A2X) : Convergent charging date parameters	Update convergent charging date parameter from a subscription item		X
Solution Quotation (A2X) : Convergent charging date parameters	Delete convergent charging date parameter from a subscription item		X
Solution Quotation (A2X) : Convergent charging numeric parameters	Retrieve convergent charging numeric parameters for a subscription related	X	
Solution Quotation (A2X) : Convergent charging numeric parameters	Create convergent charging numeric parameters for a subscription item		X
Solution Quotation (A2X) : Convergent charging numeric parameters	Retrieve convergent charging numeric parameters for a subscription item	X	
Solution Quotation (A2X) : Convergent charging numeric parameters	Create convergent charging numeric parameters for a subscription item		X
Solution Quotation (A2X) : Convergent charging numeric parameters	Retrieve convergent charging numeric parameters for a subscription item us	X	
Solution Quotation (A2X) : Convergent charging numeric parameters	Update convergent charging numeric parameter from a subscription item		X
Solution Quotation (A2X) : Convergent charging numeric parameters	Delete convergent charging numeric parameter from a subscription item		X
Solution Quotation (A2X) : Solution quotation qualification item details	Get related to businesssolutionquotation	X	
Solution Quotation (A2X) : Solution quotation qualification item details	Get entities from related to qualification	X	
Solution Quotation (A2X) : Solution quotation qualification item details	Add new entity to related to qualification		X

Solution Quotation (A2X) : Solution quotation qualification item details	Get entities from a bussolnqtanitemqualification	X	
Solution Quotation (A2X) : Solution quotation qualification item details	Add new entity to a bussolnqtanitemqualification		X
Solution Quotation (A2X) : Solution quotation qualification item details	Get entity from a bussolnqtanitemqualification by key	X	
Solution Quotation (A2X) : Solution quotation qualification item details	Update entity in a bussolnqtanitemqualification		X
Solution Quotation (A2X) : Solution quotation qualification item details	Delete entity from a bussolnqtanitemqualification		X
Solution Quotation (A2X) : Convergent charging string parameters	Retrieve convergent charging string parameters for a subscription related ite	X	
Solution Quotation (A2X) : Convergent charging string parameters	Create convergent charging string parameters for a subscription item		X
Solution Quotation (A2X) : Convergent charging string parameters	Retrieve convergent charging string parameters for a subscription item	X	
Solution Quotation (A2X) : Convergent charging string parameters	Create convergent charging string parameters for a subscription item		X
Solution Quotation (A2X) : Convergent charging string parameters	Retrieve convergent charging string parameters for a subscription item using	X	
Solution Quotation (A2X) : Convergent charging string parameters	Update convergent charging string parameter from a subscription item		X
Solution Quotation (A2X) : Convergent charging string parameters	Delete convergent charging string parameter from a subscription item		X
Solution Quotation (A2X) : Convergent charging table parameters	Retrieve convergent charging table parameters for a subscription related ite	X	
Solution Quotation (A2X) : Convergent charging table parameters	Create convergent charging table parameters for a subscription item		X
Solution Quotation (A2X) : Convergent charging table parameters	Retrieve convergent charging table parameters for a subscription item	X	
Solution Quotation (A2X) : Convergent charging table parameters	Create convergent charging table parameters for a subscription item		X
Solution Quotation (A2X) : Convergent charging table parameters	Retrieve convergent charging table parameters for a subscription item using	X	
Solution Quotation (A2X) : Convergent charging table parameters	Update convergent charging table parameter from a subscription item		X
Solution Quotation (A2X) : Convergent charging table parameters	Delete convergent charging table parameter from a subscription item		X
Solution Quotation (A2X) : Item technical resource	Retrieve the solution quotation header for a specific technical resource of a s	X	
Solution Quotation (A2X) : Item technical resource	Retrieve technical resource data for a specific subscription related item	X	
Solution Quotation (A2X) : Item technical resource	Create technical resource data for a specific subscription related item		X
Solution Quotation (A2X) : Item technical resource	Retrieve all technical resource data	X	
Solution Quotation (A2X) : Item technical resource	Create technical resource data for a specific subscription related item		X
Solution Quotation (A2X) : Item technical resource	Retrieve a specific technical resource	X	
Solution Quotation (A2X) : Item technical resource	Update technical resource data for a specific subscription item		X
Solution Quotation (A2X) : Item technical resource	Delete technical resource data for a specific subscription item		X
Solution Quotation (A2X) : Billing request item of business solution quotati	Get entities from related to bussolnqtanitmblgreqitmprcelm	X	
Solution Quotation (A2X) : Billing request item of business solution quotati	Get related to businesssolutionquotation	X	
Solution Quotation (A2X) : Billing request item of business solution quotati	Get entities from related to billingrequestitem	X	
Solution Quotation (A2X) : Billing request item of business solution quotati	Get entities from a bussolnqtanitmbillgreqitem	X	
Solution Quotation (A2X) : Billing request item of business solution quotati	Get entity from a bussolnqtanitmbillgreqitem by key	X	
Solution Quotation (A2X) : Follow-up sales order item	Retrieve the solution quotation header for a specific follow-up sales order ite	X	
Solution Quotation (A2X) : Follow-up sales order item	Retrieve the follow-up sales order item for a specific sales item	X	
Solution Quotation (A2X) : Follow-up sales order item	Retrieve all follow-up sales order items	X	
Solution Quotation (A2X) : Follow-up sales order item	Retrieve a specific follow-up sales order item	X	
Solution Quotation (A2X) : Follow-up service contract item	Retrieve the solution quotation header for a specific follow-up service contra	X	
Solution Quotation (A2X) : Follow-up service contract item	Retrieve the follow-up service contract item for a specific service contract ite	X	
Solution Quotation (A2X) : Follow-up service contract item	Retrieve all follow-up service contract items	X	
Solution Quotation (A2X) : Follow-up service contract item	Retrieve a specific follow-up service contract item	X	
Solution Quotation (A2X) : Variant config structure node	Get entities from related to characteristicvaluation	X	
Solution Quotation (A2X) : Variant config structure node	Get entities from related to varconfignstructurenode	X	
Solution Quotation (A2X) : Variant config structure node	Get entities from a bussolnqtanitmvarcnfstrucnde	X	
Solution Quotation (A2X) : Variant config structure node	Get entity from a bussolnqtanitmvarcnfstrucnde by key	X	
Solution Quotation (A2X) : Item product list	Retrieve the solution quotation header for a specific product list of a specific	X	
Solution Quotation (A2X) : Item product list	Retrieve the product list for a specific service contract item	X	
Solution Quotation (A2X) : Item product list	Create product list data for a specific service contract item		X
Solution Quotation (A2X) : Item product list	Retrieve product lists for all service contract items	X	
Solution Quotation (A2X) : Item product list	Create product list data for a specific service contract item		X
Solution Quotation (A2X) : Item product list	Retrieve a specific product list for a specific service contract item	X	
Solution Quotation (A2X) : Item product list	Update a specific product list for a specific service contract item		X
Solution Quotation (A2X) : Item product list	Delete a specific product list for a specific service contract item		X
Solution Quotation (A2X) : Service operations	Invoke action deletenotprocessedchangeitems		X
Solution Quotation (A2X) : Service operations	Invoke action accept		X
Solution Quotation (A2X) : Service operations	Invoke action processchangequotation		X
Solution Quotation (A2X) : Batch requests	Send a group of requests		X
Financial Planning Entry Item - Read : Company code data	Read the items of all company codes	X	
Financial Planning Entry Item - Read : Company code data	Read a company code by key	X	
Financial Planning Entry Item - Read : Cost center data	Read the items of all cost centers	X	
Financial Planning Entry Item - Read : Cost center data	Read a cost center by key	X	
Financial Planning Entry Item - Read : Financial planning entry item fix var	Get entities from a finplanentryitemvariablefix	X	
Financial Planning Entry Item - Read : Financial planning entry item fix var	Get entity from a finplanentryitemvariablefix by key	X	
Financial Planning Entry Item - Read : Financial planning entry item	Read the company code data of a specific financial planning item	X	
Financial Planning Entry Item - Read : Financial planning entry item	Read the current cost center data of a specific financial planning item	X	
Financial Planning Entry Item - Read : Financial planning entry item	Read financial planning entry items	X	
Financial Planning Entry Item - Read : Financial planning entry item	Read a financial planning entry item by key	X	
Financial Planning Entry Item - Read : Profit center data	Read the current profit center data of a specific financial planning item	X	
Financial Planning Entry Item - Read : Profit center data	Read the items of all profit centers	X	
Financial Planning Entry Item - Read : Profit center data	Read a profit center by key	X	
Financial Planning Entry Item - Read : General ledger account in chart of a	Read the chart of accounts data of a specific financial planning item	X	
Financial Planning Entry Item - Read : General ledger account in chart of a	Read the items of all chart of accounts	X	
Financial Planning Entry Item - Read : General ledger account in chart of a	Read a chart of account by key	X	
Segmentation Structure and Strategy Maintenance : Atp pool segment and	Get entities from atppoolsegmentandchecklevel	X	
Segmentation Structure and Strategy Maintenance : Atp pool segment and	Add new entity to atppoolsegmentandchecklevel		X
Segmentation Structure and Strategy Maintenance : Atp pool segment and	Get entity from atppoolsegmentandchecklevel by key	X	
Segmentation Structure and Strategy Maintenance : Atp pool segment and	Update entity in atppoolsegmentandchecklevel		X
Segmentation Structure and Strategy Maintenance : Atp pool segment and	Delete entity from atppoolsegmentandchecklevel		X

Segmentation Structure and Strategy Maintenance : Segmentation structu	Get related to segmentationstructuretp	X	
Segmentation Structure and Strategy Maintenance : Segmentation structu	Get entities from segmentationstructure	X	
Segmentation Structure and Strategy Maintenance : Segmentation structu	Add new entity to segmentationstructure		X
Segmentation Structure and Strategy Maintenance : Segmentation structu	Get entity from segmentationstructure by key	X	
Segmentation Structure and Strategy Maintenance : Segmentation structu	Update entity in segmentationstructure		X
Segmentation Structure and Strategy Maintenance : Segmentation structu	Delete entity from segmentationstructure		X
Segmentation Structure and Strategy Maintenance : Segmentation strateg	Get related to segmentationstrategytp	X	
Segmentation Structure and Strategy Maintenance : Segmentation strateg	Get entities from related to atprqmttostksegmtnalloctp	X	
Segmentation Structure and Strategy Maintenance : Segmentation strateg	Add new entity to related to atprqmttostksegmtnalloctp		X
Segmentation Structure and Strategy Maintenance : Segmentation strateg	Get related to segmentationstructuretp	X

Utilities Product Integration Layer : IS-U product	Get the usage charge associated to an internally represented utilities produc	X	
Utilities Product Integration Layer : IS-U product	Post usage charges to associated with internally represented utilities product		X
Utilities Product Integration Layer : IS-U product	Get internally represented utilities products	X	
Utilities Product Integration Layer : IS-U product	Get an internally represented utilities product	X	
Utilities Product Integration Layer : Billing attributes for reference utilities p	Get the value helps of billing attributes associated with a utilities reference p	X	
Utilities Product Integration Layer : Billing attributes for reference utilities p	Get the value helps of billing attribute	X	
Utilities Product Integration Layer : Billing attributes for reference utilities p	Get the value help of a billing attribute	X	
Utilities Product Integration Layer : Discount for reference utilities product	Get the value helps of discounts associated with a utilities reference product	X	
Utilities Product Integration Layer : Discount for reference utilities product	Get value helps of utilities discounts	X	
Utilities Product Integration Layer : Discount for reference utilities product	Get value helps of utilities discounts	X	
Utilities Product Integration Layer : One time charge for reference utilities p	Get the value helps of one-time charges associated with a utilities reference	X	
Utilities Product Integration Layer : One time charge for reference utilities p	Get value helps of one-time charges	X	
Utilities Product Integration Layer : One time charge for reference utilities p	Get the value help of a one-time charge	X	
Utilities Product Integration Layer : Recurring charge for reference utilities	Get the value helps of recurring charges associated with a utilities reference	X	
Utilities Product Integration Layer : Recurring charge for reference utilities	Get value helps of recurring charges	X	
Utilities Product Integration Layer : Recurring charge for reference utilities	Get the value help of a recurring charge	X	
Utilities Product Integration Layer : Sales attributes for reference utilities pr	Get the value helps associated with a utilities reference product	X	
Utilities Product Integration Layer : Sales attributes for reference utilities pr	Get value helps of sales attributes	X	
Utilities Product Integration Layer : Sales attributes for reference utilities pr	Get the value help of a sales attribute	X	
Utilities Product Integration Layer : Utilities product standard characteristic	Get the standard attributes associated with a utilities reference product	X	
Utilities Product Integration Layer : Utilities product standard characteristic	Get characteristic values of standard attributes	X	
Utilities Product Integration Layer : Utilities product standard characteristic	Get the characteristic values of a standard attribute	X	
Utilities Product Integration Layer : Standard attribute names and characte	Get the value helps of standard attributes associated with a utilities referenc	X	
Utilities Product Integration Layer : Standard attribute names and characte	Get names and characteristics of standard attributes	X	
Utilities Product Integration Layer : Standard attribute names and characte	Get the name and characteristic of a standard attribute	X	
Utilities Product Integration Layer : Usage charge for reference utilities pro	Get the value helps of usage charges associated with a utilities reference pr	X	
Utilities Product Integration Layer : Usage charge for reference utilities pro	Get value helps of usage charge of utilities reference products	X	
Utilities Product Integration Layer : Usage charge for reference utilities pro	Get the value help of a usage charge of a utilities reference product	X	
Utilities Product Integration Layer : Currency	Get the currency associated with a utilities product discount	X	
Utilities Product Integration Layer : Currency	Get currencies	X	
Utilities Product Integration Layer : Currency	Get a currency	X	
Utilities Product Integration Layer : Product group text	Get the text associated with a product group	X	
Utilities Product Integration Layer : Product group text	Get product group texts	X	
Utilities Product Integration Layer : Product group text	Get a product group texts	X	
Utilities Product Integration Layer : Product standard search help	Get value helps of standard attributes	X	
Utilities Product Integration Layer : Product standard search help	Get the value help of a standard attributes	X	
Utilities Product Integration Layer : Product type code	Get the product type code associated with a product type	X	
Utilities Product Integration Layer : Product type code	Get product type codes	X	
Utilities Product Integration Layer : Product type code	Get a product type code	X	
Utilities Product Integration Layer : Product type code text	Get the text associated with a product type code	X	
Utilities Product Integration Layer : Product type code text	Get texts of product type codes	X	
Utilities Product Integration Layer : Product type code text	Get a text of a product type code	X	
Utilities Product Integration Layer : Product value help	Get product value helps	X	
Utilities Product Integration Layer : Product value help	Get a product value help	X	
Utilities Product Integration Layer : Unit of measure	Get the unit of measurement associated with the usage charge of a utilities p	X	
Utilities Product Integration Layer : Unit of measure	Get units of measurement	X	
Utilities Product Integration Layer : Unit of measure	Get a unit of measurement	X	
Utilities Product Integration Layer : Utilities price	Get the price associated with a recurring charge	X	
Utilities Product Integration Layer : Utilities price	Get the price associated with a usage charge	X	
Utilities Product Integration Layer : Utilities price	Get the unit of measurement associated with a utilities price	X	
Utilities Product Integration Layer : Utilities price	Get utilities prices	X	
Utilities Product Integration Layer : Utilities price	Post utilities price keys		X
Utilities Product Integration Layer : Utilities price	Get a utilities price	X	
Utilities Product Integration Layer : Utilities price	Update a utilities price key		X
Utilities Product Integration Layer : Utilities price text	Get the price text associated with a utilities price	X	
Utilities Product Integration Layer : Utilities price text	Get utilities price texts	X	

Utilities Product Integration Layer : Utilities price text	Get a utilities price text	X	
Utilities Product Integration Layer : Utilities charge/price type value help	Get the charge tier type associated with a recurring charge	X	
Utilities Product Integration Layer : Utilities charge/price type value help	Get the charge tier type associated with a utilities price	X	
Utilities Product Integration Layer : Utilities charge/price type value help	Get value helps of charge tier types	X	
Utilities Product Integration Layer : Utilities charge/price type value help	Get the value help of a charge tier type	X	
Utilities Product Integration Layer : Utilities price category value help	Get the price category associated with a utilities price	X	
Utilities Product Integration Layer : Utilities price category value help	Get value helps of utilities price categories	X	
Utilities Product Integration Layer : Utilities price category value help	Get the value help of a utilities price category	X	
Utilities Product Integration Layer : Utilities time category value help	Get the price frequency unit associated with a recurring charge	X	
Utilities Product Integration Layer : Utilities time category value help	Get the price frequency unit associated with a utilities price	X	
Utilities Product Integration Layer : Utilities time category value help	Get value helps of utilities time categories	X	
Utilities Product Integration Layer : Utilities time category value help	Get the value help of a utilities time category	X	
Utilities Product Integration Layer : Utilities price blocks/items history	Get the price item history associated with a utilities price	X	
Utilities Product Integration Layer : Utilities price blocks/items history	Post price item histories to an existing utilities price key		X
Utilities Product Integration Layer : Utilities price blocks/items history	Get price item histories	X	
Utilities Product Integration Layer : Utilities price blocks/items history	Post price item histories to existing price item histories		X
Utilities Product Integration Layer : Utilities price blocks/items history	Get a price item history	X	
Utilities Product Integration Layer : Utilities price blocks/items history	Update a price item history		X
Utilities Product Integration Layer : Utilities price origin value help	Get the price origin associated with a utilities price	X	
Utilities Product Integration Layer : Utilities price origin value help	Get value helps of price origins	X	
Utilities Product Integration Layer : Utilities price origin value help	Get the value help of a price origin	X	
Utilities Product Integration Layer : Value help for characteristics	Get the value help values associated with the value help of a billing attribute	X	
Utilities Product Integration Layer : Value help for characteristics	Get the value help values associated with the value help of a one-time charg	X	
Utilities Product Integration Layer : Value help for characteristics	Get the value help values associated with the value help of a sales attribute	X	
Utilities Product Integration Layer : Value help for characteristics	Get value helps of attribute values	X	
Utilities Product Integration Layer : Value help for characteristics	Get the value help of an attribute value	X	
Utilities Product Integration Layer : Utilities billing operand	Get the billing operands associated with the value help of an attribute value	X	
Utilities Product Integration Layer : Utilities billing operand	Get billing operands	X	
Utilities Product Integration Layer : Utilities billing operand	Get a billing operand	X	
Utilities Product Integration Layer : Utilities billing simulation run	Get entities from I utilsbillgsimlnrun	X	
Utilities Product Integration Layer : Utilities billing simulation run	Get entity from I utilsbillgsimlnrun by key	X	
Utilities Product Integration Layer : Utils billg simln run confign attributes	Get entities from related to utilsbillgsimattribute	X	
Utilities Product Integration Layer : Utils billg simln run confign attributes	Get entities from I utilsbillgsimlnrunattrib	X	
Utilities Product Integration Layer : Utils billg simln run confign attributes	Get entity from I utilsbillgsimlnrunattrib by key	X	
Utilities Product Integration Layer : Utils billg simln run resulting items	Get entities from related to utilsbillgsimresultingitem	X	
Utilities Product Integration Layer : Utils billg simln run resulting items	Get entities from I utilsbillgsimlnrunrsltitm	X	
Utilities Product Integration Layer : Utils billg simln run resulting items	Get entity from I utilsbillgsimlnrunrsltitm by key	X	
Utilities Product Integration Layer : Utilities discount	Get the billing class text associated with a utilities discount	X	
Utilities Product Integration Layer : Utilities discount	Get the discount associated with a utilities product discount	X	
Utilities Product Integration Layer : Utilities discount	Get the division associated with a utilities discount	X	
Utilities Product Integration Layer : Utilities discount	Get the unit of measurement associated with a utilities discount	X	
Utilities Product Integration Layer : Utilities discount	Get the price frequency unit associated with a utilities price	X	
Utilities Product Integration Layer : Utilities discount	Get utilities discounts	X	
Utilities Product Integration Layer : Utilities discount	Post utilities discount keys		X
Utilities Product Integration Layer : Utilities discount	Get a utilities discount	X	
Utilities Product Integration Layer : Utilities discount	Update a utilities discount key		X
Utilities Product Integration Layer : Utilities discount category	Get the discount category associated with a utilities product discount	X	
Utilities Product Integration Layer : Utilities discount category	Get the discount category associated with a utilities discount	X	
Utilities Product Integration Layer : Utilities discount category	Get value helps of utilities discount categories	X	
Utilities Product Integration Layer : Utilities discount category	Get the value help of a utilities discount category	X	
Utilities Product Integration Layer : Utilities discount item	Get the discount item associated with a utilities discount	X	
Utilities Product Integration Layer : Utilities discount item	Post discount item histories to an existing utilities discount key		X
Utilities Product Integration Layer : Utilities discount item	Get utilities discount items	X	
Utilities Product Integration Layer : Utilities discount item	Post discount item histories to existing utilities discount keys		X
Utilities Product Integration Layer : Utilities discount item	Get a utilities discount item	X	
Utilities Product Integration Layer : Utilities discount item	Update a discount item history		X
Utilities Product Integration Layer : Utilities discount text	Get the discount text associated with a utilities discount	X	
Utilities Product Integration Layer : Utilities discount text	Get utilities discount texts	X	
Utilities Product Integration Layer : Utilities discount text	Get a utilities discount text	X	
Utilities Product Integration Layer : Utilities discount type	Get the discount type associated with a utilities product discount	X	
Utilities Product Integration Layer : Utilities discount type	Get the discount type associated with a utilities discount	X	
Utilities Product Integration Layer : Utilities discount type	Get value helps of utilities discount types	X	
Utilities Product Integration Layer : Utilities discount type	Get the value help of a utilities discount type	X	
Utilities Product Integration Layer : Utility discount reference base VH	Get the reference base of a utilities discount	X	
Utilities Product Integration Layer : Utility discount reference base VH	Get value helps of reference bases	X	
Utilities Product Integration Layer : Utility discount reference base VH	Get the value help of a reference base	X	
Utilities Product Integration Layer : Utilities price blocks/items	Get the price item associated with a recurring charge	X	
Utilities Product Integration Layer : Utilities price blocks/items	Get the price items associated with a usage charge	X	
Utilities Product Integration Layer : Utilities price blocks/items	Get the unit of measurement associated with a utilities price item	X	
Utilities Product Integration Layer : Utilities price blocks/items	Get the tier type of a utilities charge associated with a utilities price itemm	X	
Utilities Product Integration Layer : Utilities price blocks/items	Get the frequency unit associated with a utilities price item	X	
Utilities Product Integration Layer : Utilities price blocks/items	Get utilities price items	X	
Utilities Product Integration Layer : Utilities price blocks/items	Get a utilities price item	X	
Utilities Product Integration Layer : Reference product for utilities product	Get utilities reference products	X	
Utilities Product Integration Layer : Reference product for utilities product	Get a utilities reference product	X	
Utilities Product Integration Layer : Service operations	Simulate bill	X	
Utilities Product Integration Layer : Service operations	Post a product reset		X

Utilities Product Integration Layer : Batch requests	Send a group of requests		X
Consolidation Group Journal Entry for Reporting Rule : Transactional data	Get entities from related results	X	
Consolidation Group Journal Entry for Reporting Rule : Batch requests	Send a group of requests		X

Subscription Contract - Read : Service operations	Invoke function getactvsrvctransacchgprocgroup	X	
Subscription Contract - Read : Batch requests	Send a group of requests		X
Request for Quotation : Request for quotation	Get the header details of all the requests for quotations in the system	X	
Request for Quotation : Request for quotation	Create a header of a new rfq with the details passed in the request body		X
Request for Quotation : Request for quotation	Get the header details of an rfq	X	
Request for Quotation : Request for quotation	Update the header details of an rfq		X
Request for Quotation : Request for quotation	Deletes an rfq.		X
Request for Quotation : Bidder	Get the bidder details of an rfq	X	
Request for Quotation : Bidder	Add bidder to an rfq		X
Request for Quotation : Bidder	Get all bidders from an rfqs	X	
Request for Quotation : Bidder	Add one or several bidders to an rfq		X
Request for Quotation : Bidder	Get the bidder details of an rfq by partner counter	X	
Request for Quotation : Bidder	Update the details of a bidder in an rfq		X
Request for Quotation : Bidder	Delete the bidder from the rfq		X
Request for Quotation : Item	Get the item details from an rfq	X	
Request for Quotation : Item	Add an item to an rfq		X
Request for Quotation : Item	Get the details of all items in all rfqs in the system	X	
Request for Quotation : Item	Add an item to an rfq		X
Request for Quotation : Item	Gets the item details of an rfq.	X	
Request for Quotation : Item	Update the item details of in an rfq		X
Request for Quotation : Item	Delete an item in an rfq		X
Request for Quotation : Service operations	Completes the bidding process		X
Request for Quotation : Service operations	Cancel the bidding process		X
Request for Quotation : Service operations	Submits rfq for approval		X
Request for Quotation : Batch requests	Send a group of requests		X
Cost Center - Read (A2X) : Cost center	Read all available cost centers	X	
Cost Center - Read (A2X) : Cost center	Read a specific cost center	X	
Cost Center - Read (A2X) : Cost center text	Read all language-dependent fields for a specific cost center	X	
Cost Center - Read (A2X) : Cost center text	Read cost center header fields for a specific language	X	
Cost Center - Read (A2X) : Cost center text	Read all language-dependent fields for all cost centers	X	
Cost Center - Read (A2X) : Cost center text	Read language-dependent fields of a cost center in a specific language	X	
Cost Center - Read (A2X) : Batch requests	Send a group of requests		X
Transaction Data for Group Reporting - Read : Transactional data for grou	Get entities from related results	X	
Transaction Data for Group Reporting - Read : Batch requests	Send a group of requests		X
Characteristic Data for Classification : Characteristic header data	List of characteristic header data	X	
Characteristic Data for Classification : Characteristic header data	Create a characteristic header data		X
Characteristic Data for Classification : Characteristic header data	Characteristic header data for a given key	X	
Characteristic Data for Classification : Characteristic header data	Update a characteristic header data		X
Characteristic Data for Classification : Characteristic header data	Delete a characteristic		X
Characteristic Data for Classification : Characteristic descriptions	Read the descriptions of a characteristic	X	
Characteristic Data for Classification : Characteristic descriptions	Create a description for a characteristic		X
Characteristic Data for Classification : Characteristic descriptions	List of characteristic descriptions	X	
Characteristic Data for Classification : Characteristic descriptions	Create a characteristic description		X
Characteristic Data for Classification : Characteristic descriptions	Characteristic description for a given key	X	
Characteristic Data for Classification : Characteristic descriptions	Update a characteristic description		X
Characteristic Data for Classification : Characteristic descriptions	Delete a characteristic description		X
Characteristic Data for Classification : Characteristic references	Read the references defined for a characteristic	X	
Characteristic Data for Classification : Characteristic references	Create a reference for a characteristic		X
Characteristic Data for Classification : Characteristic references	List of characteristic references	X	
Characteristic Data for Classification : Characteristic references	Create a characteristic reference		X
Characteristic Data for Classification : Characteristic references	Characteristic reference for a given key	X	
Characteristic Data for Classification : Characteristic references	Delete a characteristic reference		X
Characteristic Data for Classification : Characteristic restrictions	Read the restrictions defined for a characteristic	X	
Characteristic Data for Classification : Characteristic restrictions	Create a restriction for a characteristic		X
Characteristic Data for Classification : Characteristic restrictions	List of characteristic restrictions	X	
Characteristic Data for Classification : Characteristic restrictions	Create a characteristic restriction		X
Characteristic Data for Classification : Characteristic restrictions	Characteristic restriction for a given key	X	
Characteristic Data for Classification : Characteristic restrictions	Delete a characteristic restriction		X
Characteristic Data for Classification : Characteristic values	Read the values defined for a characteristic	X	
Characteristic Data for Classification : Characteristic values	Create a value for a characteristic		X
Characteristic Data for Classification : Characteristic values	List of characteristic values	X	
Characteristic Data for Classification : Characteristic values	Create a characteristic value		X
Characteristic Data for Classification : Characteristic values	Characteristic value for a given key	X	
Characteristic Data for Classification : Characteristic values	Update a characteristic value		X
Characteristic Data for Classification : Characteristic values	Delete a characteristic value		X
Characteristic Data for Classification : Characteristic value descriptions	Read the descriptions of a characteristic value	X	
Characteristic Data for Classification : Characteristic value descriptions	Create a description for a characteristic value		X
Characteristic Data for Classification : Characteristic value descriptions	List of characteristic value descriptions	X	
Characteristic Data for Classification : Characteristic value descriptions	Create a characteristic value description		X
Characteristic Data for Classification : Characteristic value descriptions	Characteristic value description for a given key	X	
Characteristic Data for Classification : Characteristic value descriptions	Update a characteristic value description		X
Characteristic Data for Classification : Characteristic value descriptions	Delete a characteristic value description		X
Characteristic Data for Classification : Batch requests	Send a group of requests		X
Characteristic Attribute Catalog - Read : Characteristic attribute selected s	Read all selected sets of catalog type characteristic attributes	X	

Characteristic Attribute Catalog - Read : Characteristic attribute selected s	Read a specific selected set of catalog type characteristic attributes	X	
Characteristic Attribute Catalog - Read : Characteristic attribute selected s	Read all selected set codes and code groups of catalog type characteristic a	X	
Characteristic Attribute Catalog - Read : Characteristic attribute selected s	Read a specific selected set code of catalog type characteristic attributes	X	
Characteristic Attribute Catalog - Read : Characteristic attribute selected s	Read all selected set code texts of catalog type characteristic attributes	X	
Characteristic Attribute Catalog - Read : Characteristic attribute selected s	Read a specific selected set code text of catalog type characteristic attribute	X	
Characteristic Attribute Catalog - Read : Characteristic attribute selected s	Read all selected set texts of catalog type characteristic attributes	X	
Characteristic Attribute Catalog - Read : Characteristic attribute selected s	Read a specific selected set text of catalog type characteristic attributes in a	X	
Characteristic Attribute Catalog - Read : Batch requests	Send a group of requests		X
Shipment Request and Shipment Confirmation : Sales order header	Read all sales order headers	X	
Shipment Request and Shipment Confirmation : Sales order header	Create a sales order		X
Shipment Request and Shipment Confirmation : Sales order header	Read the header of a sales order	X	
Shipment Request and Shipment Confirmation : Sales order header	Update a sales order		X
Shipment Request and Shipment Confirmation : Sales order header	Delete a sales order		X
Shipment Request and Shipment Confirmation : Sales order item	Read all items of a sales order	X	
Shipment Request and Shipment Confirmation : Sales order item	Create a sales order item for a sales order		X
Shipment Request and Shipment Confirmation : Sales order item	Read the sales order header of a sales order item	X	
Shipment Request and Shipment Confirmation : Sales order item	Read all sales order items	X	
Shipment Request and Shipment Confirmation : Sales order item	Create a sales order item		X
Shipment Request and Shipment Confirmation : Sales order item	Read a sales order item	X	
Shipment Request and Shipment Confirmation : Sales order item	Update a sales order item		X
Shipment Request and Shipment Confirmation : Sales order item	Delete a sales order item		X
Shipment Request and Shipment Confirmation : Header partner	Read the header partners of a sales order	X	
Shipment Request and Shipment Confirmation : Header partner	Create a header partner for a sales order		X
Shipment Request and Shipment Confirmation : Header partner	Read the sales order header for a header partner	X	
Shipment Request and Shipment Confirmation : Header partner	Read the header partners of all sales orders	X	
Shipment Request and Shipment Confirmation : Header partner	Create a header partner for a specific sales order with a specific partner function		X
Shipment Request and Shipment Confirmation : Header partner	Read the header partners of a sales order and a partner function	X	
Shipment Request and Shipment Confirmation : Header partner	Update a header partner for a specific sales order with a specific partner function		X
Shipment Request and Shipment Confirmation : Header partner	Delete a header partner of a specific sales order with a specific partner function		X
Shipment Request and Shipment Confirmation : Header payment plan	Read the header payment plan of a specific sales order	X	
Shipment Request and Shipment Confirmation : Header payment plan	Create a header payment plan for a specific sales order		X
Shipment Request and Shipment Confirmation : Header payment plan	Read the sales order header for a payment plan item	X	
Shipment Request and Shipment Confirmation : Header payment plan	Read the payment plans of all sales orders	X	
Shipment Request and Shipment Confirmation : Header payment plan	Create a payment plan for a sales order		X
Shipment Request and Shipment Confirmation : Header payment plan	Read a payment plan item of a sales order	X	
Shipment Request and Shipment Confirmation : Header payment plan	Update a payment plan item of a sales order		X
Shipment Request and Shipment Confirmation : Header payment plan	Delete a payment plan item of a specific sales order		X
Shipment Request and Shipment Confirmation : Header pricing element	Read the pricing element of a sales order	X	
Shipment Request and Shipment Confirmation : Header pricing element	Create a header pricing element for a specific sales order		X
Shipment Request and Shipment Confirmation : Header pricing element	Read the sales order header for a pricing element	X	
Shipment Request and Shipment Confirmation : Header pricing element	Read the header pricing elements of all sales orders	X	
Shipment Request and Shipment Confirmation : Header pricing element	Create a header pricing element for a sales order		X
Shipment Request and Shipment Confirmation : Header pricing element	Read the header pricing element for a sales order	X	
Shipment Request and Shipment Confirmation : Header pricing element	Update a header pricing element for a sales order		X
Shipment Request and Shipment Confirmation : Header pricing element	Delete a header pricing element for a sales order		X
Shipment Request and Shipment Confirmation : Header text	Read the header texts of a sales order	X	
Shipment Request and Shipment Confirmation : Header text	Create a header text for a sales order		X
Shipment Request and Shipment Confirmation : Header text	Read the sales order header for a header text	X	
Shipment Request and Shipment Confirmation : Header text	Read the header texts of all sales orders	X	
Shipment Request and Shipment Confirmation : Header text	Create a header text for a sales order		X
Shipment Request and Shipment Confirmation : Header text	Read a header text from a sales order	X	
Shipment Request and Shipment Confirmation : Header text	Update a header text for a sales order		X
Shipment Request and Shipment Confirmation : Header text	Delete a header text from a sales order		X
Shipment Request and Shipment Confirmation : Clinical trial shipment req	Read clinical trial-related transportation data for a specific customer order	X	
Shipment Request and Shipment Confirmation : Item partner	Read the sales order header of a partner function of a sales order item	X	
Shipment Request and Shipment Confirmation : Item partner	Read the item partners of a specific sales order item	X	
Shipment Request and Shipment Confirmation : Item partner	Create an item partner for a specific sales order item		X
Shipment Request and Shipment Confirmation : Item partner	Read the sales order item for a partner function of a sales order item	X	
Shipment Request and Shipment Confirmation : Item partner	Read the item partners for all sales orders	X	
Shipment Request and Shipment Confirmation : Item partner	Create a partner for a sales order item with a specific partner function		X
Shipment Request and Shipment Confirmation : Item partner	Read an item partner of an item with a specific partner function in a specific	X	
Shipment Request and Shipment Confirmation : Item partner	Update a partner of a sales order item with a specific partner function		X
Shipment Request and Shipment Confirmation : Item partner	Delete a partner of a specific sales order item with a specific partner function		X
Shipment Request and Shipment Confirmation : Item pricing element	Read the sales order header for a pricing element	X	
Shipment Request and Shipment Confirmation : Item pricing element	Read the pricing element of a sales order item	X	
Shipment Request and Shipment Confirmation : Item pricing element	Create a pricing element for a specific sales order item		X
Shipment Request and Shipment Confirmation : Item pricing element	Read the sales order item for a pricing element	X	
Shipment Request and Shipment Confirmation : Item pricing element	Read the item pricing elements of all sales orders	X	
Shipment Request and Shipment Confirmation : Item pricing element	Create an item pricing element		X
Shipment Request and Shipment Confirmation : Item pricing element	Read the pricing element of a item with specific pricing details	X	
Shipment Request and Shipment Confirmation : Item pricing element	Update an item pricing element		X
Shipment Request and Shipment Confirmation : Item pricing element	Delete an item pricing element		X
Shipment Request and Shipment Confirmation : Item schedule line	Read the schedule lines of a sales order item	X	
Shipment Request and Shipment Confirmation : Item schedule line	Create schedule lines for a sales order item		X
Shipment Request and Shipment Confirmation : Item schedule line	Read the schedule lines of all sales orders	X	
Shipment Request and Shipment Confirmation : Item schedule line	Create a schedule line		X
Shipment Request and Shipment Confirmation : Item schedule line	Read a schedule line	X	

Shipment Request and Shipment Confirmation : Item schedule line	Update a schedule line		X
Shipment Request and Shipment Confirmation : Item schedule line	Delete a schedule line		X
Shipment Request and Shipment Confirmation : Item text	Read the sales order header for a text of a sales order item	X	
Shipment Request and Shipment Confirmation : Item text	Read the text of a sales order item	X	
Shipment Request and Shipment Confirmation : Item text	Create a text for a specific sales order item		X
Shipment Request and Shipment Confirmation : Item text	Read the sales order item for an item text	X	
Shipment Request and Shipment Confirmation : Item text	Read item texts of all sales orders	X	
Shipment Request and Shipment Confirmation : Item text	Create an item text		X
Shipment Request and Shipment Confirmation : Item text	Read an item text	X	
Shipment Request and Shipment Confirmation : Item text	Update an item text		X
Shipment Request and Shipment Confirmation : Item text	Delete an item text		X
Shipment Request and Shipment Confirmation : Clinical trial shipment req	Retrieve location data from a clinical trial for a specific customer order	X	
Shipment Request and Shipment Confirmation : Service operations	Invoke action rejectapprovalrequest		X
Shipment Request and Shipment Confirmation : Service operations	Invoke action releaseapprovalrequest		X
Shipment Request and Shipment Confirmation : Batch requests	Send a group of requests		X
Funds Management Budget Document Item (A2X) : Funds mgmt budget d	Get entities from fundsmgmtbdgtdocumentitem	X	
Funds Management Budget Document Item (A2X) : Funds mgmt budget d	Get entity from fundsmgmtbdgtdocumentitem by key	X	
Funds Management Budget Document Item (A2X) : Batch requests	Send a group of requests		X
Funds Center : Funds center	Get entities from fundscenter	X	
Funds Center : Funds center	Get entity from fundscenter by key	X

Assortment Module (A2X) : Assortment module version: Text	Add new entity to assortment module version text		X
Assortment Module (A2X) : Assortment module version: Text	Get entity from assortment module version text by key	X	
Assortment Module (A2X) : Assortment module version: Text	Update entity in assortment module version text		X
Assortment Module (A2X) : Assortment module version: Text	Delete entity from assortment module version text		X
Assortment Module (A2X) : Assortment module version	Get related explicit assortment module	X	
Assortment Module (A2X) : Assortment module version	Get entities from related text	X	
Assortment Module (A2X) : Assortment module version	Add new entity to related text		X
Assortment Module (A2X) : Assortment module version	Get entities from explicit assortment module version	X	
Assortment Module (A2X) : Assortment module version	Add new entity to explicit assortment module version		X
Assortment Module (A2X) : Assortment module version	Get entity from explicit assortment module version by key	X	
Assortment Module (A2X) : Assortment module version	Update entity in explicit assortment module version		X
Assortment Module (A2X) : Assortment module version	Delete entity from explicit assortment module version		X
Assortment Module (A2X) : Product exclusion from assortment module for	Get entities from explicit assortment module for user	X	
Assortment Module (A2X) : Product exclusion from assortment module for	Add new entity to explicit assortment module for user		X
Assortment Module (A2X) : Product exclusion from assortment module for	Get entity from explicit assortment module for user by key	X	
Assortment Module (A2X) : Product exclusion from assortment module for	Delete entity from explicit assortment module for user		X
Assortment Module (A2X) : Assortment module	Get entities from related version	X	
Assortment Module (A2X) : Assortment module	Add new entity to related version		X
Assortment Module (A2X) : Assortment module	Get entities from related exclusion	X	
Assortment Module (A2X) : Assortment module	Add new entity to related exclusion		X
Assortment Module (A2X) : Assortment module	Get entities from explicit assortment module	X	
Assortment Module (A2X) : Assortment module	Add new entity to explicit assortment module		X
Assortment Module (A2X) : Assortment module	Get entity from explicit assortment module by key	X	
Assortment Module (A2X) : Assortment module	Delete entity from explicit assortment module		X
Assortment Module (A2X) : Assortment user assignment to assortment mo	Get entities from related assortment user	X	
Assortment Module (A2X) : Assortment user assignment to assortment mo	Add new entity to related assortment user		X
Assortment Module (A2X) : Assortment user assignment to assortment mo	Get entities from explicit assortment module user	X	
Assortment Module (A2X) : Assortment user assignment to assortment mo	Add new entity to explicit assortment module user		X
Assortment Module (A2X) : Assortment user assignment to assortment mo	Get entity from explicit assortment module user by key	X	
Assortment Module (A2X) : Assortment user assignment to assortment mo	Delete entity from explicit assortment module user		X
Assortment Module (A2X) : Assortment user assignment to assortment mo	Invoke action update validity		X
Assortment Module (A2X) : Product assignment to assortment module	Get entities from related product	X	
Assortment Module (A2X) : Product assignment to assortment module	Get entities from product to explicit assortment	X	
Assortment Module (A2X) : Product assignment to assortment module	Get entity from product to explicit assortment by key	X	
Assortment Module (A2X) : Product assignment to assortment module	Invoke action replaceproduct		X
Assortment Module (A2X) : Product assignment to assortment module	Invoke action update validity		X
Assortment Module (A2X) : Product assignment to assortment module ver	Get entities from related product	X	
Assortment Module (A2X) : Product assignment to assortment module ver	Add new entity to related product		X
Assortment Module (A2X) : Product assignment to assortment module ver	Get related explicit assortment module version	X	
Assortment Module (A2X) : Product assignment to assortment module ver	Get entities from related product to explicit module version	X	
Assortment Module (A2X) : Product assignment to assortment module ver	Add new entity to related product to explicit module version		X
Assortment Module (A2X) : Product assignment to assortment module ver	Get related product to explicit assortment module version	X	
Assortment Module (A2X) : Product assignment to assortment module ver	Get entities from product to explicit assortment module version	X	
Assortment Module (A2X) : Product assignment to assortment module ver	Add new entity to product to explicit assortment module version		X
Assortment Module (A2X) : Product assignment to assortment module ver	Get entity from product to explicit assortment module version by key	X	
Assortment Module (A2X) : Product assignment to assortment module ver	Update entity in product to explicit assortment module version		X
Assortment Module (A2X) : Product assignment to assortment module ver	Delete entity from product to explicit assortment module version		X
Assortment Module (A2X) : Batch requests	Send a group of requests		X
Awarding Scenario : Awarding scenario	Get entities from srcg proj awarding scenario	X	

Awarding Scenario : Awarding scenario	Add new entity to srcg proj awarding scenario		X
Awarding Scenario : Awarding scenario	Get entity from srcg proj awarding scenario by key	X	
Awarding Scenario : Awarding scenario	Update entity in srcg proj awarding scenario		X
Awarding Scenario : Awarding scenario	Delete entity from srcg proj awarding scenario		X
Awarding Scenario : Awarding scenario	Invoke action submit for approval		X
Awarding Scenario : Awarding scenario	Invoke action withdraw from approval		X
Awarding Scenario : Awarding scenario	Invoke action cancel		X
Awarding Scenario : Awarding scenario note	Get entities from related srcgprojawardingscennote	X	
Awarding Scenario : Awarding scenario note	Add new entity to related srcgprojawardingscennote		X
Awarding Scenario : Awarding scenario note	Get related srcg proj awarding scenario	X	
Awarding Scenario : Awarding scenario note	Get entities from srcg proj awarding scenario note	X	
Awarding Scenario : Awarding scenario note	Get entity from srcg proj awarding scenario note by key	X	
Awarding Scenario : Awarding scenario note	Update entity in srcg proj awarding scenario note		X
Awarding Scenario : Awarding scenario note	Delete entity from srcg proj awarding scenario note		X
Awarding Scenario : Supplier quotation	Get entities from related srcgprojawardingscenqtn	X	
Awarding Scenario : Supplier quotation	Add new entity to related srcgprojawardingscenqtn		X
Awarding Scenario : Supplier quotation	Get related srcg proj awarding scenario	X	
Awarding Scenario : Supplier quotation	Get entities from srcgprojawardingscenqtn	X	
Awarding Scenario : Supplier quotation	Get entity from srcgprojawardingscenqtn by key	X	
Awarding Scenario : Supplier quotation	Delete entity from srcgprojawardingscenqtn		X
Awarding Scenario : Batch requests	Send a group of requests		X
Bank : Bank	Get entities from bank	X	
Bank : Bank	Add new entity to bank		X
Bank : Bank	Get entity from bank by key	X	
Bank : Bank	Update entity in bank		X
Bank : Bank address	Get related bank add ress	X	
Bank : Bank address	Get related bank	X	
Bank : Bank address	Get entities from bank add ress	X	
Bank : Bank address	Get entity from bank add ress by key	X	
Bank : Bank address	Update entity in bank add ress		X
Bank : Scripted addresses	Get related bank	X

CTR Complementary Table Data Maintenance : BR country/region dec obs	Get entity from dpais obs by key	X	
CTR Complementary Table Data Maintenance : BR country/region dec obs	Update entity in dpais obs		X
CTR Complementary Table Data Maintenance : BR country/region dec obs	Delete entity from dpais obs		X
CTR Complementary Table Data Maintenance : BR cofins exempt revenue	Get entities from drecise c	X	
CTR Complementary Table Data Maintenance : BR cofins exempt revenue	Add new entity to drecise c		X
CTR Complementary Table Data Maintenance : BR cofins exempt revenue	Get entity from drecise c by key	X	
CTR Complementary Table Data Maintenance : BR cofins exempt revenue	Update entity in drecise c		X
CTR Complementary Table Data Maintenance : BR cofins exempt revenue	Delete entity from drecise c		X
CTR Complementary Table Data Maintenance : BR PIS pasep exempt rev	Get entities from drecise p	X	
CTR Complementary Table Data Maintenance : BR PIS pasep exempt rev	Add new entity to drecise p		X
CTR Complementary Table Data Maintenance : BR PIS pasep exempt rev	Get entity from drecise p by key	X	
CTR Complementary Table Data Maintenance : BR PIS pasep exempt rev	Update entity in drecise p		X
CTR Complementary Table Data Maintenance : BR PIS pasep exempt rev	Delete entity from drecise p		X
CTR Complementary Table Data Maintenance : BR ECD additional field	Get entities from ecd cmp a	X	
CTR Complementary Table Data Maintenance : BR ECD additional field	Add new entity to ecd cmp a		X
CTR Complementary Table Data Maintenance : BR ECD additional field	Get entity from ecd cmp a by key	X	
CTR Complementary Table Data Maintenance : BR ECD additional field	Update entity in ecd cmp a		X
CTR Complementary Table Data Maintenance : BR ECD additional field	Delete entity from ecd cmp a		X
CTR Complementary Table Data Maintenance : BR ECD history	Get entities from ecd histo	X	
CTR Complementary Table Data Maintenance : BR ECD history	Add new entity to ecd histo		X
CTR Complementary Table Data Maintenance : BR ECD history	Get entity from ecd histo by key	X	
CTR Complementary Table Data Maintenance : BR ECD history	Update entity in ecd histo		X
CTR Complementary Table Data Maintenance : BR ECD history	Delete entity from ecd histo		X
CTR Complementary Table Data Maintenance : BR ECF equipment	Get entities from ecf equip	X	
CTR Complementary Table Data Maintenance : BR ECF equipment	Add new entity to ecf equip		X
CTR Complementary Table Data Maintenance : BR ECF equipment	Get entity from ecf equip by key	X	
CTR Complementary Table Data Maintenance : BR ECF equipment	Update entity in ecf equip		X
CTR Complementary Table Data Maintenance : BR ECF equipment	Delete entity from ecf equip		X
CTR Complementary Table Data Maintenance : BR ECF item with ST com	Get entities from ecf it st	X	
CTR Complementary Table Data Maintenance : BR ECF item with ST com	Add new entity to ecf it st		X
CTR Complementary Table Data Maintenance : BR ECF item with ST com	Get entity from ecf it st by key	X	
CTR Complementary Table Data Maintenance : BR ECF item with ST com	Update entity in ecf it st		X
CTR Complementary Table Data Maintenance : BR ECF item with ST com	Delete entity from ecf it st		X
CTR Complementary Table Data Maintenance : BR cupom fiscal header ta	Get entities from ecf nf	X	
CTR Complementary Table Data Maintenance : BR cupom fiscal header ta	Add new entity to ecf nf		X
CTR Complementary Table Data Maintenance : BR cupom fiscal header ta	Get entity from ecf nf by key	X	
CTR Complementary Table Data Maintenance : BR cupom fiscal header ta	Update entity in ecf nf		X
CTR Complementary Table Data Maintenance : BR cupom fiscal header ta	Delete entity from ecf nf		X
CTR Complementary Table Data Maintenance : BR cupom fiscal item table	Get entities from ecf nf it	X	
CTR Complementary Table Data Maintenance : BR cupom fiscal item table	Add new entity to ecf nf it		X
CTR Complementary Table Data Maintenance : BR cupom fiscal item table	Get entity from ecf nf it by key	X	
CTR Complementary Table Data Maintenance : BR cupom fiscal item table	Update entity in ecf nf it		X
CTR Complementary Table Data Maintenance : BR cupom fiscal item table	Delete entity from ecf nf it		X
CTR Complementary Table Data Maintenance : BR ECF PIS and cofins ta	Get entities from ecf pis c	X	
CTR Complementary Table Data Maintenance : BR ECF PIS and cofins ta	Add new entity to ecf pis c		X
CTR Complementary Table Data Maintenance : BR ECF PIS and cofins ta	Get entity from ecf pis c by key	X	
CTR Complementary Table Data Maintenance : BR ECF PIS and cofins ta	Update entity in ecf pis c		X
CTR Complementary Table Data Maintenance : BR ECF PIS and cofins ta	Delete entity from ecf pis c		X
CTR Complementary Table Data Maintenance : BR ECF referenced proce	Get entities from ecf pr re	X	
CTR Complementary Table Data Maintenance : BR ECF referenced proce	Add new entity to ecf pr re		X
CTR Complementary Table Data Maintenance : BR ECF referenced proce	Get entity from ecf pr re by key	X	
CTR Complementary Table Data Maintenance : BR ECF referenced proce	Update entity in ecf pr re		X

CTR Complementary Table Data Maintenance : BR ECF referenced proce	Delete entity from ecf pr re		X
CTR Complementary Table Data Maintenance : BR ECF reduction	Get entities from ecf red z	X	
CTR Complementary Table Data Maintenance : BR ECF reduction	Add new entity to ecf red z		X
CTR Complementary Table Data Maintenance : BR ECF reduction	Get entity from ecf red z by key	X	
CTR Complementary Table Data Maintenance : BR ECF reduction	Update entity in ecf red z		X
CTR Complementary Table Data Maintenance : BR ECF reduction	Delete entity from ecf red z		X
CTR Complementary Table Data Maintenance : BR analytical registration	Get entities from ecf reg a	X	
CTR Complementary Table Data Maintenance : BR analytical registration	Add new entity to ecf reg a		X
CTR Complementary Table Data Maintenance : BR analytical registration	Get entity from ecf reg a by key	X	
CTR Complementary Table Data Maintenance : BR analytical registration	Update entity in ecf reg a		X
CTR Complementary Table Data Maintenance : BR analytical registration	Delete entity from ecf reg a		X
CTR Complementary Table Data Maintenance : BR ECF monthly summar	Get entities from ecf res m	X	
CTR Complementary Table Data Maintenance : BR ECF monthly summar	Add new entity to ecf res m		X
CTR Complementary Table Data Maintenance : BR ECF monthly summar	Get entity from ecf res m by key	X	
CTR Complementary Table Data Maintenance : BR ECF monthly summar	Update entity in ecf res m		X
CTR Complementary Table Data Maintenance : BR ECF monthly summar	Delete entity from ecf res m		X
CTR Complementary Table Data Maintenance : BR ECF totalizer	Get entities from ecf total	X	
CTR Complementary Table Data Maintenance : BR ECF totalizer	Add new entity to ecf total		X
CTR Complementary Table Data Maintenance : BR ECF totalizer	Get entity from ecf total by key	X	
CTR Complementary Table Data Maintenance : BR ECF totalizer	Update entity in ecf total		X
CTR Complementary Table Data Maintenance : BR ECF totalizer	Delete entity from ecf total		X
CTR Complementary Table Data Maintenance : BR ECF totalizer complen	Get entities from ecf ttl c	X	
CTR Complementary Table Data Maintenance : BR ECF totalizer complen	Add new entity to ecf ttl c		X
CTR Complementary Table Data Maintenance : BR ECF totalizer complen	Get entity from ecf ttl c by key	X	
CTR Complementary Table Data Maintenance : BR ECF totalizer complen	Update entity in ecf ttl c		X
CTR Complementary Table Data Maintenance : BR ECF totalizer complen	Delete entity from ecf ttl c		X
CTR Complementary Table Data Maintenance : BR ECF totalizer per item	Get entities from ecf ttl i	X	
CTR Complementary Table Data Maintenance : BR ECF totalizer per item	Add new entity to ecf ttl i		X
CTR Complementary Table Data Maintenance : BR ECF totalizer per item	Get entity from ecf ttl i by key	X	
CTR Complementary Table Data Maintenance : BR ECF totalizer per item	Update entity in ecf ttl i		X
CTR Complementary Table Data Maintenance : BR ECF totalizer per item	Delete entity from ecf ttl i		X
CTR Complementary Table Data Maintenance : BR ecommerce	Get entities from ecommerce	X	
CTR Complementary Table Data Maintenance : BR ecommerce	Add new entity to ecommerce		X
CTR Complementary Table Data Maintenance : BR ecommerce	Get entity from ecommerce by key	X	
CTR Complementary Table Data Maintenance : BR ecommerce	Update entity in ecommerce		X
CTR Complementary Table Data Maintenance : BR ecommerce	Delete entity from ecommerce		X
CTR Complementary Table Data Maintenance : BR entry for elalur and ela	Get entities from elallac l	X	
CTR Complementary Table Data Maintenance : BR entry for elalur and ela	Add new entity to elallac l		X
CTR Complementary Table Data Maintenance : BR entry for elalur and ela	Get entity from elallac l by key	X	
CTR Complementary Table Data Maintenance : BR entry for elalur and ela	Update entity in elallac l		X
CTR Complementary Table Data Maintenance : BR entry for elalur and ela	Delete entity from elallac l		X
CTR Complementary Table Data Maintenance : BR consolidated compani	Get entities from emp cons	X	
CTR Complementary Table Data Maintenance : BR consolidated compani	Add new entity to emp cons		X
CTR Complementary Table Data Maintenance : BR consolidated compani	Get entity from emp cons by key	X	
CTR Complementary Table Data Maintenance : BR consolidated compani	Update entity in emp cons		X
CTR Complementary Table Data Maintenance : BR consolidated compani	Delete entity from emp cons		X
CTR Complementary Table Data Maintenance : BR counterpart comp elim	Get entities from emp con p	X	
CTR Complementary Table Data Maintenance : BR counterpart comp elim	Add new entity to emp con p		X
CTR Complementary Table Data Maintenance : BR counterpart comp elim	Get entity from emp con p by key	X	
CTR Complementary Table Data Maintenance : BR counterpart comp elim	Update entity in emp con p		X
CTR Complementary Table Data Maintenance : BR counterpart comp elim	Delete entity from emp con p		X
CTR Complementary Table Data Maintenance : BR company and BRanch	Get entities from emp cpl	X	
CTR Complementary Table Data Maintenance : BR company and BRanch	Add new entity to emp cpl		X
CTR Complementary Table Data Maintenance : BR company and BRanch	Get entity from emp cpl by key	X	
CTR Complementary Table Data Maintenance : BR company and BRanch	Update entity in emp cpl		X
CTR Complementary Table Data Maintenance : BR company and BRanch	Delete entity from emp cpl		X
CTR Complementary Table Data Maintenance : BR comp holding installme	Get entities from emp det p	X	
CTR Complementary Table Data Maintenance : BR comp holding installme	Add new entity to emp det p		X
CTR Complementary Table Data Maintenance : BR comp holding installme	Get entity from emp det p by key	X	
CTR Complementary Table Data Maintenance : BR comp holding installme	Update entity in emp det p		X
CTR Complementary Table Data Maintenance : BR comp holding installme	Delete entity from emp det p		X
CTR Complementary Table Data Maintenance : BR controlled transactions	Get entities from entidades	X	
CTR Complementary Table Data Maintenance : BR controlled transactions	Add new entity to entidades		X
CTR Complementary Table Data Maintenance : BR controlled transactions	Get entity from entidades by key	X	
CTR Complementary Table Data Maintenance : BR controlled transactions	Update entity in entidades		X
CTR Complementary Table Data Maintenance : BR controlled transactions	Delete entity from entidades		X
CTR Complementary Table Data Maintenance : BR decentralized bookkee	Get entities from escr desc	X	
CTR Complementary Table Data Maintenance : BR decentralized bookkee	Add new entity to escr desc		X
CTR Complementary Table Data Maintenance : BR decentralized bookkee	Get entity from escr desc by key	X	
CTR Complementary Table Data Maintenance : BR decentralized bookkee	Update entity in escr desc		X
CTR Complementary Table Data Maintenance : BR decentralized bookkee	Delete entity from escr desc		X
CTR Complementary Table Data Maintenance : BR bookkeeping	Get entities from esc conta	X	
CTR Complementary Table Data Maintenance : BR bookkeeping	Add new entity to esc conta		X
CTR Complementary Table Data Maintenance : BR bookkeeping	Get entity from esc conta by key	X	
CTR Complementary Table Data Maintenance : BR bookkeeping	Update entity in esc conta		X
CTR Complementary Table Data Maintenance : BR bookkeeping	Delete entity from esc conta		X
CTR Complementary Table Data Maintenance : BR bookkeeping v2	Get entities from esc conta v2	X	

CTR Complementary Table Data Maintenance : BR bookkeeping v2	Add new entity to esc conta v2		X
CTR Complementary Table Data Maintenance : BR bookkeeping v2	Get entity from esc conta v2 by key	X	
CTR Complementary Table Data Maintenance : BR bookkeeping v2	Update entity in esc conta v2		X
CTR Complementary Table Data Maintenance : BR bookkeeping v2	Delete entity from esc conta v2		X
CTR Complementary Table Data Maintenance : BR other int mov between	Get entities from estoq mov	X	
CTR Complementary Table Data Maintenance : BR other int mov between	Add new entity to estoq mov		X
CTR Complementary Table Data Maintenance : BR other int mov between	Get entity from estoq mov by key	X	
CTR Complementary Table Data Maintenance : BR other int mov between	Update entity in estoq mov		X
CTR Complementary Table Data Maintenance : BR other int mov between	Delete entity from estoq mov		X
CTR Complementary Table Data Maintenance : BR comp participating of e	Get entities from even emp	X	
CTR Complementary Table Data Maintenance : BR comp participating of e	Add new entity to even emp		X
CTR Complementary Table Data Maintenance : BR comp participating of e	Get entity from even emp by key	X	
CTR Complementary Table Data Maintenance : BR comp participating of e	Update entity in even emp		X
CTR Complementary Table Data Maintenance : BR comp participating of e	Delete entity from even emp		X
CTR Complementary Table Data Maintenance : BR susp obligation contrib	Get entities from exig susp	X	
CTR Complementary Table Data Maintenance : BR susp obligation contrib	Add new entity to exig susp		X
CTR Complementary Table Data Maintenance : BR susp obligation contrib	Get entity from exig susp by key	X	
CTR Complementary Table Data Maintenance : BR susp obligation contrib	Update entity in exig susp		X
CTR Complementary Table Data Maintenance : BR susp obligation contrib	Delete entity from exig susp		X
CTR Complementary Table Data Maintenance : BR export data	Get entities from exportaca	X	
CTR Complementary Table Data Maintenance : BR export data	Add new entity to exportaca		X
CTR Complementary Table Data Maintenance : BR export data	Get entity from exportaca by key	X	
CTR Complementary Table Data Maintenance : BR export data	Update entity in exportaca		X
CTR Complementary Table Data Maintenance : BR export data	Delete entity from exportaca		X
CTR Complementary Table Data Maintenance : BR company and BRanch	Get entities from export nf	X

CTR Complementary Table Data Maintenance : BR related method iNForn	Update entity in infmetodo		X
CTR Complementary Table Data Maintenance : BR related method iNForn	Delete entity from infmetodo		X
CTR Complementary Table Data Maintenance : BR iNFo related to linked	Get entities from info lig	X	
CTR Complementary Table Data Maintenance : BR iNFo related to linked	Add new entity to info lig		X
CTR Complementary Table Data Maintenance : BR iNFo related to linked	Get entity from info lig by key	X	
CTR Complementary Table Data Maintenance : BR iNFo related to linked	Update entity in info lig		X
CTR Complementary Table Data Maintenance : BR iNFo related to linked	Delete entity from info lig		X
CTR Complementary Table Data Maintenance : BR ICMS difal orig dest iN	Get entities from inf aapod	X	
CTR Complementary Table Data Maintenance : BR ICMS difal orig dest iN	Add new entity to inf aapod		X
CTR Complementary Table Data Maintenance : BR ICMS difal orig dest iN	Get entity from inf aapod by key	X	
CTR Complementary Table Data Maintenance : BR ICMS difal orig dest iN	Update entity in inf aapod		X
CTR Complementary Table Data Maintenance : BR ICMS difal orig dest iN	Delete entity from inf aapod		X
CTR Complementary Table Data Maintenance : BR sub adjust calc iNFo	Get entities from inf aj ap	X	
CTR Complementary Table Data Maintenance : BR sub adjust calc iNFo	Add new entity to inf aj ap		X
CTR Complementary Table Data Maintenance : BR sub adjust calc iNFo	Get entity from inf aj ap by key	X	
CTR Complementary Table Data Maintenance : BR sub adjust calc iNFo	Update entity in inf aj ap		X
CTR Complementary Table Data Maintenance : BR sub adjust calc iNFo	Delete entity from inf aj ap		X
CTR Complementary Table Data Maintenance : BR NF ICMS difal origin d	Get entities from inf anfod	X	
CTR Complementary Table Data Maintenance : BR NF ICMS difal origin d	Add new entity to inf anfod		X

CTR Complementary Table Data Maintenance : BR NF ICMS difal origin d	Get entity from inf anfod by key	X	
CTR Complementary Table Data Maintenance : BR NF ICMS difal origin d	Update entity in inf anfod		X
CTR Complementary Table Data Maintenance : BR NF ICMS difal origin d	Delete entity from inf anfod		X
CTR Complementary Table Data Maintenance : BR ICMS appraisal add iN	Get entities from inf ap nf	X	
CTR Complementary Table Data Maintenance : BR ICMS appraisal add iN	Add new entity to inf ap nf		X
CTR Complementary Table Data Maintenance : BR ICMS appraisal add iN	Get entity from inf ap nf by key	X	
CTR Complementary Table Data Maintenance : BR ICMS appraisal add iN	Update entity in inf ap nf		X
CTR Complementary Table Data Maintenance : BR ICMS appraisal add iN	Delete entity from inf ap nf		X
CTR Complementary Table Data Maintenance : BR ICMS st fiscal doc add	Get entities from inf icmst	X	
CTR Complementary Table Data Maintenance : BR ICMS st fiscal doc add	Add new entity to inf icmst		X
CTR Complementary Table Data Maintenance : BR ICMS st fiscal doc add	Get entity from inf icmst by key	X	
CTR Complementary Table Data Maintenance : BR ICMS st fiscal doc add	Update entity in inf icmst		X
CTR Complementary Table Data Maintenance : BR ICMS st fiscal doc add	Delete entity from inf icmst		X
CTR Complementary Table Data Maintenance : BR previous period iNForr	Get entities from inf per a	X	
CTR Complementary Table Data Maintenance : BR previous period iNForr	Add new entity to inf per a		X
CTR Complementary Table Data Maintenance : BR previous period iNForr	Get entity from inf per a by key	X	
CTR Complementary Table Data Maintenance : BR previous period iNForr	Update entity in inf per a		X
CTR Complementary Table Data Maintenance : BR previous period iNForr	Delete entity from inf per a		X
CTR Complementary Table Data Maintenance : BR sub declared vl calc	Get entities from inf val d	X	
CTR Complementary Table Data Maintenance : BR sub declared vl calc	Add new entity to inf val d		X
CTR Complementary Table Data Maintenance : BR sub declared vl calc	Get entity from inf val d by key	X	
CTR Complementary Table Data Maintenance : BR sub declared vl calc	Update entity in inf val d		X
CTR Complementary Table Data Maintenance : BR sub declared vl calc	Delete entity from inf val d		X
CTR Complementary Table Data Maintenance : BR register description	Get entities from inscr cad	X	
CTR Complementary Table Data Maintenance : BR register description	Add new entity to inscr cad		X
CTR Complementary Table Data Maintenance : BR register description	Get entity from inscr cad by key	X	
CTR Complementary Table Data Maintenance : BR register description	Update entity in inscr cad		X
CTR Complementary Table Data Maintenance : BR register description	Delete entity from inscr cad		X
CTR Complementary Table Data Maintenance : BR inventory data	Get entities from invent	X	
CTR Complementary Table Data Maintenance : BR inventory data	Add new entity to invent		X
CTR Complementary Table Data Maintenance : BR inventory data	Get entity from invent by key	X	
CTR Complementary Table Data Maintenance : BR inventory data	Update entity in invent		X
CTR Complementary Table Data Maintenance : BR inventory data	Delete entity from invent		X
CTR Complementary Table Data Maintenance : BR inventory complement	Get entities from invent cp	X	
CTR Complementary Table Data Maintenance : BR inventory complement	Add new entity to invent cp		X
CTR Complementary Table Data Maintenance : BR inventory complement	Get entity from invent cp by key	X	
CTR Complementary Table Data Maintenance : BR inventory complement	Update entity in invent cp		X
CTR Complementary Table Data Maintenance : BR inventory complement	Delete entity from invent cp		X
CTR Complementary Table Data Maintenance : BR inventory data comple	Get entities from inven cpl	X	
CTR Complementary Table Data Maintenance : BR inventory data comple	Add new entity to inven cpl		X
CTR Complementary Table Data Maintenance : BR inventory data comple	Get entity from inven cpl by key	X	
CTR Complementary Table Data Maintenance : BR inventory data comple	Update entity in inven cpl		X
CTR Complementary Table Data Maintenance : BR inventory data comple	Delete entity from inven cpl		X
CTR Complementary Table Data Maintenance : BR last month ipi	Get entities from ipi ant	X	
CTR Complementary Table Data Maintenance : BR last month ipi	Add new entity to ipi ant		X
CTR Complementary Table Data Maintenance : BR last month ipi	Get entity from ipi ant by key	X	
CTR Complementary Table Data Maintenance : BR last month ipi	Update entity in ipi ant		X
CTR Complementary Table Data Maintenance : BR last month ipi	Delete entity from ipi ant		X
CTR Complementary Table Data Maintenance : BR IPI calculation	Get entities from ipi apur	X	
CTR Complementary Table Data Maintenance : BR IPI calculation	Add new entity to ipi apur		X
CTR Complementary Table Data Maintenance : BR IPI calculation	Get entity from ipi apur by key	X	
CTR Complementary Table Data Maintenance : BR IPI calculation	Update entity in ipi apur		X
CTR Complementary Table Data Maintenance : BR IPI calculation	Delete entity from ipi apur		X
CTR Complementary Table Data Maintenance : BR material data	Get entities from item	X	
CTR Complementary Table Data Maintenance : BR material data	Add new entity to item		X
CTR Complementary Table Data Maintenance : BR material data	Get entity from item by key	X	
CTR Complementary Table Data Maintenance : BR material data	Update entity in item		X
CTR Complementary Table Data Maintenance : BR material data	Delete entity from item		X
CTR Complementary Table Data Maintenance : BR material data complen	Get entities from item cpl	X	
CTR Complementary Table Data Maintenance : BR material data complen	Add new entity to item cpl		X
CTR Complementary Table Data Maintenance : BR material data complen	Get entity from item cpl by key	X	
CTR Complementary Table Data Maintenance : BR material data complen	Update entity in item cpl		X
CTR Complementary Table Data Maintenance : BR material data complen	Delete entity from item cpl		X
CTR Complementary Table Data Maintenance : BR ICMS rate for material	Get entities from item icms	X	
CTR Complementary Table Data Maintenance : BR ICMS rate for material	Add new entity to item icms		X
CTR Complementary Table Data Maintenance : BR ICMS rate for material	Get entity from item icms by key	X	
CTR Complementary Table Data Maintenance : BR ICMS rate for material	Update entity in item icms		X
CTR Complementary Table Data Maintenance : BR ICMS rate for material	Delete entity from item icms		X
CTR Complementary Table Data Maintenance : BR inactive item	Get entities from item inat	X	
CTR Complementary Table Data Maintenance : BR inactive item	Add new entity to item inat		X
CTR Complementary Table Data Maintenance : BR inactive item	Get entity from item inat by key	X	
CTR Complementary Table Data Maintenance : BR inactive item	Update entity in item inat		X
CTR Complementary Table Data Maintenance : BR inactive item	Delete entity from item inat		X
CTR Complementary Table Data Maintenance : BR produced items	Get entities from it prod	X	
CTR Complementary Table Data Maintenance : BR produced items	Add new entity to it prod		X
CTR Complementary Table Data Maintenance : BR produced items	Get entity from it prod by key	X	
CTR Complementary Table Data Maintenance : BR produced items	Update entity in it prod		X

CTR Complementary Table Data Maintenance : BR produced items	Delete entity from it prod		X
CTR Complementary Table Data Maintenance : BR third party produced it	Get entities from it prod t	X	
CTR Complementary Table Data Maintenance : BR third party produced it	Add new entity to it prod t		X
CTR Complementary Table Data Maintenance : BR third party produced it	Get entity from it prod t by key	X	
CTR Complementary Table Data Maintenance : BR third party produced it	Update entity in it prod t		X
CTR Complementary Table Data Maintenance : BR third party produced it	Delete entity from it prod t		X
CTR Complementary Table Data Maintenance : BR NF item ST compleme	Get entities from i inf st	X	
CTR Complementary Table Data Maintenance : BR NF item ST compleme	Add new entity to i inf st		X
CTR Complementary Table Data Maintenance : BR NF item ST compleme	Get entity from i inf st by key	X	
CTR Complementary Table Data Maintenance : BR NF item ST compleme	Update entity in i inf st		X
CTR Complementary Table Data Maintenance : BR NF item ST compleme	Delete entity from i inf st		X
CTR Complementary Table Data Maintenance : BR oil station pump seal	Get entities from lacre bom	X	
CTR Complementary Table Data Maintenance : BR oil station pump seal	Add new entity to lacre bom		X
CTR Complementary Table Data Maintenance : BR oil station pump seal	Get entity from lacre bom by key	X	
CTR Complementary Table Data Maintenance : BR oil station pump seal	Update entity in lacre bom		X
CTR Complementary Table Data Maintenance : BR oil station pump seal	Delete entity from lacre bom		X
CTR Complementary Table Data Maintenance : BR accounting document	Get entities from lanc cont	X	
CTR Complementary Table Data Maintenance : BR accounting document	Add new entity to lanc cont		X
CTR Complementary Table Data Maintenance : BR accounting document	Get entity from lanc cont by key	X	
CTR Complementary Table Data Maintenance : BR accounting document	Update entity in lanc cont		X
CTR Complementary Table Data Maintenance : BR accounting document	Delete entity from lanc cont		X
CTR Complementary Table Data Maintenance : BR arbitrated profit	Get entities from lanc div	X	
CTR Complementary Table Data Maintenance : BR arbitrated profit	Add new entity to lanc div		X
CTR Complementary Table Data Maintenance : BR arbitrated profit	Get entity from lanc div by key	X	
CTR Complementary Table Data Maintenance : BR arbitrated profit	Update entity in lanc div		X
CTR Complementary Table Data Maintenance : BR arbitrated profit	Delete entity from lanc div		X
CTR Complementary Table Data Maintenance : BR accounting doc segme	Get entities from lcont cpl	X	
CTR Complementary Table Data Maintenance : BR accounting doc segme	Add new entity to lcont cpl		X
CTR Complementary Table Data Maintenance : BR accounting doc segme	Get entity from lcont cpl by key	X	
CTR Complementary Table Data Maintenance : BR accounting doc segme	Update entity in lcont cpl		X
CTR Complementary Table Data Maintenance : BR accounting doc segme	Delete entity from lcont cpl		X
CTR Complementary Table Data Maintenance : BR income postings paym	Get entities from lctorenrt	X	
CTR Complementary Table Data Maintenance : BR income postings paym	Add new entity to lctorenrt		X
CTR Complementary Table Data Maintenance : BR income postings paym	Get entity from lctorenrt by key	X	
CTR Complementary Table Data Maintenance : BR income postings paym	Update entity in lctorenrt		X
CTR Complementary Table Data Maintenance : BR income postings paym	Delete entity from lctorenrt		X
CTR Complementary Table Data Maintenance : BR Auxiliary Book for ECI	Get entities from livro aux	X

CTR Complementary Table Data Maintenance : BR invoice	Get entities from nf fatura	X	
CTR Complementary Table Data Maintenance : BR invoice	Add new entity to nf fatura		X
CTR Complementary Table Data Maintenance : BR invoice	Get entity from nf fatura by key	X	
CTR Complementary Table Data Maintenance : BR invoice	Update entity in nf fatura		X
CTR Complementary Table Data Maintenance : BR invoice	Delete entity from nf fatura		X
CTR Complementary Table Data Maintenance : BR invoice due date	Get entities from nf fat ve	X	
CTR Complementary Table Data Maintenance : BR invoice due date	Add new entity to nf fat ve		X
CTR Complementary Table Data Maintenance : BR invoice due date	Get entity from nf fat ve by key	X	
CTR Complementary Table Data Maintenance : BR invoice due date	Update entity in nf fat ve		X
CTR Complementary Table Data Maintenance : BR invoice due date	Delete entity from nf fat ve		X
CTR Complementary Table Data Maintenance : BR nota fiscal taxes	Get entities from nf impost	X	
CTR Complementary Table Data Maintenance : BR nota fiscal taxes	Add new entity to nf impost		X
CTR Complementary Table Data Maintenance : BR nota fiscal taxes	Get entity from nf impost by key	X	
CTR Complementary Table Data Maintenance : BR nota fiscal taxes	Update entity in nf impost		X
CTR Complementary Table Data Maintenance : BR nota fiscal taxes	Delete entity from nf impost		X
CTR Complementary Table Data Maintenance : BR withholding taxes for N	Get entities from nf impwh	X	
CTR Complementary Table Data Maintenance : BR withholding taxes for N	Add new entity to nf impwh		X
CTR Complementary Table Data Maintenance : BR withholding taxes for N	Get entity from nf impwh by key	X	
CTR Complementary Table Data Maintenance : BR withholding taxes for N	Update entity in nf impwh		X
CTR Complementary Table Data Maintenance : BR withholding taxes for N	Delete entity from nf impwh		X

CTR Complementary Table Data Maintenance : BR NF for PIS cofins impc	Get entities from nf im ser	X	
CTR Complementary Table Data Maintenance : BR NF for PIS cofins impc	Add new entity to nf im ser		X
CTR Complementary Table Data Maintenance : BR NF for PIS cofins impc	Get entity from nf im ser by key	X	
CTR Complementary Table Data Maintenance : BR NF for PIS cofins impc	Update entity in nf im ser		X
CTR Complementary Table Data Maintenance : BR NF for PIS cofins impc	Delete entity from nf im ser		X
CTR Complementary Table Data Maintenance : BR NF complementary iNI	Get entities from nf inf co	X	
CTR Complementary Table Data Maintenance : BR NF complementary iNI	Add new entity to nf inf co		X
CTR Complementary Table Data Maintenance : BR NF complementary iNI	Get entity from nf inf co by key	X	
CTR Complementary Table Data Maintenance : BR NF complementary iNI	Update entity in nf inf co		X
CTR Complementary Table Data Maintenance : BR NF complementary iNI	Delete entity from nf inf co		X
CTR Complementary Table Data Maintenance : BR NF item	Get entities from nf item	X	
CTR Complementary Table Data Maintenance : BR NF item	Add new entity to nf item		X
CTR Complementary Table Data Maintenance : BR NF item	Get entity from nf item by key	X	
CTR Complementary Table Data Maintenance : BR NF item	Update entity in nf item		X
CTR Complementary Table Data Maintenance : BR NF item	Delete entity from nf item		X
CTR Complementary Table Data Maintenance : BR NF item complement	Get entities from nf it cpl	X	
CTR Complementary Table Data Maintenance : BR NF item complement	Add new entity to nf it cpl		X
CTR Complementary Table Data Maintenance : BR NF item complement	Get entity from nf it cpl by key	X	
CTR Complementary Table Data Maintenance : BR NF item complement	Update entity in nf it cpl		X
CTR Complementary Table Data Maintenance : BR NF item complement	Delete entity from nf it cpl		X
CTR Complementary Table Data Maintenance : BR NF item complement v	Get entities from nf it cpl v2	X	
CTR Complementary Table Data Maintenance : BR NF item complement v	Add new entity to nf it cpl v2		X
CTR Complementary Table Data Maintenance : BR NF item complement v	Get entity from nf it cpl v2 by key	X	
CTR Complementary Table Data Maintenance : BR NF item complement v	Update entity in nf it cpl v2		X
CTR Complementary Table Data Maintenance : BR NF item complement v	Delete entity from nf it cpl v2		X
CTR Complementary Table Data Maintenance : BR NF item with st comp i	Get entities from nf it st	X	
CTR Complementary Table Data Maintenance : BR NF item with st comp i	Add new entity to nf it st		X
CTR Complementary Table Data Maintenance : BR NF item with st comp i	Get entity from nf it st by key	X	
CTR Complementary Table Data Maintenance : BR NF item with st comp i	Update entity in nf it st		X
CTR Complementary Table Data Maintenance : BR NF item with st comp i	Delete entity from nf it st		X
CTR Complementary Table Data Maintenance : BR NF item fuel storage	Get entities from nf i comb	X	
CTR Complementary Table Data Maintenance : BR NF item fuel storage	Add new entity to nf i comb		X
CTR Complementary Table Data Maintenance : BR NF item fuel storage	Get entity from nf i comb by key	X	
CTR Complementary Table Data Maintenance : BR NF item fuel storage	Update entity in nf i comb		X
CTR Complementary Table Data Maintenance : BR NF item fuel storage	Delete entity from nf i comb		X
CTR Complementary Table Data Maintenance : BR collection and delivery	Get entities from nf loc ce	X	
CTR Complementary Table Data Maintenance : BR collection and delivery	Add new entity to nf loc ce		X
CTR Complementary Table Data Maintenance : BR collection and delivery	Get entity from nf loc ce by key	X	
CTR Complementary Table Data Maintenance : BR collection and delivery	Update entity in nf loc ce		X
CTR Complementary Table Data Maintenance : BR collection and delivery	Delete entity from nf loc ce		X
CTR Complementary Table Data Maintenance : BR bill of lading coll del pl	Get entities from nf loc ct	X	
CTR Complementary Table Data Maintenance : BR bill of lading coll del pl	Add new entity to nf loc ct		X
CTR Complementary Table Data Maintenance : BR bill of lading coll del pl	Get entity from nf loc ct by key	X	
CTR Complementary Table Data Maintenance : BR bill of lading coll del pl	Update entity in nf loc ct		X
CTR Complementary Table Data Maintenance : BR bill of lading coll del pl	Delete entity from nf loc ct		X
CTR Complementary Table Data Maintenance : BR NF consolid presumec	Get entities from nf luc pr	X	
CTR Complementary Table Data Maintenance : BR NF consolid presumec	Add new entity to nf luc pr		X
CTR Complementary Table Data Maintenance : BR NF consolid presumec	Get entity from nf luc pr by key	X	
CTR Complementary Table Data Maintenance : BR NF consolid presumec	Update entity in nf luc pr		X
CTR Complementary Table Data Maintenance : BR NF consolid presumec	Delete entity from nf luc pr		X
CTR Complementary Table Data Maintenance : BR modal	Get entities from nf modais	X	
CTR Complementary Table Data Maintenance : BR modal	Add new entity to nf modais		X
CTR Complementary Table Data Maintenance : BR modal	Get entity from nf modais by key	X	
CTR Complementary Table Data Maintenance : BR modal	Update entity in nf modais		X
CTR Complementary Table Data Maintenance : BR modal	Delete entity from nf modais		X
CTR Complementary Table Data Maintenance : BR nota fiscal note releas	Get entities from nf obs lc	X	
CTR Complementary Table Data Maintenance : BR nota fiscal note releas	Add new entity to nf obs lc		X
CTR Complementary Table Data Maintenance : BR nota fiscal note releas	Get entity from nf obs lc by key	X	
CTR Complementary Table Data Maintenance : BR nota fiscal note releas	Update entity in nf obs lc		X
CTR Complementary Table Data Maintenance : BR nota fiscal note releas	Delete entity from nf obs lc		X
CTR Complementary Table Data Maintenance : BR nota fiscal fuel operati	Get entities from nf opr co	X	
CTR Complementary Table Data Maintenance : BR nota fiscal fuel operati	Add new entity to nf opr co		X
CTR Complementary Table Data Maintenance : BR nota fiscal fuel operati	Get entity from nf opr co by key	X	
CTR Complementary Table Data Maintenance : BR nota fiscal fuel operati	Update entity in nf opr co		X
CTR Complementary Table Data Maintenance : BR nota fiscal fuel operati	Delete entity from nf opr co		X
CTR Complementary Table Data Maintenance : BR other tributary obligatic	Get entities from nf ot obt	X	
CTR Complementary Table Data Maintenance : BR other tributary obligatic	Add new entity to nf ot obt		X
CTR Complementary Table Data Maintenance : BR other tributary obligatic	Get entity from nf ot obt by key	X	
CTR Complementary Table Data Maintenance : BR other tributary obligatic	Update entity in nf ot obt		X
CTR Complementary Table Data Maintenance : BR other tributary obligatic	Delete entity from nf ot obt		X
CTR Complementary Table Data Maintenance : BR nota fiscal partners	Get entities from nf parc	X	
CTR Complementary Table Data Maintenance : BR nota fiscal partners	Add new entity to nf parc		X
CTR Complementary Table Data Maintenance : BR nota fiscal partners	Get entity from nf parc by key	X	
CTR Complementary Table Data Maintenance : BR nota fiscal partners	Update entity in nf parc		X
CTR Complementary Table Data Maintenance : BR nota fiscal partners	Delete entity from nf parc		X
CTR Complementary Table Data Maintenance : BR referenced process frc	Get entities from nf prc re	X	
CTR Complementary Table Data Maintenance : BR referenced process frc	Add new entity to nf prc re		X

CTR Complementary Table Data Maintenance : BR referenced process frc	Get entity from nf prc re by key	X	
CTR Complementary Table Data Maintenance : BR referenced process frc	Update entity in nf prc re		X
CTR Complementary Table Data Maintenance : BR referenced process frc	Delete entity from nf prc re		X
CTR Complementary Table Data Maintenance : BR invoiced terminal from	Get entities from nf ter fa	X	
CTR Complementary Table Data Maintenance : BR invoiced terminal from	Add new entity to nf ter fa		X
CTR Complementary Table Data Maintenance : BR invoiced terminal from	Get entity from nf ter fa by key	X	
CTR Complementary Table Data Maintenance : BR invoiced terminal from	Update entity in nf ter fa		X
CTR Complementary Table Data Maintenance : BR invoiced terminal from	Delete entity from nf ter fa		X
CTR Complementary Table Data Maintenance : BR nota fiscal type	Get entities from nf type	X	
CTR Complementary Table Data Maintenance : BR nota fiscal type	Add new entity to nf type		X
CTR Complementary Table Data Maintenance : BR nota fiscal type	Get entity from nf type by key	X	
CTR Complementary Table Data Maintenance : BR nota fiscal type	Update entity in nf type		X
CTR Complementary Table Data Maintenance : BR nota fiscal type	Delete entity from nf type		X
CTR Complementary Table Data Maintenance : BR NF transported volume	Get entities from nf vol tr	X	
CTR Complementary Table Data Maintenance : BR NF transported volume	Add new entity to nf vol tr		X
CTR Complementary Table Data Maintenance : BR NF transported volume	Get entity from nf vol tr by key	X	
CTR Complementary Table Data Maintenance : BR NF transported volume	Update entity in nf vol tr		X
CTR Complementary Table Data Maintenance : BR NF transported volume	Delete entity from nf vol tr		X
CTR Complementary Table Data Maintenance : BR journal entry gl acc rel	Get entities from num lanc	X	
CTR Complementary Table Data Maintenance : BR journal entry gl acc rel	Add new entity to num lanc		X
CTR Complementary Table Data Maintenance : BR journal entry gl acc rel	Get entity from num lanc by key	X	
CTR Complementary Table Data Maintenance : BR journal entry gl acc rel	Update entity in num lanc		X
CTR Complementary Table Data Maintenance : BR journal entry gl acc rel	Delete entity from num lanc		X
CTR Complementary Table Data Maintenance : BR ICMS obligation to col	Get entities from oBRi icms	X	
CTR Complementary Table Data Maintenance : BR ICMS obligation to col	Add new entity to oBRi icms		X
CTR Complementary Table Data Maintenance : BR ICMS obligation to col	Get entity from oBRi icms by key	X	
CTR Complementary Table Data Maintenance : BR ICMS obligation to col	Update entity in oBRi icms		X
CTR Complementary Table Data Maintenance : BR ICMS obligation to col	Delete entity from oBRi icms		X
CTR Complementary Table Data Maintenance : BR ICMS st oblig to collec	Get entities from ob icmsst	X	
CTR Complementary Table Data Maintenance : BR ICMS st oblig to collec	Add new entity to ob icmsst		X
CTR Complementary Table Data Maintenance : BR ICMS st oblig to collec	Get entity from ob icmsst by key	X	
CTR Complementary Table Data Maintenance : BR ICMS st oblig to collec	Update entity in ob icmsst		X
CTR Complementary Table Data Maintenance : BR ICMS st oblig to collec	Delete entity from ob icmsst		X
CTR Complementary Table Data Maintenance : BR ICMS obligation to col	Get entities from ob icms r	X	
CTR Complementary Table Data Maintenance : BR ICMS obligation to col	Add new entity to ob icms r		X
CTR Complementary Table Data Maintenance : BR ICMS obligation to col	Get entity from ob icms r by key	X	
CTR Complementary Table Data Maintenance : BR ICMS obligation to col	Update entity in ob icms r		X
CTR Complementary Table Data Maintenance : BR ICMS obligation to col	Delete entity from ob icms r		X
CTR Complementary Table Data Maintenance : BR external operations	Get entities from oper exte	X	
CTR Complementary Table Data Maintenance : BR external operations	Add new entity to oper exte		X
CTR Complementary Table Data Maintenance : BR external operations	Get entity from oper exte by key	X	
CTR Complementary Table Data Maintenance : BR external operations	Update entity in oper exte		X
CTR Complementary Table Data Maintenance : BR external operations	Delete entity from oper exte		X
CTR Complementary Table Data Maintenance : BR refis paes iNFormation	Get entities from opt re pa	X	
CTR Complementary Table Data Maintenance : BR refis paes iNFormation	Add new entity to opt re pa		X
CTR Complementary Table Data Maintenance : BR refis paes iNFormation	Get entity from opt re pa by key	X	
CTR Complementary Table Data Maintenance : BR refis paes iNFormation	Update entity in opt re pa		X
CTR Complementary Table Data Maintenance : BR refis paes iNFormation	Delete entity from opt re pa		X
CTR Complementary Table Data Maintenance : BR credit debit card transa	Get entities from op cartao	X	
CTR Complementary Table Data Maintenance : BR credit debit card transa	Add new entity to op cartao		X
CTR Complementary Table Data Maintenance : BR credit debit card transa	Get entity from op cartao by key	X	
CTR Complementary Table Data Maintenance : BR credit debit card transa	Update entity in op cartao		X
CTR Complementary Table Data Maintenance : BR credit debit card transa	Delete entity from op cartao		X
CTR Complementary Table Data Maintenance : BR pharmaceutic data cor	Get entities from op md cpl	X	
CTR Complementary Table Data Maintenance : BR pharmaceutic data cor	Add new entity to op md cpl		X
CTR Complementary Table Data Maintenance : BR pharmaceutic data cor	Get entity from op md cpl by key	X	
CTR Complementary Table Data Maintenance : BR pharmaceutic data cor	Update entity in op md cpl		X
CTR Complementary Table Data Maintenance : BR pharmaceutic data cor	Delete entity from op md cpl		X
CTR Complementary Table Data Maintenance : BR transact with elect pay	Get entities from op p elet	X	
CTR Complementary Table Data Maintenance : BR transact with elect pay	Add new entity to op p elet		X
CTR Complementary Table Data Maintenance : BR transact with elect pay	Get entity from op p elet by key	X	
CTR Complementary Table Data Maintenance : BR transact with elect pay	Update entity in op p elet		X
CTR Complementary Table Data Maintenance : BR transact with elect pay	Delete entity from op p elet		X
CTR Complementary Table Data Maintenance : BR other iNFormation	Get entities from outrasinf	X	
CTR Complementary Table Data Maintenance : BR other iNFormation	Add new entity to outrasinf		X
CTR Complementary Table Data Maintenance : BR other iNFormation	Get entity from outrasinf by key	X	
CTR Complementary Table Data Maintenance : BR other iNFormation	Update entity in outrasinf		X
CTR Complementary Table Data Maintenance : BR other iNFormation	Delete entity from outrasinf		X
CTR Complementary Table Data Maintenance : BR other iNFo presumed	Get entities from outra inf	X	
CTR Complementary Table Data Maintenance : BR other iNFo presumed	Add new entity to outra inf		X
CTR Complementary Table Data Maintenance : BR other iNFo presumed	Get entity from outra inf by key	X	
CTR Complementary Table Data Maintenance : BR other iNFo presumed	Update entity in outra inf		X
CTR Complementary Table Data Maintenance : BR other iNFo presumed	Delete entity from outra inf		X
CTR Complementary Table Data Maintenance : BR partner data	Get entities from part	X	
CTR Complementary Table Data Maintenance : BR partner data	Add new entity to part		X
CTR Complementary Table Data Maintenance : BR partner data	Get entity from part by key	X	
CTR Complementary Table Data Maintenance : BR partner data	Update entity in part		X

CTR Complementary Table Data Maintenance : BR partner data	Delete entity from part		X
CTR Complementary Table Data Maintenance : BR permanent part on affi	Get entities from parti per	X	
CTR Complementary Table Data Maintenance : BR permanent part on affi	Add new entity to parti per		X
CTR Complementary Table Data Maintenance : BR permanent part on affi	Get entity from parti per by key	X	
CTR Complementary Table Data Maintenance : BR permanent part on affi	Update entity in parti per		X
CTR Complementary Table Data Maintenance : BR permanent part on affi	Delete entity from parti per		X
CTR Complementary Table Data Maintenance : BR partners change log	Get entities from part alt	X	
CTR Complementary Table Data Maintenance : BR partners change log	Add new entity to part alt		X
CTR Complementary Table Data Maintenance : BR partners change log	Get entity from part alt by key	X	
CTR Complementary Table Data Maintenance : BR partners change log	Update entity in part alt		X
CTR Complementary Table Data Maintenance : BR partners change log	Delete entity from part alt		X
CTR Complementary Table Data Maintenance : BR participants in consort	Get entities from part cons	X	
CTR Complementary Table Data Maintenance : BR participants in consort	Add new entity to part cons		X
CTR Complementary Table Data Maintenance : BR participants in consort	Get entity from part cons by key	X	
CTR Complementary Table Data Maintenance : BR participants in consort	Update entity in part cons		X
CTR Complementary Table Data Maintenance : BR participants in consort	Delete entity from part cons		X
CTR Complementary Table Data Maintenance : BR partner data complem	Get entities from part cpl	X

Consolidation Profit Center Hierarchy : Batch requests	Send a group of requests		X
Consolidation Sales District : Consolidation sales district	Get entities from cnsldtn sales district	X	
Consolidation Sales District : Consolidation sales district	Add new entity to cnsldtn sales district		X
Consolidation Sales District : Consolidation sales district	Get entity from cnsldtn sales district by key	X	
Consolidation Sales District : Consolidation sales district	Update entity in cnsldtn sales district		X
Consolidation Sales District : Consolidation sales district	Delete entity from cnsldtn sales district		X
Consolidation Sales District : Consolidation sales district: Text	Get entities from related text	X	
Consolidation Sales District : Consolidation sales district: Text	Add new entity to related text		X
Consolidation Sales District : Consolidation sales district: Text	Get related sales district	X	
Consolidation Sales District : Consolidation sales district: Text	Get entities from cnsldtn sales district text	X	
Consolidation Sales District : Consolidation sales district: Text	Get entity from cnsldtn sales district text by key	X	
Consolidation Sales District : Consolidation sales district: Text	Update entity in cnsldtn sales district text		X
Consolidation Sales District : Consolidation sales district: Text	Delete entity from cnsldtn sales district text		X
Consolidation Sales District : Batch requests	Send a group of requests		X
Consolidation Sales District Hierarchy : Consolidation sales district hierarc	Get entities from cnsldtn sales district hierarchy	X	
Consolidation Sales District Hierarchy : Consolidation sales district hierarc	Get entity from cnsldtn sales district hierarchy by key	X	
Consolidation Sales District Hierarchy : Cnsldtn sales district hierarchy no	Get entities from related hierarchy node	X	
Consolidation Sales District Hierarchy : Cnsldtn sales district hierarchy no	Get related hierarchy	X	
Consolidation Sales District Hierarchy : Cnsldtn sales district hierarchy no	Get entities from cnsldtn sales district hier node	X	
Consolidation Sales District Hierarchy : Cnsldtn sales district hierarchy no	Get entity from cnsldtn sales district hier node by key	X	
Consolidation Sales District Hierarchy : Cnsldtn sales district hierarchy: Te	Get entities from related text	X	
Consolidation Sales District Hierarchy : Cnsldtn sales district hierarchy: Te	Get related hierarchy	X	
Consolidation Sales District Hierarchy : Cnsldtn sales district hierarchy: Te	Get entities from cnsldtn sales district hier text	X	
Consolidation Sales District Hierarchy : Cnsldtn sales district hierarchy: Te	Get entity from cnsldtn sales district hier text by key	X	
Consolidation Sales District Hierarchy : Cnsldtn sales district hier node: Te	Get entities from related text	X	
Consolidation Sales District Hierarchy : Cnsldtn sales district hier node: Te	Get related hierarchy node	X	
Consolidation Sales District Hierarchy : Cnsldtn sales district hier node: Te	Get entities from cnsldtnsalesdstrcthiernodetext	X	
Consolidation Sales District Hierarchy : Cnsldtn sales district hier node: Te	Get entity from cnsldtnsalesdstrcthiernodetext by key	X	
Consolidation Sales District Hierarchy : Batch requests	Send a group of requests		X
Consolidation Sales Organization : Consolidation sales organization	Get entities from cnsldtn sales organization	X	
Consolidation Sales Organization : Consolidation sales organization	Add new entity to cnsldtn sales organization		X

Consolidation Sales Organization : Consolidation sales organization	Get entity from cnsldtn sales organization by key	X	
Consolidation Sales Organization : Consolidation sales organization	Update entity in cnsldtn sales organization		X
Consolidation Sales Organization : Consolidation sales organization	Delete entity from cnsldtn sales organization		X
Consolidation Sales Organization : Consolidation sales organization: Text	Get entities from related text	X	
Consolidation Sales Organization : Consolidation sales organization: Text	Add new entity to related text		X
Consolidation Sales Organization : Consolidation sales organization: Text	Get related sales organization	X	
Consolidation Sales Organization : Consolidation sales organization: Text	Get entities from cnsldtn sales organization text	X	
Consolidation Sales Organization : Consolidation sales organization: Text	Get entity from cnsldtn sales organization text by key	X	
Consolidation Sales Organization : Consolidation sales organization: Text	Update entity in cnsldtn sales organization text		X
Consolidation Sales Organization : Consolidation sales organization: Text	Delete entity from cnsldtn sales organization text		X
Consolidation Sales Organization : Batch requests	Send a group of requests		X
Consolidation Segment : Consolidation segment	Get entities from cnsldtn segment	X	
Consolidation Segment : Consolidation segment	Add new entity to cnsldtn segment		X
Consolidation Segment : Consolidation segment	Get entity from cnsldtn segment by key	X	
Consolidation Segment : Consolidation segment	Update entity in cnsldtn segment		X
Consolidation Segment : Consolidation segment	Delete entity from cnsldtn segment		X
Consolidation Segment : Consolidation segment: Text	Get entities from related text	X	
Consolidation Segment : Consolidation segment: Text	Add new entity to related text		X
Consolidation Segment : Consolidation segment: Text	Get related segment	X	
Consolidation Segment : Consolidation segment: Text	Get entities from cnsldtn segment text	X	
Consolidation Segment : Consolidation segment: Text	Get entity from cnsldtn segment text by key	X	
Consolidation Segment : Consolidation segment: Text	Update entity in cnsldtn segment text		X
Consolidation Segment : Consolidation segment: Text	Delete entity from cnsldtn segment text		X
Consolidation Segment : Batch requests	Send a group of requests		X
Consolidation Segment Hierarchy : Consolidation segment hierarchy	Get entities from cnsldtn segment hierarchy	X	
Consolidation Segment Hierarchy : Consolidation segment hierarchy	Get entity from cnsldtn segment hierarchy by key	X	
Consolidation Segment Hierarchy : Consolidation segment hierarchy node	Get entities from related hierarchy node	X	
Consolidation Segment Hierarchy : Consolidation segment hierarchy node	Get related hierarchy	X	
Consolidation Segment Hierarchy : Consolidation segment hierarchy node	Get entities from cnsldtn segment hierarchy node	X	
Consolidation Segment Hierarchy : Consolidation segment hierarchy node	Get entity from cnsldtn segment hierarchy node by key	X	
Consolidation Segment Hierarchy : Consolidation segment hierarchy: Text	Get entities from related text	X	
Consolidation Segment Hierarchy : Consolidation segment hierarchy: Text	Get related hierarchy	X	
Consolidation Segment Hierarchy : Consolidation segment hierarchy: Text	Get entities from cnsldtn segment hierarchy text	X	
Consolidation Segment Hierarchy : Consolidation segment hierarchy: Text	Get entity from cnsldtn segment hierarchy text by key	X	
Consolidation Segment Hierarchy : Cnsldtn segment hierarchy node: Text	Get entities from related text	X	
Consolidation Segment Hierarchy : Cnsldtn segment hierarchy node: Text	Get related hierarchy node	X	
Consolidation Segment Hierarchy : Cnsldtn segment hierarchy node: Text	Get entities from cnsldtn segment hier node text	X	
Consolidation Segment Hierarchy : Cnsldtn segment hierarchy node: Text	Get entity from cnsldtn segment hier node text by key	X	
Consolidation Segment Hierarchy : Batch requests	Send a group of requests		X
Consolidation Supplier : Consolidation supplier	Get entities from cnsldtn supplier	X	
Consolidation Supplier : Consolidation supplier	Add new entity to cnsldtn supplier		X
Consolidation Supplier : Consolidation supplier	Get entity from cnsldtn supplier by key	X	
Consolidation Supplier : Consolidation supplier	Update entity in cnsldtn supplier		X
Consolidation Supplier : Consolidation supplier	Delete entity from cnsldtn supplier		X
Consolidation Supplier : Consolidation supplier: Text	Get entities from related text	X	
Consolidation Supplier : Consolidation supplier: Text	Add new entity to related text		X
Consolidation Supplier : Consolidation supplier: Text	Get related supplier	X	
Consolidation Supplier : Consolidation supplier: Text	Get entities from cnsldtn supplier text	X	
Consolidation Supplier : Consolidation supplier: Text	Get entity from cnsldtn supplier text by key	X	
Consolidation Supplier : Consolidation supplier: Text	Update entity in cnsldtn supplier text		X
Consolidation Supplier : Consolidation supplier: Text	Delete entity from cnsldtn supplier text		X
Consolidation Supplier : Batch requests	Send a group of requests		X
Consolidation Task - Read : Cnsldtn dc task document type assignment	Get entities from cnsldtntskdoctypedtacollection	X	
Consolidation Task - Read : Cnsldtn dc task document type assignment	Get entity from cnsldtntskdoctypedtacollection by key	X	
Consolidation Task - Read : Consolidation task	Get related cnsldtn task	X	
Consolidation Task - Read : Consolidation task	Get entities from related cnsldtntskdoctypedtacoll	X	
Consolidation Task - Read : Consolidation task	Get entities from consolidation task	X	
Consolidation Task - Read : Consolidation task	Get entity from consolidation task by key	X	
Consolidation Task - Read : Batch requests	Send a group of requests		X
Consolidation Task Group - Read : Consolidation task group task assignm	Get entities from cnsldtn task group task assignment	X	
Consolidation Task Group - Read : Consolidation task group task assignm	Get entity from cnsldtn task group task assignment by key	X	
Consolidation Task Group - Read : Consolidation task group	Get related cnsldtn task group	X	
Consolidation Task Group - Read : Consolidation task group	Get entities from related cnsldtn task assignment	X	
Consolidation Task Group - Read : Consolidation task group	Get entities from consolidation task group	X	
Consolidation Task Group - Read : Consolidation task group	Invoke function get unit tasks	X	
Consolidation Task Group - Read : Consolidation task group	Get entity from consolidation task group by key	X	
Consolidation Task Group - Read : Batch requests	Send a group of requests		X
Consolidation Task Group Assignment - Read : Consolidation task group a	Get entities from cnsldtn task group assignment	X	
Consolidation Task Group Assignment - Read : Consolidation task group a	Get entity from cnsldtn task group assignment by key	X	
Consolidation Task Group Assignment - Read : Batch requests	Send a group of requests		X
Consolidation Task Log - Read : Consolidation task log item data entry	Get entities from cnsldtn task log item data entry	X	
Consolidation Task Log - Read : Consolidation task log item data entry	Get entity from cnsldtn task log item data entry by key	X	
Consolidation Task Log - Read : Consolidation task log	Get related consolidation task log	X	
Consolidation Task Log - Read : Consolidation task log	Get entities from consolidation task log	X	
Consolidation Task Log - Read : Consolidation task log	Get entity from consolidation task log by key	X	
Consolidation Task Log - Read : Cnsldtn task log item line validation	Get related consolidation task log	X	
Consolidation Task Log - Read : Cnsldtn task log item line validation	Get entities from cnsldtntsklgitemlinevalidation	X	

Consolidation Task Log - Read : Cnsldtn task log item line validation	Get entity from cnsldtntsklgitemlinevalidation by key	X	
Consolidation Task Log - Read : Cnsldtn tsk lg item currency translation	Get related consolidation task log	X	
Consolidation Task Log - Read : Cnsldtn tsk lg item currency translation	Get entities from cnsldtntsklgitmcrcytranslation	X	
Consolidation Task Log - Read : Cnsldtn tsk lg item currency translation	Get entity from cnsldtntsklgitmcrcytranslation by key	X	
Consolidation Task Log - Read : Cnsldtn task log item reclassification	Get related consolidation task log	X	
Consolidation Task Log - Read : Cnsldtn task log item reclassification	Get entities from cnsldtntsklgitmrclassfctn	X	
Consolidation Task Log - Read : Cnsldtn task log item reclassification	Get entity from cnsldtntsklgitmrclassfctn by key	X	
Consolidation Task Log - Read : Cnsldtn task log item manual posting	Get related consolidation task log	X	
Consolidation Task Log - Read : Cnsldtn task log item manual posting	Get entities from cnsldtn tsk log itm manual posting	X	
Consolidation Task Log - Read : Cnsldtn task log item manual posting	Get entity from cnsldtn tsk log itm manual posting by key	X	
Consolidation Task Log - Read : Consolidation task log message	Get related consolidation task log	X	
Consolidation Task Log - Read : Consolidation task log message	Get entities from consolidation task log message	X	
Consolidation Task Log - Read : Consolidation task log message	Get entity from consolidation task log message by key	X	
Consolidation Task Log - Read : Batch requests	Send a group of requests		X
Consolidation Unit Data Collection : Cons unit data collection selection	Get entities from cnsldtn unit data collection	X	
Consolidation Unit Data Collection : Cons unit data collection selection	Get entity from cnsldtn unit data collection by key	X	
Consolidation Unit Data Collection : Cons unit data coll selection: Text	Get entities from related text	X	
Consolidation Unit Data Collection : Cons unit data coll selection: Text	Get related cnsldtn unit data collection	X	
Consolidation Unit Data Collection : Cons unit data coll selection: Text	Get entities from cnsldtn unit data collection text	X	
Consolidation Unit Data Collection : Cons unit data coll selection: Text	Get entity from cnsldtn unit data collection text by key	X	
Consolidation Unit Data Collection : Batch requests	Send a group of requests		X
Consolidation Unit Task Run : Consolidation unit task run	Get entities from consolidation unit task run	X	
Consolidation Unit Task Run : Consolidation unit task run	Invoke function get task status	X	
Consolidation Unit Task Run : Consolidation unit task run	Invoke action block		X
Consolidation Unit Task Run : Consolidation unit task run	Invoke action simulate		X
Consolidation Unit Task Run : Consolidation unit task run	Invoke action executetask		X
Consolidation Unit Task Run : Consolidation unit task run	Get entity from consolidation unit task run by key	X	
Consolidation Unit Task Run : Consolidation unit task run	Invoke action unblock		X
Consolidation Unit Task Run : Consolidation unit task run	Invoke action reset		X
Consolidation Unit Task Run : Batch requests	Send a group of requests		X
Constraint Net : Constraints	Get entities from varcnfconstraint	X	
Constraint Net : Constraints	Get entity from varcnfconstraint by key	X	
Constraint Net : Constraints	Delete entity from varcnfconstraint		X
Constraint Net : Constraint nets	Get related constraintnet	X	
Constraint Net : Constraint nets	Get entities from related constraint	X	
Constraint Net : Constraint nets	Add new entity to related constraint		X
Constraint Net : Constraint nets	Get entities from varcnfconstraint net	X	
Constraint Net : Constraint nets	Add new entity to varcnfconstraint net		X
Constraint Net : Constraint nets	Get entity from varcnfconstraint net by key	X	
Constraint Net : Constraint nets	Delete entity from varcnfconstraint net		X
Constraint Net : Historical constraints	Get entities from related historicalconstraint	X	
Constraint Net : Historical constraints	Add new entity to related historicalconstraint		X
Constraint Net : Historical constraints	Get related constraint	X	
Constraint Net : Historical constraints	Get related constraintnet	X	
Constraint Net : Historical constraints	Get entities from varcnfhistlconstraint	X	
Constraint Net : Historical constraints	Get entity from varcnfhistlconstraint by key	X	
Constraint Net : Historical constraints	Update entity in varcnfhistlconstraint		X
Constraint Net : Constraint source codes	Get entities from related source code	X	
Constraint Net : Constraint source codes	Add new entity to related source code		X
Constraint Net : Constraint source codes	Get related constraint	X	
Constraint Net : Constraint source codes	Get related constraintnet	X	
Constraint Net : Constraint source codes	Get related source code	X	
Constraint Net : Constraint source codes	Get entities from varcnfcstrtsourcecode	X	
Constraint Net : Constraint source codes	Get entity from varcnfcstrtsourcecode by key	X	
Constraint Net : Constraint texts	Get entities from related text	X	
Constraint Net : Constraint texts	Add new entity to related text		X
Constraint Net : Constraint texts	Get related constraint	X	
Constraint Net : Constraint texts	Get related constraintnet	X	
Constraint Net : Constraint texts	Get entities from varcnfconstraint text	X	
Constraint Net : Constraint texts	Get entity from varcnfconstraint text by key	X	
Constraint Net : Constraint texts	Delete entity from varcnfconstraint text		X
Constraint Net : Historical constraint nets	Get entities from related historicalconstraintnet	X	
Constraint Net : Historical constraint nets	Add new entity to related historicalconstraintnet		X
Constraint Net : Historical constraint nets	Get related constraintnet	X	
Constraint Net : Historical constraint nets	Get entities from related historicalconstraint	X	
Constraint Net : Historical constraint nets	Get entities from varcnfhistlconstraint net	X	
Constraint Net : Historical constraint nets	Get entity from varcnfhistlconstraint net by key	X	
Constraint Net : Historical constraint nets	Update entity in varcnfhistlconstraint net		X
Constraint Net : Constraint net texts	Get entities from related text	X	
Constraint Net : Constraint net texts	Add new entity to related text		X

Pack Containers : FI shipment packaging item	Get entities from shipment packaging item	X	
Pack Containers : FI shipment packaging item	Get entity from shipment packaging item by key	X	
Pack Containers : FI shipment packaging item	Invoke action delete packaging assignment		X
Pack Containers : Shpt stage assign to packaging	Get entities from related shptstgeassgmt	X	
Pack Containers : Shpt stage assign to packaging	Add new entity to related shptstgeassgmt		X
Pack Containers : Shpt stage assign to packaging	Get related shptpackggunit	X	
Pack Containers : Shpt stage assign to packaging	Get entities from shptstageassgpackitem	X	
Pack Containers : Shpt stage assign to packaging	Get entity from shptstageassgpackitem by key	X	
Pack Containers : Shpt stage assign to packaging	Delete entity from shptstageassgpackitem		X
Pack Containers : Batch requests	Send a group of requests		X
Partner Role : Partner role	Get entities from partner role	X	
Partner Role : Partner role	Add new entity to partner role		X
Partner Role : Partner role	Get entity from partner role by key	X	
Partner Role : Partner role	Update entity in partner role		X
Partner Role : Partner role	Invoke action setitemtonoTDeleted		X
Partner Role : Partner role	Invoke action setitemtodeleted		X
Partner Role : Batch requests	Send a group of requests		X
Physical-Chemical Properties : Physical chemical boiling point	Get entities from phys chml boiling po int	X	
Physical-Chemical Properties : Physical chemical boiling point	Get entity from phys chml boiling po int by key	X	
Physical-Chemical Properties : Physical chemical property	Get related physchmlprpty	X	
Physical-Chemical Properties : Physical chemical property	Get entities from related boiling po int	X	
Physical-Chemical Properties : Physical chemical property	Get entities from physical chemical property	X	
Physical-Chemical Properties : Physical chemical property	Invoke action create and release version		X
Physical-Chemical Properties : Physical chemical property	Invoke action validate		X
Physical-Chemical Properties : Physical chemical property	Get entity from physical chemical property by key	X	
Physical-Chemical Properties : Physical chemical bulk density	Get related bulk density	X	
Physical-Chemical Properties : Physical chemical bulk density	Get entities from phys chml bulk density	X	
Physical-Chemical Properties : Physical chemical bulk density	Get entity from phys chml bulk density by key	X	
Physical-Chemical Properties : Physical chemical color	Get related color	X	
Physical-Chemical Properties : Physical chemical color	Get entities from phys chml color	X	
Physical-Chemical Properties : Physical chemical color	Get entity from phys chml color by key	X	
Physical-Chemical Properties : Physical chemical density	Get related density	X	
Physical-Chemical Properties : Physical chemical density	Get entities from phys chml density	X	
Physical-Chemical Properties : Physical chemical density	Get entity from phys chml density by key	X	

Physical-Chemical Properties : Physchem property evaporation rate	Get related evaporation rate	X	
Physical-Chemical Properties : Physchem property evaporation rate	Get entities from phys chml evaporation rate	X	
Physical-Chemical Properties : Physchem property evaporation rate	Get entity from phys chml evaporation rate by key	X	
Physical-Chemical Properties : Physical chemical flow time	Get related flowtime	X	
Physical-Chemical Properties : Physical chemical flow time	Get entities from phys chml flow time	X	
Physical-Chemical Properties : Physical chemical flow time	Get entity from phys chml flow time by key	X	
Physical-Chemical Properties : Physical chemical property form	Get related form	X	
Physical-Chemical Properties : Physical chemical property form	Get entities from phys chml form	X	
Physical-Chemical Properties : Physical chemical property form	Get entity from phys chml form by key	X	
Physical-Chemical Properties : Physical chemical melting point	Get related melting po int	X	
Physical-Chemical Properties : Physical chemical melting point	Get entities from phys chml melting po int	X	
Physical-Chemical Properties : Physical chemical melting point	Get entity from phys chml melting po int by key	X	
Physical-Chemical Properties : Physical chemical molar mass	Get related molarmass	X	
Physical-Chemical Properties : Physical chemical molar mass	Get entities from phys chml molar mass	X	
Physical-Chemical Properties : Physical chemical molar mass	Get entity from phys chml molar mass by key	X	
Physical-Chemical Properties : Physical chemical odor	Get related odor	X	
Physical-Chemical Properties : Physical chemical odor	Get entities from phys chml odor	X	
Physical-Chemical Properties : Physical chemical odor	Get entity from phys chml odor by key	X	
Physical-Chemical Properties : Physical chemical odor threshold	Get related odor threshold	X	
Physical-Chemical Properties : Physical chemical odor threshold	Get entities from phys chml odor threshold	X	
Physical-Chemical Properties : Physical chemical odor threshold	Get entity from phys chml odor threshold by key	X	
Physical-Chemical Properties : Physical chemical property particle size	Get related physchmlprpty	X	
Physical-Chemical Properties : Physical chemical property particle size	Get entities from related particle size	X	
Physical-Chemical Properties : Physical chemical property particle size	Get entities from phys chml particle size	X	
Physical-Chemical Properties : Physical chemical property particle size	Get entity from phys chml particle size by key	X	
Physical-Chemical Properties : Physchem particle size distribution	Get related physchmlprpty	X	
Physical-Chemical Properties : Physchem particle size distribution	Get entities from related particle size distr	X	
Physical-Chemical Properties : Physchem particle size distribution	Get entities from phys chml particle size distr	X	
Physical-Chemical Properties : Physchem particle size distribution	Get entity from phys chml particle size distr by key	X	
Physical-Chemical Properties : Physical chemical partition coefficient	Get related physchmlprpty	X	
Physical-Chemical Properties : Physical chemical partition coefficient	Get entities from related partitioncoefficient	X	
Physical-Chemical Properties : Physical chemical partition coefficient	Get entities from phys chml partition coefficient	X	
Physical-Chemical Properties : Physical chemical partition coefficient	Get entity from phys chml partition coefficient by key	X	
Physical-Chemical Properties : Physical chemical property ph scale	Get related phscale	X	
Physical-Chemical Properties : Physical chemical property ph scale	Get entities from physchmlphscale	X	
Physical-Chemical Properties : Physical chemical property ph scale	Get entity from physchmlphscale by key	X	
Physical-Chemical Properties : Physical chemical state of matter	Get related physicalstate	X	
Physical-Chemical Properties : Physical chemical state of matter	Get entities from physchmlphysicalstate	X	
Physical-Chemical Properties : Physical chemical state of matter	Get entity from physchmlphysicalstate by key	X	
Physical-Chemical Properties : Physical chemical relative density	Get related relative density	X	
Physical-Chemical Properties : Physical chemical relative density	Get entities from phys chml relative density	X	
Physical-Chemical Properties : Physical chemical relative density	Get entity from phys chml relative density by key	X	
Physical-Chemical Properties : Physical chemical relative vapor density	Get related relative vapor density	X	
Physical-Chemical Properties : Physical chemical relative vapor density	Get entities from phys chml relative vapor density	X	
Physical-Chemical Properties : Physical chemical relative vapor density	Get entity from phys chml relative vapor density by key	X	
Physical-Chemical Properties : Physchem property vapor pressure	Get related vapor pressure	X	
Physical-Chemical Properties : Physchem property vapor pressure	Get entities from phys chml vapor pressure	X	
Physical-Chemical Properties : Physchem property vapor pressure	Get entity from phys chml vapor pressure by key	X	
Physical-Chemical Properties : Physical chemical dynamic viscosity	Get related physchmlprpty	X	
Physical-Chemical Properties : Physical chemical dynamic viscosity	Get entities from related viscosity dynamic	X	
Physical-Chemical Properties : Physical chemical dynamic viscosity	Get entities from phys chml viscosity dynamic	X	
Physical-Chemical Properties : Physical chemical dynamic viscosity	Get entity from phys chml viscosity dynamic by key	X	
Physical-Chemical Properties : Physical chemical kinematic viscosity	Get related viscosity kinematic	X	
Physical-Chemical Properties : Physical chemical kinematic viscosity	Get entities from phys chml viscosity kinematic	X	
Physical-Chemical Properties : Physical chemical kinematic viscosity	Get entity from phys chml viscosity kinematic by key	X	
Physical-Chemical Properties : Physical chemical water solubility	Get related physchmlprpty	X	
Physical-Chemical Properties : Physical chemical water solubility	Get entities from related water solubility	X	
Physical-Chemical Properties : Physical chemical water solubility	Get entities from phys chml water solubility	X	
Physical-Chemical Properties : Physical chemical water solubility	Get entity from phys chml water solubility by key	X	
Physical-Chemical Properties : Batch requests	Send a group of requests		X
Planned Order : Planned order capacity	Get entities from planned order capacity	X	
Planned Order : Planned order capacity	Get entity from planned order capacity by key	X	
Planned Order : Planned order capacity	Invoke action schedule planned order operation		X
Planned Order : Planned order	Get related planned order	X	
Planned Order : Planned order	Get entities from related planned order capacity	X	
Planned Order : Planned order	Get entities from planned order header	X	
Planned Order : Planned order	Add new entity to planned order header		X
Planned Order : Planned order	Get entity from planned order header by key	X	
Planned Order : Planned order	Update entity in planned order header		X
Planned Order : Planned order	Delete entity from planned order header		X
Planned Order : Planned order	Invoke action schedule planned order		X
Planned Order : Planned order component	Get related planned order	X	
Planned Order : Planned order component	Get entities from related plannedordercomponent	X	
Planned Order : Planned order component	Add new entity to related plannedordercomponent		X
Planned Order : Planned order component	Get entities from plannedordercomponent	X	
Planned Order : Planned order component	Get entity from plannedordercomponent by key	X	
Planned Order : Planned order component	Update entity in plannedordercomponent		X

Planned Order : Planned order component	Delete entity from plannedordercomponent		X
Planned Order : Batch requests	Send a group of requests		X
Plant Substitution : Plant substitution	Get entities from plant substitution	X	
Plant Substitution : Plant substitution	Add new entity to plant substitution		X
Plant Substitution : Plant substitution	Get entity from plant substitution by key	X	
Plant Substitution : Plant substitution	Update entity in plant substitution		X
Plant Substitution : Plant substitution	Delete entity from plant substitution		X
Plant Substitution : Batch requests	Send a group of requests		X
Plant Substitution Control : Plant substitution control	Get entities from plantsubstnctrl	X	
Plant Substitution Control : Plant substitution control	Add new entity to plantsubstnctrl		X
Plant Substitution Control : Plant substitution control	Get entity from plantsubstnctrl by key	X	
Plant Substitution Control : Plant substitution control	Update entity in plantsubstnctrl		X
Plant Substitution Control : Plant substitution control	Delete entity from plantsubstnctrl		X
Plant Substitution Control : Plant substitution control group	Get entities from related control group	X	
Plant Substitution Control : Plant substitution control group	Add new entity to related control group		X
Plant Substitution Control : Plant substitution control group	Get related control	X	
Plant Substitution Control : Plant substitution control group	Get entities from plantsubstnctrlgrp	X	
Plant Substitution Control : Plant substitution control group	Get entity from plantsubstnctrlgrp by key	X	
Plant Substitution Control : Plant substitution control group	Delete entity from plantsubstnctrlgrp		X
Plant Substitution Control : Plant substitution control: Text	Get entities from related text	X	
Plant Substitution Control : Plant substitution control: Text	Add new entity to related text		X
Plant Substitution Control : Plant substitution control: Text	Get related control	X	
Plant Substitution Control : Plant substitution control: Text	Get entities from plantsubstnctrl text	X	
Plant Substitution Control : Plant substitution control: Text	Get entity from plantsubstnctrl text by key	X	
Plant Substitution Control : Plant substitution control: Text	Update entity in plantsubstnctrl text		X
Plant Substitution Control : Plant substitution control: Text	Delete entity from plantsubstnctrl text		X
Plant Substitution Control : Batch requests	Send a group of requests		X
Plant Substitution Exclusion : Plant substitution exclusion	Get entities from plant exclusion	X	
Plant Substitution Exclusion : Plant substitution exclusion	Add new entity to plant exclusion		X
Plant Substitution Exclusion : Plant substitution exclusion	Get entity from plant exclusion by key	X	
Plant Substitution Exclusion : Plant substitution exclusion	Update entity in plant exclusion		X
Plant Substitution Exclusion : Plant substitution exclusion	Delete entity from plant exclusion		X
Plant Substitution Exclusion : Batch requests	Send a group of requests		X
Plant Substitution Group : Plant substitution group	Get entities from a plant substn grp	X	
Plant Substitution Group : Plant substitution group	Add new entity to a plant substn grp		X
Plant Substitution Group : Plant substitution group	Get entity from a plant substn grp by key	X	
Plant Substitution Group : Plant substitution group	Update entity in a plant substn grp		X
Plant Substitution Group : Plant substitution group	Delete entity from a plant substn grp		X
Plant Substitution Group : Plant substitution group text	Get entities from related text	X	
Plant Substitution Group : Plant substitution group text	Add new entity to related text		X
Plant Substitution Group : Plant substitution group text	Get related group	X	
Plant Substitution Group : Plant substitution group text	Get entities from a plant substn grp text	X	
Plant Substitution Group : Plant substitution group text	Get entity from a plant substn grp text by key	X	
Plant Substitution Group : Plant substitution group text	Update entity in a plant substn grp text		X
Plant Substitution Group : Plant substitution group text	Delete entity from a plant substn grp text		X
Plant Substitution Group : Batch requests	Send a group of requests		X
Poison Center Notification : Poison center notification country	Get entities from pcncountry	X	
Poison Center Notification : Poison center notification country	Get entity from pcncountry by key	X	
Poison Center Notification : Poison center notification detail	Get related pcndetail	X	
Poison Center Notification : Poison center notification detail	Get entities from related pcncountry	X	
Poison Center Notification : Poison center notification detail	Get entities from pcndetail	X	
Poison Center Notification : Poison center notification detail	Get entity from pcndetail by key	X	
Poison Center Notification : Poison center notification	Get related poison center notification	X	
Poison Center Notification : Poison center notification	Get related poison center notification	X	
Poison Center Notification : Poison center notification	Get related pcndetail	X	
Poison Center Notification : Poison center notification	Get entities from poison center notification	X	
Poison Center Notification : Poison center notification	Invoke action create and release version		X
Poison Center Notification : Poison center notification	Invoke action validate		X
Poison Center Notification : Poison center notification	Get entity from poison center notification by key	X	
Poison Center Notification : Batch requests	Send a group of requests		X
Polymer Composition : Polymer component	Get entities from polymercomponent	X	
Polymer Composition : Polymer component	Get entity from polymercomponent by key	X	
Polymer Composition : Polymer com position	Get related com position	X	
Polymer Composition : Polymer com position	Get entities from related component	X	
Polymer Composition : Polymer com position	Get entities from polymer com position	X	
Polymer Composition : Polymer com position	Invoke action create and release version		X
Polymer Composition : Polymer com position	Invoke action validate		X
Polymer Composition : Polymer com position	Get entity from polymer com position by key	X	
Polymer Composition : Batch requests	Send a group of requests		X
Preferred Supplier List : Prpsd company code for suplr list	Get entities from suplr list proposed company code	X	
Preferred Supplier List : Prpsd company code for suplr list	Invoke action proposetoadd company code		X
Preferred Supplier List : Prpsd company code for suplr list	Invoke action proposetodelete company code		X
Preferred Supplier List : Prpsd company code for suplr list	Get entity from suplr list proposed company code by key	X	
Preferred Supplier List : Prpsd company code for suplr list	Invoke action reject company code proposal		X
Preferred Supplier List : Prpsd company code for suplr list	Invoke action accept company code proposal		X
Preferred Supplier List : Prpsd company code for suplr list	Invoke action delete proposed company code		X
Preferred Supplier List : Supplier list	Get related supplier list tp	X	

Preferred Supplier List : Supplier list	Get entities from related suplr list prpsd company code tp	X	
Preferred Supplier List : Supplier list	Get entities from supplier list	X	
Preferred Supplier List : Supplier list	Add new entity to supplier list		X
Preferred Supplier List : Supplier list	Invoke action createuserspecifiedlist		X
Preferred Supplier List : Supplier list	Get entity from supplier list by key	X	
Preferred Supplier List : Supplier list	Update entity in supplier list		X
Preferred Supplier List : Supplier list	Invoke action deactivatesupplierlist		X
Preferred Supplier List : Supplier list	Invoke action activate supplier list		X
Preferred Supplier List : Supplier list	Invoke action upgradeversion		X
Preferred Supplier List : Supplier list	Invoke action copy		X
Preferred Supplier List : Supplier list	Invoke action deletepreferredsupplierlist		X
Preferred Supplier List : Proposed supplier for supplier list	Get related supplier list tp	X	
Preferred Supplier List : Proposed supplier for supplier list	Get entities from related suplr list proposed supplier tp	X	
Preferred Supplier List : Proposed supplier for supplier list	Get entities from suplr list prpsd business partner	X	
Preferred Supplier List : Proposed supplier for supplier list	Invoke action proposetoadd supplier		X
Preferred Supplier List : Proposed supplier for supplier list	Invoke action proposetodelete supplier		X
Preferred Supplier List : Proposed supplier for supplier list	Get entity from suplr list prpsd business partner by key	X	
Preferred Supplier List : Proposed supplier for supplier list	Invoke action approve		X
Preferred Supplier List : Proposed supplier for supplier list	Invoke action delete proposed supplier		X
Preferred Supplier List : Proposed supplier for supplier list	Invoke action reject		X
Preferred Supplier List : Supplier list purchasing organization	Get related supplier list tp	X	
Preferred Supplier List : Supplier list purchasing organization	Get entities from related suplr list purg organization tp	X	
Preferred Supplier List : Supplier list purchasing organization	Get entities from suplrlstpurchasingorganization	X	
Preferred Supplier List : Supplier list purchasing organization	Get entity from suplrlstpurchasingorganization by key	X	
Preferred Supplier List : Business partner for supplier list	Get entities from related suplr list business partner tp	X	
Preferred Supplier List : Business partner for supplier list	Add new entity to related suplr list business partner tp		X
Preferred Supplier List : Business partner for supplier list	Get related supplier list tp	X	
Preferred Supplier List : Business partner for supplier list	Get entities from supplier list business partner	X	
Preferred Supplier List : Business partner for supplier list	Invoke action add supplier		X
Preferred Supplier List : Business partner for supplier list	Get entity from supplier list business partner by key	X	
Preferred Supplier List : Business partner for supplier list	Update entity in supplier list business partner		X
Preferred Supplier List : Business partner for supplier list	Invoke action setbusinesspartnertodeleted		X
Preferred Supplier List : Supplier list purchasing category	Get entities from related suplr list purg category tp	X	
Preferred Supplier List : Supplier list purchasing category	Add new entity to related suplr list purg category tp		X
Preferred Supplier List : Supplier list purchasing category	Get related supplier list tp	X	
Preferred Supplier List : Supplier list purchasing category	Get entities from supplier list purchasing category	X	
Preferred Supplier List : Supplier list purchasing category	Get entity from supplier list purchasing category by key	X	
Preferred Supplier List : Supplier list purchasing category	Update entity in supplier list purchasing category		X
Preferred Supplier List : Supplier list purchasing category	Delete entity from supplier list purchasing category		X
Preferred Supplier List : Company code for supplier list	Get entities from related supplier list company code tp	X	
Preferred Supplier List : Company code for supplier list	Add new entity to related supplier list company code tp		X
Preferred Supplier List : Company code for supplier list	Get related supplier list tp	X	
Preferred Supplier List : Company code for supplier list	Get entities from supplier list company code	X	
Preferred Supplier List : Company code for supplier list	Get entity from supplier list company code by key	X	
Preferred Supplier List : Company code for supplier list	Delete entity from supplier list company code		X
Preferred Supplier List : Material group for supplier list	Get entities from related supplier list material group tp	X	
Preferred Supplier List : Material group for supplier list	Add new entity to related supplier list material group tp		X
Preferred Supplier List : Material group for supplier list	Get related supplier list tp	X	
Preferred Supplier List : Material group for supplier list	Get entities from supplier list material group	X	
Preferred Supplier List : Material group for supplier list	Get entity from supplier list material group by key	X	
Preferred Supplier List : Material group for supplier list	Delete entity from supplier list material group		X
Preferred Supplier List : Batch requests	Send a group of requests		X
Price Simulation - Read : Purg document pricing simulation	Get entities from purchasing document	X	
Price Simulation - Read : Purg document pricing simulation	Get entity from purchasing document by key	X	
Price Simulation - Read : Purg document pricing simulation	Invoke action simulate pricing		X
Price Simulation - Read : Batch requests	Send a group of requests		X
Procurement Project : Procurement project	Get entities from procurement project	X	
Procurement Project : Procurement project	Add new entity to procurement project		X
Procurement Project : Procurement project	Get entity from procurement project by key	X	
Procurement Project : Procurement project	Update entity in procurement project		X
Procurement Project : Procurement project	Delete entity from procurement project		X
Procurement Project : Procurement project	Invoke action deactivateprocurementproject		X
Procurement Project : Procurement project	Invoke action activate procurement project		X
Procurement Project : Plant	Get entities from related procurement project plant	X	
Procurement Project : Plant	Add new entity to related procurement project plant		X
Procurement Project : Plant	Get related procurement project	X	
Procurement Project : Plant	Get entities from procurement project plant	X	
Procurement Project : Plant	Get entity from procurement project plant by key	X	
Procurement Project : Plant	Update entity in procurement project plant		X
Procurement Project : Plant	Delete entity from procurement project plant		X
Procurement Project : Batch requests	Send a group of requests		X
Product : Product sales delivery sales tax	Get entities from prod sales delivery sales tax	X	
Product : Product sales delivery sales tax	Get entity from prod sales delivery sales tax by key	X	
Product : Product sales delivery sales tax	Update entity in prod sales delivery sales tax		X
Product : Product	Get related product	X	
Product : Product	Get entities from product	X	
Product : Product	Add new entity to product		X

Product : Product	Get entity from product by key	X	
Product : Product	Update entity in product		X
Product : Product sales delivery	Get related product sales delivery	X	
Product : Product sales delivery	Get entities from related prod sales delivery sales tax	X	
Product : Product sales delivery	Add new entity to related prod sales delivery sales tax		X
Product : Product sales delivery	Get entities from related product sales delivery	X	
Product : Product sales delivery	Add new entity to related product sales delivery		X
Product : Product sales delivery	Get related product	X	
Product : Product sales delivery	Get entities from product sales delivery	X	
Product : Product sales delivery	Get entity from product sales delivery by key	X	
Product : Product sales delivery	Update entity in product sales delivery		X
Product : Product change master	Get entities from related product change master	X	
Product : Product change master	Add new entity to related product change master		X
Product : Product change master	Get related product	X	
Product : Product change master	Get entities from product change master	X	
Product : Product change master	Get entity from product change master by key	X	
Product : Product description	Get entities from related product description	X	
Product : Product description	Add new entity to related product description		X
Product : Product description	Get related product	X	
Product : Product description	Get entities from product description	X	
Product : Product description	Get entity from product description by key	X	
Product : Product description	Update entity in product description		X
Product : Product description	Delete entity from product description		X
Product : Product ewm warehouse	Get entities from related product ewm warehouse	X	
Product : Product ewm warehouse	Add new entity to related product ewm warehouse		X
Product : Product ewm warehouse	Get related product	X	
Product : Product ewm warehouse	Get entities from product ewm warehouse	X	
Product : Product ewm warehouse	Get entity from product ewm warehouse by key	X	
Product : Product ewm warehouse	Update entity in product ewm warehouse		X
Product : Product plant	Get entities from related product plant	X	
Product : Product plant	Add new entity to related product plant		X
Product : Product plant	Get related product	X	
Product : Product plant	Get entities from product plant	X	
Product : Product plant	Get entity from product plant by key	X	
Product : Product plant	Update entity in product plant		X
Product : Product procurement	Get related product procurement	X	
Product : Product procurement	Get related product	X	
Product : Product procurement	Get entities from product procurement	X	
Product : Product procurement	Get entity from product procurement by key	X	
Product : Product procurement	Update entity in product procurement		X
Product : Product quality management	Get related product quality management	X	
Product : Product quality management	Get related product	X	
Product : Product quality management	Get entities from product quality management	X	
Product : Product quality management	Get entity from product quality management by key	X	
Product : Product quality management	Update entity in product quality management		X
Product : Product sales	Get related product sales	X	
Product : Product sales	Get related product	X	
Product : Product sales	Get entities from product sales	X	
Product : Product sales	Get entity from product sales by key	X	
Product : Product sales	Update entity in product sales		X
Product : Product storage	Get related product storage	X	
Product : Product storage	Get related product	X	
Product : Product storage	Get entities from product storage	X	
Product : Product storage	Get entity from product storage by key	X	
Product : Product storage	Update entity in product storage		X
Product : Product unit of measure	Get entities from related productunitofmeasure	X	
Product : Product unit of measure	Add new entity to related productunitofmeasure		X
Product : Product unit of measure	Get related product	X	
Product : Product unit of measure	Get entities from productunitofmeasure	X	
Product : Product unit of measure	Get entity from productunitofmeasure by key	X	
Product : Product unit of measure	Update entity in productunitofmeasure		X
Product : Product unit of measure	Delete entity from productunitofmeasure		X
Product : Product valuation	Get entities from related product valuation	X	
Product : Product valuation	Add new entity to related product valuation		X
Product : Product valuation	Get related product	X	
Product : Product valuation	Get entities from product valuation	X	
Product : Product valuation	Get entity from product valuation by key	X	
Product : Product valuation	Update entity in product valuation		X
Product : Product ewm storage type	Get related product	X	
Product : Product ewm storage type	Get related product ewm warehouse	X	
Product : Product ewm storage type	Get entities from related product ewm storage type	X	
Product : Product ewm storage type	Add new entity to related product ewm storage type		X
Product : Product ewm storage type	Get entities from product ewm storage type	X	
Product : Product ewm storage type	Get entity from product ewm storage type by key	X	
Product : Product ewm storage type	Update entity in product ewm storage type		X
Product : Product ewm storage type	Delete entity from product ewm storage type		X
Product : Product plant international trade	Get related product	X	

Product : Product plant international trade	Get related prod plant international trade	X	
Product : Product plant international trade	Get related product plant	X	
Product : Product plant international trade	Get entities from product plant international trade	X	
Product : Product plant international trade	Get entity from product plant international trade by key	X	
Product : Product plant international trade	Update entity in product plant international trade		X
Product : Product plant costing	Get related product	X	
Product : Product plant costing	Get related product plant costing	X	
Product : Product plant costing	Get related product plant	X	
Product : Product plant costing	Get entities from product plant costing	X	
Product : Product plant costing	Get entity from product plant costing by key	X	
Product : Product plant costing	Update entity in product plant costing		X
Product : Product plant forecast	Get related product	X	
Product : Product plant forecast	Get related product plant forecast	X	
Product : Product plant forecast	Get related product plant	X	
Product : Product plant forecast	Get entities from product plant forecast	X	
Product : Product plant forecast	Get entity from product plant forecast by key	X	
Product : Product plant forecast	Update entity in product plant forecast		X
Product : Inspection type settings	Get related product	X	
Product : Inspection type settings	Get entities from related productplantinsptypesetting	X	
Product : Inspection type settings	Add new entity to related productplantinsptypesetting		X
Product : Inspection type settings	Get related product plant	X	
Product : Inspection type settings	Get entities from productplantinsptypesetting	X	
Product : Inspection type settings	Get entity from productplantinsptypesetting by key	X	
Product : Inspection type settings	Update entity in productplantinsptypesetting		X
Product : Product plant mrp	Get related product	X	
Product : Product plant mrp	Get entities from related product plant mrp	X	
Product : Product plant mrp	Add new entity to related product plant mrp		X
Product : Product plant mrp	Get related product plant	X	
Product : Product plant mrp	Get entities from product plant mrp	X	
Product : Product plant mrp	Get entity from product plant mrp by key	X	
Product : Product plant mrp	Update entity in product plant mrp		X
Product : Product plant procurement	Get related product	X	
Product : Product plant procurement	Get related product plant procurement	X	
Product : Product plant procurement	Get related product plant	X	
Product : Product plant procurement	Get entities from product plant procurement	X	
Product : Product plant procurement	Get entity from product plant procurement by key	X

Task Planning Element : Task planning element	Invoke action blockinstallation		X
Task Planning Element : Task planning element	Invoke action unlockfordesignassignment		X
Task Planning Element : Task planning element bom item	Get entities from related tskplngelmntbomitem	X	
Task Planning Element : Task planning element bom item	Add new entity to related tskplngelmntbomitem		X
Task Planning Element : Task planning element bom item	Get related task planning element	X	
Task Planning Element : Task planning element bom item	Get entities from tskplngelmntbomitem	X	
Task Planning Element : Task planning element bom item	Get entity from tskplngelmntbomitem by key	X	
Task Planning Element : Batch requests	Send a group of requests		X
Time Dependent Stock Levels : Stock level details	Get entities from a prodtimedepdntstocklvl	X	
Time Dependent Stock Levels : Stock level details	Add new entity to a prodtimedepdntstocklvl		X
Time Dependent Stock Levels : Stock level details	Invoke action insertandadjuststklvlinterval		X
Time Dependent Stock Levels : Stock level details	Invoke action splitstocklevelinterval		X
Time Dependent Stock Levels : Stock level details	Get entity from a prodtimedepdntstocklvl by key	X	
Time Dependent Stock Levels : Stock level details	Update entity in a prodtimedepdntstocklvl		X
Time Dependent Stock Levels : Batch requests	Send a group of requests		X
Toxicological Information : Acute dermal toxicity assessment	Get entities from pctxacutedermaltoxtyassmt	X	
Toxicological Information : Acute dermal toxicity assessment	Get entity from pctxacutedermaltoxtyassmt by key	X	
Toxicological Information : Toxicological iNFormation	Get related pctxproperty	X	
Toxicological Information : Toxicological iNFormation	Get entities from related acutedermaltoxtyassmt	X	
Toxicological Information : Toxicological iNFormation	Get entities from toxicological property	X	
Toxicological Information : Toxicological iNFormation	Invoke action create and release version		X
Toxicological Information : Toxicological iNFormation	Get entity from toxicological property by key	X	
Toxicological Information : Acute dermal toxicity study	Get related pctxproperty	X	
Toxicological Information : Acute dermal toxicity study	Get entities from related acutedermaltoxtystudy	X	
Toxicological Information : Acute dermal toxicity study	Get entities from pctxacutedermaltoxtystudy	X	
Toxicological Information : Acute dermal toxicity study	Get entity from pctxacutedermaltoxtystudy by key	X	
Toxicological Information : Acute inhalation toxicity assessment	Get related pctxproperty	X	
Toxicological Information : Acute inhalation toxicity assessment	Get entities from related acuteinhltntoxtyassmt	X	
Toxicological Information : Acute inhalation toxicity assessment	Get entities from pctxacuteinhltntoxtyassmt	X	
Toxicological Information : Acute inhalation toxicity assessment	Get entity from pctxacuteinhltntoxtyassmt by key	X	
Toxicological Information : Acute inhalation toxicity study	Get related pctxproperty	X	
Toxicological Information : Acute inhalation toxicity study	Get entities from related acuteinhltntoxtystudy	X	
Toxicological Information : Acute inhalation toxicity study	Get entities from pctxacuteinhltntoxtystudy	X	
Toxicological Information : Acute inhalation toxicity study	Get entity from pctxacuteinhltntoxtystudy by key	X	
Toxicological Information : Acute oral toxicity assessment	Get related pctxproperty	X	
Toxicological Information : Acute oral toxicity assessment	Get entities from related acuteoraltoxtyassmt	X	
Toxicological Information : Acute oral toxicity assessment	Get entities from pctxacuteoraltoxtyassmt	X	
Toxicological Information : Acute oral toxicity assessment	Get entity from pctxacuteoraltoxtyassmt by key	X	
Toxicological Information : Acute oral toxicity study	Get related pctxproperty	X	
Toxicological Information : Acute oral toxicity study	Get entities from related acuteoraltoxtystudy	X	
Toxicological Information : Acute oral toxicity study	Get entities from pctxacuteoraltoxtystudy	X	
Toxicological Information : Acute oral toxicity study	Get entity from pctxacuteoraltoxtystudy by key	X	
Toxicological Information : Aspiration toxicity assessment	Get related pctxproperty	X	
Toxicological Information : Aspiration toxicity assessment	Get entities from related aspirationtoxtyassmt	X	
Toxicological Information : Aspiration toxicity assessment	Get entities from pctxaspirationtoxtyassmt	X	
Toxicological Information : Aspiration toxicity assessment	Get entity from pctxaspirationtoxtyassmt by key	X	
Toxicological Information : Carcinogenicity assessment	Get related pctxproperty	X	
Toxicological Information : Carcinogenicity assessment	Get entities from related crcngnctyassmt	X	
Toxicological Information : Carcinogenicity assessment	Get entities from pctxcrcngnctyassmt	X	
Toxicological Information : Carcinogenicity assessment	Get entity from pctxcrcngnctyassmt by key	X	
Toxicological Information : Carcinogenicity study	Get related pctxproperty	X	
Toxicological Information : Carcinogenicity study	Get entities from related crcngnctystudy	X	
Toxicological Information : Carcinogenicity study	Get entities from pctxcrcngnctystudy	X	
Toxicological Information : Carcinogenicity study	Get entity from pctxcrcngnctystudy by key	X	
Toxicological Information : Eye irritation assessment	Get related pctxproperty	X	
Toxicological Information : Eye irritation assessment	Get entities from related eye irritation assmt	X	

Toxicological Information : Eye irritation assessment	Get entities from pctxeyeirritationassmt	X	
Toxicological Information : Eye irritation assessment	Get entity from pctxeyeirritationassmt by key	X	
Toxicological Information : Eye irritation study	Get related pctxproperty	X	
Toxicological Information : Eye irritation study	Get entities from related eye irritation study	X	
Toxicological Information : Eye irritation study	Get entities from pctxeyeirritationstudy	X	
Toxicological Information : Eye irritation study	Get entity from pctxeyeirritationstudy by key	X	
Toxicological Information : Genetic toxicity - in vitro study	Get related pctxproperty	X	
Toxicological Information : Genetic toxicity - in vitro study	Get entities from related gentcvitrostudy	X	
Toxicological Information : Genetic toxicity - in vitro study	Get entities from pctxgentcvitrostudy	X	
Toxicological Information : Genetic toxicity - in vitro study	Get entity from pctxgentcvitrostudy by key	X	
Toxicological Information : Genetic toxicity - in vivo study	Get related pctxproperty	X	
Toxicological Information : Genetic toxicity - in vivo study	Get entities from related gentcvivostudy	X	
Toxicological Information : Genetic toxicity - in vivo study	Get entities from pctxgentcvivostudy	X	
Toxicological Information : Genetic toxicity - in vivo study	Get entity from pctxgentcvivostudy by key	X	
Toxicological Information : Experiences with human exposure	Get related pctxproperty	X	
Toxicological Information : Experiences with human exposure	Get entities from related human exposure	X	
Toxicological Information : Experiences with human exposure	Get entities from pctxhumanexposure	X	
Toxicological Information : Experiences with human exposure	Get entity from pctxhumanexposure by key	X	
Toxicological Information : Mutagenicity assessment	Get related pctxproperty	X	
Toxicological Information : Mutagenicity assessment	Get entities from related mutagenicity assmt	X	
Toxicological Information : Mutagenicity assessment	Get entities from pctxmtgnctyassmt	X	
Toxicological Information : Mutagenicity assessment	Get entity from pctxmtgnctyassmt by key	X	
Toxicological Information : Neurological effects	Get related pctxproperty	X	
Toxicological Information : Neurological effects	Get entities from related neurologicaleffect	X	
Toxicological Information : Neurological effects	Get entities from pctxneurologicaleffect	X	
Toxicological Information : Neurological effects	Get entity from pctxneurologicaleffect by key	X	
Toxicological Information : Other health hazards	Get related pctxproperty	X	
Toxicological Information : Other health hazards	Get entities from related other health hazard	X	
Toxicological Information : Other health hazards	Get entities from pctxotherhealthhazard	X	
Toxicological Information : Other health hazards	Get entity from pctxotherhealthhazard by key	X	
Toxicological Information : Other relevant toxicity iNFormation	Get related pctxproperty	X	
Toxicological Information : Other relevant toxicity iNFormation	Get entities from related other relevant info	X	
Toxicological Information : Other relevant toxicity iNFormation	Get entities from pctxotherrelevantinfo	X	
Toxicological Information : Other relevant toxicity iNFormation	Get entity from pctxotherrelevantinfo by key	X	
Toxicological Information : Repeated dose toxicity study	Get related pctxproperty	X	
Toxicological Information : Repeated dose toxicity study	Get entities from related repTDdosetoxtystudy	X	
Toxicological Information : Repeated dose toxicity study	Get entities from pctxrepTDdosetoxtystudy	X	
Toxicological Information : Repeated dose toxicity study	Get entity from pctxrepTDdosetoxtystudy by key	X	
Toxicological Information : Respiratory sensitization assessment	Get related pctxproperty	X	
Toxicological Information : Respiratory sensitization assessment	Get entities from related respiratorysenstnassmt	X	
Toxicological Information : Respiratory sensitization assessment	Get entities from pctxrespiratorysenstnassmt	X	
Toxicological Information : Respiratory sensitization assessment	Get entity from pctxrespiratorysenstnassmt by key	X	
Toxicological Information : Reproductive toxicity - developmental assessm	Get related pctxproperty	X	
Toxicological Information : Reproductive toxicity - developmental assessm	Get entities from related rprdvdevassmt	X	
Toxicological Information : Reproductive toxicity - developmental assessm	Get entities from pctxrprdvdevassmt	X	
Toxicological Information : Reproductive toxicity - developmental assessm	Get entity from pctxrprdvdevassmt by key	X	
Toxicological Information : Reproductive toxicity - development and teratog	Get related pctxproperty	X	
Toxicological Information : Reproductive toxicity - development and teratog	Get entities from related rprdvdevstudy	X	
Toxicological Information : Reproductive toxicity - development and teratog	Get entities from pctxrprdvdevstudy	X	
Toxicological Information : Reproductive toxicity - development and teratog	Get entity from pctxrprdvdevstudy by key	X	
Toxicological Information : Reproductive toxicity fertility assessment	Get related pctxproperty	X	
Toxicological Information : Reproductive toxicity fertility assessment	Get entities from related rprdvfrtltyassmt	X	
Toxicological Information : Reproductive toxicity fertility assessment	Get entities from pctxrprdvfrtltyassmt	X	
Toxicological Information : Reproductive toxicity fertility assessment	Get entity from pctxrprdvfrtltyassmt by key	X	
Toxicological Information : Reproductive toxicity fertility study	Get related pctxproperty	X	
Toxicological Information : Reproductive toxicity fertility study	Get entities from related rprdvfrtltystudy	X	
Toxicological Information : Reproductive toxicity fertility study	Get entities from pctxrprdvfrtltystudy	X	
Toxicological Information : Reproductive toxicity fertility study	Get entity from pctxrprdvfrtltystudy by key	X	
Toxicological Information : Reproductive toxicity - lactation assessment	Get related pctxproperty	X	
Toxicological Information : Reproductive toxicity - lactation assessment	Get entities from related rprdvlactnassmt	X	
Toxicological Information : Reproductive toxicity - lactation assessment	Get entities from pctxrprdvlactnassmt	X	
Toxicological Information : Reproductive toxicity - lactation assessment	Get entity from pctxrprdvlactnassmt by key	X	
Toxicological Information : Sensitization study	Get related pctxproperty	X	
Toxicological Information : Sensitization study	Get entities from related sensitization study	X	
Toxicological Information : Sensitization study	Get entities from pctxsensitizationstudy	X	
Toxicological Information : Sensitization study	Get entity from pctxsensitizationstudy by key	X	
Toxicological Information : Skin irritation assessment	Get related pctxproperty	X	
Toxicological Information : Skin irritation assessment	Get entities from related skin irritation assmt	X	
Toxicological Information : Skin irritation assessment	Get entities from pctxskinirritationassmt	X	
Toxicological Information : Skin irritation assessment	Get entity from pctxskinirritationassmt by key	X	
Toxicological Information : Skin irritation study	Get related pctxproperty	X	
Toxicological Information : Skin irritation study	Get entities from related skin irritation study	X	
Toxicological Information : Skin irritation study	Get entities from pctxskinirritationstudy	X	
Toxicological Information : Skin irritation study	Get entity from pctxskinirritationstudy by key	X	
Toxicological Information : Skin sensitization assessment	Get related pctxproperty	X	
Toxicological Information : Skin sensitization assessment	Get entities from related skinsenstnassmt	X	
Toxicological Information : Skin sensitization assessment	Get entities from pctxskinsenstnassmt	X	

Toxicological Information : Skin sensitization assessment	Get entity from pctxskinsenstnassmt by key	X	
Toxicological Information : Specific risk assessment	Get related pctxproperty	X	
Toxicological Information : Specific risk assessment	Get entities from related specific risk assmt	X	
Toxicological Information : Specific risk assessment	Get entities from pctxspecificriskassmt	X	
Toxicological Information : Specific risk assessment	Get entity from pctxspecificriskassmt by key	X	
Toxicological Information : Stot repeated exposure assessment	Get related pctxproperty	X	
Toxicological Information : Stot repeated exposure assessment	Get entities from related stotrepTDexpsrassmt	X	
Toxicological Information : Stot repeated exposure assessment	Get entities from pctxstotrepTDexpsrassmt	X	
Toxicological Information : Stot repeated exposure assessment	Get entity from pctxstotrepTDexpsrassmt by key	X	
Toxicological Information : Stot single exposure assessment	Get related pctxproperty	X	
Toxicological Information : Stot single exposure assessment	Get entities from related stotsingleexpsrassmt	X	
Toxicological Information : Stot single exposure assessment	Get entities from pctxstotsingleexpsrassmt	X	
Toxicological Information : Stot single exposure assessment	Get entity from pctxstotsingleexpsrassmt by key	X	
Toxicological Information : Batch requests	Send a group of requests		X
Transport System : Ts disallowed material sequence	Get entities from disallowedmaterials	X	
Transport System : Ts disallowed material sequence	Get entity from disallowedmaterials by key	X	
Transport System : Ts disallowed material sequence	Update entity in disallowedmaterials		X
Transport System : Ts disallowed material sequence	Delete entity from disallowedmaterials		X
Transport System : Transport system	Get related transport system	X	
Transport System : Transport system	Get entities from related transptsysTDsblmatl	X	
Transport System : Transport system	Add new entity to related transptsysTDsblmatl		X
Transport System : Transport system	Get entities from transport system	X	
Transport System : Transport system	Add new entity to transport system		X
Transport System : Transport system	Get entity from transport system by key	X	
Transport System : Transport system	Update entity in transport system		X
Transport System : Transport system	Invoke action create partner		X
Transport System : Transport system	Invoke action setitemtonoTDeleted		X
Transport System : Transport system	Invoke action setitemtodeleted		X
Transport System : Transport syst location assignment	Get related transport system	X	
Transport System : Transport syst location assignment	Get entities from related transptsystlocassgmt	X	
Transport System : Transport syst location assignment	Add new entity to related transptsystlocassgmt		X
Transport System : Transport syst location assignment	Get entities from location assignment	X	
Transport System : Transport syst location assignment	Get entity from location assignment by key	X	
Transport System : Transport syst location assignment	Update entity in location assignment		X
Transport System : Transport syst location assignment	Delete entity from location assignment		X
Transport System : Transport syst location assignment	Invoke action create partner		X
Transport System : Planning material	Get related transport system	X	
Transport System : Planning material	Get entities from related transptsystplngmatl	X	
Transport System : Planning material	Add new entity to related transptsystplngmatl		X
Transport System : Planning material	Get entities from planned materials	X	
Transport System : Planning material	Get entity from planned materials by key	X	
Transport System : Planning material	Update entity in planned materials		X
Transport System : Planning material	Delete entity from planned materials		X
Transport System : Transport mode	Get related transport system	X	
Transport System : Transport mode	Get entities from related transptsysttransptmode	X	
Transport System : Transport mode	Add new entity to related transptsysttransptmode		X
Transport System : Transport mode	Get entities from transport mode	X	
Transport System : Transport mode	Get entity from transport mode by key	X	
Transport System : Transport mode	Delete entity from transport mode		X
Transport System : Batch requests	Send a group of requests		X
Treasury Trade Request - Read Create : Treasury trade request	Get entities from treasury trade request	X	
Treasury Trade Request - Read Create : Treasury trade request	Add new entity to treasury trade request		X
Treasury Trade Request - Read Create : Treasury trade request	Get entity from treasury trade request by key	X	
Treasury Trade Request - Read Create : Treasury trade request action his	Get entities from related action history	X	
Treasury Trade Request - Read Create : Treasury trade request action his	Get related trade request	X	
Treasury Trade Request - Read Create : Treasury trade request action his	Get entities from trsytrdrequestactionhistory	X	
Treasury Trade Request - Read Create : Treasury trade request action his	Get entity from trsytrdrequestactionhistory by key	X	
Treasury Trade Request - Read Create : Trsy trade request additional attri	Get related additionalattributes	X	
Treasury Trade Request - Read Create : Trsy trade request additional attri	Get related trade request	X	
Treasury Trade Request - Read Create : Trsy trade request additional attri	Get entities from trsytrdreqaddlattributes	X	
Treasury Trade Request - Read Create : Trsy trade request additional attri	Get entity from trsytrdreqaddlattributes by key	X	
Treasury Trade Request - Read Create : Trsy trade request financial trans	Get entities from related financial trans action	X	
Treasury Trade Request - Read Create : Trsy trade request financial trans	Get related trade request	X	
Treasury Trade Request - Read Create : Trsy trade request financial trans	Get entities from trsytrdreqfinancialtransaction	X	
Treasury Trade Request - Read Create : Trsy trade request financial trans	Get entity from trsytrdreqfinancialtransaction by key	X	
Treasury Trade Request - Read Create : Treasury trade request total amo	Get related total amount	X	
Treasury Trade Request - Read Create : Treasury trade request total amo	Get entities from trsy trade request total amounts	X	
Treasury Trade Request - Read Create : Treasury trade request total amo	Get entity from trsy trade request total amounts by key	X	
Treasury Trade Request - Read Create : Batch requests	Send a group of requests		X
Trip Cost Optimizer Interface : Delivery zone	Get entities from delivery zone	X	
Trip Cost Optimizer Interface : Delivery zone	Get entity from delivery zone by key	X	
Trip Cost Optimizer Interface : Delivery zone	Get entities from related sub delivery zone	X	
Trip Cost Optimizer Interface : Delivery zone	Get related superdeliveryzone	X	
Trip Cost Optimizer Interface : Delivery zone	Get related topdeliveryzone	X	
Trip Cost Optimizer Interface : Delivery zone group	Get related delivery zone group	X	
Trip Cost Optimizer Interface : Delivery zone group	Get entities from related delivery zone	X	
Trip Cost Optimizer Interface : Delivery zone group	Get entities from delivery zone group	X	

Trip Cost Optimizer Interface : Delivery zone group	Get entity from delivery zone group by key	X	
Trip Cost Optimizer Interface : Assign delivery zone to plant	Get entities from related plant	X	
Trip Cost Optimizer Interface : Assign delivery zone to plant	Get related delivery zone	X	
Trip Cost Optimizer Interface : Assign delivery zone to plant	Get entities from plant delivery zone assignment	X	
Trip Cost Optimizer Interface : Assign delivery zone to plant	Get entity from plant delivery zone assignment by key	X	
Trip Cost Optimizer Interface : Unloading document	Get entities from related unloading document	X	
Trip Cost Optimizer Interface : Unloading document	Get related delivery zone	X	
Trip Cost Optimizer Interface : Unloading document	Get entities from unloading document	X	
Trip Cost Optimizer Interface : Unloading document	Get entity from unloading document by key	X	
Trip Cost Optimizer Interface : Assign delivery zone to vehicle depot	Get entities from related vehicle depot	X	
Trip Cost Optimizer Interface : Assign delivery zone to vehicle depot	Get related delivery zone	X	
Trip Cost Optimizer Interface : Assign delivery zone to vehicle depot	Get entities from vehicledepoTDlvznassignment	X	
Trip Cost Optimizer Interface : Assign delivery zone to vehicle depot	Get entity from vehicledepoTDlvznassignment by key	X	
Trip Cost Optimizer Interface : Driver	Get entities from driver	X	
Trip Cost Optimizer Interface : Driver	Get entity from driver by key	X	
Trip Cost Optimizer Interface : Assign trnsport unit equipment to driver	Get entities from related default transport unit equipment	X	
Trip Cost Optimizer Interface : Assign trnsport unit equipment to driver	Get related driver	X	
Trip Cost Optimizer Interface : Assign trnsport unit equipment to driver	Get entities from drivertuequipmentassignment	X	
Trip Cost Optimizer Interface : Assign trnsport unit equipment to driver	Get entity from drivertuequipmentassignment by key	X	
Trip Cost Optimizer Interface : Assign transport unit to driver	Get entities from related transport unit	X	
Trip Cost Optimizer Interface : Assign transport unit to driver	Get related driver	X	
Trip Cost Optimizer Interface : Assign transport unit to driver	Get entities from driver transport unit assignment	X	
Trip Cost Optimizer Interface : Assign transport unit to driver	Get entity from driver transport unit assignment by key	X	
Trip Cost Optimizer Interface : Assign driver to vehicle depot	Get entities from related vehicle depot	X	
Trip Cost Optimizer Interface : Assign driver to vehicle depot	Get related driver	X	
Trip Cost Optimizer Interface : Assign driver to vehicle depot	Get entities from vehicle depot driver assignment	X	
Trip Cost Optimizer Interface : Assign driver to vehicle depot	Get entity from vehicle depot driver assignment by key	X	
Trip Cost Optimizer Interface : Transport unit	Get related transport unit	X	
Trip Cost Optimizer Interface : Transport unit	Get entities from related default driver equipment	X	
Trip Cost Optimizer Interface : Transport unit	Get related transport unit	X	
Trip Cost Optimizer Interface : Transport unit	Get entities from related driver	X	
Trip Cost Optimizer Interface : Transport unit	Get entities from transport unit	X	
Trip Cost Optimizer Interface : Transport unit	Get entity from transport unit by key	X	
Trip Cost Optimizer Interface : Equipment	Get related equipment	X	
Trip Cost Optimizer Interface : Equipment	Get entities from related default driver transport unit	X	
Trip Cost Optimizer Interface : Equipment	Get entities from equipment	X	
Trip Cost Optimizer Interface : Equipment	Get entity from equipment by key	X	
Trip Cost Optimizer Interface : Assign equipment to transport unit	Get entities from related default equipment	X	
Trip Cost Optimizer Interface : Assign equipment to transport unit	Get related transport unit	X	
Trip Cost Optimizer Interface : Assign equipment to transport unit	Get entities from related default transport unit	X	
Trip Cost Optimizer Interface : Assign equipment to transport unit	Get related equipment	X	
Trip Cost Optimizer Interface : Assign equipment to transport unit	Get entities from tudefaultequipmentassignment	X	
Trip Cost Optimizer Interface : Assign equipment to transport unit	Get entity from tudefaultequipmentassignment by key	X	
Trip Cost Optimizer Interface : Assign equipment to vehicle depot	Get entities from related vehicle depot	X	
Trip Cost Optimizer Interface : Assign equipment to vehicle depot	Get related equipment	X	
Trip Cost Optimizer Interface : Assign equipment to vehicle depot	Get entities from vehicledepotequipmntassignment	X	
Trip Cost Optimizer Interface : Assign equipment to vehicle depot	Get entity from vehicledepotequipmntassignment by key	X	
Trip Cost Optimizer Interface : Loading document	Get entities from loading document	X	
Trip Cost Optimizer Interface : Loading document	Get entity from loading document by key	X	
Trip Cost Optimizer Interface : Plant	Get entities from related delivery zone	X	
Trip Cost Optimizer Interface : Plant	Get related plant	X	
Trip Cost Optimizer Interface : Plant	Get related plant	X	
Trip Cost Optimizer Interface : Plant	Get entities from plant	X	
Trip Cost Optimizer Interface : Plant	Get entity from plant by key	X	
Trip Cost Optimizer Interface : Transport unit compartment	Get entities from related compartment	X	
Trip Cost Optimizer Interface : Transport unit compartment	Get related transport unit	X	
Trip Cost Optimizer Interface : Transport unit compartment	Get entities from transport unit compartment	X	
Trip Cost Optimizer Interface : Transport unit compartment	Get entity from transport unit compartment by key	X	
Trip Cost Optimizer Interface : Assign transport unit to vehicle depot	Get entities from related vehicle depot	X	
Trip Cost Optimizer Interface : Assign transport unit to vehicle depot	Get related transport unit	X	
Trip Cost Optimizer Interface : Assign transport unit to vehicle depot	Get entities from vehicledepottuassignment	X	
Trip Cost Optimizer Interface : Assign transport unit to vehicle depot	Get entity from vehicledepottuassignment by key	X	
Trip Cost Optimizer Interface : Trip	Get related driver	X	
Trip Cost Optimizer Interface : Trip	Get entities from trip	X	
Trip Cost Optimizer Interface : Trip	Invoke action create trip		X
Trip Cost Optimizer Interface : Trip	Get entity from trip by key	X	
Trip Cost Optimizer Interface : Trip	Invoke action delete trip		X
Trip Cost Optimizer Interface : Trip	Invoke action release trip		X
Trip Cost Optimizer Interface : Trip	Invoke action check trip	X	
Trip Cost Optimizer Interface : Vehicle depot	Get entities from related delivery zone	X	
Trip Cost Optimizer Interface : Vehicle depot	Get related vehicle depot	X	
Trip Cost Optimizer Interface : Vehicle depot	Get entities from related driver	X	
Trip Cost Optimizer Interface : Vehicle depot	Get related vehicle depot	X	
Trip Cost Optimizer Interface : Vehicle depot	Get entities from related equipment	X	
Trip Cost Optimizer Interface : Vehicle depot	Get related vehicle depot	X	
Trip Cost Optimizer Interface : Vehicle depot	Get entities from related transport unit	X	
Trip Cost Optimizer Interface : Vehicle depot	Get related vehicle depot	X	

Trip Cost Optimizer Interface : Vehicle depot	Get entities from vehicle depot	X	
Trip Cost Optimizer Interface : Vehicle depot	Get entity from vehicle depot by key	X	
Trip Cost Optimizer Interface : Batch requests	Send a group of requests		X
Utilities Communication Messages : Utilities communication message	Get entities from message	X	
Utilities Communication Messages : Utilities communication message	Add new entity to message		X
Utilities Communication Messages : Utilities communication message	Get entity from message by key	X	
Utilities Communication Messages : Utilities communication message	Update entity in message		X
Utilities Communication Messages : Batch requests	Send a group of requests		X
Utilities Sales Contract Process (A2X) : Utilities sales contract process	Get entities from utilities sales contract process	X	
Utilities Sales Contract Process (A2X) : Utilities sales contract process	Add new entity to utilities sales contract process		X
Utilities Sales Contract Process (A2X) : Utilities sales contract process	Get entity from utilities sales contract process by key	X	
Utilities Sales Contract Process (A2X) : Utilities sales contract process	Update entity in utilities sales contract process		X
Utilities Sales Contract Process (A2X) : Utilities sales contract process	Invoke action resume process		X
Utilities Sales Contract Process (A2X) : Utilities sales contract process	Invoke action cancel process		X
Utilities Sales Contract Process (A2X) : Utilities sales contract process	Invoke action get message	X	
Utilities Sales Contract Process (A2X) : Utils sales contract process param	Get entities from related process parameter	X	
Utilities Sales Contract Process (A2X) : Utils sales contract process param	Add new entity to related process parameter		X
Utilities Sales Contract Process (A2X) : Utils sales contract process param	Get related process	X	
Utilities Sales Contract Process (A2X) : Utils sales contract process param	Get entities from utils sls contr process parameter	X	
Utilities Sales Contract Process (A2X) : Utils sales contract process param	Get entity from utils sls contr process parameter by key	X	
Utilities Sales Contract Process (A2X) : Utils sales contract process param	Update entity in utils sls contr process parameter		X
Utilities Sales Contract Process (A2X) : Batch requests	Send a group of requests		X
Utilities Sales Contract - Read (A2X) : Utilities sales contract	Get entities from utilities sales contract	X	
Utilities Sales Contract - Read (A2X) : Utilities sales contract	Get entity from utilities sales contract by key	X	
Utilities Sales Contract - Read (A2X) : Utilities sales contract item	Get entities from related utilities sales contract item	X	
Utilities Sales Contract - Read (A2X) : Utilities sales contract item	Get related utilities sales contract	X	
Utilities Sales Contract - Read (A2X) : Utilities sales contract item	Get entities from utilities sales contract item	X	
Utilities Sales Contract - Read (A2X) : Utilities sales contract item	Get entity from utilities sales contract item by key	X	
Utilities Sales Contract - Read (A2X) : Utilities sales contract period	Get entities from related utilities sales contract period	X	
Utilities Sales Contract - Read (A2X) : Utilities sales contract period	Get related utilities sales contract	X	
Utilities Sales Contract - Read (A2X) : Utilities sales contract period	Get entities from related utils sales contract period	X	
Utilities Sales Contract - Read (A2X) : Utilities sales contract period	Get entities from utilities sales contract period	X	
Utilities Sales Contract - Read (A2X) : Utilities sales contract period	Get entity from utilities sales contract period by key	X	
Utilities Sales Contract - Read (A2X) : Utilities sales contract item duration	Get related utilities sales contract	X	
Utilities Sales Contract - Read (A2X) : Utilities sales contract item duration	Get entities from related utils sls contract item duration	X	
Utilities Sales Contract - Read (A2X) : Utilities sales contract item duration	Get related utilities sales contract item	X	
Utilities Sales Contract - Read (A2X) : Utilities sales contract item duration	Get entities from utils sls contract item duration	X	
Utilities Sales Contract - Read (A2X) : Utilities sales contract item duration	Get entity from utils sls contract item duration by key	X	
Utilities Sales Contract - Read (A2X) : Utils sales contract item appointmer	Get related utilities sales contract	X	
Utilities Sales Contract - Read (A2X) : Utils sales contract item appointmer	Get entities from related utils sls contr item appointment	X	
Utilities Sales Contract - Read (A2X) : Utils sales contract item appointmer	Get related utilities sales contract item	X	
Utilities Sales Contract - Read (A2X) : Utils sales contract item appointmer	Get entities from utils sls contr item appointment	X	
Utilities Sales Contract - Read (A2X) : Utils sales contract item appointmer	Get entity from utils sls contr item appointment by key	X
